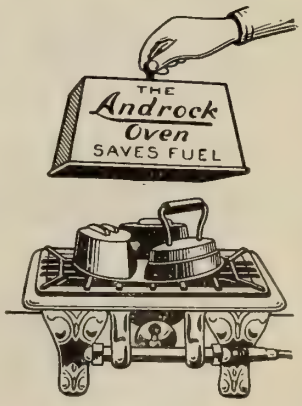
ORANGE, N. J.



The "Androck" Oven

Fills a long-felt want. Saves gas and time.

It consists of four parts: The cover, or oven proper, made of aluminized steel; the **Stand**, asbestos lined; the **Heat Distributing Plate**, to be used underneath the stand or alone for heating flatirons, and the **Androck Bread Toaster**, the finest toaster made.
One burner is all that is required to do an ordinary baking, whereas a range requires 2 or 3, and produces no better results. This means a big saving of gas and a cooler kitchen. The oven works equally well on gasoline or coal-oil stove.
Get the Androck Oven now and boost it. Every sale leads to others.

Saves Oil, Time and Labor

A trial always makes a steady user.

Easy Profit because Easily Sold

No matter in what position the can may be held, the oil is entirely controlled by the operator. Not a drop of oil need be wasted. Oil is forced out by simply pressing on the plunger. The flow of oil ceases the instant the pressure on the plunger stops.

Oiling can be done in one-half the time and with less effort.

The "Cannon" is giving satisfaction to thousands of users.

Drop a card for particulars.

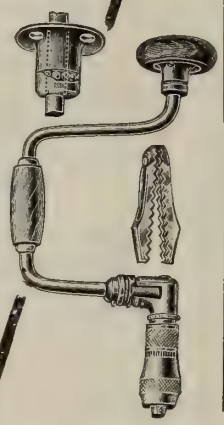
MILLERS FALLS TOOLS

When You Think of These Tools

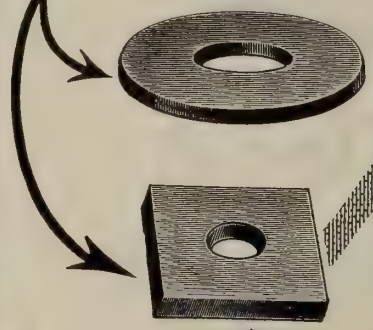


doesn't it occur to you that tools, like the Barber Braces, that have back of them the sanction of the best mechanics everywhere, are the most profitable tools for you to handle?

Barber Ratchet Brace No. 32

is one of the best of a good line—a late model of a class of tools that have always been admitted as standards of excellence.

Everything about this brace is first-class. Has ball-bearing head, non-splitting, free-acting sweep handle; covered ratchet teeth and forged steel alligator jaws. A Brace that satisfies the most critical, hence a tool you can easily and safely sell.



Stock a few, either direct or from your own jobber. Complete Dealers Catalogue on request.

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

The R. McDougall Co., Limited
GALT, CANADA

Reading Brimful of Interest for Busy Canadians

The July MacLean's, just off the press, is full of feature articles and stories which should appeal to every Canadian. Does not this list interest you?

"The Education of the Camp"—A strong article by a military authority on the benefits, physical and otherwise, of militia training.

"On the Firing Line in Riel's Day"—The first of a series of articles on the North-west Rebellion, written by one who served through the last campaign. These stories will be full of reminiscences given to the public for the first time.

"The Adventures of Madelyn Mack: Detective"—The best detective stories published since Sherlock Holmes first appeared. The first of this series appears under the title "The Man With Nine Lives"—A strong recital of adventure, written in graphic, vivid style.

"The Miracle of the X-Rays"—A clear presentation of one of the greatest discoveries of modern times. The fascination that science exerts on the lay mind will serve to make this article one of absorbing interest to all.

There is nothing a man could not do if he had the right information before starting at it. Under the heading: "Getting the Facts," a Lieutenant of Harrington Emerson, the chief exponent of efficiency, tells how the right information can always be obtained. Want to get started on the highroad to success? Read this article.

Glen Campbell—Broncho buster, sturdy man of the plains, orator, player of practical jokes, firm friend and hard fighter—is the subject of a breezy sketch that will both interest and amuse. Meet this famous Western M.P. in the pages of July MacLean's.

These are just a few. There are plenty more of the same kind to be found in the July issue of Canada's national magazine. If you don't read MacLean's, start with the July number.

Send a postcard and have your name added to our subscription list. You'll be delighted with every issue.

Subscription price $2.00 *per year.* 20 *cents a copy.*

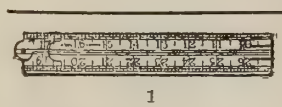
THE "WANT AD."

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

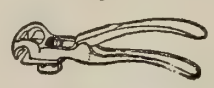
Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.



The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.



Hardware and Metal's Electro Service

AT the request of many of our readers and in order to assist Canadian hardwaremen in such a manner as to make it easy for them to use illustrations of staple hardware lines in their newspaper, circular or catalogue advertising. Hardware and Metal's editorial department has instituted a new service, viz., the supplying of electros of staple hardware lines at a reasonable price. Many merchants claim that the electros they have on hand are of such large proportions and occupy such large space that their use is almost prohibitive on account of the cost of newspaper space. By using small electros of seasonable goods the merchants will be able to feature several lines in one advertisement at a very reasonable cost. Hardware and Metal will from time to time publish seasonable advertising suggestions in which electros here shown will be used. In ordering electros be sure and order by numbers. Price of electros shown on this page is 15c each. Cash with order. Address all orders to Hardware and Metal, 143-153 University Ave., Toronto, Ont.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

a thought for manufacturers and jobbers of hardware

If nine-tenths of the hardwaremen in Canada were assembled in Massey Hall, what would you give for the privilege of standing on the platform and telling them about the merits of your proposition?

here is our offer to you:

We offer you practically this same privilege in the advertising pages of Hardware and Metal. For nine-tenths of the retail hardware dealers in all the Provinces of the Dominion are paid subscribers to Hardware and Metal. And they read it every week, because it helps them to make more money.

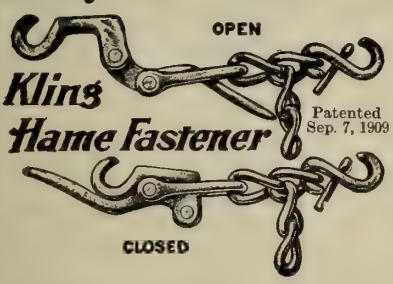
GERMANTOWN LAMP BLACK

IS THE BEST AND HAS BEEN FOR OVER SIXTY YEARS.



When we originated Germantown Lamp Black at our factory in Germantown, Philadelphia, we little realized that it would become the STANDARD of the Trade and that in order to market their Blacks every other manufacturer would have to use that name, or else make something better.

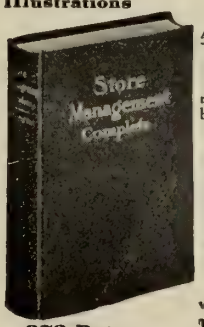
Every Horse Owner Buys at Sight



The Kling Hame Fastener holds the hames tight and uniform at all times. A child or woman can hitch up as easily as a strong man. Only takes a second to put on or take off, yet the horse can never open it or break it. Lasts longer than the harness. Costs the dealer $2.25 per doz. Any jobber. Write for circular.

Look for "Kling" on the lever.

RABONE STEEL TAPES

Builders, Architects, Surveyors and all buyers know this and order in preference to all other makes. J. Rabone & Sons were established 1784 and were the first to introduce easily read markings; their patented "Duplex Etching" system is still the best.

Steel tapes and measuring chains for all purposes, solid leather and solid nickle cases with flush "pin-thrust" handles.

Supplied by all Wholesale Hardware Jobbers. Write for Canadian Catalogue to sole representative:

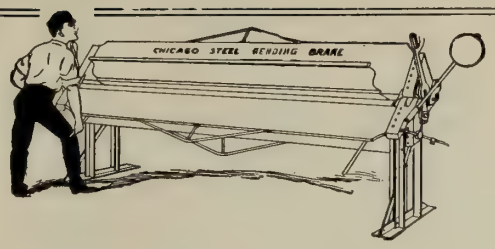
ARE YOU THE MAN AT THE HELM?

Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.



STORE MANAGEMENT COMPLETE

is a guide that will show you how to get the maximum trade and profit out of your busines. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete.") It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full-page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

CHICAGO STEEL BENDING BRAKES

(Made in 200 sizes)

If you are in the market for a Bending Brake apply to us for catalogue and price list.
There is no use trying to get along with antiquated tools.
To be successful you must be up-to-date.
The Steel Brakes do the largest variety of work with accurate results.

The Steel Bending Brake Works Ltd., Chatham, Ont.

The Most Popular Fire-Pot on the Market is Clayton & Lambert No. 1.

No. 1 Fire-Pot

The tank is made of heavy, galvanized iron, and will withstand hard usage. The burner is made of generator metal, and is swivelled, allowing the user to place it in any position desired. It gives a perfect blue flame of intense heat, using but little gasoline. The top section can be removed and the base, with burner, used as a Torch or open fire. Order the No. 1—you will be perfectly satisfied.

All leading jobbers will supply at factory price. Send for Catalog—it's free.

THE TEMPTATION TO SHOOT IS HARD TO RESIST

Every youth and most men find it difficult to pass a good display of rifles in any window.

The Ross Cadet Rifle

is specially attractive, as it is a strong and serviceable "Summer" arm. Good for shooting at a mark and any game, except deer, etc.

It sells at $12.00, gives dealers a reasonable margin, and gives the purchaser a full measure of satisfaction in the way of accuracy, good sights, and good service.

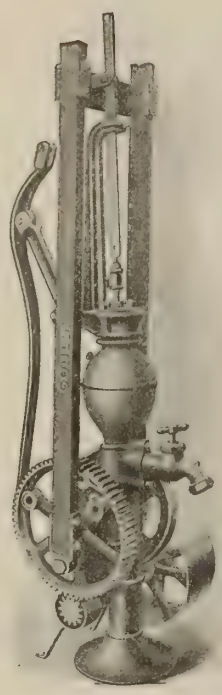
AUTOMATIC BENCH WASHER

(BUY IT IN CANADA)

Here is a machine that is meeting with immense favor wherever it is shown or used. It possesses every possible convenience. The wringer swings to any desired position and may be operated in either direction and may be fed from either side. The control is always within reach and the operator may start, stop or reverse the wringer by a mere touch upon the lever. It also has the safety release, so that all pressure may be instantly thrown off the rolls, making it absolutely safe.

With this machine more than one person may work at the washing. It is splendid for families having many clothes to be washed.



The side table is detachable and when removed the machine occupies a floor space of 24" x 39".

The Automatic Bench Washer is made in both power and electric types. A machine for every home. A beautiful 32-page book, full of washing machine information, is mailed free for the asking. It is called Bulletin 107. Write for it.

Sold through Canadian jobbers.

Saws and Tools That Last For Generations

It takes a mighty good saw to serve two or three generations of mechanics, yet there are numerous cases where a Disston Saw has passed from father to son more than once in its lifetime. This quality of great durability is only one of the many that attest the wonderful superiority of Disston Saws.

The reputation which has been built up in the past 73 years for these saws is shared by other Disston products, for

Disston

SAWS TOOLS FILES

all embrace those distinguishing qualities of durability, efficiency and ease in handling which have enabled them to set a standard for high-grade tools that is world-wide in its scope.

Think—

Skilled mechanics always ask for "STANLEY'S PLANES."

Is it not far more profitable to sell them the "genuine STANLEY," which gives every satisfaction and holds them, than to sell them an inferior substitute and have them go elsewhere for the next tool they require?

The irons in these good planes are made from the best English steel, of equal thickness and temper throughout.

Each tool passes a rigid examination before leaving the works, and is fully guaranteed against defect in either material or workmanship.

For household and other purposes we have another make of Iron Planes made in all the leading styles and sizes, known as "Hunts," which sells at a low price.

Here's a Dandy Tool to Demonstrate!

These calipers will measure over flanges, ribs, bosses, etc., with perfect accuracy. They were invented and patented by Mr. L. S. Starrett and are, like all Starrett Tools, well made and serviceable. Hardware salesmen will find it a simple matter to demonstrate the value of

Starrett
Lock-Joint Transfer Calipers

A good example of the use of the outside calipers is shown in the illustrations above, in which a casting for a large pipe fitting is being calipered.

In the circle at the left the calipers are being set at the thickness of the casting below the flange. In the circle at the right, the leg of the calipers is swung out to permit removing caliper over the flange, **but note that the short leg is still in place.** In the lower circle the leg is swung back to the short leg and the opening between the points may be read from the rule.

These calipers are made in sizes from 4 to 24 inches and may be sold to shops and to many individual mechanics. They are Nos. 36 and 37 in our catalog. If you have not a supply, write us for some catalogs No. 20 M.A.

UNIVERSAL ELECTRIC GRILL

THE ELECTRIC TABLE GRILL after the Electric Irons is the best selling appliance on the market.

This compact device will prepare food quickly, perfectly and daintily at any time. Allows cooking both above and below the heating coils at the same time. Boils, Broils, Toasts, Stews, Fries. Of unlimited usefulness in an apartment.

Carefully designed to produce the greatest possible efficiency. The heating element is carried nearer to the ends of the frame than in any similar device, insuring an even spread of heat, cooking thoroughly. The frame is insulated from the heating coils to prevent waste of heat. The pans are of extra depth, giving large capacity.

Made carefully to give long satisfaction. The tray has insulated feet, is inseparably fixed to the frame. The pans fit the frame, set evenly and slide easily under the heating coils. Heavy nickel-plated, high-polished finish. Special attention has been given to the inside of the pans. No turned-in edges to make cleaning difficult.

Heating Surface 7⅝ x 4½ inches. **Depth of Pans 2 and 1¼ inches.** **Depth of Griddle ¼ inch.**

No. E981 Nickel-Plated Retails for $5.00 each.

Complete with six-foot, mercerized, silk finish, flexible cord.

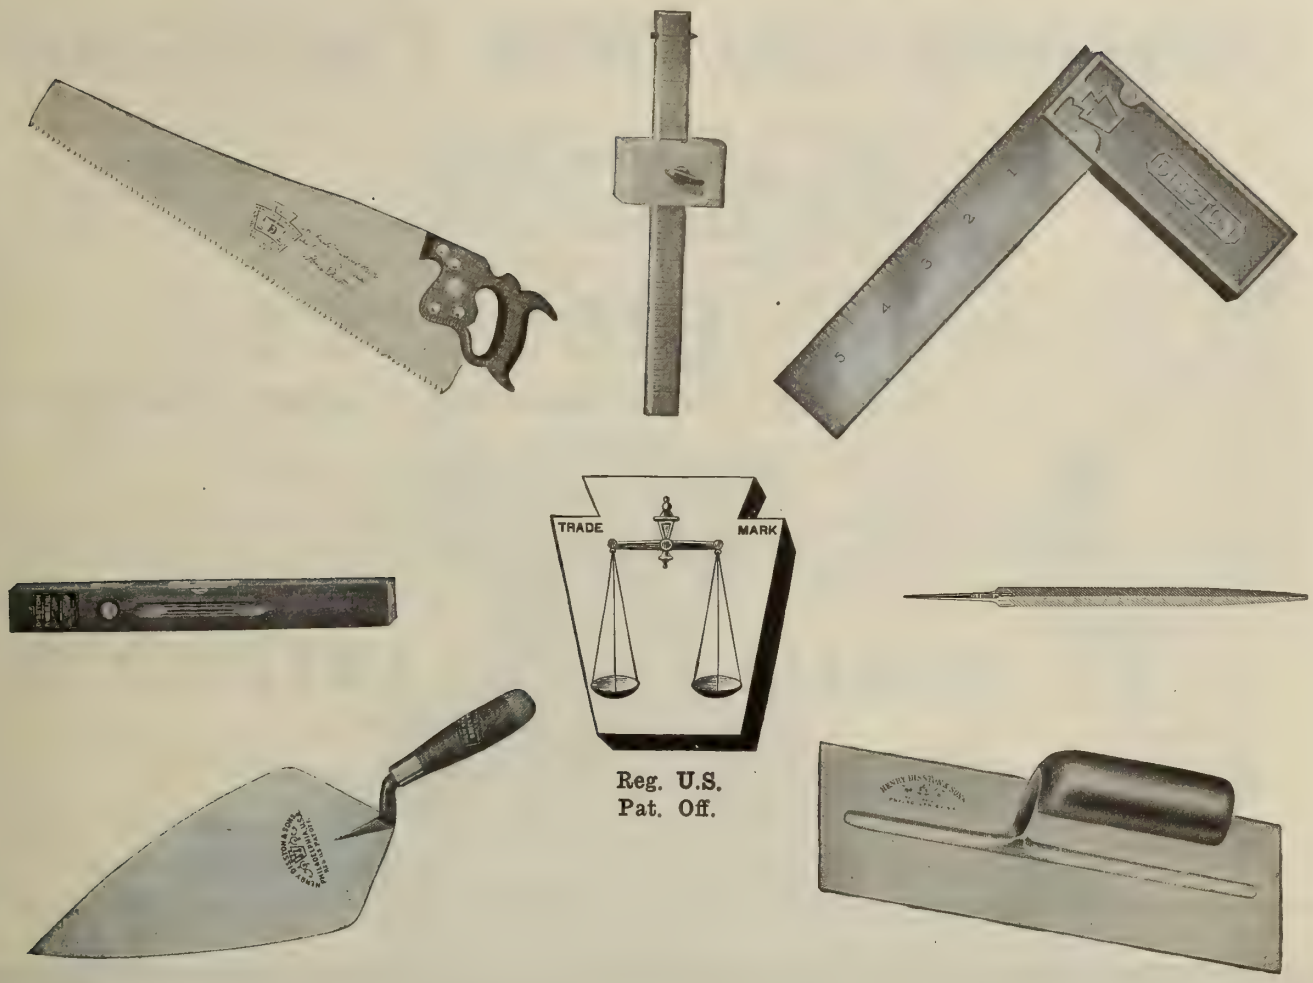
Money In Salesmanship

The trained salesman is practically independent. Scores of business houses seek his services.

It should, therefore, be the aim of every young man to qualify himself for a higher position. He can accomplish this in his spare time, just as hundreds have done.



No work so quickly develops poise, self-reliance, ease, ability to grasp situations, instinct to meet the demands of the moment, and the capacity to meet men of their own level, as representing MACLEAN'S.

This work puts you in touch with the prominent men of each town, a connection of inestimable value. We require representatives in nearly every town and centre of population in Canada. You can make from $5 to $10 per week in addition to your regular salary. We give you a practical training that is worth consideration.

Write us to-day for particulars.

The Disston Standard of Quality Applies to Every One of Their Products

From the beginning, 74 years ago, a high standard was set for Disston Brand Goods. This standard has been raised to keep pace with the advance of the times. So high is this standard that both dealers and mechanics have come to look upon a Disston Saw or Tool as the standard by which to judge all others.

Henry Disston, himself a finished mechanic, insisted upon sending his sons into the shop to learn the business as he did. Realizing the importance of this early training, his sons in turn placed their sons in the shops until they thoroughly understood the manufacturing end of the business.

This means that the sons and grandsons of Henry Disston, who to-day manage the great business which he established, are all practical men. They know the business from the ground up, which assures a maintenance of the efficiency and high quality of all products manufactured by the Disston Works.

Comparing Cost With Convenience

The Bissell Sweeper ranks high among the generally used household utilities. There is probably no other labor-saving article in the home that furnishes so much genuine comfort and convenience, even at several times the cost. No other utensil is so frequently needed by the housewife.

BISSELL'S

"CYCO" Ball Bearing Carpet Sweeper

is pre-eminent in its field of usefulness.

It is the handy, inexpensive cleaning device for every-day use.

Consistently advertised and sold under a sincerely conceived business policy which aims at a liberal co-operation with the dealer in the sale of our goods and which, through standard prices that are universally observed, insure him a reasonable profit, the Bissell sweeper has become a staple whose constant growing popularity is evidenced by the steady increase of our sales from the inception of our business to the present time.

Change places with your customer. Imagine yourself one of the many thousands of car owners who use and buy automobile accessories.

¶ Would not the guarantee of a $5,000,000 corporation, backed by a Service in actual operation in every important city of North America, be a great—if not a deciding factor—in your purchase?

¶ Such is the Johns-Manville guarantee on Johns-Manville Automobile Accessories—and such is the efficiency of Johns-Manville Service.

¶ And remember that you are able to offer your customers this two-fold assurance of satisfaction at no extra cost.

Carter Carburetor

Multiple-Jet Principle

Works WITH the Engine—NOT AGAINST It

Never "lags" or "drags." Built on a principle that gives the engine complete automatic control over the amount of fuel consumed.

Effects a real increase in economy, flexibility and power. Allows lowest throttle, insures quickest "pick-up," and estimated conservatively, saves 10 per cent. on fuel.

Long Horn

Sure as a Hammer on a Gong.

A mechanical horn independent of all electrical apparatus, eliminating all possibility of breakdown. Its mechanism is one compact unit, directly under your control. There's nothing to get out of order. It **won't** fail, because it **can't** fail.

$12 **First cost the only cost**

The Long Horn shouts its warning or drawls it out. You use it instinctively just as you do your voice. It defies wear and tear, costs nothing to keep, and outlasts the car.

JM Lens (NON-BLINDING)

Gives Daylight Safety to Night Driving.

Illuminates the roadway clearly in front of the car, yet does not throw a blinding glare into the eyes of motorists or pedestrians. This is made possible by a front glass of pronounced curvature, frosted over its entire surface with the exception of a clear space slightly below the centre, about 3x5 inches, through which a powerful searching beam is projected, forward and downward, on the road. Does away with the necessity of side lights. Requires no special attachments, and is easily fitted to any lamps in place of the old-style front glasses.

Made in sizes to fit all standard lamps

$6 Per Pair

DAVIDSON'S NON-EXPLOSIVE
Premier Underwriters Safety Gasoline Cans

Specially made for Gasoline, Benzine, Alcohol and all highly inflammable explosive liquids. Saves 30% Evaporation, and preserves the volatile qualities of the oil or spirits.

Strong and Superior Construction—Finished in a beautiful Japan Red.

The principle of this Can for safe storing of Gasoline depends upon the same fire-stopping property of wire gauze that gives absolute safety in use, to the celebrated "Davy" mining lamp. *The brass tube* extending into the tank is covered at its base by wire gauze and is sealed at the top by an automatic valve which practically makes it air-tight. If fire occurs near or or around the tank and excessive gas is formed by the heat, this valve opens automatically and allows the dangerous gas to escape.

In case contents of Can are ignited the vapor escaping through the gauze-protected tube will burn quietly and harmlessly at the orifice without exploding.

Tested by the most competent Engineers and accepted by the Underwriters, its use is therefore a positive safeguard to human life and property, and will reduce your insurance rates to the minimum.

—Three Sizes—

1, 2, and 5 gallon.

Some Reasons Why "Wear-Ever" Utensils Outsell All Others

WEAR-EVER

Battle Creek Sanitarium, Battle Creek, Mich.

Three Kitchens Equipped

We have been using **"Wear-Ever"** Aluminum for several years, and find it to be very desirable because of its durability. There is no granite to chip off and no rust caused by acid fruits.

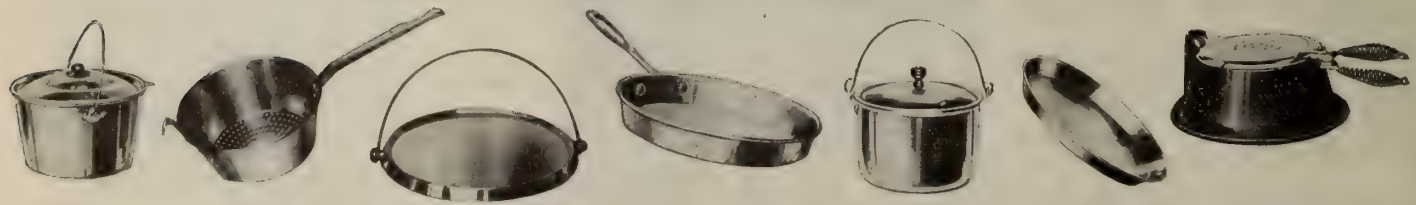
We have almost fully equipped three large kitchens and it is giving perfect satisfaction. We shall continue using aluminum ware in preference to any other kind of utensil we would be able to purchase.

Battle Creek, Mich., July 25, 1912.

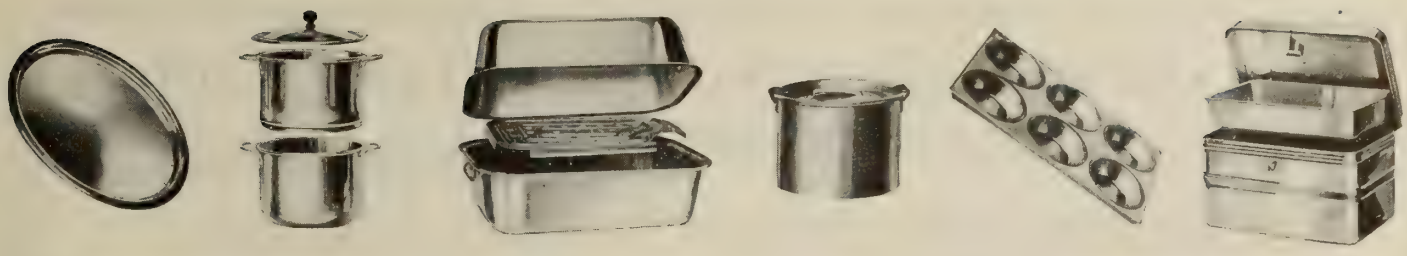
The Battle Creek Sanitarium, Sanitarium Store Dept.

O. C. Edwards

Institutions Like These Use and Recommend "WEAR-EVER"



No place do utensils receive so much hard usage as in these kitchens. That **"WEAR-EVER"** is recommended and used by so many large or prominent hotels and institutions, (a complete list on application) speaks well of it. Surely it's the safe and only kind to sell your customers.



WEAR-EVER

Window Display—T. Eaton Co., Limited, Toronto.

DISPLAYS LIKE THESE HELP SELL IT

WEAR-EVER

WEAR-EVER

The **"Wear-Ever"** MAGAZINE is written and published to assist in increasing the sales and general efficiency of your store.

It shows how others are selling the goods, their prize-winning window displays and the arrangement of their stock. It has well-written business articles. It suggests new developments of business. Worth reading and worth keeping. Send for a copy.

The Fundamental "Why"

The enormous pressure of rolling mill and stamping machine makes the metal in **"Wear-Ever"** aluminum cooking utensils dense, hard and smooth. The "case-hardened" surface of the metal is made still harder by electricity—which makes the inside of the utensil darker, smoother, less liable to be discolored and more easily cleaned.

"Wear-Ever" Aluminum Utensils

are stamped from thick, hard sheet aluminum—are made without joint, seam or solder. The less aluminum is heated and the more it is "worked" the harder it becomes. Consequently stamped utensils are rigid, are not easily dented nor softened by being heated. These are the reasons that you can tell your customers why she or he should buy **"Wear-Ever."** These are the reasons why they'll come back for more.

Better send for printed matter giving more particulars. It will be a step on the right road to Aluminum Ware Profits. A card will do.

Some of the Reasons why "You" Should Handle Buffalo Brand Oils, Lubricants and Specialties

MANUFACTURED BY

PRAIRIE CITY OIL COMPANY, LTD.

Winnipeg - Manitoba

1. Because they are never sold direct to the consumer, but to dealers only.
2. Because the Prairie City Oil Company, Limited, is the ONLY Oil concern in Western Canada who protects the dealer in this way.
3. Because "Buffalo Brands" are put up in handy sizes, in handsome lithographed cans, which makes handling easy and gives a splendid opportunity for effective window decoration. The Prairie City Oil Co., Ltd., were pioneers in this regard.
4. Because being so well and favorably known they are constantly asked for, and the time spent in trying to persuade customers to accept something claimed to be "equally as good," but which in reality is vastly inferior, is saved.
5. Because they cost no more than inferior goods, and it pays to handle "only the best."
6. Because the quality of "Buffalo Brands" is the highest standard obtainable, is always uniform, and you are assured that when you re-order, the goods will be **exactly** the same as before and not a cheap substitute.
7. Because our files show hundreds of voluntary testimonials from merchants and users which prove the satisfaction "Buffalo Brands" have given.
8. Because in handling "Buffalo Brands" you are supporting a home industry, backed by Canadian money and not CONTROLLED BY ANY TRUST OR COMBINE.
9. Because our selling staff is at your disposal to help you close sales by personal assistance, information or advice.
10. Because our Plant is new and up-to-date, our facilities are good, shipments prompt, and carefully looked after by an experienced and competent warehouse staff.
11. Because "Buffalo Brands" will increase your sales and consequently your profits. The best-looking goods are the easiest sold.
12. Because "Buffalo Brands" are sold under an absolute "Money Back" guarantee, and you run absolutely no risk in handling same.

Vol. XXVI. JULY 4, 1914 No. 27

A Comparative Census of Store Co-operation

Of Twelve Stores Visited One Only Showed One Hundred Per Cent. Efficiency — Lack of Balance Between Different Departments is Chief Cause—Each Store Had Some Good Points.

Written for Hardware and Metal by Norman Lowe.

I CALLED on twelve retail hardware stores in a Canadian city recently that represented a fair average of the trade, from the small store of the suburban dealer to that of the large and thoroughly modern store that is one of the best of its kind in Canada. The excuse for my call was the inquiry for a staple article of hardware that is closely associated with the building industry, and a call for which should indicate to the dealer that the customer will in all probability require many other articles other than the one directly asked for. The compiled results are interesting as a human document, illustrating as they do that we are all one under the skin; that the smart city store depends, in the last analysis, upon the same selling material as the small cross roads dealer; i.e., the personality and efficiency of its salesmen.

Neither the clumsy and sale-killing approach, nor that variety that immediately puts the customer at ease and in a receptive mood, were found to be peculiar to any one type of store, nor to either hired clerk or the store proprietor.

A general compendium of the sum total of results is best expressed as follows: of the twelve stores, no one offered any downright discourtesy, but in only four of them was I waited upon directly when no legitimate cause intervened. This statement does not take into account such cases as involved the clerk finishing waiting upon some other and earlier customer, but only those cases in which the clerk was idling with some friend, sweeping up, etc. In only five cases did the salesman ask for my address, presumably with a view of getting in touch with me for other building material. Worse still, in only two cases did he suggest some other building lines that I might purchase there. Of the twelve stores, five had tinsmith shops, and of these only one volunteered that information and asked for an opportunity to do that work on the building. Of the twelve, ten of them were prompt in their replies as to the price; of the remaining two, one had to call the jobber up, and the other kept me waiting for twenty minutes until the proprietor came in. Of the prices offered on an article that at best usually offers a very small margin of profit but two were alike, and there was an increase of 37 per cent. over the lowest figure for the highest. The two stores that had equal prices quoted the lowest price of any.

The one store of the twelve that was the beau ideal of all-round efficiency in window trim, store interior and salesman, priced the article at 12½ per cent. over the lowest price. The latter meant a total loss to the store that sold at that price. Hence, the one store that showed complete efficiency in other departments was the one that offered the goods at the regular price that embraced a small profit.

Five of the stores had good window trims; three had excellent ones. These three stores were the only ones of the five that had well-arranged interiors; but of the seven remaining stores that had poor windows, three had good interiors, making a grand total of six. The one first-class store was the only one that exhibited a first-class salesman, who gave his prices without any hesitation, was solicitous without being obnoxious, was courteous and pleasant, and who, when I left, bade me good-day, and smilingly told me to come in at any time for information. The other extreme was illustrated by a patronizing youth who smoked a pipe and replied in monosyllables to my questions. One man, who happened to be the proprietor of another store, endeavored to create a good impression by a crude hail fellow, well-met manner, but the unkempt appearance of himself and store was against him, and if that had not been enough, he followed me to the door and with pathetic eagerness offered to cut the price still further when he saw that I would leave empty-handed, which proceeding on his part would be more apt to engender suspicion of his prices and goods than to induce the customer to buy. Eight of the twelve salesmen showed fair ability in selling once they had learned my wants, even in the case of those who were inattentive when I first entered the store. On the other hand, some who were most prompt in greeting me upon my entrance fell down lamentably in sales talk. As previously stated, one man only showed complete efficiency from the time of the approach to the close of the conversation.

A comparative table of the results shows the following percentages of efficiency in the different departments:

Downright discourtesy, entirely absent; prompt attention upon entrance of customer, four stores out of twelve, or 33 1/3 per cent.; inquiry as to customer's name and address, five, or 41 2/3 per cent.; suggestions as to purchase of other and co-related lines, two, or 16 2/3 per cent.; inquiries as to tinsmith work, one out of five, or 20 per cent.; knowledge of prices without unnecessary delay, ten, or 83 1/3 per cent.; lack of variation from standard prices, two, or 16 2/3 per cent.; first-class window trims, after allowing for natural advantages or the reverse, of the windows, three, or 25 per cent.; first-class arrangement of shelves, show-cases, etc., of interior, six, or 50 per cent.; first-class salesmanship, as evidenced by the salesman's prompt attention, approach, sales talk and paving of way for a later sale, one, or 12½ per cent.; complete efficiency of window trims, store interior and salesmanship, one, or 12 per cent.

It will be noticed that each desirable

(Continued on page 51.)

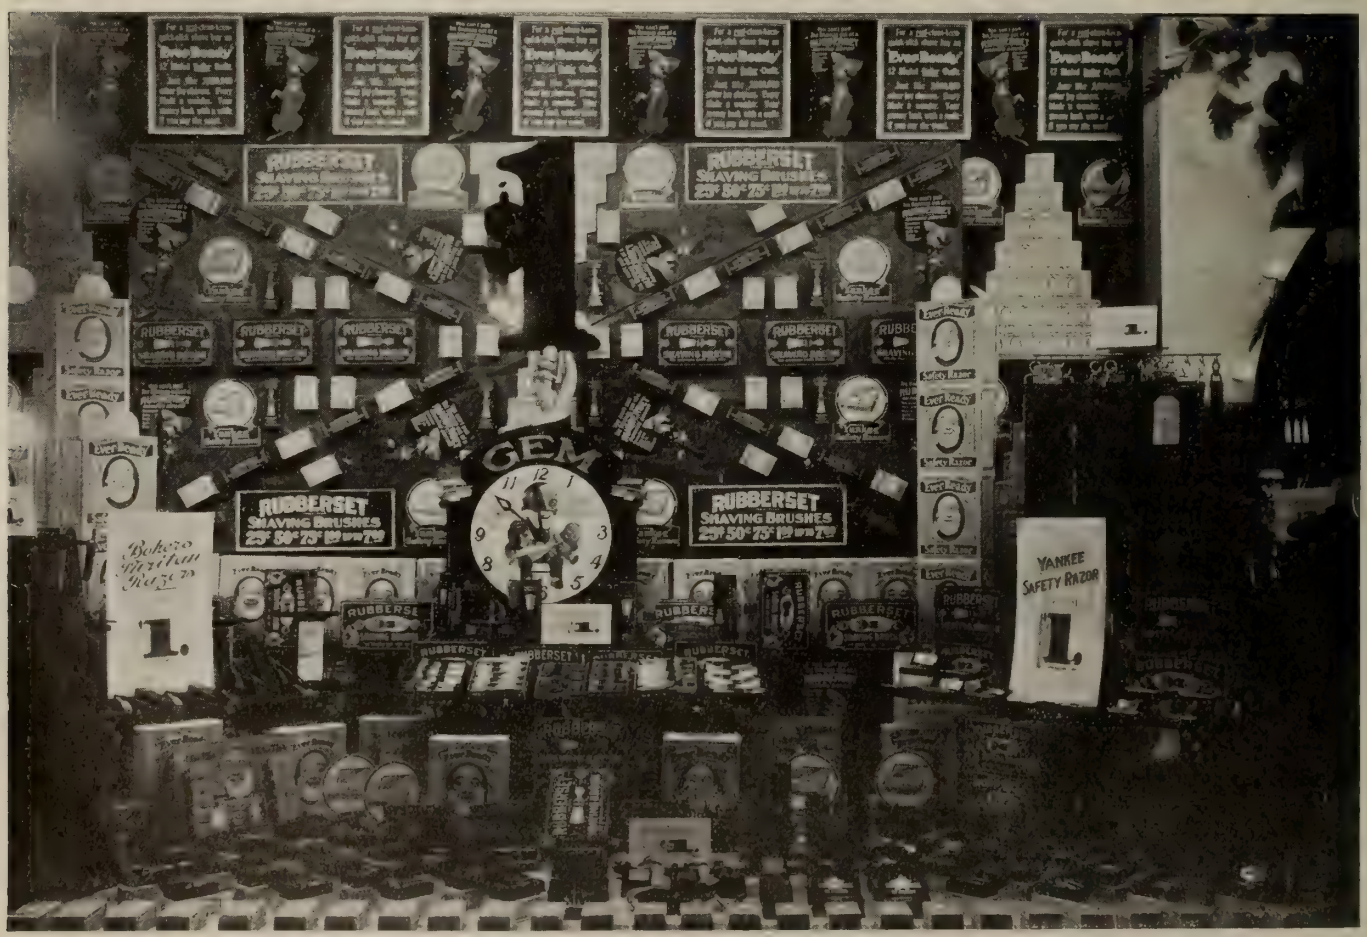
Shaving Supplies in a Dollar Window

Western Canada Firm Features Showing Supplies in a Dollar Window and Makes Many Sales—Entire Window Devoted to the Display of Goods Retailing at One Dollar.

THERE is probably no line in the stock of a hardware store which, if properly displayed in a show window, will bring quicker returns and more immediate sales than shaving supplies.

Unfortunately for many dealers and manufacturers as well, the line is often neglected. Too many retailers are content to allow their stocks of strops, soaps, razors, hones, clippers, etc., to remain under cover, where they cannot be seen by customers. Probably this is why so many druggists and novelty stores have taken up the shaving accessory line and are making such inroads into the retail hardwareman's business. The hardwareman who will not display shaving accessories, and who kicks about the druggist who does display the line, deserves very little sympathy.

Every man is a prospective purchaser of shaving accessories. He not only needs a razor, but he needs a strop, hone, strop dressing, soap, shaving mug, toilet clipper, brush, or other article.



A shaving accessory window display is clearly a man's display, and there are few men who would not be interested in such a display.

One of the desirable features of the shaving accessory line is that each item affords a very fair margin of profit. The merchant who is careful in selecting his stock, who does not purchase in a haphazard manner, can lay in a real live selection of good selling shaving accessories at a very reasonable cost. He can also turn the stock quickly, provided he uses the proper merchandising methods.

The accompanying illustration shows a window display that made many sales. All articles in the display were priced at one dollar each. The entire background of the display was made up of advertising material, including showcards, boxes, etc. Dollar cards were used on each article and red $1 signs were pasted on the plate glass. A large variety of dollar razors, shaving brushes, razor hones, toilet clippers, nail nippers, strops, together with a few lines of dollar pocket knives, comprised the displays.

This window display created many sales, not only for the lines shown in the dollar display, but in other lines of shaving accessories, many of them at a higher price than those featured in the special display.

It is very doubtful if there is any other hardware line of equal size and importance that can be stocked in as small a space as shaving accessories, and yet there is probably no other line which will sell more rapidly if properly displayed. In some stores special display cases are used for showing this class of goods, and many direct sales result. Another point which salesmen should always bear in mind is that all men are not looking for cheap goods. Too many clerks get the idea that the average man will only pay 25 cents for a shaving brush, when as a matter of fact the majority of men will pay from 50 cents to $1.50, and some even higher. The same rule applies to all other shaving accessories. This is one line where quality talk makes bigger sales.

A dollar window in which shaving supplies are featured.

Team Work by Merchant and Farmer

Ruinous Mail Order Competition Can be Thrown Off if Merchants and Farmers Co-operate—Community Like a Rope, is Only as Strong as its Weakest Part.

Written for Hardware and Metal by Henry Lewis.

EDITOR'S NOTE.—The accompanying story is based on what might be done rather than on any actual occurrence. It presents a suggestion which in some form might be worked out to the mutual advantage of merchant and farmer. In addition, it presents the disadvantages that the mail order customer must be prepared to face. It is worth reading and acting upon.

THERE is one town in Ontario that does not fear the mail order house, although it lies in the very heart of the so-called mail order belt. There is a reason for it. It is due neither to any dispensation of Providence nor any carelessness on the part of the mail-order houses.

It all came about as the result of the ruinous condition of affairs that were the order of the day in that locality as a result of the petty rivalries of local merchants and their lack of co-operation against their common enemy.

Things were down to pan rock on that day when Avery walked into Walker Bros.'s store. The Walker boys had started business on a shoestring, and by constant application to business, good merchandising and the aid of a kindly banker, they had eventually pulled through and had built up a fine type of the country hardware business. Just at that time when things looked most favorable for them, the mail order business began to make itself felt in their community. Slowly, but surely, it cut into their business, as it did into that of every merchant in the town. One thing led to another, so that what with price cutting and the consequent internal strife, they were all in a bad way.

Avery was a leader amongst the farmers generally, and in times gone by had been a good customer; now, he was only a more or less sporadic buyer of home goods, a "shopper," one who went to the cheapest market, whether that was at home or elsewhere, after first carefully pricing in both places.

"How much for your milk buckets; those with the strainer?" he asked laconically. "Fifty cents," replied Walker, and proceeded to reach up to the ceiling hooks with his stick for a sample bucket.

Avery inspected it for a moment in silence. "I can get that for forty-five cents by mail," he commented.

"The old story," Walker thought, and then, from sheer force of habit, "How about your cost of getting it here?"

"Forty-five cents covers it all," said Avery. "It's the very same bucket, and it's five cents cheaper, so I guess I can't use yours, Mr. Walker."

"Do you mean that you would send away from your home town in order to save five cents?"

"I sure do: five cents is five cents and I work just hard enought for my money so that I appreciate it."

"How about the wait of a couple of days for your bucket, and the cost of a new one if it should prove defective? They won't replace it as I would, you know," said Walker.

Avery reflected, "Yes, that's so. In fact that's the only kick that I've got against those fellows."

"Well, why not buy at home, then?" persisted Walker. Then, in a last desperate effort to gain his point: "It's not right for you to patronize others in preference to your local merchant."

"Oh, pshaw," said Avery, disgustedly. "Don't give me any of that guff. You know as well as I do that it's not only right, but that it would be utterly wrong for me not to go to the cheapest market. Do you mean to tell me that you buy in Toronto, or Hamilton, or Montreal because of any loyalty to home products? I should say not," he continued, answering his own question. "You patronize Canadian manufacturers and jobbers simply because they can deliver the goods. If you could buy the same goods at a cheaper price in London, to London you would go. Why, even as it is," he continued in virtuous indignation, "you buy all kinds of American goods; there is stuff on your shelves that came from Chicago that could have been duplicated in Toronto. It's only right that you should, though, for if the same quality of American goods is cheaper than Canadian, buy them by all means, but for the love of Mike don't preach to us farmers to patronize home industries at any cost, and then turn right around and do the reverse yourself. You make a joke of it."

"That's all very true," replied Walker, "but our positions are certainly different. I have to pay cash or nearly so, for everything that I buy. The small merchant nowadays is between the upper and the lower millstones. No one will wait over thirty days on me. If I con't meet my bills in that time, they begin to push sight drafts at me and ten to one I can't meet them, because I'm in on the red down at the bank owing to the fact that I've been carrying a lot of my customers since last fall, and the aggravating part of it is that those I have carried the longest and have been the most lenient with are the first ones to send in to a mail order house as soon as they get hold of a little cash."

"Why do you let them? Why not slip a draft in on them?" queried the other.

"Oh, come off; it's all right for you, Avery, you're good pay; but you know very well that the average farmer would consider that he had been insulted and that a reflection had been cast upon his character if he should be presented with a draft, or even dunned to any great extent."

"Yes, there's no getting around a lot of what you've said," Avery admitted. "But even at that, I still stand by my original contention that it's business, and as all business is a matter of dollars and cents, it is perfectly just and right for me to buy in the cheapest market. Say," he said, stepping up the better to inspect Walker's smart-looking suit, the while an amused grin spread over his face, "where did you get that suit?"

Walker blushed as he admitted that he had bought it in Toronto on the occasion of his last visit there.

"Why?" charged Avery.

"Well, I, er—" stammered Walker.

"Oh, I've caught you with the goods on," shouted the farmer gleefully. "You bought that suit in Toronto," he charged, "for these reasons," and he began to tab them off on his fingers as he enumerated them. "First, because it's a darn sight better suit than you can get over at Henry Sampson's for the same money; second, because Henry Sampson bought his new car down in Toronto and drove up here with it, when he could as well have bought it from you for the same money, as long as you hold the agency here. There were other reasons, but that's enough to illustrate."

"Now, here's another thing," he went on. "There's Bob McLean; just think of what he does. That fellow makes half his profits on underpaying us farmers for our eggs and chickens and other stuff

(Continued on page 48.)

HARDWARE AND METAL

VOL. XXVI. No. 27 Toronto, Canada, July 4, 1914 Two Dollars per Year

WHAT PEOPLE NEED.

THERE are to-day countless retailers who are in profound ignorance of the actual conditions existing in the communities in which their stores are located. They do not realize the changes, agriculturally and otherwise that have taken place even during the past few years. A striking instance was brought to light a short time ago. In a certain section of Canada the farmers undertook to grow and develop a certain farm product which required certain kinds of tools and cultivators. A large seed and implement supply house doing business in a large city many miles away learned through one of its agents—and the firm has many of them—that the farmers had taken up the idea and would be in the market for cultivators, hoes, etc. Within the next week or ten days the community was circularized and the supply house was receiving orders with the cash in advance. The supply house was selling over the heads of the local retail hardwaremen because the latter did not study conditions in the community and did not know that the need for such lines existed. This is only one instance selected from many which could be cited to show that in come communities the retailers are not keeping in touch with changing conditions. The changes which have taken place in methods of building, living and farming during the past few years have been fundamental and far-reaching. They have amounted to a revolution in methods of building, farming and manufacturing and have been responsible for the production and marketing of products undreamed of a decade ago. The retail merchant to be successful in his buying and selling must study the changing needs of the community he serves. The merchant who does not study the needs of his customers is running chances of overstocking with unsaleable goods,—losing trade to firms who make a study of local needs and in all probability wondering why he is not making money. A speaker at the recent convention of the Associated Advertising Clubs of America held at Toronto told how the vast fortunes of the Rothschilds were found upon a system of securing accurate information.

This system was started 150 years ago by Ansel Rothschild, then a provincial banker. He conceived the idea that if he could know absolutely what clothing the people of all the interior European provinces were wearing and what food they were eating, then he would know whether or not a merchant who came to him to borrow money was buying the right kind of stock. Ansel Rothschild, therefore, established business correspondents at every important point in the provinces.

This system soon gave the Rothschilds, as bankers, an advantage over all other European bankers. To-day, in the main office of the Rothschilds at Antwerp, are to be found accurate charts, constantly brought down to date, which show every detail of the world's business situation —retail sales, wholesale sales, building operations, transportation conditions, crops, manufacturing conditions and the money market in every city or community of consequence on the globe.

Upon such accurate information the fortunes of the Rothschilds have been built.

LACK OF CO-OPERATION.

AN interesting comparison is shown in this issue of the results of an impartial investigation into store methods with the idea of determining exactly how the average store ranks as a field for the efficiency expert.

The results show a most lamentable condition of affairs, and in this connection it must be borne in mind that the investigator did not deliberately seek out stores of known mediocrity, but rather a fair representation of all classes, which included in it some stores that have always borne a splendid reputation. The most noticeable lack noticed was that of intelligent co-operation between the dependent and inter-locking departments, such as window trimming, interior arrangement of stock, salesmanship and in addition, one very important quality that should have run like a silver thread through all of these last-mentioned qualities, namely, aggressiveness. The results show that in every case the store was progressive in some one department, infallible proof that no one store was entirely hopeless. This fact was the one redeeming feature of the whole, indicating as it did, a wholesome desire for improvement.

However, these isolated cases of progressiveness in a sea of neglect were in most cases abortive in their effects as a result of the neglect shown the other departments. It would be futile to expect a good window, a good advertising campaign or any other factor to effect results as long as the other departments were neglected. Such misapplication of energy can only be compared to a driver of a six-horse team who lets one horse do all the work and when the wagon fails to reach its destination, curses all six alike. The store proprietor who centers his efforts on one department to the detriment of the others instead of holding an even balance between them is quite likely to feel, like the driver, that the one honest horse in his train, was worthless.

Intelligent co-operation is the only panacea for such evils, not only between the merchant and his salesman, but between the roustabout and the office girl, between the merchant and his rival next door so that all duplication of effort, all waste of time and money may be eliminated,

to be replaced by the millenium of an efficient store plant that operates on greased wheels. Like a piece of rope, no store, no system, no combination of salesmen is stronger than its weakest part and unless all are brought to the same level of efficiency the weakest will invariably affect the results of the whole as one rotten apple does the contents of the barrel.

MID-SUMMER SALES.

MANY of our largest and most successful retail merchandising establishments hold mid-summer clearance sales, usually during the month of July. During the sales, old lots, hold-overs, etc., are disposed of sometimes at reduced prices and sometimes at or below cost. The idea is to secure a quick turnover and to dispose of goods which would probably remain on hand until the following year, unless some steps were taken to make a clearance.

Probably the retail hardwareman is less affected by the changing season than the dry goods or clothing merchant, but at the same time there are certain lines of hardware merchandise which if not disposed of in their proper season are liable to become stickers—taking up considerable valuable space—tying up capital which should be working—and very often depreciating in value on account of becoming shop-worn or damaged. It is true that we will still have over two months of warm weather, but this is no good reason why the retail hardwareman should rest on his oars and not endeavor to make a clearance of summer goods. We do not advocate price-cutting or selling goods at cost unless a merchant is driven to it, but it certainly is a good plan to follow out some of the methods adopted by our large and successful firms and endeavor to push,—during the holiday months—goods which if not specially featured will remain on hand and prove a burden to the merchant. It has often been said that if a woman does not buy a hammock or refrigerator before July 1, she will probably wait until the next year, but this has been disproven many times by merchants who have conducted mid-summer sales and have cleaned out large stocks of summer lines during July and August. We have now entered the between-season and retailers who happen to be burdened with overstocks of summer lines should start immediately to clean house.

MIXED FARMING IN THE WEST.

AS straws indicate which way the wind blows, so in Western Canada there are signs of the times which emphasize that in that part of Canada, there is a change from the old order of things—that the farmer has come to realize that for the future the West—and the future of the West is the future of Western Canadians individually—depends upon mixed farming rather than the exclusive growing of grain.

That in the West there has been a neglect of mixed farming up to the present time is just as natural as it is necessary that there must be a change for the future. Grain growing has been a simple means of taking wealth from the soil—the prices of land and the prices paid for the grain have both been favorable; and then those who would be critical must remember that the majority of those who went on homesteads in the West did not have the money to go into stock raising, and some of those who had would not have the knowledge necessary. Mixed raising is an agricultural evolution in the West.

The Westerners were not ignorant of the rapids towards which they were drifting, but while the current was smooth there was little objection to drifting along. Indications of the rough water ahead are to be found in agricultural reports published by the Provincial Governments. In the report of the commission on agricultural credits of the Saskatchewan Government, there is a direct statement that the country cannot be developed or sustained on grain growing alone. This was the conclusion drawn after an exhaustive inquiry into agricultural conditions in all parts of the world; it was the declaration that Canada could not hope for agricultural success along lines which history and history repeated had shown to be unsound.

There were a number of factors which made it inevitable that the Western farmer must change from his grain-growing policy. The cost of the transportation of grain to world markets with the long rail haul is too high for handling anything but the best grades; the only way to get the benefits from the balance is by using it for feed and this applies to half crops which are hardly worth threshing, and which would make good fodder. The price of land was advancing so rapidly and the price of labor also, that the wheat markets did not offer the avenue to satisfactory profits. Experience was proving that the one-crop farmer was not the safe and sane farmer, and that it was a better policy to have always something for the rainy day—or perhaps it would be better to say the lack of rainy days. Then on top of all is the quiet spell in the West and the tightening up of credits on the part of the implement companies. The banks too have given the farmer a chance to catch up to things and look them in the face.

THE FALL CAMPAIGN.

WE are just entering the mid-summer season when acations are the order of the day. A relaxation in business will undoubtedly be noticed in many stores, and the trade will look forward to the fall season in the hope that with the advent of fall we will find business conditions improved, and as a result of a splendid harvest, which we hope will be forthcoming, the retail hardwaremen will have a heavy demand for fall goods. This should not be construed to mean that the hardwareman is not busy during the holiday months. There are some hardwaremen who so plan their campaigns that they seldom have a quiet month; but on the other hand, there are many merchants who experience a quiet spell. Although he hopes that business will improve greatly next fall, the hardwareman should not forget that competition for fall business will be keen, and that during the slack period in the summer he should lay his plans for the future. This is particularly true regarding the stove department. During recent years much has been said—and many complaints have been registered—by retailers regarding the aggressive competition of the mail order houses.

The worst enemy of many stove dealers is their own lack of progressiveness. They do nothing to teach the public the wisdom of buying at home. They even neglect to feature their line of stoves prominently. The result is that the person who contemplates buying a new stove has nothing to guide him, and may very easily fall into the error of buying by mail. Under such circumstances, the mail order house gets a lot of business in and around the district to which this unprogressive dealer caters. The latter believes that the business thus secured is due to the activity of the mail order house when in reality it is due to his own inactivity.

For it is a fact that catalogue buying can thrive only where the local dealers are sufficiently lacking in enterprise to let it grow. As every hardwareman knows, the local dealer has advantages which, if employed actively, reduce mail order buying to a negligible quantity. If these advantages are used, the catalogue house, no matter how active a campaign it may make, will get but a slender share of the business. It is, therefore, in his own interests that the retail hardwareman get an early start in actively pushing his fall stove campaign.

Truth Emblem Issued by Local Clubs Only

The Following Were the Recommendations of a Special Committee Appointed to Deal with the Use of the Truth Emblem, all of Which Were Passed by the Associated Ad Clubs of the World:

(1) That no action be taken to license the association's seal or emblem to national advertisers.

(2) That the association adopt another and different form of local seal for the identification of documents and similar coroporate things.

(3) That the use of the "Truth" emblem be licensed upon the following conditions to the local clubs affiliated to the association to be licensed by them to local advertisers:—

(a) The "Truth" emblem shall be used by the local clubs in its present form, except that in each case the local club shall substitute its own name for the name of the national association on the upper periphery of the seal, who shall print the word "Guaranteed" on the lower periphery of the seal. Any other symbol or work similar but not identical will be considered an infringement of the property rights of the National Association

(b) The local club shall place the licensing of the "Truth" emblem in the hands of its vigilance committee.

(c) The "Truth" emblem shall be licensed by the local clubs only to advertisers who will pledge themselves in writing to the observance of such code of advertising practice ethics as may be prepared by the National Association.

(d) All licenses shall be in writing and shall be revocative.

(e) Licenses for every "Truth" emblem shall be charged to the advertiser by the local club. and,

(f) Twenty-five per cent. of the gross amount of license fees collected by the local clubs for the use of the "Truth" emblem shall be remitted to the National Association.

BY the adoption of the foregoing report, which was made by the committee of the executive appointed to deal with the subject, the Associated Ad. Clubs of the World, took another important step towards placing advertising on a higher plane and establishing confidence with the public. This was one of the most important things done by the big convention of Ad Clubs for 1914, which was held in Toronto during the week commencing June 20th, when thousands of advertising experts from all parts of the continent and from foreign countries as well, assembled to discuss subjects of importance in the world of publicity. At this convention the change of the name of the organization to embrace practically all countries was a step significant of the advance of the movement for the establishment of the advertising profession on a broader more substantial and more responsible basis.

The Truth Emblem typifies what the organization stands for; it is the key to the method by which it is proposed to cleanse the untruth and misrepresentation from advertising as a whole and put commercial and mercantile publicity on a stronger footing with the public. The emblem had been previously adopted and it remained for the convention of 1914 to decide upon the method by which its use should be controlled.

It will be noted that the report puts the responsibility for the licensing of the emblem with each local club, and it will be for the vigilance committee of that club to see that the principles behind its use are not violated. Where there is a violation the right to use the emblem will be cancelled and this is considered as being sufficient incentive for respect of the principles which it represents. Advertisers who undertake the use of the emplem will be required to sign pledges in writing that they will observe the advertising practice ethics as set down by the National Association.

The truth sentiment in regard to advertising was a dominant note throughout a number of the session of the convention of Ad men and it was emphatically evident that among the members there was a strong feeling that for the future the outstanding feature of the campaigns of all responsible concerns will be the endeavor to secure the public confidence.

Truth for Retailers.

That there was no new thing to say about advertising unless there was a new ideal or clearer understanding of truth was the manner in which C. L. Brittain, of the Kline Cloak & Suit Co.. Kansas City, Me., introduced an address in which he brought forward strong arguments of both a practical and theoretical nature for advertising in which the buying public can at all times pin their faith.

"We may talk about these things for years and study them for scores of years," he said, and the one basic law will remain unchanged. All we can hope to learn of advertising or of any new or old science will have to be learned from its fundamental truth or principle.

"As it is in all kinds of advertising, honesty is beginning to be recognized as the most important factor in the retail campaign. You can all remember when advertising was looked upon as trickery and the common expression that 'It is just some sort of an advertising scheme.' Thousands and thousands of dollars are now being spent for the purpose of gaining the confidence of the advertising public.

Must Know the Goods.

"Some business men think that if the ad pulls the crowd and the selling force gets the money its a good ad and a fine combination that is as deeply as many think—just to get the money. True we advertise to get the money—no question about that, but men steal horses to get the horses.

"As advertising men we need to know the truth about what we are advertising —the whole truth and nothing but the truth; a lawyer needs to know the truth about his case in order to win. We need to be honest both in advertising and selling. Advertising is not just white space. type, pictures, etc. Advertising is business and a strong business-building factor. In order to accomplish the greatest good in the shortest time and maintain the confidence of the buy-

ing public we must know something about merchandise. We must know when it is right. We must know the truth about it. We must know the good about it. We must tell it in a plain and honest but enthusiastic sort of way that will not only pull trade but prove to be a lasting advertisement.

"It is just as impossible to write a truthful but business-pulling advertisement if the merchandise is not right as it is to write a truthful news story about something that never happened. We should see that our merchandise is right.

Not for One Sale Alone.

"I wouldn't give much for the advertising that only made a first sale and didn't leave the customer in a fit condition of good feeling toward the store to come back; it ought to do more than that—it ought to make them want to bring a friend. And it will if the advertisement is properly merchandised and the values are honest."

Mr. Brittain gave some strong illustrations backed up by his own personal experience. As advertising writer in a men's store he had put out a line of copy, which he felt should be bringing results; but it was not. So he made a trip himself into the store and asked to see $2 cravats which he was advertising at $1.65. He found $1.50 cravats which had been marked up to $2, and then marked down again. He found identifying buttons being cut off standard $17 suits which were then marked up to $25, and then reduced as a bargain to $18.50. It was no wonder that this advertising did not pull. He left that ship before it sank.

Selling Advertises.

"We must understand and know advertising and selling to be one and the same thing. We must remember that advertising sells and selling advertises. We must know that the real advertisement is not in the printed word but in the effect of the sale on the customer. A dissatisfied customer advertises—but in the wrong way.

The speaker looked for a new era in business for with the introduction of honesty, science and system, were given a chance and where science and system governed advertising and selling there would be less failure and more prosperity.

Condemning the Deceivers.

Deceptive advertising received a blow straight from the shoulder in the paper of A. J. Harding, which referred to truthful and untruthful advertising and embraced the ideas of the members of the vigilance committee in this connection. He asked if it was deceptive for a merchant to sell silk hose that are seconds and sortings at 19c., when he knew that if they were perfect goods the selling price would be $1? Was it fair to the purchaser to permit him to buy advertised bargains (?) without making him acquainted with such defects? Was a merchant guilty of false advertising when he knew he was selling damaged goods to an innocent purchaser, as perfect?

STANDARDS OF PRACTICE.

The following are the "Standards of Practice" adopted by the Retail Department of Advertising at the annual convention of the Associated Advertising Clubs of America held at Toronto last week:

Each head of a retail enterprise should dedicate his best efforts to the cause of Business Uplift and to this end should pledge himself:

1. *To consider, first, the interests of his customers.*
2. *To insist on the courteous treatment of every visitor.*
3. *To permit no misrepresentation.*
4. *To discontinue careless, slurring or offensive statements on the part of salespeople.*
5. *To avoid misrepresentation or careless indifference in advertising.*
6. *To see that comparison values in printed announcements are with prices previously prevailing in his store, unless otherwise distinctly stated.*
7. *To avoid the use of such expressions as "Were $10," "Value $10," Elsewhere $10," "Made to Sell at $10," "The $10 Kind," etc., where their use would give a misleading impression to the reader.*
8. *To resent strenuously—to the point of withdrawal, if necessary—the "make-up" of his advertising in a newspaper next or near announcements offensive to good taste or of a debasing nature.*
9. *To demand of each newspaper evidence of the approximate number of its readers (based on copies actually sold), their general location and character, and a statement as to how they were secured—by voluntary subscription, by solicitation, by premium or gifts.*
10. *To urge on newspapers that the same care should be shown in admitting advertising to their columns that would be shown in admitting news matter to their columns or in expressing editorial opinion there; that the newspaper should feel itself as responsible for the verity and propriety of advertising and news in its columns as for its editorials—always giving assurance that he will welcome just criticism of his own advertising.*

F. A. BLACK,
Boston.
MANLY M. GILLAM,
New York.

"He is" was the answer of Mr. Harding. "Now let us go back to the beginning of the sale. The wholesaler offers the merchant a special lot of goods at a sacrifice in price. He buys the lot and knows the faults before he places them on sale. But he offers them at a sacrifice, without one word of explanation to his purchaser. What would happen to the wholesaler or jobber if when he sold the lot to the merchant nothing was said about the defects and he simply featured the low price without a word as to quality. He would lose the confidence of the merchant just as the merchant loses the confidence of his patrons. He makes the sale but it is poor business in the end.

Mr. Harding asked the retailer to give the public the same consideration as he expected himself. Almost any kind of advertising would bring results but the point was whether this advertising strengthened the link between the seller and the buyer. The advertiser who deceived in his advertisements was largely deceiving himself in the end.

"There is nothing magical about writing honest advertisements? You must co-operate with and be a silent partner of public opinion. Confidence is a plant of slow growth. If it is abused by false or questionable advertising it withers and dies of exposure. If it is planted in a dependable place and that place is known for its straight-forward dealing and the reliability of its advertising, it thrives, grows and spreads out.

CONSTRUCTIVE SELLING.

In the course of a recent conversation the manager of a large retail hardware store said:—"I make it a practice to talk hardware to as many people as I can possibly get at, in the course of a day. I prefer the views of customers, whether they come in motors or stumble along in plaster covered boots. Each has his own peculiar wants and his own peculiar viewpoint, and both are equally valuable to the house that seeks to hold their trade. I think it a shame to lose a customer after having spent so much money in newspaper advertising, catalogues and window trims to first get his trade. I try to get the address of almost every man who comes here, whether he pays cash or goes on the books, and by so doing I can get an idea of his worldly condition from the knowledge of the part of town that he lives in, combined with his personal appearance. I can thus talk to him along the lines that would be most likely to interest him."

Fifteen Cent Display to Secure Ladies' Trade

Small Items of Enamelware and Aluminumware to Retail at Fifteen Cents Make Good Leaders and Attract the Attention of Ladies.

A WESTERN Ontario hardwareman whose store is located in a busy street, recently ran a fifteen cent window display in which he featured small items such as aluminum and enamel basting spoons, jelly molds, tin tea kettles, fruit strainers, rolling pins, and a hundred or more other small items in which the housewife is interested. The display was neatly arranged and a number of neat showcards were used, advising passers-by that any article shown could be purchased for fifteen cents. Many sales were made from the window, and in several instances four or five articles were purchased by one person. The display was one that brought direct returns and the profits were reasonably large. The average invoice cost of the goods shown did not run over 90 cents per dozen. During the three-day sale the store secured many new customers. The majority of the sales were made to ladies, many of whom had never before been in the store and who were under the impression that the goods shown could only be secured in syndicate stores. Now we must admit that the goods shown suited the wants of the housewife in that community, and that at fifteen cents any one of the lines was a bargain. The merchant in buying his goods did not simply give an order for any utensil which could be retailed at fifteen cents. He exercised as much care in selecting his stock of low-priced goods as he did in selecting tools, cutlery, or any other more expensive lines.

You often hear retailers say that it is impossible to secure good goods to retail at such prices, but such is not the case. There are in Canada to-day hundreds of firms, some manufacturers and some importers, who have an endless variety of small household utensils which the careful buyer can secure if he only keeps his eyes open. Too many retailers are inclined to pass-up the traveller who is showing a line of what might be termed novelties or specialties, but who in reality has a line of leaders which if purchased at the right price and featured in the proper manner would prove a boon in securing new customers. An occasional window display of low-priced kitchen utensils is almost sure to secure new customers for a store. If you get the public going to your store for small items, you can rest assured that if the small wants are properly looked after you will soon secure orders for the larger items.

The accompanying illustration shows an attractively arranged window display of enamel and aluminum ware kitchen specialties which appeared in the show window of a western firm. Any article in the window was offered at fifteen cents.

An effective "fifteen-cent" window featuring aluminum and enamelware household utensils.

Supplying the Needs of Autoists

Western Canada Hardware Merchants Have Been Quick to Take up the Auto-Accessory Line—Easterners Are Falling in Line.

THE question of the advisability of carrying a side line of auto accessories is one that is arousing considerable interest throughout the hardware trade. Investigation has determined that the hardwaremen of the western provinces have taken to selling this line more generally than eastern dealers, although the latter, spurred on by the successes of others, are beginning to more fully realize the benefits of such a line.

As an illustration of how adaptable a line this is, it might not be amiss to point out that merchants in many lines of trade other than hardware have added auto accessories to their stock. Wm. McConnell, grocer, of Harriston, Ont.; J. A. Cappell, druggist, Elora, Ont.; J. E. Smith & Co., implement dealer, Orangeville, Ont.; H. Wilson & Son, music store, Gananoque, offer examples of the truth of this remark. J. E. Mosley, of Huntsville; E. A. Button, of Stouffville; J. Chalmers, of Palmerston, and A. A. Sinclair, of Paisley, are a few of the Ontario hardwaremen who have taken up this line.

Of all other lines, the implement business vies with hardware as being the most natural one to absorb a line of auto accessories. This is so true that many implement men have been ready to turn the fact to their pecuniary advantage.

It is to be presumed that our hardwaremen are fully as enterprising as the implement dealers, so that there is no doubt that they can as easily make a success in this field as the latter.

There are three alternatives for the prospective dealer to consider. He may become an authorized agent and get his commission direct from the auto company for the sale of their autos and parts; or he may effect the same result, but probably at a lesser profit through the company's near-by dealer; or, again, he may be a free lance, and instead of holding an agency for one make of car, its necessary working parts and a line of universally used accessories on the side, he may concentrate his attention on the accessories alone, and so be able to fill the needs of the majority of cars.

If the first plan should be chosen, the matter of deciding between the carrying of an agency for a much used line like Fords, or of some other line in which the sales are less frequent, but the individual profit greater, would necessarily come up. The Ford Company offers the dealer a widely-advertised line for which there is a constant demand, but in the security of their own position offer a smaller profit for individual sales than do other manufacturers. Their authorized agents receive from them a discount of 20 per cent. on their working parts, such as gears, valves, springs, etc. But in order to become their agent the dealer must also arrange to sell their cars. In addition to these strictly Ford parts, however, the dealer may carry standardized accessories that are manufactured by a score of companies. The profits on inner tubing, shock absorbers, lamps, cotter pins, horns, tires, spark plugs, gauges, and a score of other and similar articles are very large, and carry with them in their purchase no restrictions of any kind. These articles are adaptable to the use of almost any car that is used in Canada. The larger and more expensive items of this proposed stock need not be purchased until sold; that is, they may be ordered from the jobber or manufacturer when needed, as it will be found that the car maker is seldom in a great hurry for such items as tires, inner tubing, etc., for they are so vital a part of the car's equipment that he usually a small reserve stock of his own on hand, and buys to keep his own stock up to standard. A car owner cannot afford to be caught napping with an exploded tire or a shortage of any very necessary part in reserve when he meets with an accident, and this fact tends greatly to the dealer's profit, as it forces the owner to tie his money up in articles that the dealer would otherwise have to carry. This is a fact that cannot be too strongly emphasized, and is worthy of the most serious consideration of any hardware dealer who hesitates to go to the additional expense of adding another line to what may already be an overburdened and top-heavy stock.

Of the three plans suggested, the second is simply a modest replica of the first; the only difference being that the prospective dealer must deal with an authorized agent of the auto company, who already has the rights for that district instead of directly with the company itself. It is to be presumed that he would have to be content with a smaller profit under these circumstances as the original agent would most likely insist upon a small percentage for himself. The case of A. A. Sinclair of Paisley, Ont., may be cited as that of one who holds a sub-agency for cars and carries in addition a general line of accessories. J. E. Mosley, of Huntsville, on the other hand, does his business direct with the car manufacturers.

The third and last case is that of the man who dispenses with the selling agency of the car or any working parts that can only be used on one make of car, and instead concentrates his attention on what might be called the universal lines: those that may be used on any car, or, if some particular make of part that sells frequently and at a good profit will not go into all cars, the dealer is as free to order the make of part wanted to fill a special order as he is to send in for a make of razors or shovels in order that he may fill some special order.

J. Chalmer, of Palmerston, offers a good illustration of the practicability of this last plan, for he deals in the universal accessories only, and buys from a number of firms. In his case, the presence of a garage in the town merely lessens his sales. Its presence there does not injure him materially.

It has been found that most of those who are already in the business went into it while there were very few autos in their towns, so that their business has grown with and in fact exceeded, that of the number of cars near them. This fact should be borne in mind by the man who hesitates to go after this new trade on account of the fact that there are only a few autos in his vicinity. The number of autos in active use is increasing amazingly and it should always be borne in mind that such a good field of endeavor as this is will not long continue to be in such a condition as at present, where it is any man's for the asking.

DESIRE TO CONTRACT.

Cleveland, Ohio. July 2.—The Iron Trade Review to-day says:

Agricultural implement manufacturers are showing greater desire to contract for their steel bar requirements and are doing their best to get a price of 1.10c, Pittsburgh, on annual contracts. Mills are, however, resisting the granting of this price, except on material for prompt shipment. On 700 tons required atToledo for prompt shipment, the 1.10c price was made by several mills.

Foundries are actively contracting for their coke requirements, in some cases for six months and in other cases for a year.

The closing of sheet mills on account of the failure to agree on a new wage scale may have an important effect on the market if continued for any considerable length of time. Bar iron mills are closed pending adjustment of the wage controversy.

Scarcity of Capable Builders' Hardware Salesmen

Retail Salesmen Who Can Figure on Specifications Are Scarce—Some Positions Are Being Filled by Men Who Are More or Less Incompetent.

Written for Hardware and Metal by Chas. Myers.

WE sat down in a deep lounge in the hotel rotunda, the builders' hardware expert and I. Perhaps you know him. No doubt you hold your specifications so that he may figure on them. He knows builders' hardware from A to Z.

And after we had taken long puffs at our cigars, the talk turned on the number of men in Western Canada who could sell builders' hardware intelligently. Nelson named two between Winnipeg and Calgary. All the rest, he said, only had an imperfect knowledge of the business.

"There's a reason," he added, shaking the ash from his cigar. "Take the young hardware clerk of to-day. He makes inquiries in the various departments to find out which it pays to specialize. The man in the cutlery department, he finds, gets good pay. Those in the paint dept., he finds, do fairly well, after gaining a working knowledge. The household supplies section is too overcrowded. Too many think they can sell stoves, refrigerators, etc. On going to the builders' hardware department, the manager there tells him, 'Well, old boy, I've been in here nine years, and I'm still learning. There's a lot to learn before you can sell builders' hardware.' Then the lad thinks of the grocery clerk across the way—who is drawing a good salary after two years' experience, and he decides against builders' hardware. That's why there are so few salesmen in this line to-day.

Good Men Wanted.

"They're wanted," he went on, after a few minutes' silence; "and I could name you a dozen big stores in Canada to-day who are looking for good men in this line. Some of the good positions are being filled by men who are more or less incompetent, who send their specifications away to be figured on. One of the chief troubles is that so little has been written about this department. It is one of the most important in the hardware business, and least is known about it. It's a great pity, for you know that unless a man understands the article he is selling, unless he has implicit faith in it and knows why it will give satisfaction, he cannot succeed in selling it. When you are selling advertising space in Hardware and Metal, you know why it will pay a manufacturer to use it. The same with the builders' hardware clerk. He must know what he is selling, or he cannot succeed."

Mr. Nelson produced a specification for builders' hardware on a building, which a customer had held until his arrival. "See that," he said, pointing to one of the items. "I sent down to a local hardware store to get a price on that one article, and the clerk threw up his hands, and admitted he was at sea when dealing with these things. I have all this figuring to do wherever I go."

"Since you have such a thorough grasp of the business," I said, "you might tell me where you secured it. Readers of Hardware and Metal are always willing to learn."

Nelson laughed heartily, shook the ashes from his cigar again, and nestled deeper into the lounge. When he began to speak again, it was in deep, serious tones.

Grocery to Hardware.

"I used to work in a grocery store in a Western town," he began. "It was a high-class store, and here I learned the art of salesmanship. My father-in-law was in business in the same town, only his was a hardware store. One day he offered to take me in as a member of the firm, and I accepted the offer.

"It was little I knew about hardware, but I had learned to sell, and it wasn't long before I was quite at home, selling washing machines, fly swatters, stove pipe and such like. I studied each line thoroughly, learned what it was for, and worked up a selling talk for each line. One day I decided to tackle builders' hardware. The man in charge said, 'You're running your head into something hard. A man requires to know a vast amount before he can handle that line.' I told him I knew that, and the same applied to him. He did not have the time to attend to it thoroughly, whereas I was willing to give it my whole attention. So he handed it over.

How He Learned.

"Now this is where I learned to sell builders' hardware. There is no royal road. First I took home the catalogues and studied them as I would a book on philosophy. The various sizes and shapes of each piece were memorized, and I found what each article was used for by reading the description which always accompany the illustrations. I got as many books as I could on the subject and read them, but I want to tell you that I learned how to sell builders' hardware by studying the catalogues, and applying the knowledge gained when in the store.

"One day, a hardware manufacturer visited our town in connection with a meeting of the Board of Trade. Speaking at a banquet, he mentioned builders' hardware, declaring that there were only two men in that province who could sell it. He gave the names, and by gosh, mine was one of them. Here I had been selling builders' hardware for two years, and was held up as a paragon.

Out of a Job.

"However, through bad management, which was no fault of mine, the business lost money, and eventually was sold, leaving me without a dollar in the world. There was nothing to do but to look out for work, so I wrote a note to the manufacturer of builders' hardware, simply saying, 'Dear sirs, as you know, I am no longer in business; what can you offer me?'

"I got a reply immediately, telling me to go to the head office. I was later sent to the factory, and the manager was instructed to give me something to do. He produced a catalogue and started to quizz me about builders' hardware. In the middle of this, the manager's assistant interrupted, saying: 'I hope you'll excuse me butting in, sir, but that man knows as much about builders' hardware as we do. Don't you remember me drawing your attention to a certain customer's orders which came in with the numbers of the lines he required, instead of a description of them as the others did, thus saving us lots of trouble? Well, this is the man.' The manager closed the catalogue at once, and sent me out on the road. My first assignment was a pretty tough proposition, but I got the business. I've been selling builders' hardware ever since."

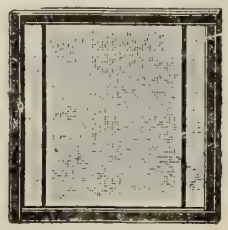
WHAT NAME?

He was pompous and overbearing, but he was a customer who should have been well known to every clerk in the house through the frequency of his calls and the extent of his purchases. The junior clerk took the order and then, "What name, please?" as politely as could be.

"What name?" the other fumed. "Me buying here all this time and you ask me, "what name," and turned and stalked out.

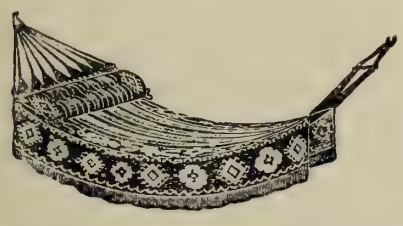
An Advertising Suggestion:

Proposed Lay-out for Summer Goods Advertisement

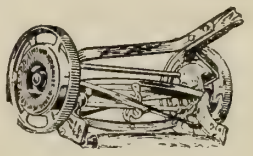


The following advertising suggestion has been prepared for use by retail hardwaremen. By changing the firm name and address, and inserting prevailing quotations the advertisement can be used by any retail firm. The electros used have been selected from the assortment offered by Hardware and Metal Electro Service, featured elsewhere in this issue.

Hardware Supplies for Summer Use



This advertisement is for the men and women who are, or should be interested in the seasonable and useful goods that can be found in an up-to-date hardware store—a store that studies the needs of its customers and selects its stock accordingly. The goods featured in this advertisement are seasonable, serviceable and reasonable in price.



You may not know that it is possible to secure small cans of paint specialties suitable for painting or staining old and worn refrigerators, verandah chairs, flower bed guards, gas ranges, stove pipes, bath tubs, porch floors, baby carriages, hanging flower baskets, verandah shades, flower boxes, etc. You can make the old things look like new. How about the food chamber of your refrigerator? We have a nice, white enamel for the purpose.

You cannot exterminate the fly pest, but you can do a great deal to keep the flies out of your home—and still admit the fresh air—if your doors and windows are equipped with screens. Bear in mind that the cheapest in price are not always the cheapest in the end. We have screen doors and windows at prices to suit all pockets, but would like to show you the samples we have on display. Be sure and measure your doors and windows, then call and see us, or phone your order: Screens from **15c to 50c each**; **Doors from $1 to $2 each.**

A Hammock that carries weight is the kind you expect to buy—but it is a good plan not to overlook the other important features in connection with a first-class hammock,—size—quality of material—color and lasting qualities are essentials, and in a good hammock are interwoven. The above qualifications are possessed by the hammocks we offer you at prices ranging from **$2.50** to **$5** each.

Cutting Grass is hard work if your lawn mower is a poor one—but there is a considerable degree of pleasure and satisfaction in grooming the lawn if your mower is one that runs easily, can be adjusted to cut evenly and at any desired length, and in addition carries the guarantee of a reliable maker. The mowers we offer you have the good features above mentioned—and more—they are reasonable in price: Range from **$4.75** to **$18.00.**

WATSON & CLARK

120 Main St. Phone 15. COMITON, ONT.

Advances Made in Early Closing

Not Only Are Merchants in the Larger Centres Tending This Way But Also Those in Smaller Places—Working Hours Being Cut Down to Permit of Some Recreation.

LIKE the wave in favor of a half holiday every week that has been advancing so rapidly during the past few years, there is also a rapid development towards earlier closing. Many of the merchants in the larger centres, and in the main streets particularly, have, of course, been cutting down working hours during recent years, but of late we see a popular note in its favor from the trade in the smaller places.

From the following list of Ontario towns will be seen the trend of the times in this regard:

ALEXANDRIA.—Close at 8 p.m. five nights, except June, July and August, when they close at 6.30.

AMHERSTBURG.—Close every night at 6 o'clock, except Saturday.

ALLISTON.—At 6 p.m. Monday, Wednesday and Friday.

ALVINSTON.—At 6 p.m. three nights a week.

ATWOOD.—At 6 p.m. on Monday, Wednesday and Friday.

BANCROFT—At 6 o'clock Monday, Wednesday and Friday.

BEAVERTON.—At 6 p.m., except Wednesday and Saturday.

BRIGDEN.—Close at six o'clock every night, except Saturday.

BRIDGEBURG.—At 7 p.m., with the usual exceptions.

CALLENDER.—At 6 p.m. Monday, Wednesday and Friday.

CARLETON PLACE. — Most merchants close at 6 p.m. Monday, Wednesday and Friday.

CARDINAL.—At 7 p.m. three nights a week.

CHESTERVILLE.—At 6 p.m. Monday, Wednesday and Friday, and at 8 p.m. Tuesday and Thursday.

CAYUGA.—At 6 p.m. except Wednesday and Saturday.

DORCHESTER.—All stores close one night a week at seven o'clock.

DRESDEN.—At 6 p.m. Monday, Wednesday and Friday.

ERIN (Wellington City). — Close Tuesday and Friday at seven o'clock year round, with usual exceptions.

ELK LAKE.—Close at six o'clock Wednesdays and Fridays from June to October.

ELMVALE.—At 6 p.m. Monday, Wednesday and Friday.

FORDWICH.—Close early Mondays, Wednesdays and Fridays.

FINGAL—At 7 o'clock on Tuesday and Friday from June 16 to August.

FINCH.—At 7 p.m., except Wednesday and Saturday.

GRIMSBY.—Close at 6 p.m. every day, except Saturday and days before holidays.

GRAND VALLEY.—Close at six o'clock, except Wednesday and Saturday.

HUMBERSTONE. — Close at 6.30 p.m., except Saturdays and nights before holidays.

HAWKESBURY.—At seven o'clock Tuesdays and Fridays the year round.

JARVIS.—Close at 6.30, except Wednesdays and Saturdays.

KINCARDINE.—Close at 6.30 during summer months.

LANCASTER.—Close at 7 p.m. Tuesdays and Fridays.

LANARK.—Close at 6 p.m. Monday, Wednesday and Friday.

LINDSAY.—At 5 o'clock each evening except Saturday during summer months beginning June 15.

L'ORIGINAL.—Early closing twice a week.

MANITOWANING.—At 7 p.m., except Wednesday and Saturday, during May, June, July, August and September.

ORONO.—Closes early every other night.

PORT ELGIN.—Six o'clock the year round, and 10.30 preceding holidays.

ROCKLAND.—6 p.m. Tuesdays and Fridays by city by-law.

SIMCOE.—6.30 p.m. Monday, Wednesday and Friday, except on 10th or 15th of month, or preceding a holiday.

STAYNER.—6 p.m., except Saturday.

STANFIELD. — 6.30 p.m. Monday, Wednesday and Friday.

SUDBURY.—All stores close not later than 7 p.m.

WIARTON.—Close every evening at six o'clock, with usual exceptions.

WESTPORT.—Close Tuesdays and Fridays at 6 p.m.

WINCHESTER.—Close at 6 p.m. five nights a week.

TEAM WORK BY MERCHANT AND FARMER.

(Continued from page 39.)

when we go to him to trade for groceries."

"Well, that's got nothing to do with me," said Walker in an aggrieved tone.

"Nothing to do with you," Avery flung out: "Why, it's got everything in the world to do with you. If a farmer's wife drives in ten miles to do some trading and gets eighteen cents for eggs that MacLean turns around and sells here in town for twenty-eight; she's not only going to get sore on MacLean, but on you and on Sampson and every merchant in this town. Do you know what the commonly expressed opinion amongst the farmers generally is about the merchants of this town"

"No, I can't say that I do," answered Walker.

"Well, I'll tell you. It's this. They figure that you are a bunch of robbers, that you try to work us coming and going. Some of you underpay us when we sell and you all complain if we go elsewhere to buy. Why," he added disgustedly, "there's the greatest chance in the world here for you fellows if you could only see which side your bread was buttered on."

"What do you mean?" asked Walker.

"Simply this: get together, not only you merchants, but everybody; go in for team work and help one another."

"See here," said Walker, "If I take this thing up amongst the merchants and all the customers that we may see, will you give it a boost around the country so that we can call a mass meeting and get right down into the heart of the trouble?"

"I sure will," and the two men shook hands.

The conversion of that town and the surrounding country dated from that day. The mass meeting lasted far into the night and resulted in both farmers and merchants airing their grievances and in shedding the light of publicity on old abuses. A temporary committee that was composed of farmers, townspeople and merchants was appointed to draft a set of resolutions that should embody in them the spirit of the inquiry that was to be instituted. The final result was a sweeping survey of local conditions that had to do with a large number of things that concerned the welfare of the community.

The merchants started the co-operative ball to rolling by publicly pledging themselves to buy from one another at home in preference to an outside point as long as home prices were at all fair. They further pledged themselves to paying the highest possible price to the farmers for their produce.

A kind of informal association or Board of Trade was then formed; but instead of keeping the farmers out as is usually done, the merchants eagerly welcomed them as members. An enterprising clerk of Walker Bros. was voted secretary at a moderate salary and he devoted most of his evenings to welfare work for the community. Through his efforts it was arranged that a Toronto commission house should take all of

(Continued on page 55.)

How to Develop Four-Piece Tapered Elbow

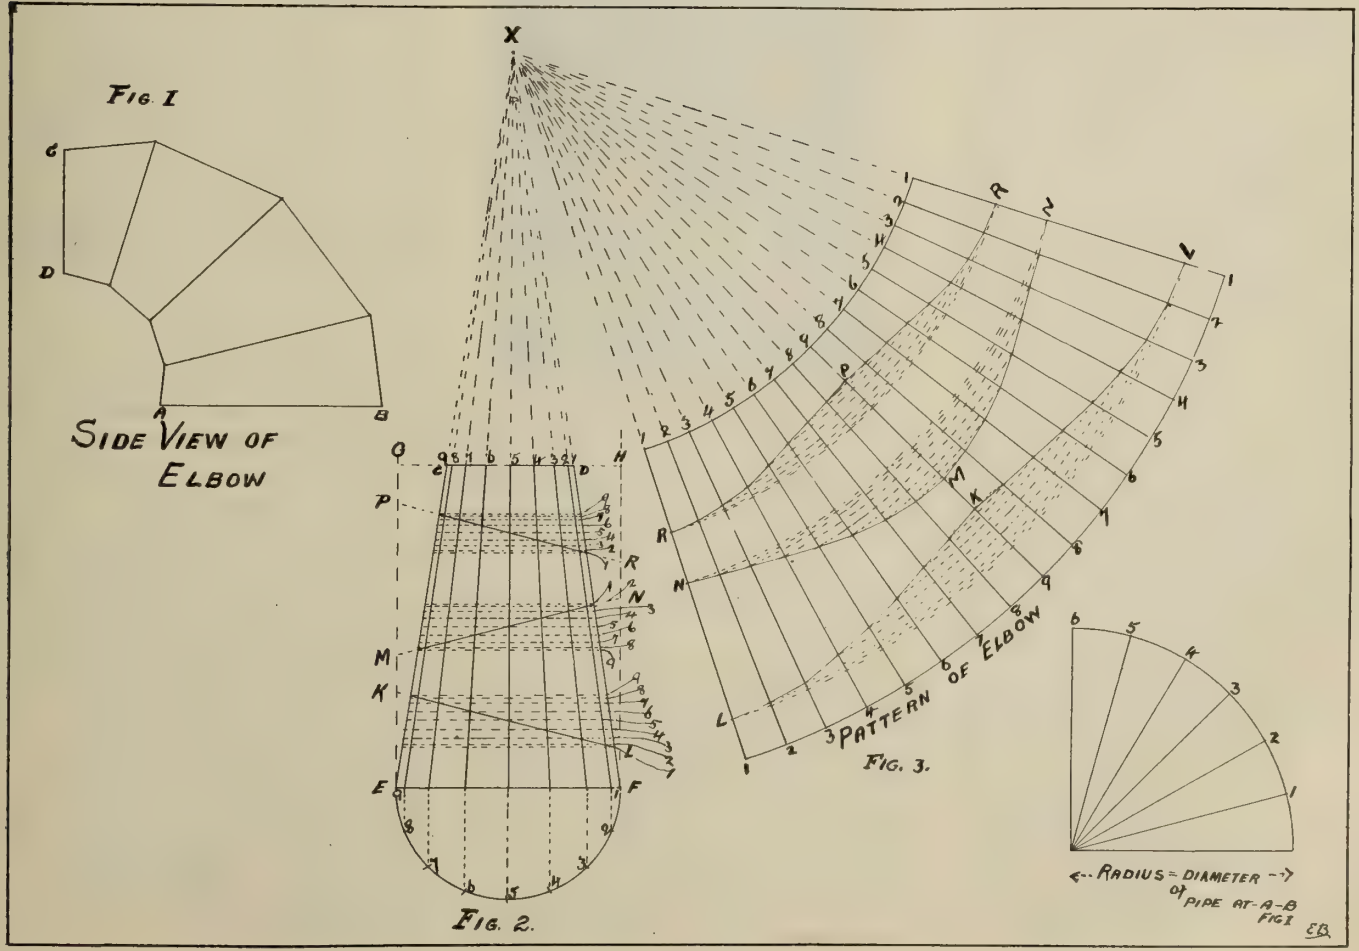
Sheet Metal Problem Showing How to Develop a Four-Piece Tapered Elbow, the Taper Running Straight Through the Elbow.

By E. Newton.

TINSHOPS.

IN the problem presented here we show how to develop a 4-pieced tapered elbow, the taper being straight through the elbow. Such being the case, the pattern required is a section of a cone. To lay out and cut the pattern proceed as follows:—In Fig. 1 we show a side elevation of elbow when completed. Draw a straight line as shown in E F, length being equal to A B in Fig. 1. From E and F and at right angles to E F erect two lines any length, as shown by dotted lines in Fig. 2. This will form an elevation of a straight pipe, the diameter of the large end of the elbow. On this elevation as shown by G, E, H, and F, mark off the sections of a four-pieced elbow, as shown by lines K, L, M, N, and P R. At the end of elbow as laid out and from the center between G and H mark off the diameter of the small end of the elbow, as C D in Fig. 1. Connect points E and F to C and D on line G H continuing lines until they meet at point X, their union making an elevation of the cone complete. On the base of cone E F draw a half circle, with dividers or compasses, and divide into a number of equal parts.

Placing side of square on line E F, connect points or divisions in half circle to base line E F. Connect points thus obtained on line E F to point or apex of cone intersecting the lines K-L, M-N and P-R. At right angles to G-E or H-F draw lines through the intersection of the lines P-R, M-N and K-L with the lines numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, continuing them through until they meet the outside line of the cone, as C-E or D-F.



With X as a center and X-F as a radius strike an arc, running it out some distance. From point X draw a line cutting arc as in line X-1 in Fig. 3. Beginning at point 1, lay out a strechout of base of cone as shown by divisions 1 to 9 on the half circle. Connect points of divisions on large arc to point X. Number these lines to correspond with lines at base of cone.

Using X as a center, make the various arcs from the points at side of cone, the arc from 1 being marked on line 1, from 2 on line 2, from 3 on line 3, and repeating until all the lines on the stretchout are bisected by an arc drawn from corresponding number at side of cone. A line drawn through the intersections will give the lines K-L, M-N and P-R on pattern.

In Fig. 4 is shown the division of a quarter circle into the required number of parts to give pitch for a four-pieced elbow.

HOW MANY?

How many clerks endeavor to do some of the customer's thinking by suggesting to him the purchase of a saw after he has bought a hammer; a glass-cutter after he has bought some points; in short, one of the many co-related articles of any one group of accessories?

Junior Clerk's Page

A FEW TIPS.

THE large majority of hardware clerks are ambitious. Some wish to become proprietors of hardware stores, others wish to enter the manufacturing field, and it is a safe bet that at some time or other in his career every junior clerk is fired with the ambition to secure a road job to become a traveler. In looking back through the "Current News" pages of Hardware and Metal for the past year, we find that a large number of traveling salesmen have been selected from the ranks of the retail salesmen in retail hardware stores. For the benefit of those who are contemplating joining the traveling fraternity, it might be advisable to point out a few of the pitfalls into which the new traveler sometimes falls thoughtlessly.

A salesman for a paint and wallpaper house dropped into a decorator's store and after a very able opening in which he praised his firm's style and variety in paints and papers, caught sight of a pattern book which showed signs of having had considerable wear lying on the counter. Possibly thinking he had been inspired with a good idea he moved along a few steps, rapped the book with his knuckles, opened and turned over a page or two and said, "This is a very shabby book for you to show your customers—let me send you our latest book of patterns."

"Yes, I agree with you; it is a dirty looking affair," said the dealer, "but it is two years old. I got it out to-day merely to make sure of a number of a pattern which a customer bought of me some time ago and now wants to order a similar pattern. I have just mailed a letter to see if the firm has any of it left. These books you see up on that desk are not dirty though."

The dealer resented the remark and his emphasis on the fact that he had clean and up-to-date books on his desk showed the salesman pretty clearly his error. He apologized, but the favorable impression that he had at first created vanished with the retort of the dealer. A sure sale was lost in this instance through the injudicious remark. The offer of a new book of patterns could have been made without any reference to the dirty condition of the one on the counter.

A salesman for a cutlery and specialty house lost for his house a customer of many years standing through a somewhat similar error. On his first trip on the road he was given a territory left vacant by one of the regular salesmen quitting. Consequently it should have been plain sailing—but it proved otherwise—at least in one instance. At one store, owned by a Scotchman who had traded with the house for several years, the salesman in displaying certain lines of goods cast his eye critically round the store and said, "If you had some decent showcases instead of those things you have there you would have a chance to move this stuff much quicker." Following a remark by the storekeeper that he had made all his business with "these things," the salesman went into a lengthy harangue on the benefits of showcases until he was suddenly pulled up by the storekeeper asking, "Are you selling showcases or what?" The storekeeper betrayed visible annoyance and the young salesman left the store minus the order—but doubtless considerably enlightened in the effects of such methods.

"Do you know that I have not got any business from you for several trips?" is the remark of one salesman who tries the "injured air" to get orders. Of course such a practice can only be made when the customer has bought many times before. But whatever or whenever it may be used it is a poor policy as this salesman eventually found out when a retailer who occasionally handed the salesman a nice fat order exclaimed, "I neither know or care when you got your last order. I buy to suit myself and not salesmen."

Such tactics are weak. The salesman places himself for consideration, rather than his goods. Even in cases where the best of friendship exists between customer and salesman it is not advisable. It may be said at that psychological moment when the customer would express himself similarly to anyone. Such a remark would not bear fruit if the customer was worried or "on edge."

A habit that one salesman fell into, one that really made him more agreeable to the people he called on—and only affected his sales record—was that of assisting prospects too quickly out of their verbal difficulties. It may be polite to assist a customer or prospect in coining the word or words they are trying to recall, but it is not always conducive to business. Nor is it part of the salesman's duty to help customers explain why they will not buy.

The salesman in question finding that he was falling down on his canvass more quickly and more frequently, wondered at first and then searched for the cause. He could not fathom the reason, but determined to watch and remember every move he made till he found out if he was to blame or his goods. A dealer he called on claimed that right at that moment he had too many accounts running and that he only did a limited amount of business. "Well, Mr. Smith, you don't think it worth while splitting up then?" was the remark made by the salesman and the answer of the dealer, "No, I don't," fitted in so easily that the salesman saw in a flash just where he had been falling down so frequently. He had been helping in one way or another by such suggestive phrases to turn down the business in the easiest possible manner. One of the main points in salesmanship is getting the prospect to answer the way the salesman wants him to—getting the admission—but in this case the salesman instead of making it hard for the customer to turn the goods down he made it easy.

"I think I had better put you such and such a line in, Mr. Blank," said the traveler for a large concern after a rather patronizing discussion. "Pardon me, Mr. Smith, but I do my own thinking and up to the present I seem to have done it pretty well," answered the dealer. "Oh, then you don't think my experience and knowledge of this class of business superior to yours?" queried the traveler. Now whatever the dealer thought about this remark, for or against, it was obvious that if he made the admission he would have to stock up a line he did not want and so he bluntly asserted in the negative.

Current News

Death of C. P. Geary.

St. Thomas, Ont.—The death occurred recently of Chas. P. Geary, local manager of the Queen City Oil Co.

Dominion Incorporations.

Imperial Waste and Metal Co., capitalized at $50,000, head office Montreal, to deal in all kinds of metals.

Du Pont Safety Powder Co. of Canada, Ltd., capitalized at $2,000,000, head office Montreal, to manufacture and deal in explosives.

Addition to McClary's Plant.

McClary's Stove Works, London, Ont., have commenced work on a 340 x 80 ft. addition to their foundry plant, at the south end. This addition is in the shape of an extra storey to their extensive mounting shop, which is found necessary. The addition will cost $25,000.

Ontario Incorporations.

The Ontario Concrete Post Co., Ltd., capitalized at $40,000, head office Brantford, to manufacture and deal in concrete posts, etc.

Ford City Metal Products Co., capitalized at $100,000, head office Ford City, to manufacture and deal in metal products.

New Firms.

Point Aux Trembles, Que.—Latendresse & Fils, hardware, have registered.

Business Changes.

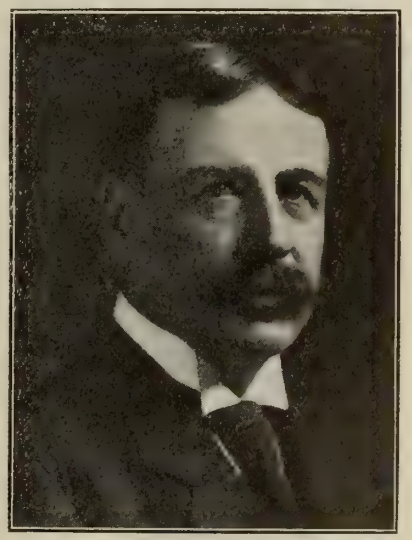
Strathroy, Ont.—A. Lawson, dealer in tinware, has sold out and moved to Sarnia.

Fire Losses.

Montreal, Que.—A. E. Cote, hardware establishment has been burned out.

Brockville, Ont.—The planing mill of the Jas. Smart Manufacturing Co. was destroyed by fire.

Personals.



E. R. Grobb, of the London Foundry Co., was in Winnipeg last week on business.

Geo. E. McCosh of Brock Sask., left for Toronto this week, the object being matrimony.

Among those recently elected to the Ontario Legislature are J. H. Ham of Ham & Nott, Brantford; Thos. Marshall of Congdon & Marshall, Dunnville; F. H. Hall, of the Hall, Zryd Co., Hespeler.

J. H. Aldstaetter, representative of the American Metal Polish Co., of West Somerville, Mass., who was recently seriously injured by being thrown from a street car, has been removed to his home in Philadelphia.

J. P. Lacroix, St. Lin; J. S. Thinkess, Hallville; Munro Bros., Monkland; Mr. Desy, of Phoenix & Desy, Hawkesbury; J. S. Messier, Varenne; J. F. Crepin, Chateauguay; J. O. J. Dufresne, Nicolet and J. P. Lalonde, St. Bruno, were among the out-of-town buyers in Montreal this week.

E. W. CHARLTON

Recently promoted to sales management of Quebec division, Brandram-Henderson, Ltd.

H. L. Brainerd, of Brainerd Manufacturing Co., East Rochester, N.Y.; C. E. McLaughlin, of Oneida Community, Ltd., Oneida, N.Y.; Edwin Moore, president of the Moore Push-Pin Co., Philadelphia; Mr. Dingay, of Henry Disston & Sons, Toronto; and A. E. Kinsley, sales manager of Oneida Game Trap Co., Inc., Oneida, N.Y., were calling on the trade in Montreal this week.

CENSUS OF STORE CO-OPERATION.

(Continued from page 37.)

quality had its exponent in some one or more of the stores visited, and that there was no outright lack of attention, but rather a lack of aggressiveness in some one or more departments. If the good features of all those stores could have been combined, it would have been found that what one store lacked the other possessed and vice versa. In short, it is evident from this table that with one exception each store centralized its efforts on one or more departments to the detriment of the remainder, instead of retaining a well-balanced scheme of co-operation. In some cases a store that had an excellent window trim was found to have a very poor arrangement of stock inside. In one case an extremely poor window hid an excellent interior. Again, a good combination of both was offset by a lack of interest in the salesman.

I found that the human element made the greatest impression on me; that is, upon entering a nice-looking store, the effect of it was lost upon me if I met a slovenly salesman and inversely; if, in a musty-looking store I was approached by a good salesman, I was apt to lose sight of the appearance of the store.

Undoubtedly the upstanding feature of this investigation was the lamentable lack of co-operation that it showed between windows, interiors and salesmen. It was found, though, that there was more apt to be a good salesman in the nice-looking store than in the other kind, due no doubt to the fact that the latter reflects its owner and reacts on the men inside to a greater or less extent, which merely goes to prove again that, whether good, bad or indifferent, the store appearance and sales results are, when all is said and done, in direct proportion to the initiative, ingenuity and love of work that inspires the men inside.

Observing Half Holiday.

The merchants of Prescott, Ont., are observing the weekly half holiday during July and August, and are closing on Wednesday afternoons.

New Hardware Goods

Offered Canadian Hardwaremen

Mail Box Display Stands.

The Peck-Hamre Mfg. Co., of Berlin, Wis., U.S., offers a new display stand for mail boxes. It consists of a revolving pyramid display stand that is offered free with any order of medium size in the same line. The manufacturers

New display stand for mail box.

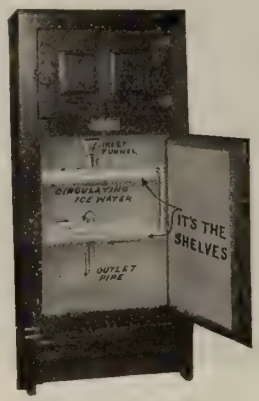
claim that it enables the dealer to exhibit the different finishes and designs of this firm to much greater advantage than is possible without it. It displays eight boxes, two on a side, four of which are shown in the accompanying cut.

A Hot Sparker Battery.

The Canadian Carbon Company, Ltd., of 96 West King St., Toronto, offers the

Hot sparker battery with sealed connections.

trade a new hot sparker battery. The manufacturers claim that their article will give no trouble from loose connections between the cells in the dry battery, as their connections are claimed to be solidly sealed.



Efficiency Cold Radiator System.

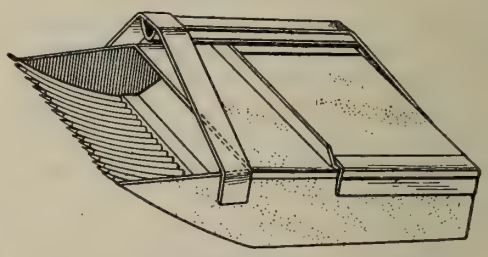
The Efficiency Metal Products Company, Inc., Candler Bldg., 220 West Forty-second Street, New York, U.S., is offering a new cold radiator system. It is made of rectangular shaped metal tubes that the enameled in white, and is made to serve as shelves, racks, etc., for cooling compartments in rooms, refrigerators, etc.

The system operates by the tube shelves catching the drip of the melted ice above and circulates it, thus utilizing what was formerly a waste by-product.

The ice water retains the cold, evens the temperature, increases refrigeration, aids sanitation, saves ice, simplifies the care of the refrigerator and produces the best results without further cost, the company claims.

The company's water chest placed in the ice compartment, enables the use of

Showing tube shelves of new radiation system.



cold water instead of ice in the refrigerator during the winter and spring months, when water is naturally very cold. This makes the system an all year round business and increases the saving on ice bills to a very large extent, especially in private families and business houses. The circulation of cold water in these hollow metal shelves creates, the company claims, an ideal condition in the food compartment of the refrigerator.

This ice water shelving can be installed in any refrigerator, old or new, small or large, commercial or household, at a very moderate cost.

Chemicals, salt or ammonia are not used in this process.

Huckleberry Picker.

The accompanying illustration shows the "Mary Jane Frances Huckleberry Picker," which is being manufactured in Canada by Christie Bros., Owen Sound. It is claimed that with this

Huckleberry Picker.

picker 2½ bushels of huckleberries can be gathered in one hour. The pickers are made in small and large sizes. The small pickers will be tried out this season for picking currants, gooseberries, cherries, etc.

STREAMERS FOR WINDOW ADVEERTISING.

Sarnia, Ont.—Tersely-worded window streamers are coming into general use among merchants here, particularly for the purpose of calling attention to special and timely offerings.

The streamer, which appears to have originated with the soda fountain people, is usually a narrow, oblong strip of paper, pasted up inside the window. White paper with blue lettering and the price in red is a popular color scheme, though other colors have been advantageously used. As a rule the streamer merely gives the name and price of some "special offering," though other information can be given. Occasionally pennant-shaped pieces of paper are used, though oblong strips 3 x 24 inches are the rule.

The use of the streamers, of which the ordinary window will accommodate anywhere from a dozen to a score, does not interfere materially with the window display proper. Merchants who have used them state that they are more effective than ordinary show cards, while less expensive, since ordinary white wrapping paper can be used in making them. The remainder of the equipment consists of a set of small brushes and two or three different colors of suitable ink.

Weekly Market Reports

Statements From Buying Centres

THE MARKETS AT A GLANCE.

The general condition of business remains unchanged from last week, although the outlook for the future is brighter. The advent of mid-summer, the closing of schools and the Dominion Day holiday had a good effect on business in sporting goods and campers' supplies. Hardware jobbers report that June business was fair and can be favorably compared with the volume passing during the corresponding period of last year. The metal markets are practically unchanged and buying is still of a hand-to-mouth character. Quotations on most metals are low and considerable price shading is evident. Paint manufacturers state that trade with the retail hardwaremen is holding up well and that business so far this year is up to their expectations. The stove business is quiet at present, the principal demand being for summer stoves. Some good orders for furnaces are being placed. Hardware retailers are buying in small lots and often. Most of the goods ordered is required to fill immediate wants and retailers as well as jobbers are conservative in their buying. It is pretty generally admitted that retailers' stocks on hand are very light. The recent cold weather has had a bad effect on the sale of certain summer lines. If crops turn out as favorably as is anticipated at present, there should be a noticeable improvement in business during the fall. The most important price change during the week was the advance in the price of white lead reported in the paint markets. Wood screws as predicted by Hardware and Metal have advanced 5%. Some lines of woodenware and brushes have also advanced. Some manufacturers of builders' hardware have changed their terms of settlement and are now allowing 1% if payment is made not later than the 15th of the month following or sixty days net.

MONTREAL.

MONTREAL, July 2.—There has been a little improvement in business lately, especially from the farming districts. Though orders, in some cases, were below the mark last week, there was noticeable some improvement so that the total volume will probably average up well. The holiday this week has stimulated the demand for sporting and vacation goods, with both jobbers and retailers. There has been an exceptionally good demand this year for garden hose, sales with most of the jobbing houses showing a big increase over last year. One jobber in commenting on this remarked that he had noticed that when hose was selling freely there was not much demand for lawn mowers, and vice versa. This year the dry weather has made the demand for hose, whereas if there had been plenty of rain, lawn mowers might have sold better, as the grass would have been a factor to reckon with.

Screws and Nails.

In the market report of May 30 it was stated that screws were as cheap as they would be. There has been a feeling for some time that an advance was about due, and this week 5 per cent. advance was made in flat, round and oval head bright. Brass goods are not affected. The new discounts on "bright" are as follows:

Wood, F.H., bright, 85, 10 7½, 10, 5 per cent.; wood, R.H., bright, 80, 10, 7½, 10, 5 per cent.; O.H., bright, 80, 10, 7½, 10, 5 per cent. off list.

Nails are still quoted at $2.25 base, Montreal, for wire nails; and cut nails are $2.50 base, Montreal. Rivets and burrs are unchanged at discounts in current market quotations.

Stoves and Ranges.

Business in stoves has been rather on the quiet side lately, but this is expected at this time. Orders for fall are considered to be pretty well up to the mark. Gas stoves have been selling well and inquiries are being received for coal and wood ranges and heating stoves. There is also a good demand for hot air furnaces. One manufacturer reported having received an order from one firm in Toronto this week for 54 furnaces. Oil stoves are still being called for for country houses and camping.

Woodenware.

In addition to the lines of woodenware advanced as per last week's report, there was an advance this week in such lines as shoe, stove, scrub and clothes brushes and whisks, of 5 per cent., also another advance of 5 cents in the price of clothes pins. The advance in brushes is due to a large extent to the Mexican war and the shortage in the corn and rice root crops.

Metals.

Weakness still characterizes the metal markets and there has been practically no change from last week's quotations except a decline in solder. Quotations now are: Tin, 37½c; sheet zinc, $6.75 in casks and $7 in small lots; lead, $5.10; antimony, $8.50; spelter, $6, and copper, $16. Ingot brass, red, is 14c lb.; ingot brass, yellow, 13c lb.; wire solder, 23½c; half-and-half, 22½c, and wiping solder, 22c.

Bar Iron.

Market on bar iron is quiet and the quotation remains at $2.05 base, Montreal.

Lead and Lead Waste Pipe.

Quotations for lead and lead waste pipe are 7½ cents for the former and 9 cents for the latter, with discounts of 7½ per cent. Demand is fair and market has a firmer tendency in view of advances in pig lead.

Rope, Twine, Etc.

Demand for cordage lines of all kinds is improving and business compares favorably with last year at this time. Quotations are unchanged as follows: Pure Manila, 15c; British Manila, 11c; African hemp, 11c; sisal, 10½c; double lath yarn, 10¼c; single lath yarn, 9¾c. For binder twine the prices are: Best Manila, 650 feet to pound, 13½c; Manila, 600 ft., 11c; standard Manila, 550 ft., 9¾c; standard, 500 ft., 9¼c.

Wall Paper.

New samples of wallpaper are now being shown for next season. This is a line that is being handled more and more by hardware dealers here and they find it a profitable line to carry. The new patterns show a tendency to run to quieter colors and smaller figures.

TORONTO.

TORONTO, July 2.—Business in hardware lines varies from fair to quiet. The month just ended, although far from equaling the corresponding period of last year, shows more business than was anticipated in the early part of it, when the sale of spring lines first began to drop off. Paints and cordage are still the two best lines. Conditions in the steel trade are still uncertain and are more or less dependent upon United States action on the pending freight rate case.

Metals.

Metals are one of the quietest lines in the market. Buying is done in small quantities only. Half and half solder is still 23c. after its rise of last week. Tin is firm at 33½c. and copper at 15c. and lead at $5.15. Collections are fair, but owing to price-cutting tactics, profits are down to a low level. The lack of demand has caused considerable shading of prices in order that orders might be secured.

Other prices are as follows:—Antimony, 8¾c to 9c lb.; zinc, 5½c per lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 12c to 14c lb.; half-and-half solder, 23c lb.; pattern aluminum, 22c to 24c; ingot aluminum, 18½c to 19½c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 21¾c lb.; wire solder, 26c lb.; tinkers' bar solder, 27c lb.; lead wool, 8c lb.; spelter, $5.50 per cwt.

Nails, Screws, and Rivets.

Nails are unchanged and in small demand at $2.25 base for wire nails and $2.70 base for cut nails. There has been an advance of 5 per cent. in screws. Flat head, bright, are now quoted at 85, 10, 7½, 10 and 5 per cent.; round head, bright, at 80, 10, 7½, 10 and 5 per cent. Steel men still hope for advances in steel lines generally, but can do nothing but wait on events. The strongest single price factor at present is the expected decision of the United States Inter-State Commerce Commission regarding the asked-for advance in freight rates. If this is granted it is expected that the railroads will at once place large steel orders, which cannot fail to give an upward tendency to other steel lines as well. So firm is the American belief in a favorable decision that brokers have practically discounted a three per cent. advance already.

There is no change in rivets, ruling prices of which are as per current quotations.

Rope, Twine, Etc.

Cordage continues in fair demand and is probably one of the best sellers. Twine, hay fork rope, and other lowest lines are selling well. There have been no price changes during the last week except in that of raw jute, which has dropped off ten per cent. and which will only affect the soft fiber twines. The break came very suddenly and originated in the United States, where considerable price shading is going on as a result of a scarcity of orders. Pure Manila is still 15c base, British 11c, African hemp 11c, and Sisal 10½c.

Stoves.

Stoves remain in fair demand only, since their recent decrease in sales, but the promised warm weather should materially assist the further sale of oil and gas stoves. Manufacturers do not anticipate any continual heavy demand until next fall.

Summer Goods.

Refrigerators have fallen off in demand, but freezers are still selling well. Screen doors and other fly preventives and destroyers are selling well. Prices are unchanged in all of these goods and are as per current quotations.

Cement and Fire Brick.

Demand in cement continues good at $1.85. Fire brick at current market quotations is not in as good demand. The present day extension of municipal improvements has tended to keep demand in cement up, as it is used to such great advantage in the more common of public works.

Brass Goods, Iron Pipe, Etc.

These lines, while not showing a business equal to that of 1913, are nevertheless making a considerable monthly turnover without price cutting. There have been no changes this past week since the drop in galvanized iron. Ruling prices are as per current market quotations.

LONDON.

LONDON, Ont, July 2.—Retail hardware business is fairly good here this week, although the sale for hammocks, refrigerators, screen doors and screen windows is poor on account of cool weather.

The nearness of the summer holiday season has a tendency to make the retail merchant reduce quantities in ordering from the jobbers or factories.

Wood screws have advanced 5 per cent., making price: Flat head, bright, 85, 10, 7½, 10, 5 per cent.; Round head, bright, 80, 10, 7½, 10, 5 per cent.; Oval head, bright, ditto; Flat head, brass, 75, 10, 7½, 5 per cent.; Round head, brass, 70, 10, 7½, 5 per cent.

No change has taken place in quotations on nails, which are as follows: Wire, $2.25 base; cut, $2.70 base.

Travelers are endeavoring to secure fall booking of lanterns, horse blankets, sleighs, etc.

WINNIPEG.

WINNIPEG, July 2.—While orders have been almost entirely of the sorting variety during the past week, the fact yet remains that business for the most part has been satisfactory; one jobbing house is so fortunate as to have done a June's business which is very nearly a record with them. They are either some few dollars ahead or behind June of 1912, which has so far been the high water mark.

A little more careful figuring will be necessary before the effect standing with other Junes can be told. Of course, it is a fact that this year's business has been secured at a somewhat higher cost than that of June, 1912.

There also seems to be good evidence that larger buying is about to commence. Word from travelers indicates that dealers are beginning to talk of car-load lots. As the crops improve and the need of threshing supplies approaches, preparation for the heavier buying is being made.

Fall Rush May Mean Delays.

It is becoming apparent that there will be a heavy rush of business in about a month's time. Indications are indeed that there will be some trouble filling all orders promptly. This, moreover, is a year when accounts which are at all doubtful are given careful consideration. On the whole, it would seem that the dealer who can estimate his wants fairly early will stand the best chance of having the goods on hand, when they are required by the farmer.

Many dealers are now suffering from a scarcity of barbed wire. This is a peculiar case, and one where it seems neither the dealer nor the jobber is at all to blame. The demand for this line—and for other styles of fencing—has been considerably heavier than was at first expected. In view of this being a year when conditions are a little trying, the belief was that many farmers would get along without doing any fencing. Probably this has been the case in some districts, yet the demand has been generally very heavy.

Manufacturers Are Blamed.

Probably acting upon the call that the demand would be light, manufacturers of barbed wire were loath to send as heavy a supply as the local jobbers desired. The result has been a very short stock. Last week, however, several cars

arrived, and it has been possible to fill new orders. At least two boats, moreover, laden with barb are expected at Port Arthur before Saturday. This supply, when it arrives, will take care of practically all orders now on hand.

Nails To Go Up.

There has been no change in the price of nails. The matter of the unusually low prices quoted by the mail order houses has, however, been brought very clearly to the attention of manufacturers, and it is expected that steps will be taken which will remove this unfair competition. It seems practically certain that nails will advance before long.

Ranges have not commenced to move at all rapidly yet. Dealers' stocks are low, however, and the expectation is that a fair demand will be experienced in July. Refrigerators, oil stoves and gas stoves have been moving quite briskly. Indeed, while the orders have all been of the sorting variety, the volume of these has been quite heavy.

Crops Developing Well.

Weather conditions are leading the stove men, and, in fact, all in the hardware field, to look with more confidence toward the fall's business. From many parts of the country splendid reports of crop conditions are being received. Practically every traveler now in the West is acting as a crop estimator, and the word the majority send in is highly encouraging. From Southern Alberta—from MacLeod and Maple Creek districts—blue reports have been received. The country is said to be very dry, and the prospects not at all good. Since such word was received, however, good rains have been experienced in those localities, and it is believed the crops there will be very fair.

In Manitoba conditions are generally good, although in some parts rain is needed.

Some Price Movements.

There is a possibility that stove pipes may be advanced somewhat before another week passes.

On Monday a meeting of the paint men was held to consider the white lead situation. At the present time the pig is being quoted at a high rate, and in the East this has been followed by an upward movement. So far such action had not been taken in Winnipeg, but an advance of 15c was found necessary.

Generally the paint business is good, not only in Winnipeg ,but throughout the whole West.

Furnaces Are Moving.

While stoves are not moving very rapidly yet, as has been stated, there is a good demand for furnaces. Much of the building going on is of a substantial variety, and quite large heating plants are necessary. Business in Winnipeg in this line is very satisfactory, and manufacturers report that through their local representatives they are getting a very satisfactory quantity of business from the three prairie provinces. So far Southern Alberta has been a little quiet, but the rains there, which have greatly improved crop prospects, are expected to have the effect of re-establishing confidence and so paving the way for more good orders.

TEAM WORK BY MERCHANT AND FARMER.

(Continued from page 48.)

their small produce from eggs to potatoes at a little better than the market price provided the produce was fresh and properly packed for his high class hotel trade.

By availing themselves of the cheerful assistance of the Agricultural College at Guelph, by lectures in the long winter nights and by the constant dissemination of literature, the farmers were induced to go in more and more for mixed farming and for the principle of marketing their grains on the hoof, and so getting higher prices and at the same time increase instead of decrease the productiveness of their land.

In time, the secretary had to leave the hardware store for good. His whole time became taken up with the new work, supervising and instructing in the dressing of chickens, packing of produce, etc., and in carrying on a heavy correspondence of an educational order.

The manner in which the spirit of cooperation and helpfulness grew amongst the community was wonderful. As they came more fully to realize that a community, like a rope, was only as strong as its weakest part; they began to perceive that neither the farmer nor the merchant could thrive at the expense of the other. It might appear that they could for a time, but like water, conditions would seek their own level and one could not help but suffer or prosper according as the other did; for the functions of both so interlocked that unison of action was essential.

With the growth of the new spirit, the mail order trade fell off, but that was only an incident. The young men began to see good opportunities at home and stayed there instead of going West, so that to-day that community shows less harmful results of the Western exodus than any farming community in Ontario. There are more autos, more telephones, better roads and less bad debts there than in any town around, and instead of looking upon one another as sources of income or sources of supplies, merchants and farmers regard one another as friends from having worked hand in hand for the common good.

ASBESTOS.

Supplying as they do a large proportion of the world's consumption of asbestos, the Canadian deposits of this mineral are of particular interest. While occurrences of the mineral have been noted in other localities and provinces, the principal areas are those found in the Eastern Townships, Province of Quebec. The present workable deposits are—as far as exploration work has shown, and with the exception of the Danville quarries—confined to the great serpentine range which strikes through the Townships of Broughton, Thetford and Coleraine. Leaving some scattered deposits in the Townships of Wolfstown and Ireland out of consideration, the total length of this productive serpentine belt is twenty-three miles, with a width varying from 100 feet in the extreme easterly part to 6,000 feet in the Mock Lake area; however, the serpentine belt as a whole in many places far exceeds the width indicated above. Active mining began about 1880.

The principal deposits occur at Thetford, Black Lake, Danville, and East Broughton; those at Thetford and Black Lake being the most important. The mineral occurs in a series of narrow and irregular veins, occasionally attaining a width of six inches, though those of the larger size are comparatively rare. Veins with three or four inches of fine fibre were, in the first years of working, quite plentiful; but as the mines increased in depth these appear to decrease somewhat in size. The veins reticulate through the rock in all directions. The deposits are worked by open quarrying, the long fibred asbestos of the larger veins being readily separated out, while the smaller material is carefully cobbed. This separation was at first accomplished entirely by hand, but mechanical treatment has been gradually introduced and perfected, until now large mills are in operation in which the rock is broken and crushed in various ways; and the fiberized asbestos taken up from screens by suction fans, and blown into collectors or settling chambers.

The annual production is now over 100,000 tons, valued at upwards of $3,000,000; and includes a wide variety of grades from the long fibred crude asbestos, valued at $300 a ton, down to the shortest mill fibre, valued at only $2 or $3 per ton, and "asbestic" sand used for wall plaster, and valued at from 75c to $1.50 per ton.

If every human crank were attached to something, most of the world's wheels would go the wrong way.

Selling Paint During the Holiday Season

Many Paint Sales Can be Made During the Midsummer Months —Ready Mixed Paint is an All-year-round Seller in Many Places. —Show Windows Play an Important Part.

WITH the advent of the mid-summer holiday season there is sure to be a falling-off in the demand for certain lines of hardware. Many people are making preparations to move to the summer resorts or to their summer cottages to spend the months of July and August. One of the departments in the store which should feel the relaxation of business less than any of the others is the paint department. This seems a peculiar statement to make in view of the fact that business drops off to a great extent during the hot weather months, but it is nevertheless true. Not many years ago the general impression prevailed that paint was a two-season selling commodity. The spring was the heavy selling season, while the fall season also brought a fairly heavy demand for paint. During recent years ideas regarding the retailing of ready mixed paints have changed considerably, and we now find many firms featuring paint and endeavoring to make paint sales the year round. Many of them have succeeded to an almost remarkable extent in making their paint department a profit-maker the year round instead of a profit-maker during two seasons.

At first thought, it would appear to the merchant who has not worked up a summer paint trade as though there were not many prospects to whom sales of paint could be made during the summer months; but on giving the matter further consideration you find there are many prospects. The owners of summer cottages are very often excellent prospects. The cottage may need painting, the boats or canoes may also be in need of a coat of paint or durable outside varnish.

There are also the men who stay at home and fix up around the house; they are quite numerous and may be found in every community. This year, when the hard times cry exists, you will find many people doing painting and other jobs around their own homes.

There is also the ordinary individual who had intended painting the veranda floor, the window screens, or the kitchen floor, but deferred action early in the spring and is now an excellent prospect. The farmer has a rather slack period for a few weeks and has a little time to paint his barns. No doubt a number of new houses are being erected in your town. Have you done anything to interest the home-builder in ready mixed paints, or have you allowed some energetic painter to supply the hand-mixed product?

You can get a large volume of paint trade during the summer months if you go after it—the hand of Providence is not likely to drive the business to you.

Lawn seats and swings, flower-pots, fences, screens, etc., can be greatly improved in appearance if painted. Why not display a few partly painted articles in a prominent part of your store or show window? The plan is an old one, but it has made many sales in the past and will make many more in the future.

Floor wax, floor polish and furniture polish can be easily sold during the summer months; that is, if the goods are kept well to the front and attractive displays are shown.

The show windows can be made play an important part in the summer paint campaign.

SALESMANSHIP.

Salesmanship, when we get right down to brass tacks, is more a matter of personality than anything else. That is something that few of us have, but which we can all cultivate. If it were not for the fact that man is enabled to personally direct his own activities, energies and thoughts, he would be little better than the lower animals. We are as we are made, but incidentally some of us have a finger in our own making—to our sorrow.

There is no reason why the salesman who knows his goods from A to Izzard should not be a salesman in the true sense of the word by cultivating a little warmth in his personality so that his sales knowledge may have a working partner. Or, on the other hand, the man who exudes geniality, love of fellow men and so forth, every day is wasting his God-given gifts if he does not apply himself sufficiently to his goods to be able to put his rare gifts to some useful purpose. He may never learn as much as the other man knows by an uncanny instinct, but every little bit helps.

The other man can never hope to acquire his natural and wholesouled friendliness to customers, but he can at least make them appreciate his sincerity. Some one has said at some time that it is only by striving after the impossible that we are able to accomplish the commonplace, and without that high goal, we perish.

A very neat paint display shown in a narrow display window.

"CHALCO"

A PAINT AND VARNISH REMOVER THAT'S 20% MORE EFFICIENT THAN OTHERS YET COSTS NO MORE

To Retailers, Jobbers and Manufacturers:

We are now able to offer in "Chalco" a Paint and Varnish Remover of unusual merit.

It's 20% more efficient than others.

TRADE CHALCO MARK

The Paint and Varnish Remover

"We pay no royalties to put on your bill."

Write for Proposition

"Chalco" is positively different and positively superior—it leaves the surface better for refinishing than any other product we've tested.

It does not injure the hands.

Weekly Paint Markets

MONTREAL.

MONTREAL, July 2.—An advance of 15 cents in white lead is the outstanding feature of the paint markets this week. There is a general tendency for firmer markets all round, and further advances would not come as a surprise. Business keeps exceptionally good, and almost without exception the jobbers and manufacturers report that they feel gratified with such a good showing, especially when in many lines of business there has been a distinct falling-off from a year ago. Retailers also state that trade has been quite active.

White Lead.

An advance of 15 cents per hundred was announced in white lead this week. This advance is due to higher prices for pig lead in the London market, which was followed by an increase in dry lead last week, and now the grinders have followed along with an advance. The market is still firm, and a further advance is not unlikely in the near future. Quotations now are: $8.20 for ton lots and $8.40 for less than ton lots.

Turpentine

There has been no change in the market for turpentine this week, but it is still very firm, and there has been a very fair local demand. Quotations are:

1 barrel ..... 67c per gal.
5 barrels ..... 66c per gal.

Five-gallon packages, 5 cents advance; packages extra; terms net.

Linseed Oil.

A firm market continues for both raw and boiled linseed oil, and though there has been no actual change in prices since last week's report, there is every indication that higher figures will soon be asked. Quotations now are:

Raw Linseed —

1 to 4 barrels..... 61c per gal.
5 to 9 barrels..... 60c per gal.

Boiled Linseed—

1 to 4 barrels..... 64c per gal.
5 to 9 barrels..... 63c per gal.

Gasoline and Benzine

There has been a fair demand for gasoline and benzine, but sales have not been as large as they were a short time ago. Shipments to outside points were very heavy until within the last few weeks, and it is stated that most dealers are now pretty well stocked. Quotations are the same as last report:

Barrels, in wood ..... 21c gal.
In steel and drums ..... 18c gal.
Tank wagon (100 gals.)... 17c gal.

Benzine is quoted at 20c per gallon in single barrels.

Paris Green

The demand for Paris Green has fallen off somewhat this week, due in some measure to wet weather, but it will probably move better with the advent of warm dry weather again. Prices are unchanged from the list in current market quotations.

TORONTO.

TORONTO, July 2.—Paint lines are a little stronger than they were a week ago. There has been a sharp advance of fifteen cents in white lead as was to have been expected according to our recent reports. Gasoline has declined but turpentine and oil are very firm.

Turpentine.

This staple is very firm at Southern producing centers with no present indications of weakening. As an indication of the underlying causes of such a condition may be cited the fact that there is less coming in from the growers than at any corresponding period of the last three years. The demand is fair at the ruling price of 70c for single barrels, and 69 cents in 2 to 4 barrel lots. Some price shading is evident.

Linseed Oil.

Oil remains the same and demand is just fair. There is no new information on the flax crop or on general oil production. The late estimates of Canadian and United States decrease in flax acreage are still the upstanding features that tend to influence market reports. Ruling prices are as follows:—

	Raw	Boiled
Single barrels	63c	66c
3 to 5 barrels	62c	65c
6 to 9 barrels	61c	64c

Gasoline and Benzine.

There has been a drop of half a cent in gasoline, which, however, only affects the grade and brand chiefly used. Other grades remain the same. Benzine is unchanged at 19c and the low on gasoline is now 19½c.

Paints, Ready Mix and Dry Colors.

The demand in this line has been unprecedented all spring until the past two weeks, more particularly during the past week. Prices are unchanged and are as per current quotations. Except for occasional spurts due to good painting weather, no great activity is looked for in this line until fall.

Glass and Putty.

Business in glass is quiet at present and quotations are unchanged from the list in current market report. It is expected that sales will increase when construction now under way is further advanced. Demand for putty follows closely the business in glass.

American reports indicate a possible future shortage of glass this fall in spite of an ample supply at present.

White Lead, Paris Green, Etc.

White lead has advanced as these columns have prophesied for some time past. The advance amounts to fifteen cents on all grades, and emanated in Montreal. This follows the advance on dry white lead to the grinders that was referred to last week.

Paris green vies with glass as the poorest seller. Demand is extremely poor this year. Prices are still 11¼, 17½ and 19c per 100-lb. drum.

Arsenate of lead is quiet at $9.75 per 100-lb. keg.

THE THRESHERLOGUE.

Miller-Morse Hardware Co., Winnipeg, Man., have recently issued the "Thresherlogue" for 1914, consisting of 104 pages, featuring thresher supplies. The "Thresherlogue" is attractively gotten up and is well illustrated. Many new lines are featured. One page is devoted to steam boiler regulations governing the provinces of Saskatchewan and Alberta. Throughout the book the idea has been to present in a complete and comprehensive manner a list of goods applying particularly to the thresher trade.

BACK of EVERY CAN YOU SELL

THE BRANDRAM-HENDERSON REPUTATION

STANDS BACK OF EVERY CAN OF

B-H "ENGLISH PAINT"

you sell; and this reputation is no figment of the imagination but a solid, incontrovertible fact that **will sell paint for you.**

It is to your interest to sell only paints that are absolutely dependable. The paint that pleases the customer is the paint that brings him to you for more, and it is these "repeat" orders that make easy profits and a quick turnover of your stock.

As a trade-builder, B-H "ENGLISH" Paint is unmatched. It is not a new proposition, but an established success—a **known** paint that commands trade; why, therefore, should you take risks, when with B-H "ENGLISH" sales, profits and satisfaction are assured?

We guarantee that all B-H "ENGLISH" Paints that can be made on a white base, are made according to this formula:

70% **Brandram's B.B. Genuine White Lead.**
30% **Pure White Zinc.**

We are prepared to offer you liberal terms on this paint—terms eminently satisfactory to you. Write us for details.

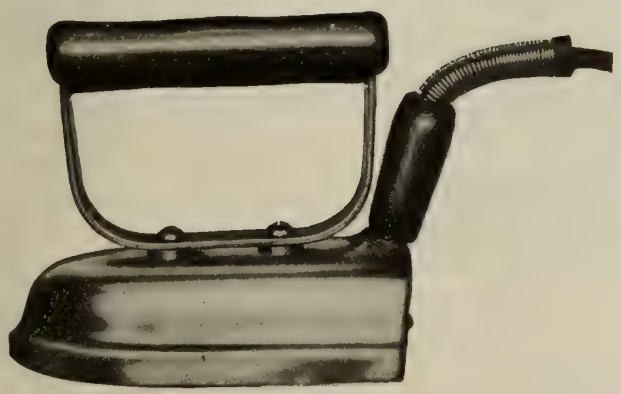
The Proper Paint Perspective

It's well to remember that the store that sells satisfactory paint, wall finishes, etc., gets almost as much credit as the maker. Bring back the customer satisfied; that's the proper paint perspective. He may not need paint so often, but when he does you'll get his order. Sell poor, unsatisfactory goods and the reverse is the case. You'll make one paint sale and lose a permanent customer for paint and other things. And now we want to tell you our lines of paints, wall finishes, etc., will bring him back. Ask us about them.

BENJAMIN MOORE & CO., LTD. 6 Lloyd St., West Toronto
NEW YORK CHICAGO CLEVELAND CARTERET, N. J.

Do you sell it?



Stephens PURE PAINT

Stephens Barn, Roof and Elevator Paints

are the very profitable and satisfactory kind

TRADE MARK

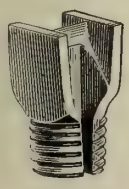
NINE LIVES

Spark Plugs and Flash Lights

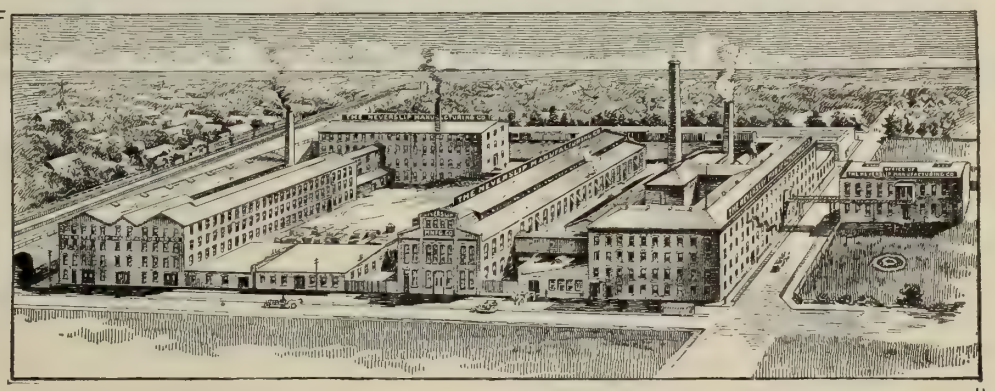
(The Real Canadian Kind)

are everything that our trade-mark implies. Their extra long life is the result of work under the supervision of the world's experts.

Their longer life makes them cheaper for the user, and builds business for the hardware merchant.



Everyone is absolutely guaranteed to give satisfaction. Should any fail to live up to the mark we will replace them with new ones, or refund the money.



Be convinced that there's big money in selling our goods. Send a trial order.

Is Your Stock of

Paris Green

Sufficient to meet the demand during the Summer months

Thousands of farmers and gardeners throughout Canada have used The Canada Paint Co.'s Paris Green for the last twenty years, and they are still using it. Its dark green shade is a sign of its quality.

ARSENATE OF LEAD
BULLETIN NO. 284 OF THE DEPT. OF INLAND REVENUE—Ottawa, Can.

It will be noted that the Canadian article shows a greater uniformity and a nearer approximation to theoretical requirements than the samples analyzed at the New Jersey Station.

The results now placed on record indicate that this article, as offered for sale in Canada, is of very satisfactory character.

(Signed) A. McGILL,
Chief Analyst.

C.P. Arsenate of Lead is put up in both paste and dry form in all sized packages from 1 lb. up.

KING BUG: "WELL BOYS! I KNEW SOMETHING FEARFUL WAS BOUND TO HAPPEN WHEN I HEARD THE CANADA PAINT COMPANY WERE SHIPPING THEIR PARIS GREEN TO THESE PARTS."

Electros of this Newspaper cut will be sent free to all dealers handling CP Paris Green.

"THE BIG WINNIPEG HOUSE"

For Outdoors Or In

You can fill every paint requirement with the right RAMSAY finish.

And every RAMSAY product is *right*. The right formulæ, the right materials, the right price and the right value. You'll find it a pleasure to do business with a house that has grown up with the country and has 72 years of Canadian paint experience behind it.

Write us.

A. RAMSAY & SON CO., - MONTREAL

ESTABLISHED 1842

CONSERVATIVE & LIBERAL

It is conservative to say that The McCaskey System will save at least its own cost once a year in "forgotten charges" alone.

More than 100,000 merchants in all lines of trade have adopted THE SYSTEM that abolishes night work and worry, keeps all accounts posted up-to-the-minute; automatically regulates the giving of credit and makes for greater store efficiency. Write us for particulars—NOW.

DOMINION REGISTER CO., LIMITED

Toronto, Ontario

Gentlemen:— I'm willing to learn more about the McCaskey. Please send catalogue,

Name.....

City..... *State*.....

Business.....

Our liberal terms will enable any merchant to install the McCaskey at once, and derive the benefits and enjoy the security afforded.

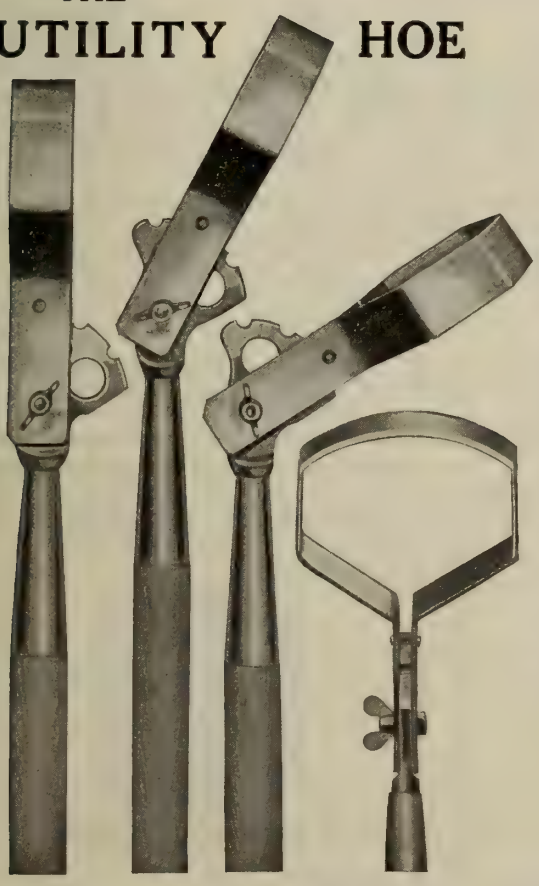
The "Come Back" That Pays

The only "come back" to a Fox Gun is the good-will of the purchaser. It's the "come back" that brings more business. Besides being a satisfactory seller the Fox has been an easy seller. It has the advertising push behind it. We have added a number of new selling features to

The 1914

FOX GUN

The Finest Gun in The World



We believe these features will make it the easiest selling gun you ever handled. It will be backed by the strongest HELP DEALER SELL campaign we have ever undertaken.

If you are already a Fox dealer you want to know what these new features are. If you are not a Fox dealer it is to your interest—for the sake of more business—to start the Fox line at once. In either case—

Get in touch with your jobber at once—or write us direct—so that you may know what's new in the world of guns.

The A. H. FOX Gun Company
4768 North Eighteenth St.
PHILADELPHIA

THE UTILITY HOE

The UTILITY hoe is made in two sizes — four and six-inch blades. Each blade has two cutting edges. The blades are made of 1⅛-inch ribbon steel and can be adjusted to suit the heighth of the operator. The shank castings are malleable. Every hoe is equipped with a first-class handle.

DU PONT

SMOKELESS POWDER
THE
Champion's Choice
AT THE
QUEBEC SHOOT

THE selection and use of DUPONT by B. Beattie, of Ottawa, proves that shooters are thoroughly alive to the importance of shooting a powder celebrated for its high velocity, regularity of action and reliability.

DU PONT

EASY TO SELL

Because the frequent and notable victories won in prominent trap-shooting events are widely advertised. The demand for shells loaded with DUPONT is sure and steady—quick sales and satisfied customers are what you get by stocking DUPONT POWDERS.

CASH in on the popularity of DUPONT POWDER. Simplify your ammunition stock. Insist on your jobber sending you DUPONT loads for shells or in canisters for bulk sales.

Du Pont Powder Co.

ESTABLISHED 1802

WILMINGTON, DELAWARE

THE PERFECT FRUIT STEP LADDER

Makes easy work for Fruit Pickers and easy ales for you.

The pointed portion or legs can be turned up, making a long, simple ladder which readily rests in the branches of the trees. The ladder as you see it in illustration is an **excellent general purpose ladder,** for the reason that it can be used on uneven ground without danger of tipping. Made in the following lengths:

6 ft. step ladder extended to 11 ft.; 8 ft. ladder extended to 18 ft.; 10 ft. step ladder extended to 19 ft.

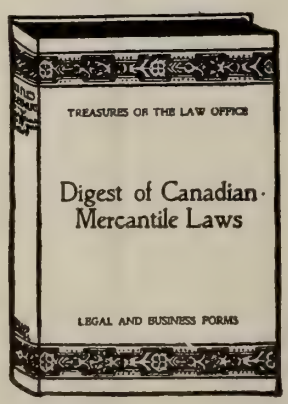
LAW

No business man can afford to be ignorant of the laws governing merchandising.

Few, however, have the time to read the many and complicated volumes of the country's laws and statutes, and for the benefit of the hustling business men a concise and understandable book has been prepared. It gives all the necessary laws and information regarding merchandising, including the renting of a store, buying property, collecting debts, etc. This book, the

Digest of Canadian Mercantile Laws

is a ready reference, a valuable guide in daily business, and is saving many dollars.



No work published in Canada equals it for business men.

A veritable consulting library on this one line so universally needed.
Based on Dominion and Provincial Statutes and Court Decisions.
Indorsed by barristers, sheriffs, magistrates and conveyancers.
Recommended by the Ontario Institute of Chartered Accountants.
Used by more accountants, bankers and business firms than any other work on the subject. Forwarded direct post free on receipt of price.
Keep the book ten days, and if it is not satisfactory, return it and get your money back. If remitting by cheque, make **same payable at par,** Toronto.

Eastern Edition, Price, $2.00

Special Western Edition, $2.50

To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price $2.50.

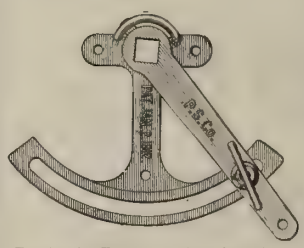
Heller-Aller Force Pumps

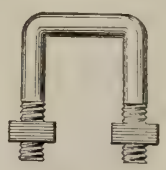
"The very profitable and reliable kind"

Pump Cylinders are made of heavy brass tubing, which has a double advantage.



It ensures the very best wear and permits the use of very coarse thread on cylinder caps (eleven threads to the inch). This prevents the cap threads from wearing or rusting off and dropping into well.

Heller-Aller Force Pumps are equipped with the most efficient, tried and tested valves. They never fail in service.



Write for full information.

Reading Brimful of Interest for Busy Canadians

The July MacLean's, just off the press, is full of feature articles and stories which should appeal to every Canadian. Does not this list interest you?

"The Education of the Camp"—A strong article by a military authority on the benefits, physical and otherwise, of militia training.

"On the Firing Line in Riel's Day"—The first of a series of articles on the North-west Rebellion, written by one who served through the last campaign. These stories will be full of reminiscences given to the public for the first time.

"The Adventures of Madelyn Mack: Detective"—The best detective stories published since Sherlock Holmes first appeared. The first of this series appears under the title "The Man With Nine Lives"—A strong recital of adventure, written in graphic, vivid style.

"The Miracle of the X-Rays"—A clear presentation of one of the greatest discoveries of modern times. The fascination that science exerts on the lay mind will serve to make this article one of absorbing interest to all.

There is nothing a man could not do if he had the right information before starting at it. Under the heading: "Getting the Facts," a Lieutenant of Harrington Emerson, the chief exponent of efficiency, tells how the right information can always be obtained. Want to get started on the highroad to success? Read this article.

Glen Campbell—Broncho buster, sturdy man of the plains, orator, player of practical jokes, firm friend and hard fighter—is the subject of a breezy sketch that will both interest and amuse. Meet this famous Western M.P. in the pages of July MacLean's.

These are just a few. There are plenty more of the same kind to be found in the July issue of Canada's national magazine. If you don't read MacLean's, start with the July number.

Send a postcard and have your name added to our subscription list. You'll be delighted with every issue.

Subscription price $2.00 *per year.* 20 *cents a copy.*

They Can't Speak

—but their service speaks for them

"Delta" Files give such good service that they find a permanent place in the mechanic's kit.

A permanent place means that the user invariably sticks to the same hardware merchant, and the latter gets re-orders and re-orders.

The secret of the "Delta's" popularity lies in the fact that it is the only file made absolutely of crucible steel — this material assures a long-lasting sharpness.

Delta Files are made in a shape and size to meet every demand.

They all bear the trade-mark as shown herewith. This mark is a guarantee that we'll quickly refund the purchase price if any prove unsatisfactory.

If your jobber cannot supply you, write us.

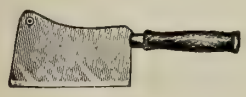
Hardware and Metal's Electro Service



AT the request of many of our readers and in order to assist Canadian hardwaremen in such a manner as to make it easy for them to use illustrations of staple hardware lines in their newspaper, circular or catalogue advertising. Hardware and Metal's editorial department has instituted a new service, viz., the supplying of electros of staple hardware lines at a reasonable price. Many merchants claim that the electros they have on hand are of such large proportions and occupy such large space that their use is almost prohibitive on account of the cost of newspaper space. By using small electros of seasonable goods the merchants will be able to feature several lines in one advertisement at a very reasonable cost. Hardware and Metal will from time to time publish seasonable advertising suggestions in which electros here shown will be used. In ordering electros be sure and order by numbers. Price of electros shown on this page is 15c each. Cash with order. Address all orders to Hardware and Metal, 143-153 University Ave., Toronto, Ont.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for Machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

A BOOK THAT SAVES MONEY

"Digest of the Mercantile Laws of Canada"

A READY REFERENCE FOR BUSINESS MEN AND THEIR ASSISTANTS. A GUIDE TO THEIR DAILY BUSINESS

IN RENTING A STORE, PROCURING A LOAN OR COLLECTING A DEBT, THIS BOOK WILL SAVE YOU MANY DOLLARS

No work ever published in Canada equals it for business men. A veritable consulting library on this one line so universally needed. Based on Dominion and Provincial Statutes and Court Decisions. Indorsed by barristers, sheriffs, magistrates and conveyancers.

Below appears a few of the questions it answers. These are picked out at random from the book.

If you endorse a cheque which bank cashes, are you liable to the bank for the amount, if the cheque were forged or raised?—173.

(The figures after each question refer to the section in the "Digest" which gives the answer.)

Can Interest written "one per cent. per month" in a note be collected by "legal process?"—See sections 345, 185.

In going security on a note, what is the difference between writing your name on the face of the paper or on the back?—171.

Why is it that a verbal agreement to buy real estate with, say $100 paid down "to bind the bargain," does not bind either seller or buyer?—451.

If a proposition is made to you by letter and you accept it by letter, do you know the exact time when the contract is closed?—39.

How many years does it take a promissory note, a book account, a judgment or a legacy to outlaw in your province?—356, 359, 360, 367.

How long may the drawee legally hold a draft for acceptance?—209.

If a man, in the presence of witness, makes a verbal agreement to buy a wagon, say for $53, but does not take possession of it, will the sale be binding?—500.

What effect has it on a will if only one person signs it as a witness?—815.

If the wife or husband of a legatee signs the will as a witness, what is the effect?—816.

"A," in paying off a Mortgage, gave mortgagee a marked cheque on which was written: "This cheque is given and received as a full settlement and discharge of Mortgage No.———." Is that a legal discharge?—410.

If a person goes with his hired man to a merchant and says: "Give this man the goods he may need up to," say "$15, and if he does not pay you," say, "within thirty days, I will," will the promise bind him?—110.

If stolen goods are sold to an innocent purchaser for value, can they be taken from him?—513.

How may a person legally add "& Co." to his name, or use any special name other than his own as a firm name, without having a partner?—694.

"B" claims that the Canadian Bills of Ex. Act allows him two days, in addition to the day of presentment, to accept a sight draft, and then three days of grace in which to pay it—six days in all. Is he right?—209, 217.

If you rent a property for a year, the rent payable monthly, and remain on after the year expires, are you a yearly or a monthly tenant?—580, 608.

Can you garnishee a debtor's money deposited in a bank if you know it is there?—885, 295.

Forwarded direct post free on receipt of price.

Keep the book ten days, and if it is not worth the price, return it and get your money back. If remitting by cheque make same payable at par, Toronto. **Eastern Edition, $2.00. Special Western Edition, $2.50.**

To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price, $2.50.

Eastern Edition, Price $2.00 **Special Western Edition, $2.50**

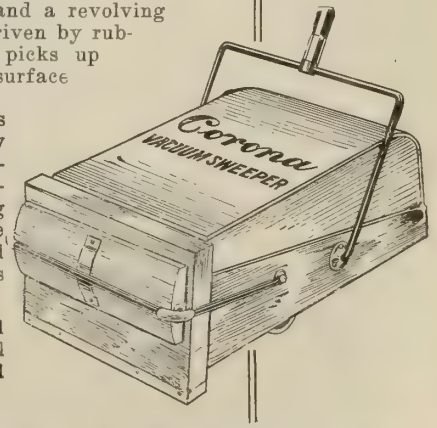
"Corona" Vacuum Sweeper



wonderfully efficient yet moderate in price

It has a much stronger suction than is ordinarily found in machines of this type, which is the result of **Three Bellows of Improved Design and Construction.**

Draws all dirt and dust into a bag while the sweeper is in motion in either direction, and a revolving brush, which is driven by rubber-tired wheels, picks up threads and all surface matter.

The "Corona" is well made, easy to handle, and absolutely guaranteed. Dust bag and pans can be easily emptied when machine is on the floor.

We'd be pleased to send you full particulars and price. Write.

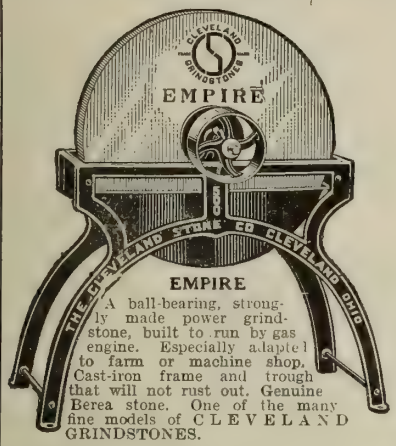
THE WHITE MOP WRINGER

always bears this trade-mark

LOOK FOR IT.



Janitors and Housekeepers praise these wringers, because they wring easily and neatly, are durable, practical and useful.

Ask your jobber for them or write to us.

White Mop Wringer Co., Fultonville, N.Y

EMPIRE
A ball-bearing, strongly made power grindstone, built to run by gas engine. Especially adapted to farm or machine shop. Cast-iron frame and trough that will not rust out. Genuine Berea stone. One of the many fine models of CLEVELAND GRINDSTONES.

CLEVELAND GRINDSTONES

Sold only to Hardware and Implement Dealers

Cleveland Grindstones are the *only* Berea grindstones—the best abrasives in the world. Absolutely even grit—no soft spots or flint spots. Never wear humpy—and never glaze. Our experts of 50 years' experience select the right grit for your customers—no haphazard shipments. Our full guarantee covers every stone and assures you of fair treatment and quick delivery.

"How to Keep Mail Orders at Home"

A new booklet we have just issued to help dealers! Shows you exactly how to thwart the mail order man, and get the business you ought to have. A FREE COPY for you if you'll write for it! Write a postal to us TO-DAY!

THE CLEVELAND STONE CO., Leader-News Bldg., CLEVELAND, OHIO

Amatite ROOFING

The Roofing that Needs No Painting

WHEN your roof is covered with Amatite, there is an end to the roof painting nuisance. Amatite has a real mineral surface and needs it will stand rain and hail and wind and snow, for every two years and paint it.

The mineral surface makes this unnecessary and it will stand rain and hail and wind and snow, for years without attention.

When you paint the old-fashioned roofings you are practically trying to keep them from getting wet. Amatite is made to get wet, for water won't hurt it a bit. Next time your old-fashioned roofs need painting, cover them with Amatite.

A sample of Amatite and booklet about it will be sent free on request. Address nearest office.

THE PATERSON MANUFACTURING COMPANY, LIMITED

Montreal Toronto Winnipeg Vancouver St. John, N. B. Halifax, N. S. Sydney, N. S.

CHICAGO STEEL BENDING BRAKES

(Made in all sizes)

Regarding the Steel Bending Brake we purchased last spring, are pleased to report that we are more than delighted with this machine, not only with the way it is constructed, but with the work it turns out. We formerly used a —— brake, but are very glad indeed now that we have made the change. We get more speed and better results.

Yours truly,

THE McCLARY MFG. CO., C. E. Main, Manager

The Steel Bending Brake Works Ltd., Chatham, Ont.

Screen Door Butts

These butts are of the same good quality that is consistent with all other "Stanley" goods.

They are supplied to the surface of the doors. By simply slipping out the pins the door is easily taken off and can be as readily rehung when necessary.

They add greatly to the appearance of any entrance, being splendidly finished in Japan, Antique Copper, Dull Brass or the anti-rust "Stanley" Sherardized; the latter finish is recommended for outdoor work or damp climates as it prevents rust.

Packed one-half dozen pairs in a box with screws. Weight per dozen with screws, No. 1751, seven pounds. No. 1753, five and one-quarter pounds.

If your jobber cannot supply you write.

THE TEMPTATION TO SHOOT IS HARD TO RESIST

Every youth and most men find it difficult to pass a good display of rifles in any window.

The Ross Cadet Rifle

is specially attractive, as it is a strong and serviceable "Summer" arm. Good for shooting at a mark and any game, except deer, etc.

It sells at $12.00, gives dealers a reasonable margin, and gives the purchaser a full measure of satisfaction in the way of accuracy, good sights, and good service.

The Cott-A-Lap Company, Limited

In Canada At Your Service

Manufactured in the Dominion for the first time.

We have thrown in our lot with yours by erecting a plant in Canada.

Now we trust you will show us a true welcome by purchasing our goods.

Our success depends on you; now that we have placed ourselves in position to give you quality and service. We are starting with the benefit of 15 years' experience in the wall burlap industry through our parent Company, THE COTT-A-LAP COMPANY of SOMERVILLE, N.J., Cheago and New York.

A few years ago they were about fourth on the list as wall burlap manufacturers, but are now, and have been for some time, by far the largest. This means quality, service, and devotion to the needs of their customers.

The policy of the Canadian Company will be the same, and we ask your co-operation. We are now prepared to furnish the first dyed wall burlaps ever made in the Dominion, in three qualities, as follows:

COTT-A-LAP, 36", 54" and 72" widths (sun-proof) and the best that can be made.
EUREKA, 36" and 54" widths, and of an excellent quality.
ARROW, a less expensive grade for competition work; also
SANITARY OIL-PAINTED BURLAP, in various widths;
PREPARED CANVASES AND MUSLINS, etc., for wall decoration.
CAL-CO-CRAFT, a paper grained from actual wood, and, when finished, resembling wood so closely, that a careful inspection is necessary to distinguish the difference. Used for paneling and wainscoting.
WOOD GRAIN FLOOR COVERING and RUG BORDERS, also grained from actual wood and closely resembling hardwood flooring.
MAGIC AND BULLDOG SIZING, for paperhangers' use.

The excellent qualities of the products of the COTT-A-LAP COMPANY of SOMERVILLE, N.J., are well-known throughout Canada, and, as our materials and methods are the same, we can assure the Canadian trade of the same continued satisfaction.

By manufacturing in Canada we will be able to save our customers considerable money which heretofore has been paid in import duties. WE ARE PREPARED TO MEET ANY COMPETITION. Write for samples and prices. A line from you will help to make us "feel at home."

Let Canada Cement Increase Your Business

Progressive farmers everywhere are building their fences with Concrete Posts. Our extensive advertising is educating them to use Concrete Fence Posts and to demand Canada Portland Cement to insure having the best concrete.

To every customer who buys cement for posts, you can sell, at the same time, all or a large part of the other goods on the above Sales-Slip, but the first item called for will be

CANADA Portland CEMENT

If you sell this dependable brand, it is probable that you can sell the rest of the bill,—but if you do not sell "Canada Cement" you may never know that a fence is to be built.

The above quantities are based on a fence containing 500 concrete posts, spaced 12 feet and requiring 6,000 lineal feet of fencing.

This example shows only one of the many ways in which small orders for Canada Cement bring large orders for other goods.

Write at once for terms and quotations and get your share of the big orders that Canada Cement brings.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

Sectional Cylinder Set

RONUK OFFERS A RARE OPPORTUNITY

WE WANT AGENTS IN EVERY TOWN TO HANDLE AND PUSH THE SALE OF "RONUK." WE WANT ONLY FIRST-CLASS DEALERS OF PROVEN REPUTATION, WHO WILL GIVE THE LINE ADDED PRESTIGE.

WE WANT AGENTS WHO ARE QUICK TO RECOGNIZE THAT IT IS TO THEIR ADVANTAGE TO HANDLE A LINE WHICH IS EXTENSIVELY ADVERTISED IN CANADIAN PAPERS.

OUR ADVERTISING CAMPAIGN THIS FALL WILL BE FROM COAST TO COAST—IN EVERY PRINCIPAL CITY. ONLY PAPERS AND MAGAZINES WILL BE USED WHICH WILL ENSURE THAT OUR ADVERTISEMENTS ENTER THE BEST HOMES IN EVERY CITY, TOWN AND VILLAGE IN WHICH WE HAVE DEALERS CARRYING "RONUK."

WHO ARE WE?

We are an English firm and we have been manufacturing Floor, Linoleum and Furniture Polish for the past twenty years.

Our policy has been to use only materials of highest grade, and the accepted standard of purity. We have maintained this principle, even when the price of raw materials, in some years, has risen to an extent that almost destroy profits entirely.

QUALITY FIRST

has been our slogan, and on this we have built up a reputation that we have every confidence in asking you to share.

WHAT IS "RONUK"?

"RONUK" is a cleanser and polish for floors, furniture and linoleum, manufactured of highest grade waxes (chosen for their durability and purity), pure white turpentine, blended with sanitary oils. No resin, petroleum, or other substitutes are used. It is a **sanitary** floor polish and its qualities as such have been recognized by the highest medical and public health authorities.

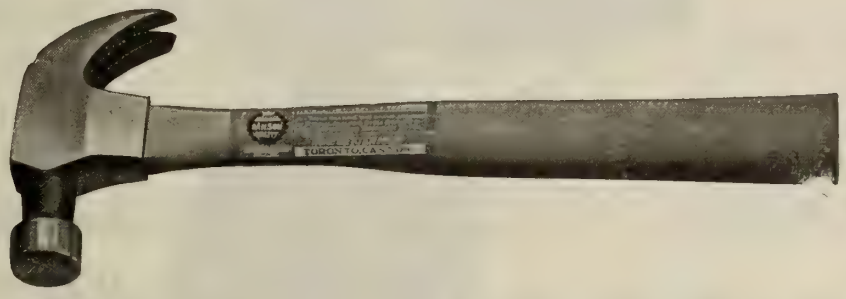
"RONUK" is, therefore, an essential commodity in every Home, Hospital, or other Institution, where the merits of polished flooring are recognized. "RONUK" is used in all the principal Hospitals, Institutions, Banks, Clubs, Galleries, etc., **in Canada** and Great Britain. This should give you every confidence in recommending it to your customers.

"RONUK" is also used in the leading Furniture Factories in Eastern Canada. You could not require a better recommendation for a Furniture Polish than this.

ADDITIONAL SELLING FEATURES.

Well-made tins of convenient size and attractively colored, an artistic range of show-cards, convincing literature, and an abundant supply of samples.

A FREE OFFER.



We will send you, prepaid, free, a box containing an assortment of our lines, so that you can examine, test and satisfy yourself. Write for this at once to—

It Pays to Meet This Demand

Every day, from coast to coast, there is a brisk, insistent demand for

NICHOLSON-MADE-FILES

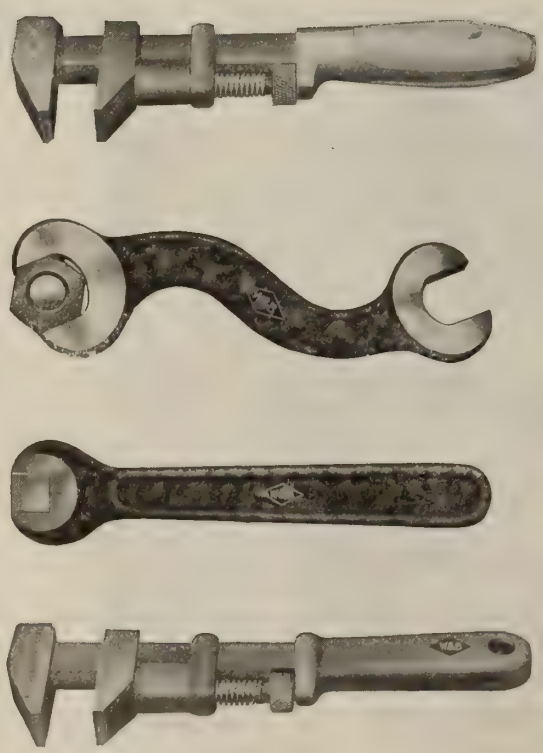
50 YEARS IN THE BUSINESS

OVER 50,000,000 FILES A YEAR

Manufacturers, superintendents, purchasing agents and mechanics have learned by experience that these are the most efficient files—That they cut deeper, last longer, are more uniform in workmanship, and cost least to use.

For 50 years these files have been building up a reputation as a mighty good file. To-day, each sale means a satisfied customer and **more** profitable trade in files.

If you are not now benefiting by this demand for NICHOLSON-MADE-FILES, by all means get in line for your share of the business to-day.



YOUR JOBBER can supply you with the small stock required.

MEMBER OF

Here's a Dandy Tool to Demonstrate!

These calipers will measure over flanges, ribs, bosses, etc., with perfect accuracy. They were invented and patented by Mr. L. S. Starrett and are, like all Starrett Tools, well made and serviceable. Hardware salesmen will find it a simple matter to demonstrate the value of

Starrett
Lock-Joint Transfer Calipers

A good example of the use of the outside calipers is shown in the illustrations above, in which a casting for a large pipe fitting is being calipered.

In the circle at the left the calipers are being set at the thickness of the casting below the flange. In the circle at the right, the leg of the calipers is swung out to permit removing caliper over the flange, **but note that the short leg is still in place.** In the lower circle the leg is swung back to the short leg and the opening between the points may be read from the rule.

These calipers are made in sizes from 4 to 24 inches and may be sold to shops and to many individual mechanics. They are Nos. 36 and 37 in our catalog. If you have not a supply, write us for some catalogs No. 20 M.A.

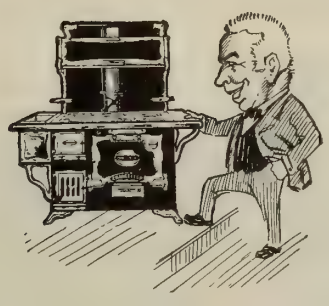
Mr. Dealer :---

We have much pleasure in announcing that our new works are running full time, at your disposal with increased advantages.

Low operating cost in all departments, through improved machinery and foundry equipment, permit us to offer you high-grade goods at lowest prices.

The "Ottawan" range illustrated, is one which gladdens the heart and delights the eye of the experienced stove merchant. Made from the original wood patterns, all parts are full size, uniform in thickness, and true. In mounting, not one piece has to be ground to make it fit. Not an ounce of undue strain in any one part by any bolt.

The "Ottawan" has all the quality points and all the satisfaction-giving results that any cast iron range ever possessed.



The price is away down low this season to induce you to handle it.

Write to-day for fuller information.

The Beach Foundry Co., Limited

OTTAWA, ONTARIO

STOVES
ANCIENT AND MODERN

Sometimes I imagine we Canadians don't think highly enough of ourselves and what we have accomplished in the way of advanced civilization. Take our cooking arrangements, for instance. The Canadian Housewife has The Best. The Germans may have it on us in music; the Italians in painting; the French in designing millinery, but for things to eat and stoves to cook them on—Canadians run One, Two, Three.

Why, all over the world, except America, you will find people trying to cook in brick ovens, in iron pots slung from a tripod, or by some other antediluvian scheme.

When you think of this, and then look at the Gurney-Oxford Chancellor, for instance, the finest member of the stove kingdom, why there's some excuse for a swelling of the chest.

It certainly seems to me that in the things that count most, the things that make life worth living, we Canadians are there, and I'm kind of pleased that I've had something to do with the evolution of the Gurney-Oxford.

Am I right?

SAM OVEN
(with Gurney's)

LONDON TORONTO MONTREAL WINNIPEG VANCOUVER
ST. JOHN, N. B. HAMILTON CALGARY SASKATOON EDMONTON

Get to the heart of your Oil Stove trade. Its strong action depends on the dependable working of the stove you sell.

McClary's
"BON AMI" OIL STOVE

is guaranteed to give perfect satisfaction.

Your trade demands a quick-acting, dependable, economical oil cook stove.

The following are a few telling features in the "Bon Ami":—

The heavy **glass** tank avoids all danger of the tank running dry, and thus eliminates all possibility of the wick burning out.

The burners and the sub-tank are constructed of solid, heavy brass, not tin merely lacquered over. Brass will resist the action of coal oil indefinitely, and this feature in the "Bon Ami" is a striking one and will strongly commend itself to prospective buyers.

The new chimney-raising device prevents the wick from coming in contact with the chimney and finally removes all possibility of the smoke and smell nuisance.

Our nearest Branch will be pleased to send you supply of folders for your customers—send a postal request to-day.

"McClary's" on goods is a Quality Name.

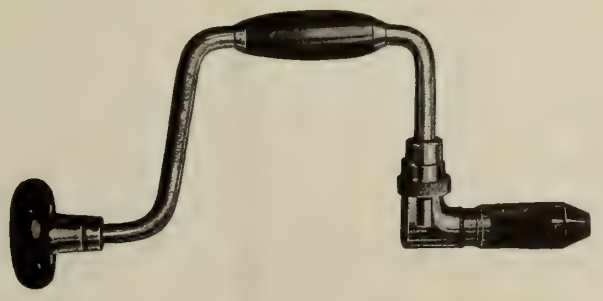
For the Man Who Takes Pride in His Tools—

In any line there is always one name that stands out as favorite with the men who are proud of their work and of their tools. Among carpenters and woodworkers, the popular boring tools are

Russell Jennings

Auger Bits and Braces



because they meet all requirements. The bits are accurate, rapid, and long-lived. The braces are well made and convenient to handle. Hardware dealers who carry this line will find that Russell Jennings tools have the highest reputation among good workmen.

Russell Jennings auger bits are made in two styles. The cabinet maker's bit with double-thread is for fine, accurate work in hard-seasoned woods. It has a very high finish.

The carpenter's bit is for general work, and has a single thread which does not clog when boring in soft or gummy woods. It has an oil finish (straw color) which is more suitable for general use in ordinary soft or gummy woods.

Write for our catalog and for a copy of our new Precision Bulletin which shows something new in auger bits.

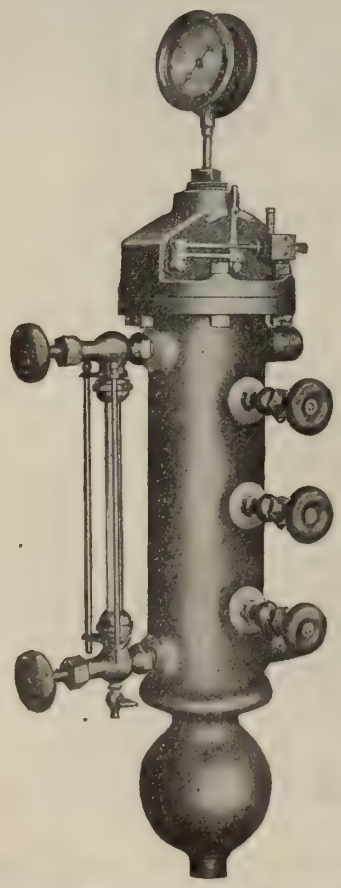
DAVIDSON'S NON-EXPLOSIVE
Premier Underwriters Safety Gasoline Cans

Specially made for Gasoline, Benzine, Alcohol and all highly inflammable explosive liquids. Saves 30% Evaporation, and preserves the volatile qualities of the oil or spirits.

Strong and Superior Construction—Finished in a beautiful Japan Red.



The principle of this Can for safe storing of Gasoline depends upon the same fire-stopping property of wire gauze that gives absolute safety in use, to the celebrated "Davy" mining lamp. *The brass tube* extending into the tank is covered at its base by wire gauze and is sealed at the top by an automatic valve which practically makes it air-tight. If fire occurs near or or around the tank and excessive gas is formed by the heat, this valve opens automatically and allows the dangerous gas to escape.

In case contents of Can are ignited the vapor escaping through the gauze-protected tube will burn quietly and harmlessly at the orifice without exploding.

Tested by the most competent Engineers and accepted by the Underwriters, its use is therefore a positive safeguard to human life and property, and will reduce your insurance rates to the minimum.

—Three Sizes—
1, 2, and 5 gallon.

9 RUNAWAY BARGES SEND 156 CRAFT ADRIFT AND SINK 7

Boats Break Loose from Tow and Sweep Yacht Anchorages.

HAVOC ALONG SHORE OF THE HUDSON RIVER

Three Houseboats, with Families on Board, Among Those Struck and Damaged.

Nine runaway barges, laden with sand, gravel and other building material, swept through the numerous fleet of yachts, motor boats, launches and other small craft moored in the Hudson River between 137th and 170th streets yesterday morning, sinking at least seven of them and sending 156 adrift, many of them damaged.

All day the owners of the craft and the harbor police were busy searching for the drifting vessels, many of them being found as far south as 100th street.

A sudden squall out of the northwest at two o'clock yesterday morning parted the hawsers by which two tugs of the Cornell Towing Company were towing nine laden barges down the river against a rising tide. The nine barges, which had been lashed together, parted, two of them being blown inshore at 138th street, while the tugs caught the other seven, towed them inside of the cove at Fort Washington Point, opposite 175th street, and anchored them while they put out to stop the other two barges.

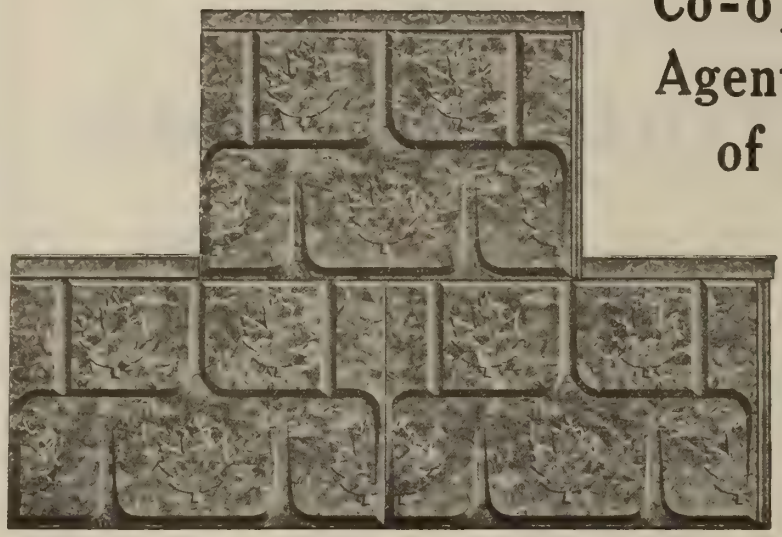
But these two barges were blown swiftly into the moorings of the Colonial Yacht Club, at 138th street, and with such force that three motor boats were sunk, forty more small craft were stripped from their moorings and the landing stage was smashed. The freed vessels started down stream. Their cabins had been crushed in by the barges, their sides scraped and their seams sprung in many instances.

The wrecking of the landing stage awa-

The news story opposite goes to show how much damage may result from the parting of a rope. Viewed in this light, every poor or overstrained rope is a public menace.

A man's responsibility does not end with himself—it embraces everybody whom his dealings or actions may affect.

You, as a dealer, can do much to fulfill your responsibility by selling only Plymouth Rope, which is reliable, and by educating buyers to purchase new rope oftener.



Both these courses are also profitable—in money and good-will alike.

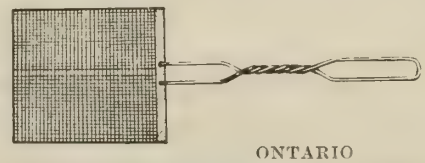
SAFETY FIRST!



In these days, when the matter of personal safety is placed before all other considerations, the banishment of the dirty and pestilent house fly becomes a matter deserving of the attention of every householder.

Personal cleanliness, as well as personal safety, also demands that the housefly be ostracised from our houses, and if possible, exterminated completely.

Fly-swatting is the quickest and easiest way of ridding a room of flies. Every swat means a sure-dead fly, and every dead fly reduces the number of flies left to breed future pests.

The Very Thing You're Looking For

The "Handy" Tie

is simple, convenient and inexpensive. It slips on over the bridle for outside tying, or can be used for tying in the stable if desired. Fitted with a ring-and-tongue attachment which prevents a strangle hold, the "Handy" Tie is three times as strong as a snap and ring tie and just as easy to use.

Prices, Prepaid, ½ inch Rope, 35c. 9-16 inch Rope, 30c.

If your dealer cannot supply you, send us his name and address and we will mail you one, PREPAID, on receipt of price.

G. L. GRIFFITH & SON,
STRATFORD, ONT.

He can't get away

THE tighter he pulls, the tighter the Giant holds. There are no weak places to snap, for the shank goes into and forms a part of the halter, equally distributing the strain. This makes the Giant absolutely "puller-proof."

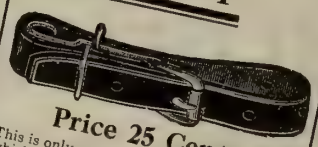
Giant halters hold

THE Giant is built to last. Made of nine-sixteenths inch pure Manilla rope, best quality harness leather, doubled and stitched. Will fit any horse and is as comfortable as it is secure.

Being roomy around the nose, the Giant is the ideal halter to take to town, as it slips easily over the bridle. Weight is less than two pounds.

Mailed prepaid for $1.00

IF your dealer is not yet carrying the Giant halter, he will get it for you or you can order direct. It will be sent you by return mail. Slip the halter over the head of your heaviest and hardest-pulling horse—and let him pull. You will get your money back if the Giant breaks. But it won't.



Write your name and address on a slip of paper (we will appreciate it if you also mention your dealer's name), say "Send me a Giant halter," pin to it a one dollar bill and mail to-day. Address

The Rotten Retailing of Wire Nails

Too Many "Under the Hat" Quotations—Many Retailers Have no Set Policy for Adding Profits When Selling Nails—One of the Most Abused Lines of Hardware Staples.

Written for Hardware and Metal by David G. George.

IN this article I will endeavor to throw a little light on the "rotten methods of retailing wire nails" now in effect in many of our Canadian towns and cities. It is not my intention to attempt to strike a blow at Canadian retail hardware merchandisers, but rather to point out a few undesirable features which exist, and which, as far as I can ascertain, have existed for many decades, and in many cases are largely the result of habit.

We hear to-day a great deal of comment on the aggressive and price-cutting tactics of many of the mail order houses, but we do not hear a great deal about the price-cutting tactics of many of our retail hardwaremen, particularly the tactics employed in the retailing of nails, the staple of hardware staples. I know that on reading this you will immediately say that the low prices are often caused by competition with semi-jobbers from the large cities, and I must admit that in some cases this is correct, but on the other hand, there are many towns and cities not affected by this class of competition, and conditions in these towns (with few exceptions) appear to be just as bad as in the towns and cities where competition is excessively keen.

It is, indeed, unfortunate that many retailers handle hundreds of kegs of nails each year at a loss. Why should this condition exist?

We hear a great deal about the origin of nails—the modern methods of making nails—the effect of the new tariff on nails—the recent advance in the wholesale price of nails; but what do we hear about the much-abused practice of selling nails at or below cost? Not very much outside of the fact that you can buy ten pounds of assorted nails, plus paper, twine, and overhead expense, for 25 cents, and if you want them by the keg, you can get them at almost any price from 10 cents per keg below the prevailing base cost up to a high figure.

In a recent investigation of the situation I found that many retailers, particularly in small places, labored under the delusion that if they quoted the farmer or builder a low price in nails they would be sure to fill the balance of the builders' wants for other lines of hardware, and thus make up the loss occasioned through selling the nails at a low figure. In some cases the plan works out to the satisfaction of the retailer, but in the majority of cases the farmer or builder **does not** place his order for glass, galvanized iron, lock sets, hinges, etc., without securing quotations on these lines as well as on the nails, and in many cases where the retailer has supplied the nails at or lower than cost, he finds he is called upon to supply the balance of the farmer's or builder's wants at prices which only allow him a very narrow margin of profit.

Joenson, the hardwareman, is going to sell me nails for my building at cost, but he told me to "keep it under my hat."

Too many retail competitors are suspicious of each other, and sacrifice legitimate profits in order to create the impression that they cannot be undersold by the other fellow. Many customers peddle their prices. For instance, a farmer or builder will secure your quotations and carry them to your competitor and vice versa. Whittling of prices commences, and before the purchase is made the hardwareman is selling the goods at a loss.

Price-cutting on nails has been carried on to an almost unbelievable extent throughout Canada, and it is the height of absurdity that carloads of nails are sold without the retailer securing any profit — in fact, very few retailers are making any money on nails. Is it not time that Canadian retail hardwaremen discontinued the demoralizing habit of price-cutting on staples and attempted to work more along the lines of co-operative competition?

Co-operation is practical, logical, workable, and will do for the retail hardwaremen of Canada what it has done and is doing for thousands of other men in other lines of business, and what it is doing constantly as a motive power in all phases of life.

A hardwareman once remarked that just as the grocer sold sugar at a loss, the hardwareman had to sell nails at a loss. Why should the hardwareman sell

Prices quoted on wire nails by retail hardware firms in a Canadian city.

nails at a loss? There is no legitimate reason why he should any more than he should cutlery or any other line. It will no doubt take time, but I believe co-operative competition can be worked up to such a degree by retail hardwaremen that the Canadian trade in general will see the folly of selling staples such as nails at prices which demoralize business and profits, and that remedial measures will be undertaken. Elsewhere in this issue is shown a panel which explains why many men fail in business. Look it over and then figure up how much you have made or lost on wire nails during the past year. You will no doubt receive a rude awakening.

It must be admitted that there are several undesirable features in connection with the retailing of nails, particularly when dealing with corporations or departments of public works. It is not generally known, but nevertheless true, that some corporations in calling for tenders on the year's supplies will specify many hundreds of kegs of nails, when as a matter of fact (and this is often known only by the successful tenderer) that a small number of kegs will be actually purchased. The successful tenderer is then able to quote an unusually low price on the nails, knowing that he will only be called poon to supply a small quantity. He can then secure a good margin of profit on the many extras required.

This is an undesirable feature, and hardwaremen should do all in their power to have it eradicated.

Another undesirable feature and one that often causes price cutting, is the fact that many customers allow themselves to be guided in their future purchases by the quotations they receive on nails. This undesirable feature existed for many years and still exists in many cases but I believe it is rapidly disappearing.

I know of a hardware merchant who last year sold over 600 kegs of nails. He sold them at a loss—a considerable loss—just think of it, and he is no exception to the rule. There are many like him. Imagine how the loss on nails eats into the profits on other lines.

It may be all right in the estimation of some men to sell nails at a loss, but I would rather make a 50-cent sale of a pocket knife carrying a profit than a twenty-dollar sale of nails at a loss.

Our country, like all other countries, has been passing through a rather trying period during the past year, but we are optimistic and expect to see a big improvement in conditions in the near future. Would this not be a good time for retail hardwaremen to start an agitation for improving conditions in the retailing of wire nails and put a stop to this demoralizing feature which has infested the hardware trade for many years in the past, and which to-day is seriously affecting the net profits of many of our retailers?

In the accompanying table is shown the prices on wire nails which prevail in one Canadian city. The majority of the retailers visited are paying $2.25 base for their nails and the quotations are on 5 ins. — 3 ins., and 1½ ins. nails in lots of one keg each. The lowest price quoted for 5-inch was $2.25 and the highest $2.85. The lowest price quoted on 1½ in. wire nails was $2.65 and the highest $4.00.

Store No. 13 was a department store and would not quote a price in keg lots, the quotations in this store being 4 cents per pound for any size. One merchant who had quoted a low price, on seeing that he was not going to secure the order, followed me to the door and then confided that he would give me the nails at a further reduction if I would keep the information under my hat. I found out later that he made a regular practice of giving out "under the hat" quotations. Too many retail hardware merchants as well as others higher up are giving out "under the hat" quotations and this is in a large measure responsible for the demoralized conditions in quotations on nails and other hardware staples in many places. I would like to see the Canadian hardware trade discuss this question through the columns of Hardware and Metal, and hope that every retail hardware merchant will do all in his power to so improve conditions that every merchant will be able to "stand up for a legitimate profit."

WHEN TO TRIM WINDOWS.

At the recent ad. convention in Toronto an interesting question regarding the proper time for window dressing come up.

The author of an article on window dressing in general, concluded his remarks by the statement that a window should never be dressed at any other time than at night and incidentally scored the country store for its usual practice of trimming windows during business hours. The speaker claimed that in the case of the city store, the waste of an empty or nearly empty window was terrific at the crowded noon hour, for instance, when immense crowds were passing.

He had taken his seat amid a mild murmur of approval when another man arose and in a few cogent and concise words routed the other's argument. He based his theory on a fact that he proved then and there and which was this—that for some unaccountable reason, the window that was being dressed while the crowds were going by did more good than the most perfectly dressed finished one. He proved that the animate man in the window was of more valuable interest to the crowd than any aggregation of inanimate objects could be as long as the window had some of the objects of the trim in it so that they would receive the benefit of the interest aroused. Also, that as long as the man continued to work on the window he could hold the attention, but when he ceases to do the interesting thing and becomes an automaton, interest wanes.

DISPLAY SALESMANSHIP.

Good display is good salesmanship, so the wiseacres say, I wot. But the whichness of the why, perchance, is that said wiseacre is feeding the hardware patient a lovely sugar-coated pill, to give him a distended feeling in the region of the top of his body.

Now for the explosion, the expose, the end of the dear deception!

Good display is good salesmanship only when the human goods are back of that window, ready with a punch that has some speed in it. The window might as well be on the roof as in the store front of some stores. The birdies would at least enjoy them.

VACUUM CLEANER DEMONSTRATION DEPARTMENT.
This view shows entrance to booth and display of cleaners of various types. Samples of hardwood flooring on wall at right. Inset is sign over entrance.

Demonstrate Vacuum Cleaners in a Window

This Method Used by Montreal Store as Well as in the Housefurnishing Department and in Private Homes—Doing up a Room Thoroughly Often Assures a Sale.

By a Staff Correspondent.

14 Vacuum Cleaners Sold in Single Day

WE have sold as many as fourteen vacuum cleaners in one day," remarked the manager of the department in Henry Morgan & Co.'s store, Montreal, in discussing with a representative of Hardware and Metal, the methods by which the machines are placed in the homes of the Montreal people.

"It is necessary to give a practical demonstration of the working of the machines in order to get people really interested. On many occasions when I have been unable to close a sale here in the store I have taken a machine under my arm, jumped on a car, and have gone to the home of the customer and cleaned up an entire room in order to show just what the cleaner would do. Usually a demonstration in the store is sufficient, but if I think it would be more convincing to show it in practical use in the home, I send a man with a machine or go myself, and thoroughly clean one room in the house. We take along all the attachments and not only clean the carpet or rug, but also go over the walls and hangings, the pictures and chairs, etc. This generally results in closing the sale."

Section for Demonstrations.

Morgan's have quite a large section of their carpet and housefurnishings department devoted to showing vacuum cleaners. An inclosure of about 25 or 30 feet square is provided with three large rugs on the floor and various makes of vacuum cleaners and carpet sweepers are close by. Chairs are conveniently placed so that customers may watch the demonstrations in comfort. Electric sockets are located so that the electric machines may be quickly connected and their utility explained. Some half dozen different makes are carried in stock and the prices range from $35 up to $150 for portables and from $300 to $1,000 for stationary machines. The hand machines which also are carried are, of course, much cheaper. All the attachments for the machines are shown in a special fixture for that purpose.

Prefer Higher Priced Machines

"We always recommend an electric machine in preference to a hand machine, as we believe them more satisfactory. Of course, we will sell the hand machine if the customer wishes it, but we endeavor to point out the advantages of the higher priced machines; how they save labor, the small expense of operating and the general all-round satisfaction they give. As I stated before, we show them first what the machine will do, how easy it is to work it and the way in which it collects the dirt. As regards the stationary machines we have our own men to install them and we do quite a business in these as well.

Operate Machine in Window.

"Occasionally we have a window display and show the machines in the window, operated by one of the employees, and it always draws a crowd. The demonstration right here in the department is the most satisfactory, though, for we can explain the working and the adaptability of the machine personally and create greater interest."

When a window is used for displaying the cleaners, its use is charged against the department, the same applies to newspaper space in advertising, the charge for the space taken up is placed on the department.

In addition to the newspaper advertising, the companies manufacturing the

HARDWARE AND METAL

VOL. XXVI. No. 28 Toronto, Canada, July 11, 1914 Two Dollars per Year

THE POSTAL QUESTION AND THE MERCHANT.

AN article is published in this issue in which the attempt made by the Postmaster-General to secure the arbitrary right to fix postal rates on second-class matter is reviewed. This is done advisedly, as the question is one of utmost importance to the retail merchant. Anyone familiar with the facts of the case can understand the Hon. Mr. Pelletier's object in seeking to take away from Parliament the right to fix the postal rates on newspapers and periodicals and to vest that power in himself. The power once secured would enable him to rearrange postal rates to his own satisfaction; and, judging from statements made before the Senate committee, he would not do anything to check the unfair advance of the "dollar dailies"—the metropolitan newspapers which gain large circulations in rural sections by cut rates and then flood the territory with mail order advertising.

Read the article in this issue and you will see that the alignment on this question is in reality as follows: The Postmaster-General, the "dollar dailies" and the mail order houses versus the weekly and trade press and the local merchants.

The merchant has a direct interest in the postal question.

RETAILING OF NAILS.

ELSEWHERE in this issue an article appears, dealing with the retailing of wire nails and pointing out some of the undesirable features which exist. It is very unfortunate that retail hardwaremen find it necessary to handle large quantities of nails each year and realize little or no profit, in fact, in many cases handling them at a considerable loss. Another undesirable feature and one not mentioned in the article is that many merchants after quoting a very low price on nails allow the customer a considerable length of time in which to settle his account. Some little time ago a retail hardware merchant who had apparently been doing a large retail business was forced to close his store. When the condition of his business and accounts was investigated, it was shown that he had been doing a very large business with contractors and builders, in fact he had been the low-priced builders' hardware merchant of the city in which he was located. It was shown that he had indiscriminately extended credit for long terms to builders and others who had purchased builders' supplies from him at very close prices. Among the conspicuous items on many of the accounts were large entries for wire nails which had been sold at an advance of five and ten cents over the base price at the factory. The merchant was really handing out the goods at much lower prices than cost because he apparently forgot that his percentage of overhead expense applied to nails as well as to other lines. He sold between three and four cars of nails each season. He sold them all at a loss and then extended credit to his customers. This merchant's price-cutting tactics did not apply only to wire nails. He treated such lines as mortar stain, sash weights, building paper and other lines in much the same manner and it was little wonder that he found it necessary after being in business only a short time to make an assignment.

MAKING MONEY.

A MAN who was once in the retail business and who now holds a minor position with a jobbing house remarked that "He made a lot of money when he was in the retail business, but he lost it all in bad accounts." He is typical of many retail merchants to-day who think they are making lots of money, but who will eventually find out that they have lost it all, or a considerable portion of it in bad accounts. He really did not make the money, but for several years he labored under the delusion that he was making money. His main object was to have a large turnover, and he did remarkably well in this respect. He found that many people were willing to pay a long price for the goods if they could only get credit. The indiscriminate giving of credit is a pit in which many retailers appear to fall, and which in many cases put them out of business. How to do a cash business is a problem that confronts many merchants to-day. The retailer must constantly be on guard in order to keep out the dead-beat and the many who cannot pay. The dead-beat is a troublesome foe, but there is room for an argument as to whether or not he is the most troublesome customer with which the retailer has to contend. One of the most troublesome debtors is the man whose intentions at the time of purchasing are good, and who places a large order for supplies, but finds out later on that he is unable to make a settlement. He belongs to a class of customers who cause endless trouble to the retailer. Many retailers are themselves to blame for much loss through bad accounts, on account of not watching collections closely and not employing a systematic method of collecting. This is a very important fea-

ture of successful retailing and too much stress cannot be laid upon it. July and August are two good months for pushing collections. The summer slackness gives the merchant and his staff plenty of time to devote to collecting accounts. The money gathered in now will help in paying for fall goods. You will probably find it easier to collect the accounts now than later on, because the longer an account remains on the books the harder it will be to collect.

INSTRUCTING SALESMEN.

MANY of our largest and most successful merchandising concerns have found that it pays to provide a course of special training for junior employees. The practical and definite instruction and information given them is a short-cut to the point of efficiency which would only otherwise be attained after many years' service, and after many costly and embarrassing mistakes. In the smaller stores there should be occasional meetings for the clerks where problems which are constantly arising could be discussed and settled. Many of the larger stores in the larger cities have instructors who conduct classes in the same manner as they would be conducted in a specialized business college. Junior members of the sales-force are instructed in all branches that it is required they should understand, and special examinations are held to test the efficiency of the students. These large firms have found out that by conducting schools or classes of instruction they secure a higher and more efficient class of help than could be obtained otherwise. An American contemporary in commenting on the methods of some of the larger city stores said:

"The educational departments for employees of the Wanamaker stores and several other big retail houses are remarkably comprehensive and complete and the good that is accomplished through them is almost beyond computation. Naturally the smaller store cannot afford an elaborate school for employees, but the thing can be handled in a smaller way according to circumstances. In some instances a regular school is not maintained but at intervals professional instructors are employed to lecture and demonstrate before the employees. The general custom is to have a course of lectures which employees are required to attend and take notes. Salespeople and others are encouraged to ask all the questions they may care to and at the end of the course an examination is held to determine how much of the instruction has 'soaked in.'

"Merchants are continually bewailing the fact that good sales-people are practically impossible to find, and there is a good deal of reason for these complaints. Unquestionably the remedy lies in education. But where is that education to be had unless the merchant himself furnishes it? At the present time, so far as we know, there are no public schools in which the prospective department store worker can secure adequate training."

Some Canadian hardware firms are working along the lines outlined above, but they are comparatively few in number, and there is great room for much educational work along this line.

IMPORTANCE OF CO-OPERATION.

THE increasing necessity of a further get-together movement upon the part of hardware merchants is becoming more and more apparent. The evils of price-cutting and credit extension form a cancerous growth in the body hardware that must be met and destroyed ere it performs that duty for those who foster it.

Hardware and Metal representatives find that almost without exception, the merchants of those towns that do not work together are prevented from doing so more by petty differences of a local nature than by any lack of desire to do so.

It seems absurd that any man with any sense of proportion or of values should allow differences of a personal nature to keep him from working in harmony with his opposition on matters of deep concern to both. No expense, no formal declaration of principles is required, but merely a business understanding between those who are engaged in the same business in the same town, irrespective of personal likes or dislikes. It will be found in most cases that one man is usually waiting upon the other and blaming him for any unfavorable present conditions. Such being the case, the exertion of a little initiative on the part of one may be depended upon to accomplish the desired result in the other, of causing him to eagerly embrace any plan suggested for the improvement of his business condition.

CO-OPERATION WITH THE TRAVELER.

THE merchant who deliberately refuses to see any traveler of any reputable firm for any reason short of sheer necessity is taking one of the steps of his business suicide. Regardless of possible grievances, real or fancied, frequent calls by the representatives of many houses or any one of a number of such reasons; the merchant owes it to himself to give the traveler every decent consideration; the consideration that he himself expects to get from his own customers.

When one considers the wide experience that goes into the making of a traveler, the variety of districts and conditions observed and the number of merchants seen by him; one cannot fail to realize that it should prove a paying investment to cultivate him and get the news and views of the trade. A traveler is human too, and he will do more and go further out of his way to boost and help the man who extends to him the courtesy and consideration that is due all men in their business relations, regardless of either the presence or absence of any direct purchase or other material benefit.

The occasion of a traveler's call is really, even under the most unfavorable of conditions, more of a compliment than the reverse, a fact that the merchant would do well to remember when he is called upon by a man from whom he has no intention of buying. The very similarity of their positions should render the merchant sympathetic rather than critical of the traveler. The chief difference is that one calls on his trade and the other (with a few progressive exceptions) lets the trade call on him. In that happy day when all merchants seek their trade by circular, personal calls and otherwise, a still closer bond of union will exist between them and the travelers who are doing the same work on a larger scale.

EDITORIAL BRIEFS.

WAS YOUR LAST inventory soggy with shelf profits?

* * *

THE MODERN merchant who would win must keep in touch with the merchandise—and the market.

* * *

CUTTING PRICES is certainly a queer way of increasing profits; and yet it is often resorted to with that object in view.

The Postmaster General versus the Merchant

A Complete Review of the Events Following an Attempt by Hon. L. P. Pelletier, Postmaster-General, to Secure Power Over the Press of Canada and Thus to Discriminate in Favor of the Big Papers Which Circulate Mail Order Advertising.

A BILL to amend the Post Office Act of Canada was introduced into the House of Commons by the Postmaster-General, Hon. L. P. Pelletier, during the session of Parliament recently closed. After certain amendments had been proposed and the bill had been passed back and forth between Commons and Senate, it was found that a satisfactory agreement could not be reached and the bill was not passed. The Postmaster-General has since, in a statement sent broadcast throughout the Dominion, made the charge that his bill was killed by the Liberal majority in the Senate, laying stress on the fact that thereby some 1,400 postal employees are deprived of an increase of salary provided for in one clause of the bill.

Under the circumstances it is felt necessary that a full explanation should be given to the public, not only in regard to the terms of the proposed legislation, but also with reference to the manner in which it was introduced. The explanation will serve to make clear the attitude of the press of Canada in opposing the bill, and, if it bears hard on the Postmaster-General, it must be borne in mind that he has forced the press into a defensive attitude. The question has never been a political one in any sense of the word—which is attested by the fact that the publishers of Canada, Conservative and Liberal alike, have opposed the measure—and it is largely to remove the impression that it is a political issue that this explanation is made. It is felt also that the public, being directly interested, should be fully informed in the matter. If legislation detrimental to the publishing business were put into force, the public would suffer either through a curtailment of service rendered by newspapers and periodicals or the other alternative of higher subscription and advertising rates.

A Plea For Higher Rates.

In order to give a clear understanding of the case, it will be necessary to review the matter from the very beginning. During the administration of Sir John A. Macdonald, newspapers and periodicals were carried in the mails free in recognition of the educational and national work they were doing. As the expense of distribution grew, however, the Post Office Department felt that this privilege could no longer be extended, and during the tenure of office of Sir William Mulock rates were fixed of ¼ cent and ½ cent a pound on all second-class matter. Later the Senate reduced this to ¼ cent all round. It was recognized that this change would completely upset the plans on which publishers had been basing their operations, and accordingly some papers were allowed five years in which to adjust themselves to the new conditions.

Nearly two years ago the Postmaster-General, Hon. Mr. Pelletier, notified the Canadian Press Association (which includes in its membership a very large majority of the publishers of Canada) that a higher rate of postage would be necessary on second-class matter. The publishers promptly informed him that, if it were found that conditions warranted it, they would cheerfully comply with whatever Parliament in its wisdom and after careful investigation found was right. In order to secure information on the relation of the increased cost of mail service to the carrying of second-class matter, the publishers employed M. E. Nichols, then the editor of a Winnipeg Conservative daily, to prepare a report for them. This report was submitted at a special joint meeting of the Canadian Press Association and Canadian Press Ltd., held in Toronto on November 20, 1913. In it Mr. Nichols dealt with the congestion in the mail service. He went further and appended a series of recommendations as to new rates and regulations which the Canadian Press Association should, in his opinion, suggest to the department. After some discussion, the Canadian Press Association accepted some of his recommendations, amended others and struck out others altogether, agreeing on the whole to an arrangement that would mean a very considerable increase in rates. The report as thus amended was submitted to Mr. Pelletier at once by Hal. B. Donly, president of the Canadian Press Association, and J. F. MacKay, president of Canadian Press Ltd. It is reported that Mr. Pelletier expressed the opinion that the suggested arrangement was generally quite satisfactory, but that there were some features included in the original report which he wanted re-inserted. As the original report had been a strictly confidential one, the question may be asked how information as to its contents had become known to the postal authorities. Finally, the Postmaster-General stated that the recommendations would be considered and the views of the department submitted in a short time, when, he urged, another meeting of the Press Association should be called at once to consider his proposition.

The promised memorandum was never supplied although the Association made repeated requests for the information.

Before going any further it will be necessary to show what excuse Mr. Pelletier had for not fulfilling his promise. The Canadian Press Association heard nothing from him until it was discovered that on May 4 bill No. 147 had passed the House of Commons containing a clause which took the fixing of postal rates on second-class matter out of the hands of Parliament and vested it in the person of the Postmaster-General. Prompt steps were taken to oppose the measure in the Senate—the only recourse left—and in the course of the fight which ensued a deputation waited upon the Premier, R. L. Borden and the Postmaster-General to protest. Mr. Pelletier defended his action in bringing the bill forward before carrying out his promise to submit a proposition to the Canadian Press Association by stating that, at the conference with the two presidents, they had agreed to have M. E. Nichols prepare a supplementary report for him, and that as a result of the non-receipt of this report he had not been able to submit the promised memorandum. In reply, President Donly expressed his clear understanding that neither he nor the president of Canadian Press Ltd. had agreed to have Mr. Nichols, who was present, prepare a supplementary report. He remembered that during the interview the Postmaster-General had asked Mr. Nichols to secure some information regarding the custom in certain countries of grading newspaper rates according to the proportion of advertising to reading matter. This request was proferred by the Postmaster-General himself in quite an incidental manner, and it was clearly the understanding of the two presidents that this report had nothing whatever to do with the arrangement that the department was to submit an early memorandum to the Canadian Press Association covering the official proposals. **That the supplementary report was to be prepared for the Post Office Department has since been confirmed by Mr. Nichols himself.**

Clearly, therefore, in failing to keep to his arrangement with the Canadian

Press Association and in seeking to put through legislation which would give him the whip hand over the publishers before submitting his proposals to them, the Postmaster-General was not playing fair.

The Introduction of the Bill.

This charge of unfairness will seem mild when the circumstances surrounding the introduction of Bill No. 147 are reviewed. The newspaper parliamentary reports of May 5 contained an item to the effect that on the preceding day a bill to amend the Post Office Act had been given its third reading and passed in the House of Commons. That was all that was said. No references were to be found as to the nature of the amendments. But when the Hansard reports came to hand it was found that Bill No. 147 contained a clause which took out of the hands of Parliament the right to fix the rates on second-class matter and transferred that power to the Postmaster-General. No notices had been sent out of this bill. The members themselves were ignorant of what it was for. When the House went into committee on the third reading, Hon. Mr. Graham asked the Postmaster-General what changes were to be effected, receiving the following reply:—

" The main object of the first change —that is, in paragraph E—is to make it clear that the right of looking at newspapers, parcels, and so on, is absolutely confined to those, and that there is no right to open letters. The section as it stands at present, as my hon. friend from Rouville (Mr. Lemieux) knows, leaves the question open as to whether or not it is right to open letters. I want to make it clear that the right does not exist. We are amending the clause so that there is no possibility of doubt, by inserting the words, ' except in the case of letters.' **There are other matters of detail, but this is the main object of the clause."**

Now let us see exactly how clause E reads:

(E) "Established the rates on postage on all mailable matter, not being letters, and prescribe the terms and conditions on which all mailable matter shall, in each case or class of cases, be permitted to pass by post; and, except in the case of letters, authorize the opening thereof for the purpose of ascertaining whether such conditions have been complied with."

It will be noted that the " main object of the clause " is added at the bottom, while the " other matters of detail " include the right to arbitrarily fix rates on second-class matter **in each case or class of cases.** A mere " matter of detail," this power vested in the hands of one man which would enable him to fix, if he so desired, prohibitive rates, to put any or all classes of publications out of business!

Mr. Pelletier's misleading explanation of this clause in the House can be accepted as proof of either one of two things.

First, he did not himself realize the importance of the first part of the clause.

Second, he was deliberately endeavoring to deceive the members and rush the bill through before its real importance became known.

The first explanation is not tenable. Mr. Pelletier is an able man, a man of broad experience and considerable astuteness. No one would insult his intelligence by assuming that he really believed that the question of taking from Parliament a power which had been vested there since Confederation, a power which might involve millions of dollars, was a mere " matter of detail " —an item of minor importance as compared with the rest of the clause which fixes that the Postmaster-General can open newspapers but not letters! It is not to be thought for a moment, we repeat, that the head of the most important administrative department could be deluded into actually believing anything of the kind.

But, further, if the right he was thus prepared to assume of fixing second-class postal rates was a mere " matter of detail," why did he hold up the whole bill when he found that this one " matter of detail " was not acceptable? The bill also provided increases for some 1,400 employees of the department, who are badly in need of the raise, he says. If a little " matter of detail " could not be adjusted, why did he not accept the amendments and let the bill go through this session? The " matter of detail " could be fixed to his satisfaction at the next session and, not being of sufficient importance to be worth explaining even to the members of the House, it could not matter much either one way or the other.

No. The Postmaster-General's subsequent course bears convincing testimony to the fact that this mere " matter of detail " was to him the most important part of the whole bill. Why, otherwise, should he permit his whole bill to be shelved because of it?

If further proof of the purpose of the astute Postmaster-General is required, the following facts will serve to establish the contention that he deliberately attempted to rush the bill through before interested parties would have a chance to stop it.

When it was learned through the Hansard reports that this bill had been passed in the Commons, the secretary of the Canadian Press Association sent a request to the Post Office Department for a copy. The reply received from Dr. Coulter, Deputy Minister, was dated May 8 (the bill passed May 4) and read in part:

"With reference to your letter of the 6th inst. asking for copy of the Postmaster-General's Bill to amend the Post Office Act which passed its third reading in the House of Commons the other day, permit me to say that none of these will be printed until the bill has been signed by the Governor-General, and when this has been done, I will be pleased to immediately send you a copy."

Yet the fact remains that hundreds of copies of the bill had been printed.

The secretary of the Canadian Press Association received copies of the bill from another source, the day before he received this letter from Dr. Coulter in which the latter states that the bills were not yet printed!

Why had not a copy been sent to the Canadian Press Association? Surely the interest of newspaper publishers in the proposed change was sufficiently great to entitle them to a copy of the bill pending! Why was the request for a copy refused?

Why Fight Was Carried to Senate.

If the purport of the bill had not been discovered, almost by an accident, the measure might have passed through the Senate in the same quiet way that it slipped through the Commons, before the publishers received copies of the bill. They would not have learned of the new power acquired by the Postmaster-General until it was too late to even protest. Can it be that this contingency had been foreseen, had in fact been counted upon?

Mr. Pelletier at various stages of the fight complained of what he termed the unfairness of publishers in carrying the fight before the Senate, a body politically opposed to the Government and himself. By skilful manipulation of this complaint he has endeavored to create a political issue out of it and to make it appear that his bill was thrown back through the caprice of a hostile second chamber instead of as a result of the opposition of a united press.

As a matter of fact, the bill had passed the House of Commons before the publishers knew that such a piece of legislation was even contemplated. What course was left but to fight it in the Senate in sheer self-defence?

The publishers of Canada would have much preferred to have fought the bill on the floor of the House, where the question could have been thrashed out without any suggestion of partyism creeping in. Mr. Pelletier was afraid to have the bill discussed in the House. He has openly avowed his fear. If he felt that his measure would be beaten in the Commons, where any party bias would be in his own favor, why does he charge that its practical defeat in the Senate was due solely to political animosity?

As a matter of fact, the press has presented a united front on this question. P. D. Ross, editor of the Ottawa Journal, who led the fight for the Canadian Press Association, is perhaps the foremost

newspaper supporter of the Government and who because of this very justly commands the respect and confidence of the Prime Minister, more perhaps than any journalist in Canada. Many of the publishers who went to Ottawa to protest were strong Conservatives. Opposition in the Senate did not come from the Liberal side of the House alone.

What is more, if the issue is reviewed next session, the publishers of Canada will go before the House of Commons to present their case, and if Mr. Pelletier relies upon carrying his point by appealing to sheer party loyalty, he will undoubtedly meet a series of surprises.

The amendments proposed in the Senate, which Mr. Pelletier refused to accept, were framed with an earnest desire to make the bill workable in the interests of both departments and press. It is not stretching a point to assert that the objections raised by the Senators were precisely what Mr. Pelletier would have encountered in the House had the members been aware of the purport of the bill when it was first introduced.

Objection Based on Principle.

The publishers of Canada objected to the bill purely on principle. It is contrary to the spirit of the British constitution for arbitrary powers to be vested in one man, without the right of appeal to Parliament. What sane man would suggest that the fixing of the tariff should be placed in the hands of one member of the Cabinet? In a lesser degree this is exactly what was contemplated in the postal amendment. It would rest with the Postmaster-General to say what rate must be paid on the printed matter circulated throughout the Dominion.

The danger would be two-fold. Not only could an unscrupulous official unfairly penalize any paper or class of paper, and discriminate against papers for party purposes, but the man responsible for the fixing of the rates would himself be placed in an invidious position. He alone would have to bear the brunt of discussion and criticism. On that man alone would all the influence of competing interests be brought to bear. Would it be wise to place such power in the hands of one man?

A significant admission was made by Mr. Pelletier before the Senate committee when the matter was first discussed. He had pointed out that the new rates suggested by the Canadian Press Association bore heavily on the metropolitan daily newspapers. "I cannot fight these big papers," he declared. If he feels unable to withstand the influence and power of the metropolitan dailies when the question rests with Parliament, would he not have been even more impotent if the sole responsibility of fixing the rates had been placed in his hands, thus making him the target against which such influence would be directed? In view of this admission, what could the smaller paper, whose interests are almost diametrically opposed to that of the big "dollar daily," expect if the adjustment of rates rested with one man —and that man professedly afraid of the big fellows in the publishing world?

But it is not necessary to go on conjecture alone in considering the effects that the measure would have. At the same session of the Senate committee Mr. Pelletier declared that the publishers need not anticipate any arbitrary use of the power he was seeking to get into his hands. Colonel MacLean, publisher of class papers with a combined circulation of over 100,000, including Printer and Publisher, the organ of the publishing industry, spoke before the meeting, objecting strongly to the proposal. In the course of the discussion that ensued, the Postmaster-General, forgetting his pledge that the power would not be used in an arbitrary way, stated that, if Colonel MacLean would not consent to the proposals, he would impose a rate of 8 cents a pound on class publications.

What more telling proof could have been adduced of the use that might be made of the arbitrary power that the Postmaster-General sought?

A rate of 8 cents a pound would put every magazine, trade, technical, and farm paper in Canada out of business. Thus would one man have the power to cripple, kill or, on the other hand, to unfairly foster by privilege any particular paper or class of papers.

The Status of the Class Press.

One of the main points of contention since the question of increasing the postal rates first came up has been the status of the class press. Despite the fact that trade and technical papers have become a necessity in every line of industry, despite their acknowledged worth as an educational factor, despite finally, the fact that the governments of Canada spend large sums of money annually to send out free printed matter of an instructive nature to the farming community, thereby performing the same work for the farmer that the trade paper does for the engineer, the mechanic and the merchant; despite this, there has long been a prejudice in the Post Office Department against trade and technical papers, a prejudice which has manifested itself in close surveillance, dogmatic interpretation of statutory details and open threats of a higher rate than is placed upon daily newspapers. As soon as it was announced that postal rates would be advanced, it became known that it was intended to seize the opportunity to penalize the trade press. The report submitted by the daily newspaperman, commissioned to report on postal matter, contained recommendations to that effect—recommendations bolstered up with reasons couched in terms so concisely the same as employed by the postal officials that one trade publisher was impelled to exclaim: "It's the hand of Esau, but the voice of Jacob."

The Canadian Press Association, with loyal appreciation of the real value and the just claims of the trade press, refused to countenance the suggestion that the newspapers escape their due share of the advanced cost of postal transportation by putting a larger load on the trade press, voting with practical unanimity to throw out the resolution.

It was not the intention of the writer to enter into a discussion of the position of the trade press at this time, but the above explanation was necessary in order to show the next inconsistency into which the worthy Postmaster-General strayed. At the meeting of the Senate Committee already referred to, Mr. Pelletier stated, in replying to Colonel MacLean, that in the course of the interview he had had with the presidents of the Canadian Press Association and Canadian Press Ltd., when they laid before him the report as adopted in November, he was told by these gentlemen that it was the spirit of the meeting of the Canadian Press Association and Canadian Press Ltd. that a higher rate should be placed on the trade press. As the instructions of the two presidents had been to merely wait upon the Postmaster-General and lay before him the findings of the meeting, it was inconceivable that they could have made such a statement. **Printer and Publisher at once communicated with both Mr. Donly and Mr. MacKay and received their unreserved and emphatic denial of the statements imputed to them by the Postmaster-General.**

The Position of the Postmaster-General.

Throughout the whole course of the fight, the representatives of the press made it their earnest endeavor to keep the personal element in the background. It was made very clear that their objection was not to Mr. Pelletier having the power he sought, but to **any** man having that power; that it was too dangerous a power for one man to have from the standpoint of the good of the country as well as the good of the press. But as the matter progressed and the part that Mr. Pelletier was playing became more transparent with each move that he made, the conviction was driven home that it would be a particularly dangerous policy for such a man as Mr. Pelletier to exercise. He convicted himself of inability to exercise that power with absolute fairness to all concerned by his own

statements in the course of the debates. On several occasions he voiced the opinion that he could not antagonize the powerful metropolitan newspapers. At the meeting of the Senate Committee on Banking and Commerce, on May 29, he said: "But I cannot afford to have all the papers in this country banded against me." If one proceeds to analyze this statement, it becomes apparent that the man who made it is not a proper person to hold a power which would enable him to summarily penalize the press and, moreover, would put him in the position of having the influence of all sections of the press focused upon him. Let us proceed upon a supposition. If he " cannot afford to have all the papers banded against him," he could not be expected to do what was right if the interests of the country at large should at any time demand that he take such action as would cause all papers to band against him. He has tacitly acknowledged that his fears would not permit him to exercise his power in a way that the interests of the country would demand. If he does not feel that he has the backbone to withstand any kind of influence which might be brought to bear, why does he endeavor to take a position where his lack of backbone might some time constitute a menace to the country at large?

The Postmaster General has wide powers now. It is part of his duty. He would have to decide, for instance, how far the metropolitan papers can go in dumping their products in all parts of the country at ridiculously low subscription prices, thus seriously jeopardizing the local press. The investigation made by Mr. Nichols showed conclusively that the congestion in the mails, which had created the necessity for higher rates, was chiefly around the big cities and was due to the enormous quantities sent out by the " dollar dailies." In recognition of this fact, the Canadian Press Association recommended that a minimum subscription price be set for daily newspapers with a view to preventing the "dumping" of big city dailies and thus reducing the congestion.

Before the Senate Committee on May 27 Mr. Pelletier said that " he was not prepared to put into effect the recommendation of the two associations in respect to a minimum subscription price for daily newspapers." Before the same committee on May 29 Mr. Pelletier said: " Fifteen days ago we took eight carloads of one paper in Montreal out to the coast, and they gave us $84.50 as a revenue, though it cost us $502.00." This instance shows that the Government loss is sustained through the circulations built up by the "dollar dailies" through their low outside prices. But Mr. Pelletier, calmly acknowledging the truth of this, had nevertheless announced his intention not to apply the obvious remedy, preferring to make up the deficit by making all papers pay a higher rate, and specially penalizing trade and technical newspapers.

And that is exactly why one man should not be allowed to decide such big problems without any right of appeal beyond him. Individuals are too prone to errors of judgment. Mr. Pelletier's error of judgment in this matter is but a foretaste of what might happen if he were permitted to gather the reins of arbitrary power into his own hands.

The Progress of the Fight.

All that remains is to recount the events following on the fight in the Senate.

On June 2 the Senate Committee on Banking and Commerce passed the bill, with an amendment as follows: " Provided always that the maximum rate which the Postmaster-General may fix as the postage of newspapers and periodicals defined by section 53 of this act shall in no case exceed — cent for each pouch pound weight or fraction of a pound weight, however the rates may be graded according to distance and zones of transportation, and said rates so fixed and levied shall be submitted to Parliament at the ensuing session for revision or ratification."

As thus amended, the bill was passed by the Senate and sent back to the House. The executive committee for the Canadian Press Association were not satisfied, however, as it was felt that when the principle was wrong, the curtailment of powers as per the amendment would not suffice. A deputation, therefore, waited upon Hon. R. L. Borden and Hon. Mr. Pelletier, requesting that "(a) the clause of Bill No. 147 which amends present newspaper postage regulations be withdrawn for the present session, inasmuch as a delay of a few months in amending the present conditions which have existed for nearly 20 years can matter little. Or (b) that the schedule of rates suggested by the Canadian Press Association in December last be adopted until the Postmaster-General can submit revised rates next session."

A promise to consider the request was received from the Premier. In view of the promise of the Premier, it was deemed advisable to place the facts before a number of representative newspapers throughout Canada, in order that they might, if thought advisable, wire their views to the Premier and other members of the Government, and thus make it clear that the position taken by the Executive Committee of the Association was the position of the individual newspapers throughout Canada. To this end night lettergrams were sent on Wednesday evening to approximately 125 representative newspapers throughout Canada, and it is known to the officers of the Association that on Thursday a large proportion of these newspapers wired the Premier and other members of the Government, urging the principle that newspaper postage rates should be fixed by Parliament.

On the evening of Thursday, June 4, it was intimated to the Chairman of the Postal Committee that the Premier wished to discuss the matter further with him. Mr. Ross, chairman of the Postal Committee of the Canadian Press Association, had an audience with the Premier that evening, and Mr. Borden expressed the willingness of the Government to meet the views of the Association to the extent of having the rates fixed by the Treasury Board instead of by the Postmaster-General, with the provision that in no case should the rate exceed one and one-half cents per pound, and with the understanding that the Association would be consulted before the increase in rates now proposed was fixed by the Treasury Board.

After the interview with the Premier and again on the morning of Friday, June 5, Mr. Ross consulted the president and other members of the Executive Committee who were in Ottawa regarding the Premier's suggestion. All were agreed that it would be inadvisable to agree to the compromise suggestion, first because it was contrary to the principle that newspaper postage rates should be fixed by Parliament, and, second, because consent to the provision of a minimum rate of one and one-half cents per pound might be interpreted at a future time as an admission by the Association that the Post Office Department would be justified in imposing any rate of postage up to the rate specified as a maximum.

However, Mr. Pelletier introduced a resolution in the House of Commons making an amendment to the Senate amendment that the fixing of the rate be vested in the Treasury Board, the rates fixed to be put before Parliament for ratification or revision.

On June 10 the bill again came before the Senate and was passed with still a further amendment which practically re-established the old order, inasmuch as it provided that rates fixed by the Treasury Board should not come into force until revised or ratified by Parliament.

The bill as thus amended was returned to the House of Commons, and, on the motion of Mr. Pelletier, a message was ordered to be sent to the Senate that the House would agree to the amendment if it were again amended by striking out the words "and shall not take effect until so revised or ratified." Mr. Pelletier's contention was that these words would have the effect of preventing the

What Other Hardwaremen Do

Hardware Firm Conducts Hour Sale—Ten-Cent Window—Free Spoons—Selling Doll Houses—Free Parcels Post—Nothing on Us—Washer Demonstration—Bathroom Outfits as Wedding Gifts.

HOUR SALE.

THE Tourtellot Hardware Co., Ltd., Port Arthur, recently conducted an "Hour Sale." The sale took place on Tuesday, June 30, the day preceding Dominion Day holiday and lasted from 2 p.m. until 10 p.m. The special goods and the hours during which they were on sale are enumerated as appeared in the ad.:—

From 2 O'clock to 3 O'clock.

10 casseroles, regular price $1 to $2 each—for one hour only the price is, each 75c. Be here early if you want one.

From 3 O'clock to 4 O'clock.

13 only aluminum preserving kettles, ranging in prices from 70c to 90c, for one hour only on Tuesday the price will be 50c.

From 4 O'clock to 5 O'clock.

24 only, tea pots of very best enamel ware, regular price $1.25. For one hour only the price will be only, each 75c.

From 5 O'clock to 6 O'clock.

20 only general purpose hand saws, regular price $1.50 each. During this hour you can get one for the special price of 95c.

From 6 O'clock to 7 O'clock.

Hot Point stoves that sell regularly at $6.25—For one hour you can get one of these stoves at this special price, $4.50.

From 7 O'clock to 8 O'clock.

15 only nickel plated tea kettles, regular price is $1.75. Sale price on Tuesday for one hour only will be, each $1.35

From 8 O'clock to 9 O'clock.

3 dozen best quality steel shears, regular prices 65c to 85c—one hour special sale price on these will be, pair 50c.

From 9 O'clock to 10 O'clock.

50 pieces enameled ware, regular sellers at from 40 to 60c each—During this hour only we will clear the entire 50 pieces at, each 50c.

* * *

TEN CENT WINDOW.

James & Reid's, Perth, Ont., conducted a ten cent sale last week. Special window displays were arranged and a large advertisement featuring the event was placed in a local paper. Graniteware was the principal line featured and among the goods offered were dippers, pie plates, jelly pans, pudding pans, mixing bowls, sauce pans, wash basins, preserving kettles, cuspidors, etc.

* * *

FREE SPOON.

In order to help stimulate the demand for preserving kettles J. B. Ross, hardware merchant, Oshawa, Ont., offers a large size aluminum preserving spoon free to each purchaser of a preserving kettle.

* * *

DOLL HOUSES.

R. Chestnut & Sons, Fredericton, N.B., are selling doll houses at $2.50 each. The houses have been made by a manufacturer of roofing. In featuring the doll houses in show window and newspaper advertising the firm makes a special feature of wall board, roofing, etc.

* * *

FREE PARCELS POST.

Wm. Magladery, hardware merchant, New Liskeard, offers free parcels post service to all customers residing within a radius of twenty miles. In a recent advertisement the following notice appeared:—

Wm. Magladery offers to you, farmers, absolutely Free Rural Delivery of any article which is ordered from us by phone or mail, that we can send by Parcels Post. No matter if it is only five or ten cents' worth of nails or staples. if you will call Phone 11, New Liskeard, or drop us a card, we will send them by the next delivery and will not charge you one cent for postage, either directly or indirectly.

Parcel Post Rules.

Bear in mind that any article weighing eleven pounds or less and not greater in size than 72 in. in height and girth combined can be sent by Parcels Post.

There are thousands of articles in our stock that you can, when in a hurry, telephone us for, which can be delivered by Parcels Post and will not cost you a cent more than if you came to town for them, tools, an ax, hammer, saw, kitchenware, dish pan, milk pail, screen wire, chicken wire, can of paint and a hundred and one other items that you often need in a hurry but don't have time to go to town for. Any of these you can always get on the next delivery by calling Wm. Magladery, hardware merchant, phone 11, New Liskeard.

We are offering this free delivery to accommodate you farmers, and to express to you our appreciation of the favors you have shown us. We hope and believe you will find our new free delivery service a great accommodation, and we want you to call us often, no matter how small the item you need. Phone 11.

NOTHING ON US.

In order to convince customers that the country residents can enjoy as many comforts as the city dwellers, O. B. Henry & Co., of Drayton, Ont., in a recent advertisement said: —

"**Mrs. Jones, of the City of Toronto,** has no greater cooking convenience than you can have on the farm or in the village. Cooking in a hot, stuffy kitchen in a sizzling hot wood or coal range in summer has probably made more women dicontented with farm or village life than any one thing. She thinks of the gas stoves the city folks can cook on. We have a joyful message for these women——The ——— Gasoline or Oil Stoves work just like a city gas stove, so you do not have to be without the convenience of a city gas stove any longer, no matter where you live. No storage or pressure tanks needed. You can put the stove in any part of the kitchen. Simply light the burners and the stove is ready to cook on. We invite you to look at them, and we will give you a little book showing the different styles and sizes.

CREAMERY DEMONSTRATION.

Geo. L. Foerster, Neepawa, Manitoba, held a demonstration, on a recent Saturday at which he featured a home creamery. In advising his customers of the demonstration Mr. Foerster said:—"The Home Creamery marks a new era in the possibilities of butter making. You need it for more than one reason. First: Because it will make you a first-class creamery butter right in your own home.

"It will bring increased profits to you because of its ability to make more butter and better butter, and for which you will be able to demand a better price. No longer will you have to take the standard price for your butter fat and let the creamery make the 18 to 25% over-run."

* * *

WASHER DEMONSTRATION.

On a recent Saturday Bernhardt & Spaldery, Preston, held a demonstration of water power washing machines in their show window.

* * *

BATHROOM OUTFITS.

The George Taylor Hardware Co., Cobalt, are featuring bathroom outfits as practical wedding gifts. In featuring a special outfit of twelve pieces the firm says:—The —— Bathroom outfit makes a handsome and practical gift for the June bride—and then again it may be found very convenient for your own use. This outfit consists of twelve pieces, namely, crystal plate glass shelf, two crystal towel bars for lavatory and bathroom, basin wall soap dish, bath tub soap dish, tumbler and tooth brush holder, toilet paper holder, and bathroom hooks. The absolutely sanitary feature of this ware is its freedom from useless ornament that collects dirt. Every piece has the exquisite A. B. C. Nickel finish on solid brass and is warranted by the makers. Price of set complete and ready for shipment or to take home is $11.00.

* * *

TRIM THAT BLOCKED THE SIDEWALK.

A Duluth hardware store has just put in a show window this week, that has stopped hundreds of people.

The floor has been sodded with grass, across the front of the window is stretched a lawn fence, at the back there are four trellises of 12 in. poultry netting, covered with artificial morning glories.

At the back of the window a sill cock is screwed, to which is attached a length of garden hose. A galvanized iron sprinkling can stands on one corner and near it are a set of floral garden tools. On the other side are a lawn mower and its accessories.

The main feature is a dummy figure in the center, a boy clad in hunting boots and khaki clothing. In his hand is the nozzle of the hose, in the hole of which is set a No. 14, 1-inch flat head bright screw. From the head of the screw 64 strands of white thread run about 6 ft. and are stapled in the floor under the sod. After stapling about 10 threads the sod is packed down, then 10 more threads are stapled, then more sod, and so on until the ends of the thread cover a space about 6 inches wide by 8 inches long.

These threads are kept in motion, giving a perfect imitation of sprayed water, by agitation from an electric fan, concealed behind a picture of lawn fence which stands near the man.

A flower bed, planted with tulips, ornaments one side of this show-window-lawn.—Zenith.

ELECTRICITY IN THE HOME.

The following is a verbatim copy of an authentic letter received in the office of Hardware and Metal, and one that properly used, should serve as an aid to the hardwareman who is pushing electric goods. The letter was written by a Toronto housewife who fully illustrates what can be done by the intelligent use of electric appliances in the home.

July 2, 1914.
—— Galley Ave.,
Toronto.

Dear ——

I received your letter a few days ago, but have been up to my eyes in housecleaning or would have sent you the required information before this. Hope this is not too late to be of use to you.

We use a vacuum cleaner, toaster, coffee percolator, iron heater and stove as well as light the house.

The bills are as follows:—

December	$3.45
January	2.96
February	2.80
March	2.02
April	2.85
May	2.45
June	1.85

Of course we do not waste power, but we use what we need.

Hoping that this information is what you require.

Sincerely yours,

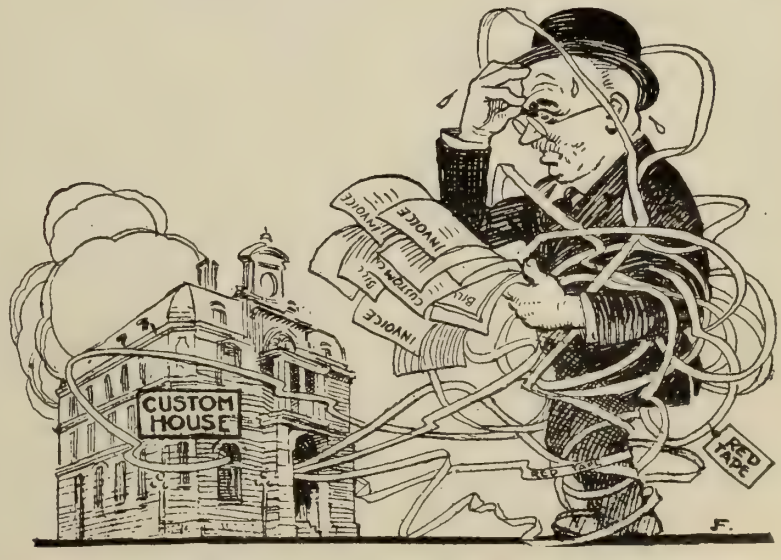
UNIQUE ADVERTISEMENT.



Sample of snappy ad. run by a British Columbia hardware merchant:

Attend the band concert at ——— this morning, commencing at 8 a.m. The music will be furnished by the cash boxes, carrying the money spent at our Great Anniversary Sale. Music will continue all day.

HARDWARE HOUSE-CLEANING.

July is house-cleaning time in most of the retail hardware stores of the Dominion. It is the between-season that precedes stock-taking—the time when the litter of spring sales is cleaned up to make way for those of autumn.

Why not add another live selling season to the year by carrying the house-cleaning to the human machinery of the store itself? Search out fossilized ideas, poor selling methods, antique show racks, such as "ceiling displays" and put them all in the discard. A man may get so used to the sight of some unsightly object or custom around his store that he is unable to realize that it works overtime at knocking him and his business.

The Science of Successful Stove Selling

The Importance of Selecting a Good Line—Truth in Selling—Necessity for Thorough Knowledge of Goods.

An Authorized Interview by Hardware and Metal Representative, With H. J. Conn. St. Catharines.

IN any dissertation on selling and on selling methods one must choose for discussion those features that loom up largest in his mind and it may be safely stated that the same general axioms may be applied to the selling of any article from peanuts on up to pianos.

My line is stoves. I have been immersed in the study and the merchandising of them for thirty-eight years and they are my religion. My list of hard and fast selling axioms is well nigh as brief: they are proper selection of goods to be sold, insistence upon the truth in the selling statements, and last but not least, intelligent salesmanship.

The first subdivision of the three chief component parts of my selling scheme is the master key to the whole, the cornerstone of the arch. One must look over the lines that are offered him and out of his experience, choose that one that offers the greatest value per cold, hard dollar. There can be no equivocation about it: the salesman sells best that article that he would use in his own home, the one that he knows is the best of its line, in short, the one that he can honestly back up and swear by.

The conscientous salesman who is asked by some farmer's wife, "Which stove do you like best?" is in a pretty dilemma, indeed, through biting off more than he can chew by pushing more than one line. I feel truly sorry for such a man. His heart cannot be in his work and he cannot put his best efforts into both stoves and still tell the truth. A further advantage lies in the fact that by centering his attention on one stove, the salesman, in the fullness of time, comes to really know it.

As to truth telling: no one will deny the financial gain to be derived from it, aside from the consciousness of knowing that one has done the right thing. I notice that this fact has been officially recognized and promulgated by the Associated Ad. Clubs in their recent convention in Toronto, but it is no new thing in this store. The man who hews to the line and shuns the crooked tongue is the man who finds an easy command of language at his tongue's end. He does not have to stammer and stutter as he racks his brain for chimerical ideas about his stove; they come faster than he can adequately express them. It is in this connection that the advantage of selling a good line stands out pre-eminently, for naturally if one intends to tell the truth, he wishes to handle a class of goods that the truth will not hurt. It is so much more soothing to one's feelings and so much more gainful to one's pocket to have a customer come back with exaggerated claims for the stove one has sold him than to listen to him prove that untruthful claims were made for the stove to aid in the sale of it.

When we get down to the last subdivision, namely, that of salesmanship, we are getting into a subject about the various subdivisions of which many books might be written. Suffice to say, the primary requisite for a salesman is that he should know his goods from top to bottom so that he can answer any question as to their ability to do this, that and the other under any conceivable condition.

"Why will it pay me to buy this stove when I can get such and such a stove for five dollars less?" is a question that must be answered by a cold analysis of the two stores; a mere broad statement covering the matter will not do much to convince the skeptical customer.

Personally, I have carried this to the extreme by going direct to the foundry where my line of stoves are manufactured and there picking out a likely looking young man, old enough to have some sense and still young enough to learn. The consequence is that I procured a man who knew all about the stoves and only needed my assistance to build up a good sales knowledge on the foundation that he had already built. As a good part of my business is in the nature of furnace and plumbing contracts which takes me away from the store a good deal, I can always leave with the assurance that I have a salesman on the job.

The windows may be properly mentioned as an important part of the selling game. They furnish the best advertising medium that I know of. At present I am running one brass goods and one aluminum ware window. I usually change both windows twice a week and endeavor to have contrasting displays in each.

My demonstrations come next in my favor as advertisers, particularly those of the gas stove variety, and I plan to be prepared for them at all times. Somehow, there is something convincing about the actual sight of the burning gas, something home-like and natural that, while it explains nothing new, adds a touch of reality to the salesman's talk. Most people appear to soak up ideas that they have seen illustrated better than those they have been told of, apparently a matter of the eyes carrying messages to the brain more completely than the ears do.

Acting on this principle, all of my show room stoves, which embrace one of every variety, including furnaces, are hooked up for prompt demonstration whenever needed.

So like the spider that catches the fly in his web, I get the customer into my store by means of my window display, and by my reputation for having a good line of goods; tell him the truth and agree to stand back of my goods, demonstrate the usefulness of what I sell; talk with the sure knowledge of an expert and then sell him the goods.

POSTMASTER VS. MERCHANT

(Continued from page 47.)

Post Office Department from collecting postage.

This the Senate refused to do, leaving the amendment as it had been drafted, but providing a clause to leave old rates in force, thus getting around the Postmaster-General's technical objection. Mr. Pelletier refused to accept the Senate amendment and the bill thus automatically died.

He thereupon issued a statement to the press in which he claimed that his bill had been killed by the Liberal majority in the Senate.

And now comes his last move, a ludicrous finale to a comedy of errors. Mr. Pelletier has publicly announced his intention of going back to the system that prevailed before '67. He states that he will leave the rate at a quarter of a cent a pound on all second-class mail matter mailed in bulk, but that he will collect one cent on every paper that is delivered to the subscriber by the mail man. This right he claims under Clause 71 of the Post Office Act. This clause gives him the power **to collect one cent postage from the subscriber,** so apparently this is what the Postmaster-General, beaten and confuted at every turn, purposes doing!

Finally, let it be stated that, to those who have followed the whole course of the fight, the reason for the stand taken by the Postmaster-General is quite clear. He is standing by the big daily papers against the weekly papers and the trade and technical press. He has allied himself with the big interests which circulate mail order advertising and thus work to the detriment of the smaller communities, as against the weekly newspapers, and the trade newspapers which foster the local merchant and thus help to keep trade at home, to the immeasurable benefit of the small cities and towns.

That is the issue—the issue which may perhaps have to be fought out at the next session of Parliament.

WHY

Many fail in business. *Because*—they figure their *profits* incorrectly.

THE RIGHT WAY

EXAMPLE:

Expense of doing business is 25%
(Figured on Gross Sales, *i.e.*, selling price.)
It is desired to make a profit of 10%
(*Must* be figured on selling price.)
Cost of an article is $2.00

Find the SELLING price

SOLUTION:

Selling price = { Expense { Rent, Light, Heat, Wages, Advertising, Insurance, Freight, Express; Delivery Charges, Telephone, Int. on Capital Invested, Depreciation of Stock, Bad Debts, Extraordinary Expense } ; Profit ; Cost }

100% . . . equals . . Selling Price

35% . . . equals . . { Expense 25% ; Profit 10% }

65% (of selling price) equals . . . . Cost

$2.00 will be 65% of selling price

Divide $2.00 by .65 equals $3.08

ANSWER:

Selling Price should be made $3.08

PROOF:

Expense	25%	of $3.08 equals . .	$ .77
Profit	10%	of 3.08 equals . .	.31
Cost	65%	of 3.08 equals . .	2.00
Selling Price	100%	equals . .	$3.08

THE WRONG WAY

Figuring it as 25% plus 10%, or $2.70
which is *less* than Cost $2.00
plus Expense . . . . .77 } $2.77

THAT'S WHY THEY FAIL

COMPARING RESULTS.

A recent window that has caused much favorable comment and a large increase of sales showed the results of the actual operation of two varieties of lawn mowers.

The one carried in stock was the more costly article. It cut a wider swath and ran so much easier than the other that the workman could, in a given time, show almost ten per cent. more of lawn mowed. The display consisted of a suitable grouping of mowers, properly placarded in the rear and sides of the window. The main floor space was given up to two well-drawn maps of an average lawn. Parallel lines showed the course of the rival mowers over the same ground. In the path of the store's mower the swath was shown to be wider than in the case of the other. Gradually as the number of trips were shown to be increased, it was noticed that the big mower was covering more ground, not only in the width of the cut, but in the actual progress ahead, owing to its easier motion.

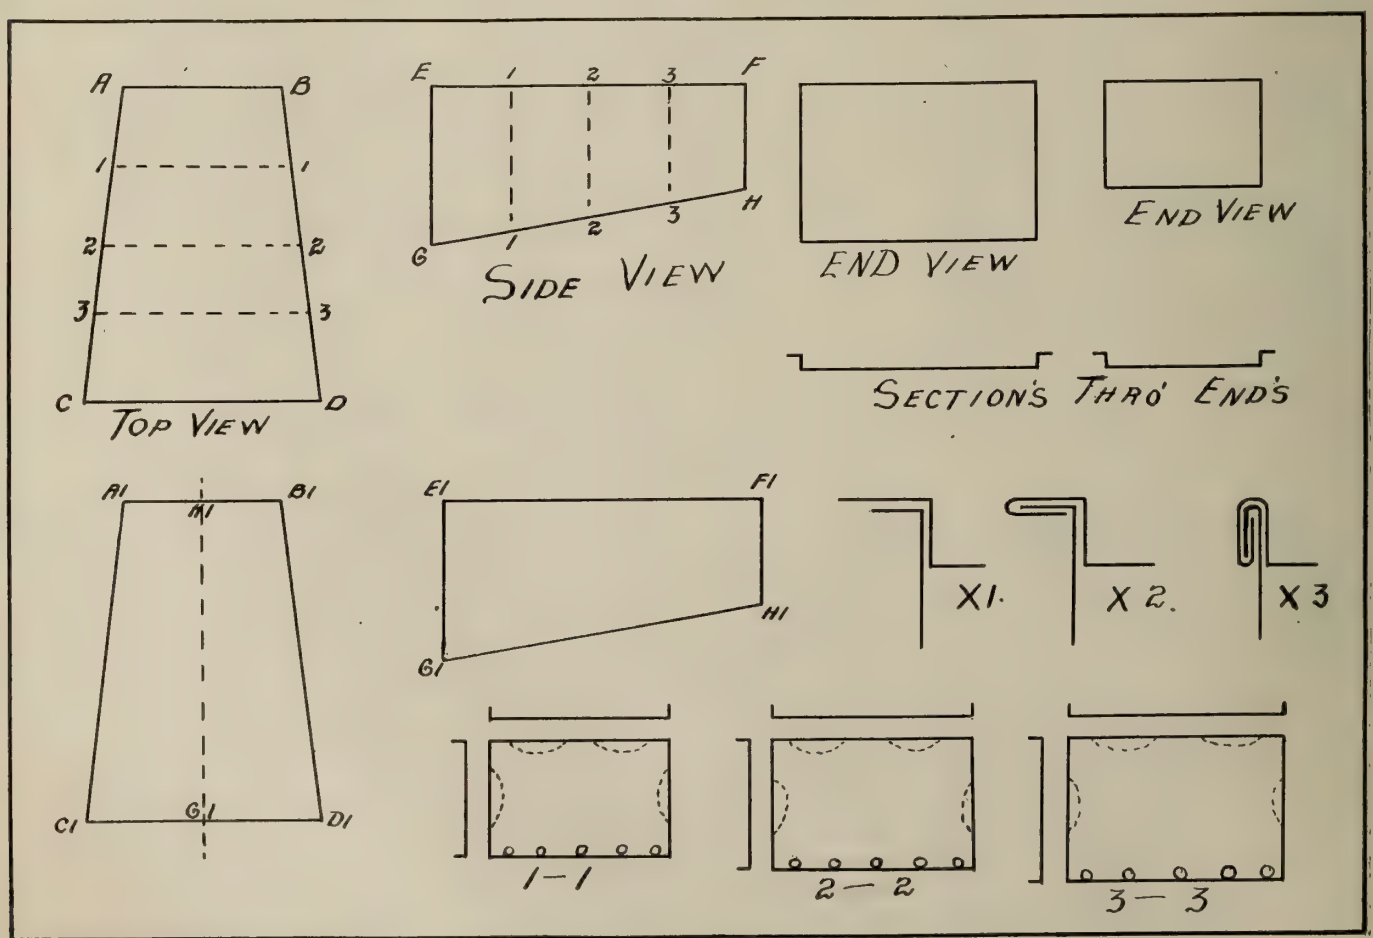
The dealer had previously checked up the window statements, and in consequence had a placard posted in a conspicuous place offering $5 reward to anyone who could, in the course of an actual test, change the figures given so as to show up his mower in a more unfavorable light.

CHAPIN-STEPHENS CO. ENLARGES.

The Chapin-Stephens Co., Pine Meadow, Conn., have recently purchased the Elmore Tool Mfg. Co., of Hartford, Conn. The plant is being dismantled and the machinery, tools, supplies, etc., will be removed to Pine Meadow. The Chapin-Stephens Co., previous to the beginning of the present year, manufactured principally rules, planes, levels, gauges, etc. After the first of the year the Ze-Litt File & Tool Handle was added to the lines, and with the latest addition of the large range of tools comprising the Elmore line the Chapin-Stephens Co. will have an exceptionally large range of tools to offer the hardware trade.

Practical Problems for Sheet Metal Workers

How to Develop a Gasoline Storage Tank for a Motor Boat



By E. Bronson.

THE problem which we show here is one that requires care. The article in this problem is a galvanized iron tank often asked for by motor boat builders and owners when fitting up their boats. As a small leak would cause considerable trouble, the tinsmith in making a tank must exercise great care. The tank as shown here is of a fairly regular pattern or design, yet in some instances the nature of the space in which the tank is located requires a very irregular shaped tank.

In the top view or plan, the three dotted lines 1-1, 2-2 and 3-3 show the position of the plates or partitions usually put in to keep the contents of the tank from splashing too freely in the tank, through the motion of the boat, thus putting too much strain on the joints and seams of the tank.

In the development of the patterns for an article such as described it is necessary to have a plan or top view and side view. In this case let A, B, C, D be the outline of the top view and E, F, G, H the outline of the side view. The top of the tank being square with both ends, the top view is also the outline of pattern of top section. The line G H in side gives the length of bottom section. Draw a line as at G 1 and H 1 and square from this line. At these points draw lines on both sides and at one end G 1. Mark on each side half the distance from C to D. At H 1 mark on each side half the distance from A to B. Connect the points thus obtained forming outline A1, B1, C1 and D1, being pattern of bottom.

The length of side is shown by lines A C and B D of top view. Draw a line as E1—F1 equal in length to C A in top view. Draw lines at right angles to E1 and F1. On line drawn from F1, mark off a distance equal to E G on side view. From F1 mark off the distance from F to H in side view. Connect points G1 and H1, thus obtained, completing pattern of side. The two end pieces are square or rectangular pieces as shown in the two end views. The section through ends show edges turned on end pieces. At X1, X2 and X3 are shown the three operations in fitting on end pieces. This seam is doubled over from the outside, making the ends very secure. At 1-1, 2-2 and 3-3 are shown the three portions which are put in before ends are seamed on. These are either punched or cut out as indicated by dotted lines.

Junior Clerk's Page

OBSERVATION AND SUCCESS.

If you are to be successful, you must ever keep in mind that your employer will have a much higher value of your services if he knows that you are observing what is going on around you, and the work of your immediate superior. It is observing the small as well as the great things in business that counts.

With attention and intelligent imagination as well as observation you are on the high road to success.

The great majority of people take things for granted—they took steam emitting from a kettle for granted until one man with a little observation of its nature, etc., put it to work—and lightning, well, that had always been, and people thought nothing of it until one young man was observant enough of its workings to harness it for mankind. And many scientists think that it is by closely observing the flight of birds that we are arriving at the navigation of the air.

And thus it follows all through the history of the world, great inventions and discoveries are due to the observation of the little things, and observation and thought given to the small and seemingly unimportant things in business is the greatest factor toward the success of that business.

Some men go on using an antiquated and cumbersome system of doing things (just because it has always been done that way) when by a little observation of conditions a shorter, quicker and better way is devised.

"Custom is the greatest barrier to progress." We keep on doing things just because our fathers did them that way until some one with enough observation of the change of conditions thinks of an up-to-date way of doing those same things and saves time.

Observation of the needs of an office brought us the card-index, loose-leaf ledgers and all other improvements.

Observation is not simply seeing things, but thinking quickly and without an effort of the things we do see. Two men see the same things; one sees nothing out of the ordinary, and the other, with the power of observation, thinks and stores in his mind everything that will be of use to him at some future date.

THE REUNION.

"Well, well, I declare! I certainly am glad to see you again. What's what with you anyhow?" and the two friends shook hands.

"Laidlaw? Dead. Yes, burning the candle at both ends. Worked night and day, and when he had a free night, instead of getting into his slippers and a book, his wife had him flying out to some social affair or other. You remember, she hung on to the ragged edge of the society bunch."

"Oh! Cooper. Yes, he certainly has done well. Deserves it, though. Worked hard when we were boys, you may remember, because he said that he would rather do his playing when he got old and couldn't work. Lots of work in him yet, though; but he's in a position to do as he likes, so he's out at the ball game every day, has his car, and follows his bent.

"No, I've lost track of Landry. He was the whole thing in this town for a while. Fell into a nice little estate. Some of his friends advised him to cut out his old habits and settle down. But he said that he could take a drink or leave it alone, so the last I heard of him he was in Cooper's warehouse. Bill gave him a job as porter more for old time's sake than any other reason, I guess.

"Going? Well, come up to the house some time and we'll have another chin-chin. So long, old man."

TRUTH.

What is there about the truth that makes it so valuable an ally to the salesman?

Notice the manner of the man who is boosting an article that he knows to be of poor quality. He may be of plausible speech, but it does not ring time; he may talk like an auctioneer as long as he is allowed to follow his own train of thought. But ask him a practical question that nails the weak spot in his goods and watch him turn tail.

Compare with him the talk of the man who knows he has an article so good that the truth cannot hurt it. Watch him meet argument with argument and criticism with the relentless logic of knowledge and conviction.

It must be that the perfect lawnmower, stove or broom arouses our latent enthusiasm for the best in anything. It is the same enthusiasm that enjoys and advocates to our friends the best in literature, art or motors—the resistless insistence for efficiency.

THE AVERAGE MAN.

It is only occasionally that great results are accomplished by accident or by the inspiration of genius. Most of us commonplace fellows must have the intention to do a great deal, in order that we may accomplish the little.

At the worst, the man who has such sincere intention for self improvement, good work or what not, has at least the lode star of a plan to guide his footsteps so that he will not go floundering down the crooked path of self-indulgence and incompetence, but rather cling steadfastly to his standards and pursue the even tenor of his way.

Fame may never come to him, but the consciousness of duty well done or at least honestly attempted, will always be his as one of that varst army of "average men" who make the wheels of the world go round.

REMARKS OF THE JUNIOR CLERK.

Revenge is sweet only to the very small individual.

* * *

Most people are willing to do their duty as they see it.

* * *

Most men would rather get the short end of an argument than keep quiet.

* * *

Some men would die young if they were compelled to work for a living.

* * *

WUFF!!

He took a lock apart, did Ben,
And thought he was in clover;
But when he put them back again
He had ten parts left over.

Current News

Association Meeting.

The Canada Paint, Oil and Varnish Association, more familiarly known as the lead grinders, met in Toronto yesterday for the discussion of the various matters connected with the trade.

Half Holiday.

Tweed, Ont.—Merchants here in common with most Ontario towns are shutting up shop for a weekly half holiday throughout July and August. Wednesday afternoon is the weekly date here.

Applications for Letters Patent.

Notice has been given of application for a grant of letters patent incorporating the Burtt Hardware Co., Ltd., head office, Woodstock, N.B., capitalized at $20,000. Names of applicants: H. E. Burtt, Woodstock. N.B.; D. Stewart, Antigonish, N.S.; F. B. Armour, Rock Island, Que.; M. B. Armour, Rock Island, Que.; M. Stewart, Antigonish, N.S.

Painters and Decorators Meet.

The Painters' and Decorators' Association will convene on the 13th at Belleville for their eleventh annual convention, for a four-day session discussing paint matters. There will be papers read on Sub-Contracting, Value of Casein Paints, Accidents, Relation of Manufacturers to Master Painters, etc. A baseball match between the supply men and the painters will vie with the ladies nail driving contest as among the sporting events of chief interest. A reception will be given in the Belleville armories on the afternoon of the 14th.

G. W. Bambridge Married.

The wedding took place in Montreal, on June 27, of Gordon Wilfred Bambridge, son of the late William Bambridge, of Oshawa, Ont., to Miss Wilhelmina Hazel, daughter of Mr. and Mrs. James Dougherty. The ceremony was performed by Rev. Milton Campbell. Mr. Bambridge is well known in the hardware trade, having been employed with Lewis Bros., Ltd., for the past ten years. He worked through the different departments of the business into the sales department, and when their oldest representative, H. H. Clark, passed away in December last, Mr. Bambridge was appointed to take his place as traveling salesman in the Eastern Townships. Mr. Bambridge will have the best wishes of a host of friends.

Changes in Lewis Bros.' Staff.

J. C. Watson, who has represented Lewis Bros., Limited, Montreal, for many years in the Province of Nova Scotia and Prince Edward Island, is leaving their employ to go into the fox industry. Two new representatives have been appointed in his place: George J. Moran, 12 Spring Park Road, Charlottetown, to look after the P. E. Island territory, and G. S. Whiston, 59 East Young Street, Halifax, to have charge of the Nova Scotia territory. Both of these gentlemen are starting out immediately and speak enthusiastically about trade prospects in the Lower Provinces.

JOSEPH H. HAM, M.P.P.

Recently elected to the Ontario Legislature. Mr. Ham is vice-president and assistant manager of the Ham & Nott Co., Brantford, Ont., and is well known to the hardware trade in the larger cities from Windsor to Quebec City, in which territory Mr. Ham travels for the firm several months during the year.

Sales Office Transferred.

The Standard Ideal Co., Ltd., Port Hope, have transferred their main sales office from Port Hope to their Toronto showroom, 119 King St. E., opposite St. James Cathedral and request that in future all sales inquiries and sales correspondence be addressed to the Toronto office.

Fire Losses.

Niagara Falls, Ont.—The Good Mfg. Co., makers of brass goods, have suffered a fire loss.

Carbon, Sask.—C. E. Burnett hardware suffered loss by fire.

Medicine Hat, Alta.—G. E. Trider, hardware and grocer, suffered loss by fire.

Personals.

G. M. Edwards, Montreal manager for Brandram & Henderson, was a business visitor in Toronto this week.

J. E. Walker, of the Cochrane Hardware Co., North Bay, Ont., was in Montreal this week on a visit to his brother.

Glencoe, Ont.—Mitchell & Hagerty have moved their store to more commodious premises opposite the McKellar house.

H. Clucas, of the Toronto branch, Canada Paint, and R. B. H. Cotton of the Brandram Henderson Company, are among those who will attend the Painters' and Decorators' Convention in Belleville on the 13th, the former to read a paper on "The Value of Casein Paints," the latter to catch on the supply men's ball team.

F. C. Barber, of P. & F. Corbin, New Britain, Conn.; Scott C. Ball, of Sargent & Co., New Haven, Conn.; A. G. Bowman, of Russell & Erwin Mfg. Co., New Britain, Conn., and Charles Ern, of W. & G. Vogel, Vohwinkel, Germany, were calling on the trade in Montreal this week.

WESTERN NOTES.

Personals

Edmonton, Alta.—MacLaren & Son have succeeded the Alex. Martin Sporting Goods Co., Ltd.

Melville, Sask.—The E. Smith Hardware and Electric Co. have succeeded E. & G. Smith, hardware merchants.

Regina, Sask.—A. W. Murdison, window trimmer for R. H. Williams & Sons, Ltd., has won the Hatpoint Company's prize for the best trim of their goods in Canada or the United States during their May contest.

WHY a certain Ontario hardwareman who says he has been in business over forty years, and knows all there is to know about hardware, and furthermore, can't be taught anything about the business has a worse looking store now than he had twenty-five years ago?

* * *

Why a hardware merchant at or near Sudbury is advertising a spring paint sale in July?

* * *

Why a clerk in a certain hardware store in Toronto kicks about his employer being a tight-wad and a back number and still sticks to the job?

* * *

Why two hardwaremen in an Ontario town of 4,000 population pass each other in fear and trembling, for fear of one or the other saying "Good morning?"

* * *

Why a hardware merchant in a Western Ontario city of about 16,000 population is kicking because a drygoods firm is selling a large number of curtain stretchers as a result of window displays and newspaper advertising, while the hardware merchant allows the three sets he has for sale to remain folded up in a back warehouse where prospective customers could never find them?

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal of July 14, 1894:—

"McLennan and McFeely's hardware at Vancouver was burglarized a few days ago and goods to the value of $200 taken."

Editor's Note.—McLennan, McFeely & Co. are still in business in Vancouver and have grown considerably during the past twenty years.

* * *

"T. B. Williamson, with M. & L. Samuel, Benjamin & Co., participated in the 100 mile century bicycle run Saturday last."

Editor's Note.—"Tom," as he is familiarly known is now buyer for H. S. Howland, Sons & Co., Toronto, and is vice-president of the Wholesale Hardware Association. In addition to being a bicycle rider of note, he was a vigorous football player in the "nineties."

* * *

"H. H. Otton, of H. H. Otton & Sons, Barrie, was a visitor in Toronto during the week."

Editor's Note.—H. H. Otton is still a member of the firm of H. H. Otton & Son, Barrie. The firm recently moved into a new store which is much larger than the one which they previously occupied.

THOMAS MARSHALL, M.P.P.

Recently elected to the Ontario Legislature as member for West Lincoln. Mr. Marshall is a member of the hardware firm of Congdon & Marshall, Dunnville, Ont.

DEMONSTRATE VACUUM CLEANERS IN A WINDOW.

(Continued from page 41.)

various makes of machine supply booklets describing the various uses to which they can be put. These booklets furnish splendid selling points for the wide-awake salesman.

The invention of the vacuum cleaner is the result of a world-wide demand for a method by which the homes, churches, schools, business houses and other institutions can be made wholly free from the dangers and discomforts of dust and dirt.

The ordinary methods of cleaning with broom and sweeper fail to give you the freedom from dust and dirt and the security from disease germs that modern civilization demands.

Real cleanliness cannot be obtained by merely removing the visible dirt. Most of the work, worry and disease is caused by light, impalpable dust, which floats in the air and accumulates on, under and behind the furnishings.

The only solution of the problem is a XXX vacuum cleaner. You will buy a XXX to insure the perfect cleanliness of your furnishings just as you have a bath-tub to main personal cleanliness.

Winding Stairs.

W. Bourque, Sherbrooke E., Que.—Kindly give us names of firms making winding steel stairs.

The following firms can supply steel stairs: John Watson & Sons, 167 Wellington street, Montreal; Montreal Architectural Iron Works, Montreal; Dominion Architectural Iron Works, 63-65 Dalhousie street, Montreal; Canadian Architectural Iron Works, 498 Avenue de Chateaubriand, Montreal.—Ed.

* * *

Felt.

A. J. Reach Company, Brantford.—Will you kindly refer us to manufacturers of felt in Canada?

Paterson Mfg. Co., Montreal and Toronto.—Ed.

Howard Furnaces.

A. C. Helwig, Hanover.—Kindly let me know where Howard Furnace is manufactured.

C. Norsworthy Co., St. Thomas.—Ed.

* * *

Fruit Baskets.

C. A. Phillips, Bristol, N.B.—Will you please advise where I can buy steel radiators for steam and hot water heating; also 6 and 11-qt. fruit baskets?

Pressed Steel Radiator Co., represented in Canada by the Waldon Co., Lumsden Building, Toronto; Clare Bros., Preston. Fruit baskets can be secured from the Forest Basket Co., Ltd., Forest, Ont.—Ed.

* * *

Boat Patterns.

Kindly advise where we can secure patterns for row boats.

Robertson Bros., Hamilton; Brooks Co., Saginaw, Mich.—Ed.

Regina, Sask.—An agreement between the city and the Western Broom Company has been drawn up, and has been recommended for acceptance by the finance committee, and if it passes that board, will mean the construction of a factory with an output of 12,000 brooms per month.

New Hardware Goods

Offered Canadian Hardwaremen

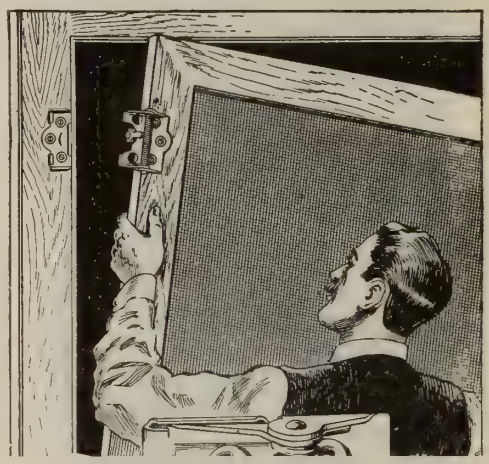
ROTARY INSECT RIDDER.

The Cleveland Galvanizing Co., Cleveland, Ohio, is offering the Canadian trade the "Rotary Insect Ridder." The ridder is said to be a simple, automatic, scientific device which, attached to any garden hose, will in the course of a season effectually rid any lawn of ants, angle worms, bugs, insects, or larvae of all kinds which infest the ground and destroy the plant life.

The device consists of an outer shell casting, hot galvanized and rust proof, fitted with a brass center post over which is placed a finely perforated brass box and cover, called the container.

The container in turn holds a cake or tablet of a special insecticide called "ridants," made up in a solid form of a consistency about that of soap. This container revolves rapidly in use on the center spindle, causing tablet to dissolve uniformly and in the proper proportion to accomplish desired results.

The whole device is closed water tight by a carefully fitted cover casting.



A brass coupling nut is provided at inlet to enable it to be easily attached to any hydrant, sill cock or water connection, and likewise any garden hose can be attached at the outlet.

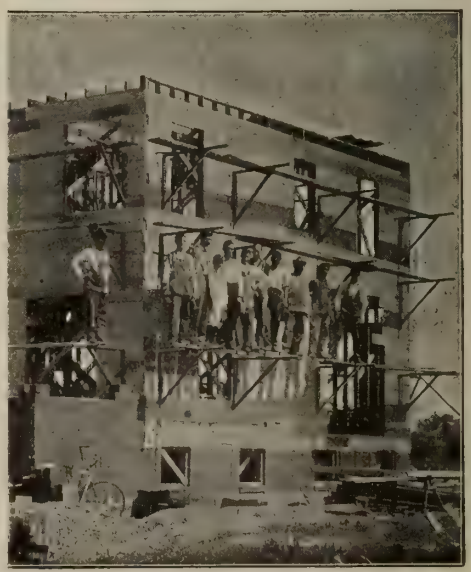
Rotary Insect Ridder.

When once attached this is all the attention it needs until the tablet of "ridants" is exhausted, when a fresh tablet can be inserted in a minute's time, without removing the "ridder."

The action of the water passing through the "ridder" causes the container which holds the tablet of "ridants" to revolve rapidly, slowly dissolving the tablet, the solution passing out through the hose and by means of any ordinary nozzle or lawn sprayer, effectively distributed over the lawn, trees, garden, etc.

The Jiffy Hinge.

THE JIFFY HINGE.



The Jiffy Detachable Screen Door Hinge, of which an illustration is shown herewith, is being offered the Canadian trade by Saunders & Wainwright, of 204 St. Nicholas Building, Montreal. It is manufactured by the Rock City Mfg. Co., of Wabash, Ind. In a booklet describing this hinge, some of the troubles and annoyances of putting up and taking down screen doors every year are cited. It is claimed that this hinge is not large or unsightly and there are no objectionable parts attached to the house. The manufacturers in offering the Jiffy detachable hinge, say they have a hinge that meets all the requirements. Once it is fastened to the house and the door there is absolutely no further need for tools. Simply raise the little lever to a right angle with the door casing and the door is lifted away, leaving a practically smooth plate on the house. To replace the door the little lever is raised to a right angle with the door, the door placed in position and the lever pressed down out of the way. A woman or a 12-year-old child can hang a door in a moment or two.

The Jiffy detachable hinge is neat in construction and exceedingly strong, being made of pressed steel throughout All the working parts are contained in the portion attaching to the door, so there is nothing left on the house to rust or corrode.

FOLDING BUILDERS' BRACKETS.

Richards-Wilcox Canadian Co., Ltd., London, Ont., are now making the No. 231 Richards-Wilcox steel folding builders' bracket here illustrated. The brackets are said to be strong, convenient and durable, and can be folded compactly.

The brackets are provided with hooks and tail screws for fastening in studding, assuring positive safety. Sway brace prevents swinging motion of bracket when in use. The backets are convenient for handling and require small storage space. They are made in two sizes, No. 1, which is three feet long, and No. 2, which is four feet long.

R.-W. Builders' Brackets.

Weekly Market Reports

Statements From Buying Centres

THE MARKETS AT A GLANCE.

Reports from hardware jobbers during the last week have been very encouraging, and July business so far has been very satisfactory. Retailers are still ordering in small lots and only as the goods are needed, but orders are numerous. June's business, while not a record-breaker, was fair, the majority of jobbers report the month was satisfactory. The metal markets are still very weak, and orders are of a hand-to-mouth character. Price-shading is still evident, and the market is unsettled. Toronto reports advance in the price of tin this week. A change is expected shortly in the price of iron pipe. It is said that butt-weld will probably show a slight decline, while lap-weld will show a slight advance. Stove manufacturers find trade quiet, although there is a fair demand for furnaces. Paint manufacturers and jobbers find trade very fair. Toronto reports indicate a big drop in linseed oil prices this week, due to excessive price-shading. The demand for oil is light. Gasoline has declined at Toronto. Gasoline and benzine have declined at Montreal. Jobbers report a movement in guns and ammunition for the fall trade. These lines are sold on September dating. A number of travelers are now on their vacations. Reports from the West regarding crop prospects have been much brighter during the past few days.

MONTREAL.

MONTREAL, July 9.—Business continues to show a slight improvement. Most of the jobbers report that they are busy, partly on account of good orders and partly due to the fact that the vacation season leaves them short-handed. The demand keeps up for all kinds of summer goods, such as hammocks, garden hose, ice cream freezers, etc. There is also a good business in such lines as fruit presses, apple parers and harvest tools. Travelers are likewise beginning to send in orders for guns and ammunition, and some orders have been taken for meat-choppers and lanterns for forward delivery.

Metals.

The metal markets are still quiet and weak. There is not a very heavy demand and prices generally are not likely to improve until orders are booked more freely. Copper was marked down 50 cents this week, but otherwise the quotations are unchanged from last week. They are as follows: Tin, 37½c; sheet zinc, $6.75 in casks and $7 in small lots; lead, $5.10; antimony, $8.50; spelter, $6, and copper, $15.50. Ingot brass, red, is 14c lb.; ingot brass, yellow, 13c lb.; wire solder, 23½c; half-and-half, 22½c, and wiping solder, 22c.

Lead and Lead Waste Pipe.

The market for lead products is firm, while the demand locally has been only fair. Quotations for lead pipe are 7½ cents, and for lead waste pipe 9 cents, with discounts of 7½ per cent.

Bar Iron.

There is little demand for bar iron at the present time and the market is unchanged with quotations at $2.05 base, Montreal.

Screws and Nails.

There has been no further change in screws since last week's advance but the market is firm at the discounts listed in the current quotations. Nails are quoted at $2.25 base, for wire nails, and $2.50 base, for cut nails, Montreal. Discounts on rivets and burrs are the same as have been quoted in the current market list.

Rope, Twine, Etc.

There is a steady sale for cordage lines, and especially at this time for binder twine. There has been no change in quotations, which are as follows: Pure Manila, 15c; British Manila, 11c; African hemp, 11c; sisal, 10½c; double lath yarn, 10¼c; single lath yarn, 9¾c. For binder twine the prices are: Best Manila, 650 feet to pound, 13½c; Manila, 609 ft., 11c; standard Manila, 550 ft., 9¾c; standard, 500 ft., 9¼c.

Wrought Iron Pipe.

A revision in the quotations of wrought iron pipe may be expected at any time now. The prices on buttwelded will probably show a slight decline, while lapweld quotations will be advanced. Orders have been fairly good of late.

Stoves and Ranges.

Business in stoves has not shown much change as yet. Quietness still characterizes the situation, but an improvement is looked for early in the fall when people commence to come back to the city from their country homes. Judging from the large number of new residential properties going up there should be a big demand for stoves and furnaces to equip them. Oil stoves and gas stoves have been selling well during the summer months.

TORONTO.

TORONTO, July 9.—Business in general remains about the same as last week; some isolated sections stand out from the rest in increased activity, but, on the whole, the trade is entering upon its usual midsummer quietness.

Of the week's few price changes, the outstanding one is the sudden rise in tin on a previously weak market. Paints still show the greatest activity of any one line. The number of unemployed factory help in the Toronto-Hamilton district has increased.

Owing to keen competition and the fact that orders in some lines are hard to get, there has been considerable price-shading on many lines.

Some jobbers here are carrying rather light stocks, but that condition is far from typical of all, as others are well stocked, and are profiting by the shortages of others.

Metals.

Metals have gained in prominence during the past week by a very unexpected activity in tin. The market, heretofore very weak, is now very firm. It has climbed from 33½c to 34½c, and in the course of one day shot up from £140 to £148. The present condition is puzzling

to the best informed, so that nothing authentic can be stated about underlying causes nor future results of the change.

Ingot copper, on the other hand, dropped from 15c to 14½c, but is firm at that. Other prices are unchanged. Pig iron is quiet, owing to low stocks and curtailment of production on part of some implement manufacturers. Lead is quiet at $5.15. Zinc is steady at 5½c.

Other prices are as follows: Antimony, 8¾c to 9c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 12c to 14c lb.; half-and-half solder, 23c lb.; pattern aluminum, 22c to 24c; ingot aluminum, 18½c to 19½c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 21¾c lb.; wire solder, 26c lb.; tinkers' bar solder, 27c lb.; lead wool, 8c lb.

Nails, Wire, Screws and Rivets.

Nails can only be described as stagnant, and still remain at $2.25 base for wire, and $2.70 base for cut. No decision has yet been given out regarding United States freight rates, but even though it turns out to be as favorable as expected, the matter of British and European importations will tend to keep American and, consequently, Canadian prices down. There is considerable price-cutting in the States in all steel products, and wire suffers with the rest. Wire is quoted there at $1.45 base, but can readily be bought at $1.35. General slackness and the presence of the holiday season are the chief causes.

Screws remain the same after their rise of last week. Flat head, bright, are now quoted at 85, 10, 7½, 10 and 5 per cent.; round head, bright, at 80, 10, 7½, 10 and 5 per cent. Iron rivets, blocked and tinned, remain at 75 per cent., and iron burrs the same. Copper rivets, usual proportion, 35 and 12½ per cent.; burrs, 30 and 12½ per cent.

Rope, Twine, etc.

Cordage is still in fair demand. Hayfork, rope and other seasonal goods are the leaders. No changes have resulted here as a result of the late drop in raw jute. Pure Manila is 15c base; British, 11c; African hemp, 11c; and sisal, 10½c.

Tents and Duck

Duck remains as per current quotations, with some shading of those prices as a result of overstocks. The line is healthy, however, embracing as it does so many of camp, boat and other summer supplies. Tents are a leader in demand.

Stoves.

As predicted last week, the late warm weather has boosted the sale of summer stoves. However, sales in this line are getting down to a normal basis, and no great activity will be due for some time to come, as July usually sees oil and gas stove purchases mostly out of the way.

. Refrigerators and Summer Goods.

Refrigerators are now very quiet, sorting orders being the only ones received. Other summer goods have settled down after the first rush, although campers' supplies are still in fair demand.

Cement, Brass Goods, etc.

There are no new developments in these lines. Cement is still $1.85 and firebrick at current market quotations, as are also all varieties of iron pipe, brass, etc.

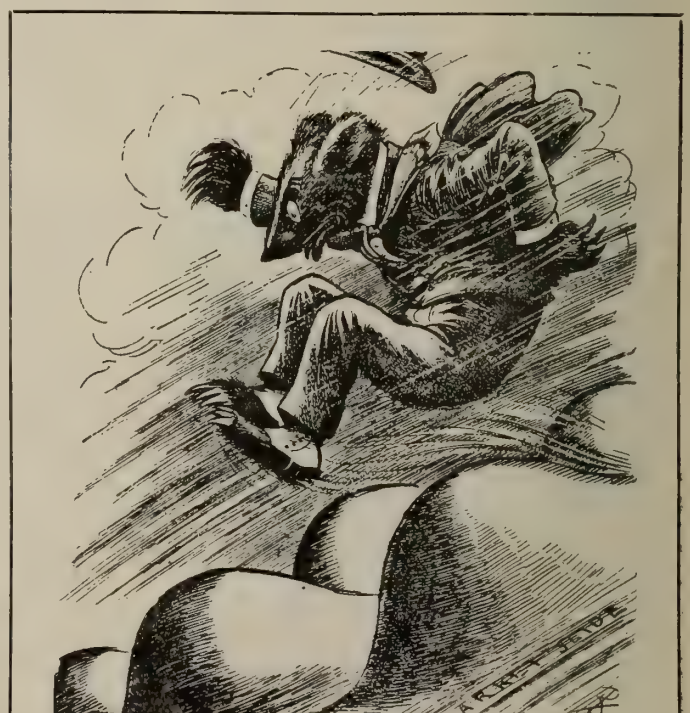
Fall Goods.

Fall orders are showing up in some lines. Guns and ammunition have been going out for some time on September dating. There is no great activity yet in other fall lines.

LONDON.

BUSINESS in London, Ontario, is holding up well, and compares favorably with the corresponding period of last year. This looks good for London and surrounding districts when so many districts are feeling the almost general dullness. Twine and rope are still the leading sellers.

Decline in Linseed Oil.



Linseed oil has declined in price and the following quotations are now in effect:

Raw Oil—

1 to 2 barrels	60c per gal.
3 to 5 barrels	59c per gal.
6 to 9 barrels	58c per gal.
Less than barrels	65c per gal.

Shaking the dust out of him.

A realistic event many market interests hope to witness soon.

Boiled Oil—

1 to 2 barrels .....63c per gal.
3 to 5 barrels .....62c per gal.
6 to 9 barrels .....61c per gal.
Less than barrel .....67c per gal.

No change has taken place in turpentine quotations which are as follows:

1 to 2 barrels .....70c per Imp. gal.
2 to 4 barrels .....69c per Imp. gal.
5 pal. lots .....77c per Imp. gal.

Nails, Screws, Etc.

Wire nails are only in fair demand and are quoted $2.25 base for wire nails and $2.70 base for cut nails. Wood screws remain unchanged from last week and are quoted as follows:—

Screws—

Flat head, iron, 85, 10, 7½, 10, 5 per cent.

Round head, iron, 80,10, 7½, 10, 5 per cent.

Flat head, brass, 75, 10, 7½, 10 per cent.

Round head, brass, 70, 10, 7½, 10 per cent.

Building Materials.

The demand for building materials, particularly for the smaller class of buildings, is fair. Red mortar stain in 400-lb. barrels is quoted at 1⅛c per pound, while black mortar stain in 250-lb. barrels is quoted at 2 cents per pound. Solid sash weights are quoted at $1.50 per 100 lb.; ½-lb. sections at $2.25 per 100 lb., and 1-lb. sections at $2 per 100 lb.

Wrenches.

The following prices are now quoted on Stillson wrenches:—

6-in.	$ 7.25 doz.
8-in.	7.25 doz.
10-in.	8.25 doz.
14-in.	11.00 doz.
18-in.	14.75 doz.
24-in.	22.00 doz.

WINNIPEG.

THE tendency of merchants to order in small lots continues, yet various supply houses have now got their figures in shape for June, and almost without exception it is reported that this month was satisfactory, though not a record breaker. For July, too, indications are that a good month's business will be done. One firm, which has sixteen travelers on the road at the moment, received a budget of orders from fourteen of them by Monday morning's mail.

Crop conditions are, on the whole, better than a week ago. A traveler for one firm, who is quite a specialist on the crop, showed considerable doubt last week when writing about the Lethbridge district. It was then a question if the crop, which has been quite badly burned, could be saved. On July 4th this man wrote in a different strain, though from the same district. "Pleased to report another fine rain this evening," he wrote, "and they are getting it all the way to Calgary. It is still raining hard. The crops are all doing fine in the last week."

Looks Like "Some Crop."

Northern Saskatchewan and center Saskatchewan were visited by a traveler from whose report the following sentences are taken:

"Took daylight ride from Saskatoon to Regina to see crop condition, and if seeing is believing, that section has some crop. Am informed the most of the marquis wheat is now in head."

Manitoba conditions are also favorable, though a few dry districts are suffering. The intense heat of the last few days seems to have benefited the crops, followed as it has been in the majority of localities by good rains.

Slight Drop in Pipe Prices.

No great price changes are noted this week. We quote patent pipe at $9.05 per 100 feet for 6-in., and $9.75 per 100 feet for 7-in. This is a little lower than recent quotations.

Barbed wire came in at Fort William during the week, as was expected, and a great many orders were filled. More orders for barbed and for other styles of fencing were received, however, and the whoelsalers are not yet quite up with these. It becomes more than ever apparent that the demand for fencing this year has been surprisingly large. One wholesale house, whose statements are always exceedingly conservative, declares they have shipped from 70 to 100 per cent. more fencing this year than up to the same date in 1912.

Orders Should Be Sent Now.

Builders' hardware is quiet at present, but for harvest tools and threshing supplies there is a very steady demand. This demand is likely to be very much heavier before the end of the month, and to be sure of quick delivery, dealers would be well advised to get their orders in early.

The nail situation remains as last week. Correspondence is still going on between local wholesalers and manufacturers, but no definite result has been arrived at, whereby the unfair competition of the mail order houses will be prevented.

Ammunition Moving.

The summer business in sporting goods is practically over as far as wholesalers are concerned. Ammunition, however, is commencing to move quite largely, and substantial orders for shotguns are coming in. The time is approaching when dealers will be anxious to have stock to meet the demand which comes with the approach of the chicken season.

No further changes in price in paint lines. The 15c advance on white lead struck last week, will not be followed by any further movement for some time.

Stoves are still quiet. It is hardly expected that there will be a big movement here until the end of the month. Then, however, orders should come in rapidly, as stocks are all remarkably low. Furnaces save been selling very satisfactorily from all reports.

A chain is no longer than its weakest link and neither is a clerk as a salesman any better than his weakest argument.

The above illustration is a reproduction from a snapshot taken on the shores of the old Chedabucto and shows a progressive young canoeist who was discovered plying his quaint canoe on Guysboro Harbor. The picture was forwarded to Brandram-Henderson, Ltd., by B. and G. Yost, of Guysboro, N.S.

Out of the Mouths of Babes and Sucklings

Reporter's Adventures Seeking for Helpful Hints on Paint Selling — Bulk of Merchants Refused Price-Cutting Tactics — Sharp Contrast Between Embryo and Official Salesman

Written for Hardware and Metal by Frank Thayer.

THE thing was becoming monotonous. Here I was; sent out to get an instructive and scintillatingly brilliant story on paints and how to sell them; how to approach the customer courteously but firmly, look him over carefully and appraisingly and then—reach out and gather him in—and nothing doing. Tough luck.

I thought of what the editor had told me as he had sent me out on the pitiless assignment, of the cold glitter of his eyeglasses as he spoke about putting a little instructive snap into what must be an authentic story for Hardware and Metal readers—and then I thought of the coming winter only six months away and the hardness of the benches and the virginal pureness of the cold over at Queen's Park.

Why were all the hardware and paint men so confoundedly honest in their statements and so alert on their jobs that a poor muckraker must lose his job for lack of muck to wallow in?

"Figuring on a little job of painting? Want a little dope on lead and oils so I can figure out the cost?" My stock introductory question had become a joke.

The stores had been uniformly of fairly good grade, and the business-like replies and attentiveness had taken on the quintessence of the commonplace.

There wasn't even any price-cutting!

Those dealers stuck by their guns and their confounded paint like a lot of leeches guarding their virtue.

Only once did I come up blinking from my sea of apathy when I struck a winsome be-cigaretted youth who promised fair copy. True, he did nonchalantly knock some ashes off with a flip of delicate finger on the already littered showcase, but he seemed to have a fair working knowledge of paints in spite of that. He was so darned good looking and seemed to know it so well; he was so well pleased with himself, that he scarcely knew which way to look; that my heart leapt out to him as to its mate and I clung to the thought of the good copy he would make, as a drowning man clutches at a straw. But nothing doing.

He wouldn't even join in the imbecile conversation of a couple of loafer friends, and an unkind fate refused to send his girl into the store, or send anything, or do anything to make him inattentive to my wants.

So I took another think. And this time I thought of the bread line and of that other line that spreads out every afternoon in front of the Telegram office waiting for the first edition of the "Help Wanted," and then I thought of home and of all those hungry little mouths—six of them, just like little robins, all gaping mouths and cavernous intestines—six of them, six little gaping, cavernous intestines; into which a loaf of bread—or six of them, would disappear without leaving a ripple on their sea of discontent. Fine proposition!

There and then, I made high resolve that if my health was spared and I be not cut off in the flower of my youth that a paint story I should have, even though I had to heave a brick through the front of the best paint window in this, our fair city. But blood, or paint, I should have, yea, even to one page of Hardware and Metal full.

And then, it happened. I took up another hole in my belt, metaphorically speaking, and with the energy that is born of despair, I walked, or rather crawled into the store that was the last bead on my rosary, ere I should be haled before his Honor in the morning.

An ordinary-looking boy of fifteen or thereabouts came bouncing in. "What can I do for you, sir?"

"Smart, anyhow," I thought.

I told him and added that in consideration of my ignorance, helpful friends had advised me to buy my own lead and oil instead of any ready-mix, and so save my hard-earned money.

"Pardon me, sir, but I think you would do better to buy some of our mixed paints."

He stood up there at attention like a little soldier, so that I felt ashamed of my deception.

"How's that?" I queried.

"Pardon me, what is your name, sir?" I told him.

"Well, Mr. Thayer, because, in the first place the inexperienced mixer is unlikely to get a good mix. On the other hand, our paint is mixed by machinery that can't go wrong, and is mixed in a way that is the result of forty years' hard-earned paint experience."

That kid talked like a dictionary, with never a slip.

"You see," he added, as I failed to reply, "the difference between an expert's mix and a beginner's, lies in the fact that the former will cover just about a fifty per cent. larger area."

Seeing that I was half convinced but still undecided, he began to get busy on the sales-clinching business and came at me with some more of his Dutch uncle stuff.

"And the most important reason of all, sir, is that we carry the very best paint on the market."

"What's the price?"

"Sixty-five cents a quart, Mr. Thayer. But let me see," he added hastily, as he tumbled to the fact that he had overlooked a bet—"How much do you wish, sir?"

The kid began to wind up now for one over the home plate.

"Five gallons? Two forty a gallon, Mr. Thayer."

"Can't you beat that for five gallons?" I asked aggrievedly.

"Excuse me a moment, please, I have no authority to do such things."

"Certainly."

He disappeared into the cellar to reappear a minute later with a man whom I judged to be one of the regular salesmen—save the mark.

"Mr. Thayer, this is Mr. ——."

"Whatcher want?" asked Mr. ——.

I repeated my query as to a lower price in view of the quantity ordered.

"Uh-huh." He stroked an unshayen face as he looked me over.

"Uh-huh. Sure. Make it two thirty-five to you," with emphasis on the "you." Coarse work.

"Well, see here," I said, still after my pound of flesh, "I'm told that So and So's paint is away better than yours."

"Huh, that's just 'cause they advertise an' make you pay for it. Don't ketch us advertising nor sellin' advertised goods, 'cause they just slip it on the price an' make you suckers pay for it."

"Well, can I get some lead and oil here," I said, beginning to back up again.

"Surest thing you know, bo."

"How do I go about it to mix it?"

"Well now, let's see." He meditated, in sharp contrast to the accurate and machine-like rapidity with which the boy had volunteered all necessary information without waiting for any leads from me.

(Continued on page 62.)

"CHALCO"

A PAINT AND VARNISH REMOVER THAT'S 20% MORE EFFICIENT THAN OTHERS YET COSTS NO MORE

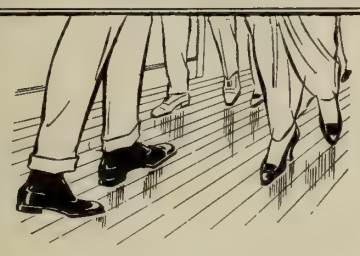
To Retailers, Jobbers and Manufacturers:

We are now able to offer in "Chalco" a Paint and Varnish Remover of unusual merit.

It's 20% more efficient than others.

TRADE CHALCO MARK

The Paint and Varnish Remover



"We pay no royalties to put on your bill."

Write for Proposition

"Chalco" is positively different and positively superior—it leaves the surface better for refinishing than any other product we've tested.

It does not injure the hands.

MANUFACTURED IN CANADA BY MARTIN-SENOUR CO., LIMITED
IN THE UNITED STATES BY THE H. B. CHALMERS CO., SCHENECTADY, N.Y.

The Tramp of Many Feet

BERRY BROTHERS' CELEBRATED TRADE MARK BRILLIANT DURABLE UNEXCELLED VARNISHES

The Hoofs of the Hobby Horse

The Varnish You Sell Should Stand These Tests

Varnish that resists the hard wear and tear of constant use is the kind of varnish that makes satisfied customers. Liquid Granite and other Berry Brothers' Varnishes have given over half a century's satisfaction to users. Their rich tone and wonderful wear-resisting qualities have demonstrated their superiority in the most pretentious homes, the largest skyscrapers and the finest public buildings throughout the country.

Liquid Granite

On floors finished with Liquid Granite, children may play to their heart's content, heavy furniture may be moved from one room to the other, an army of feet may tramp every day without marring the tough, elastic surface. Liquid Granite floors are easily kept clean, scrubbing with soap and water does not affect them.

If you do not sell Berry Bros.' products, investigate our plan of co-operation with progressive dealers.

Weekly Paint Markets

MONTREAL.

MONTREAL, July 9.—Business in paint lines continues very good and dealers say they have nothing to complain of. Markets are all firm and another upward bound to prices would not come as a surprise. There have been no actual changes this week to date.

Paris Green.

Paris green has been very quiet all season but this week, due doubtless to the advent of warmer weather, which is bringing out the bugs, there has been quite a flood of orders. This is welcomed by the dealers, who all have large stocks, much of it carried over from last year. Reports received from travelers indicate that while in some sections of the country the bugs are thick, in other parts they are almost unknown.

White Lead.

White lead is firm at the advance which was announced last week and in some quarters another increase is looked for in the very near future. Present quotations are: $8.20 for ton lots and $8.40 for less than ton lots.

Turpentine.

The market for turpentine is still very firm and there has been a fair demand locally and for country trade. Prices quoted are:

1 barrel .....67c per gal.
5 barrels .....66c per gal.

Five-gallon packages, 5 cents advance; packages extra; terms net.

Linseed Oil.

The market for oil continues firm with a fair demand. Reports have been received here that prices have been cut to some extent in the West, but there seems no justification for such a course and dealers here are holding to the prices formerly quoted, which are as follows:

1 to 4 barrels .....61c per gal.
5 to 9 barrels .....60c per gal.
Boiled Linseed—
1 to 4 barrels .....64c per gal.
5 to 9 barrels .....63c per gal.

Gasoline and Benzine.

There has been a fair demand for gasoline and benzine and lubricating oils have been selling exceptionally well. There was a half cent decline in gasoline and a reduction of one cent a gallon in the price of benzine since last report. Quotations now are:

Barrels, in wood .....20½c gal.
In steel and drums ....17½c per gal.
Tank wagon (100 gals.) ....16½c gal.

Benzine is quoted at 19c per gallon in single barrels.

Glass and Putty.

Sales of glass and putty have been very light lately, but it is expected there will be a revival soon when building work now under way is farther advanced. Prices are unchanged from the list in the current market report.

TORONTO.

TORONTO, July 9.—The continued warm weather has had a good effect on the paint trade, and the demand continues very brisk for this season of the year. The main feature of the market this week was the drop of 3 cents per gallon in linseed oil. Other lines, with the exception of gasoline, remain firm.

Turpentine.

Turpentine is still very firm, and has advanced steadily in the South, and went up ¼c again on Wednesday, but remains the same here up to date. The quantity on hand in the South is still much smaller than a year ago. The present reserve is 17,000 bbls., as against 28,000 in 1913, 32,000 in 1912, and 24,000 in 1911. Prices are: Single barrel, 70c; two to four barrels, 69c.

Decline in Linseed Oil.

The local oil trade has been considerably upset of late, and price-cutting has been quite evident, the result being a drop of 3 cents per gallon on raw and boiled linseed oil. It is said that the decline is of a temporary nature, and that prices will go back to the old level shortly.

Ruling quotations are now as follows:

	Raw.	Boiled.
Single barrels	60	63
3 to 5 „	59	62
6 to 9 „	58	61

Gasoline and Benzine.

Gasoline has dropped again another half cent to 19c even, making it the same as benzine. Demand is just fair in these lines, and nothing further of importance to them has transpired in the last week.

Paints.

Demand in paints is better than during the preceding week. Prices are unchanged, and are as per current quotations. The rise in lead has not affected demand up to date.

Glass and Putty.

Glass is still quiet and unchanged at 20 and 25 per cent. off, as per current quotations. Heavy stocks are on hand here and in United States, but it is expected that the fall trade will clean them up.

White Lead, Paris Green, etc

Lead is very firm after its recent 15c raise, and dealers appear to think that no further raise is due for some time now. The Lead Grinders' Association meets here to-morrow. It is not known what the result of the meeting will be.

Paris green is still a poor seller at the old price of 11¼c, 17½c and 19c per 100 lb. drum, according to brand.

OUT OF THE MOUTH OF BABES AND SUCKLINGS.

(Continued from page 60.)

"Danged if I know," he confessed. And then, as he began to rummage around a rat's nest that he probably called his office, "wonder where the darned thing is?"

"Oh, here," and he tossed me a grimy paint folder.

"Yuh can see for yourself how to do it there. Just read it over and come around again when you've figured out what you want."

"S'long," and Mr. —— was gone; in fact, "had went."

Industrial.

The Dominion Trade Commission will begin to take evidence in August and September from all over the Dominion on matters pertaining to the industrial life and natural resources of the country. These subjects will be discussed and analyzed in minute detail, and the various boards of trade of the country are eagerly awaiting the outcome of the final report.

WE GET ORDERS FOR YOU

It is not alone the uniform merit of our goods that draws trade for our Agents, but the ample means we provide for bringing that merit home to the people.

Our line of advertising material is complete, its selling force has been proved, and it is all trained to *help the dealer*.

You can get all the benefit of this tremendous selling power by handling B-H products. When you stock our goods, we place all the resources of our Advertising Department at your command and *help you sell* without cost to you.

The most successful Dealers sell B-H goods, which proves B-H goods make the best foundation for success.

YOU can increase your sales by joining with us. Write us for our Agency Proposition and we will tell you how.

Hence, horrible villain!
. . . .
Thou shalt be whipped with wire,
And stewed in brine,
Smarting in ling'ring pickle.
Antony and Cleopatra.

WHEN CLEOPATRA heard the news that BRUTUS was married to **OCTAVIA** she vented her spleen upon the messenger and threatened to whip him with wire and then stew in brine. To use such threats she must have been in a great rage, and **NO DOUBT** there are times when people buy poor quality goods that give poor service they would like to treat the manufacturer and seller the same way that Cleopatra threatened to treat the messenger.

When Wood Workers Ask for Screws

Be able to supply them with

PAT. FEB. 2, 1909

SEE THAT SQUARE HOLE

ROBERTSON'S SOCKET HEAD WOOD SCREWS

These screws are far superior to any other kind. They have a square hole into which our specially designed driver fits snugly. The driver cannot slip and thus spoil screw heads or material.

We also manufacture high-grade Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.

Drop a card for catalogue.

The Proper Paint Perspective

It's well to remember that the store that sells satisfactory paint, wall finishes, etc., gets almost as much credit as the maker. Bring back the customer satisfied; that's the proper paint perspective. He may not need paint so often, but when he does you'll get his order. Sell poor, unsatisfactory goods and the reverse is the case. You'll make one paint sale and lose a permanent customer for paint and other things. And now we want to tell you our lines of paints, wall finishes, etc., will bring him back. Ask us about them.

BENJAMIN MOORE & CO., LTD. 6 Lloyd St., West Toronto

NEW YORK CHICAGO CLEVELAND CARTERET, N. J.

Chorus of Plumbers

Then let thy fragrant incense be
An inspiration sweet to me
And I will sing my songs to thee;
FLUXITE.

Anyone can use it. Engineers and other mechanics will have

FLUXITE

the paste flux that

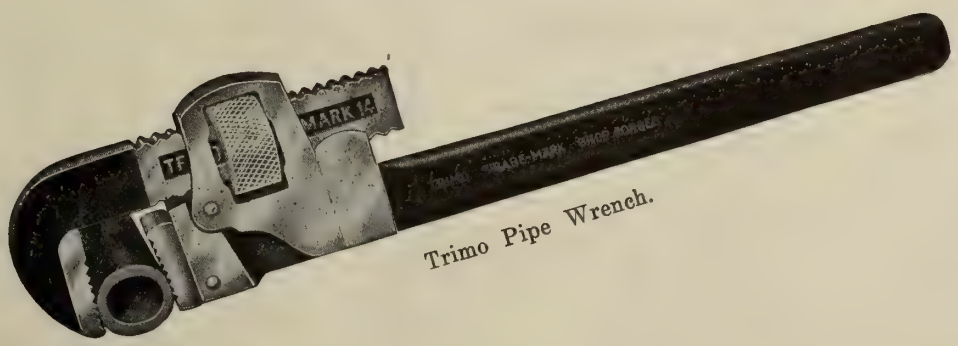
SIMPLIFIES SOLDERING

and lead jointing

Easy to use. Easy to sell.

It solders even dirty metals without cleaning, and does not cause corrosion.

Of the Jobbers and Factors in small and large tins. Remember it in your indents.



Made by the AUTO-CONTROLLER CO., 211 Vienna Rd., Bermondsey, Eng.

A splendid opportunity for securing a profitable line of business.

There is a big market for shingle stains of good quality. Modern homes built along the design of bungalow and cottage type, in many cases require the decorative effects of shingle stains to harmonize with the long sloping roofs and shingled walls and gables.

SHERWIN-WILLIAMS
PRESERVATIVE SHINGLE STAINS

are most attractive stains for rough wood and shingles. They have been specified for years by architects who know their merits. Made in pleasing shades, on a base of refined Creosote Oil, they have much better penetrating and preserving qualities than the ordinary Creosote commonly used, and are more permanent.

Our attractive store advertising, folders, and sets of stained samples are a source of good profits if you will let us co-operate in going after this business with you. Most paint dealers neglect the sale of shingle stains; drop us a line and we will show you how to get this business.

SHERWIN-WILLIAMS PAINTS & VARNISHES

A FINISH FOR EVERY PURPOSE

THREE POINTS WHY

Stephens'

REGISTERED TRADE MARK

PAINT AGENCY IS BEST

QUALITY

You require a stock of Paint which you can absolutely rely upon to give your customers PERFECT SATISFACTION. To do this the paint must be of the very highest quality.

The Paint which has given PERFECT SATISFACTION for over thirty-two years in Western Canada, *and which is absolutely guaranteed by us to continue to give satisfaction or we refund the purchase price is* Stephens' — a paint made in the West for the West, a paint with a reputation for reliability.

SERVICE

The importance of prompt, efficient service cannot be over-rated. The merchant of Western Canada does not want to carry a large stock, does not want to be waiting for shipments to come a long way, or be bothered by ordering a long way ahead.

Handling Stephens' Paint Agency eliminates all this. We manufacture both Paints and Varnishes right in Winnipeg — can supply you with anything you want *without delay* and *without shortages*—a service worth while.

ADVERTISING

Your buying Stephens' Paints from us does not end the matter—*we help you sell them again.* You receive with your first order a full assortment of Color Cards, Counter Display Cards, Framed Show Cards, Indoor and Outdoor Signs, Booklets, Novelties, etc. You get more; your customers are circularized *in your name* with handsome Booklets. They already know Stephens' Paints through their favorite newspapers and magazines. You will do well to hear more—we are at your service.

Do You Want More Money?

OF course you do and are willing to make use of your spare hours in a way that will net you the biggest returns. Many others like yourself have had the same desire to turn their spare time into money and profitable experience. They are now making from $5 to $20 a week, according to the time given.

IF YOU ARE NOT AFRAID OF WORK you can make $5 a week, giving 3 hours a week to taking subscriptions to

MacLean's Magazine

We supply you with all you need to take subscriptions except the determination. We allow a definite, liberal commission on both new and renewal subscriptions.

THE coming months are the most pleasant in the year for the work. If you write at once we can appoint you as our local representative.

143-149 UNIVERSITY AVENUE, TORONTO

WHEW!

IT'S HOT

But it isn't hot enough to forget your Paint Department

At this moment you could easily count out several families packing their trunks in readiness for their annual trip to the cottage back in the woods.

Ten chances to one the cottage will need

PAINT

So while you are selling them fishing tackle, screens, hammocks, etc., why not bring to their attention the fact that the same old reliable paint you sell for their home is just as good for the cottage,

or perhaps

MAPLE LEAF
CREOSOTE SHINGLE STAINS

would serve them just as well?

They are made in the natural shades that blend and contrast pleasingly with the foliage. We control every process in the manufacture of these Stains from the preparation of the raw oils to the pigments. We know that they are made right and that they will give satisfaction.

KEEP YOUR PAINT DEPARTMENT ON THE MOVE DURING THE SUMMER.

M L FINISHES THAT ENDURE
QUALITY

Let our Decorative Aid Department assist you to push summer sales. This department will give customers excellent color suggestions for summer homes, and refer the business to M. L. Stores.

WINNIPEG TORONTO VANCOUVER

LAW

No business man can afford to be ignorant of the laws governing merchandising.

Few, however, have the time to read the many and complicated volumes of the country's laws and statutes, and for the benefit of the hustling business men a concise and understandable book has been prepared. It gives all the necessary laws and information regarding merchandising, including the renting of a store, buying property, collecting debts, etc. This book, the

Digest of Canadian Mercantile Laws

is a ready reference, a valuable guide in daily business, and is saving many dollars.

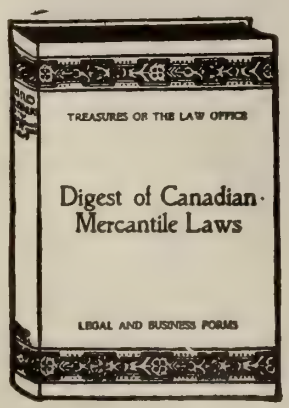
No work published in Canada equals it for business men.

A veritable consulting library on this one line so universally needed.

Based on Dominion and Provincial Statutes and Court Decisions.

Indorsed by barristers, sheriffs, magistrates and conveyancers.

Recommended by the Ontario Institute of Chartered Accountants.



Used by more accountants, bankers and business firms than any other work on the subject. Forwarded direct post free on receipt of price.

Keep the book ten days, and if it is not satisfactory, return it and get your money back. If remitting by cheque, make **same payable at par**, Toronto.

Eastern Edition, Price, $2.00

Special Western Edition, $2.50

To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price $2.50.

THE "CANNON OILER"

FORCES THE OIL ANYWHERE

Saves Oil, Time and Labor

A trial always makes a steady user.

Easy Profit because Easily Sold

No matter in what position the can may be held, the oil is entirely controlled by the operator. Not a drop of oil need be wasted. Oil is forced out by simply pressing on the plunger. The flow of oil ceases the instant the pressure on the plunger stops.

Oiling can be done in one-half the time and with less effort.

The "Cannon" is giving satisfaction to thousands of users.

Drop a card for particulars.

"Hercules" Step Ladders

are strong and well made —and they look it.

All stock entering into this ladder is carefully selected from the finest material. The nails which pass into the end of each step are held firmly in place by a patent malleable iron washer. Iron rods connecting these washers form, with a small block under each step, a truss support, the tension of which can be readily adjusted.

The **"Faultless"** Lock keeps it from opening or closing when in service. Ears are of malleable iron, and all braces are bound with steel angles.

All iron and steel parts are finished in aluminum, which, with the clear, bright woods, make this pattern **one of the most attractive, easiest sellers on the market.**

Reading Brimful of Interest for Busy Canadians

The July MacLean's, just off the press, is full of feature articles and stories which should appeal to every Canadian. Does not this list interest you?

"The Education of the Camp"—A strong article by a military authority on the benefits, physical and otherwise, of militia training.

"On the Firing Line in Riel's Day"—The first of a series of articles on the North-west Rebellion, written by one who served through the last campaign. These stories will be full of reminiscences given to the public for the first time.

"The Adventures of Madelyn Mack: Detective"—The best detective stories published since Sherlock Holmes first appeared. The first of this series appears under the title "The Man With Nine Lives"—A strong recital of adventure, written in graphic, vivid style.

"The Miracle of the X-Rays"—A clear presentation of one of the greatest discoveries of modern times. The fascination that science exerts on the lay mind will serve to make this article one of absorbing interest to all.

There is nothing a man could not do if he had the right information before starting at it. Under the heading: "Getting the Facts," a Lieutenant of Harrington Emerson, the chief exponent of efficiency, tells how the right information can always be obtained. Want to get started on the highroad to success? Read this article.

Glen Campbell—Broncho buster, sturdy man of the plains, orator, player of practical jokes, firm friend and hard fighter—is the subject of a breezy sketch that will both interest and amuse. Meet this famous Western M.P. in the pages of July MacLean's.

These are just a few. There are plenty more of the same kind to be found in the July issue of Canada's national magazine. If you don't read MacLean's, start with the July number.

Send a postcard and have your name added to our subscription list. You'll be delighted with every issue.

Subscription price $2.00 *per year.* 20 *cents a copy.*

WRITE DEPARTMENT M.

The MacLean Publishing Co.
LIMITED
143-149 University Avenue, Toronto, Canada

Would you like a

UNIVERSITY EDUCATION?

Scattered up and down this great country of ours there are a number of young men who have the ambition to *make good* in every sense of the word, to whom a University training would act as a spur to greater success. If you are one of these ambitious, go-ahead young men we offer you the opportunity to *realize your ambition.*

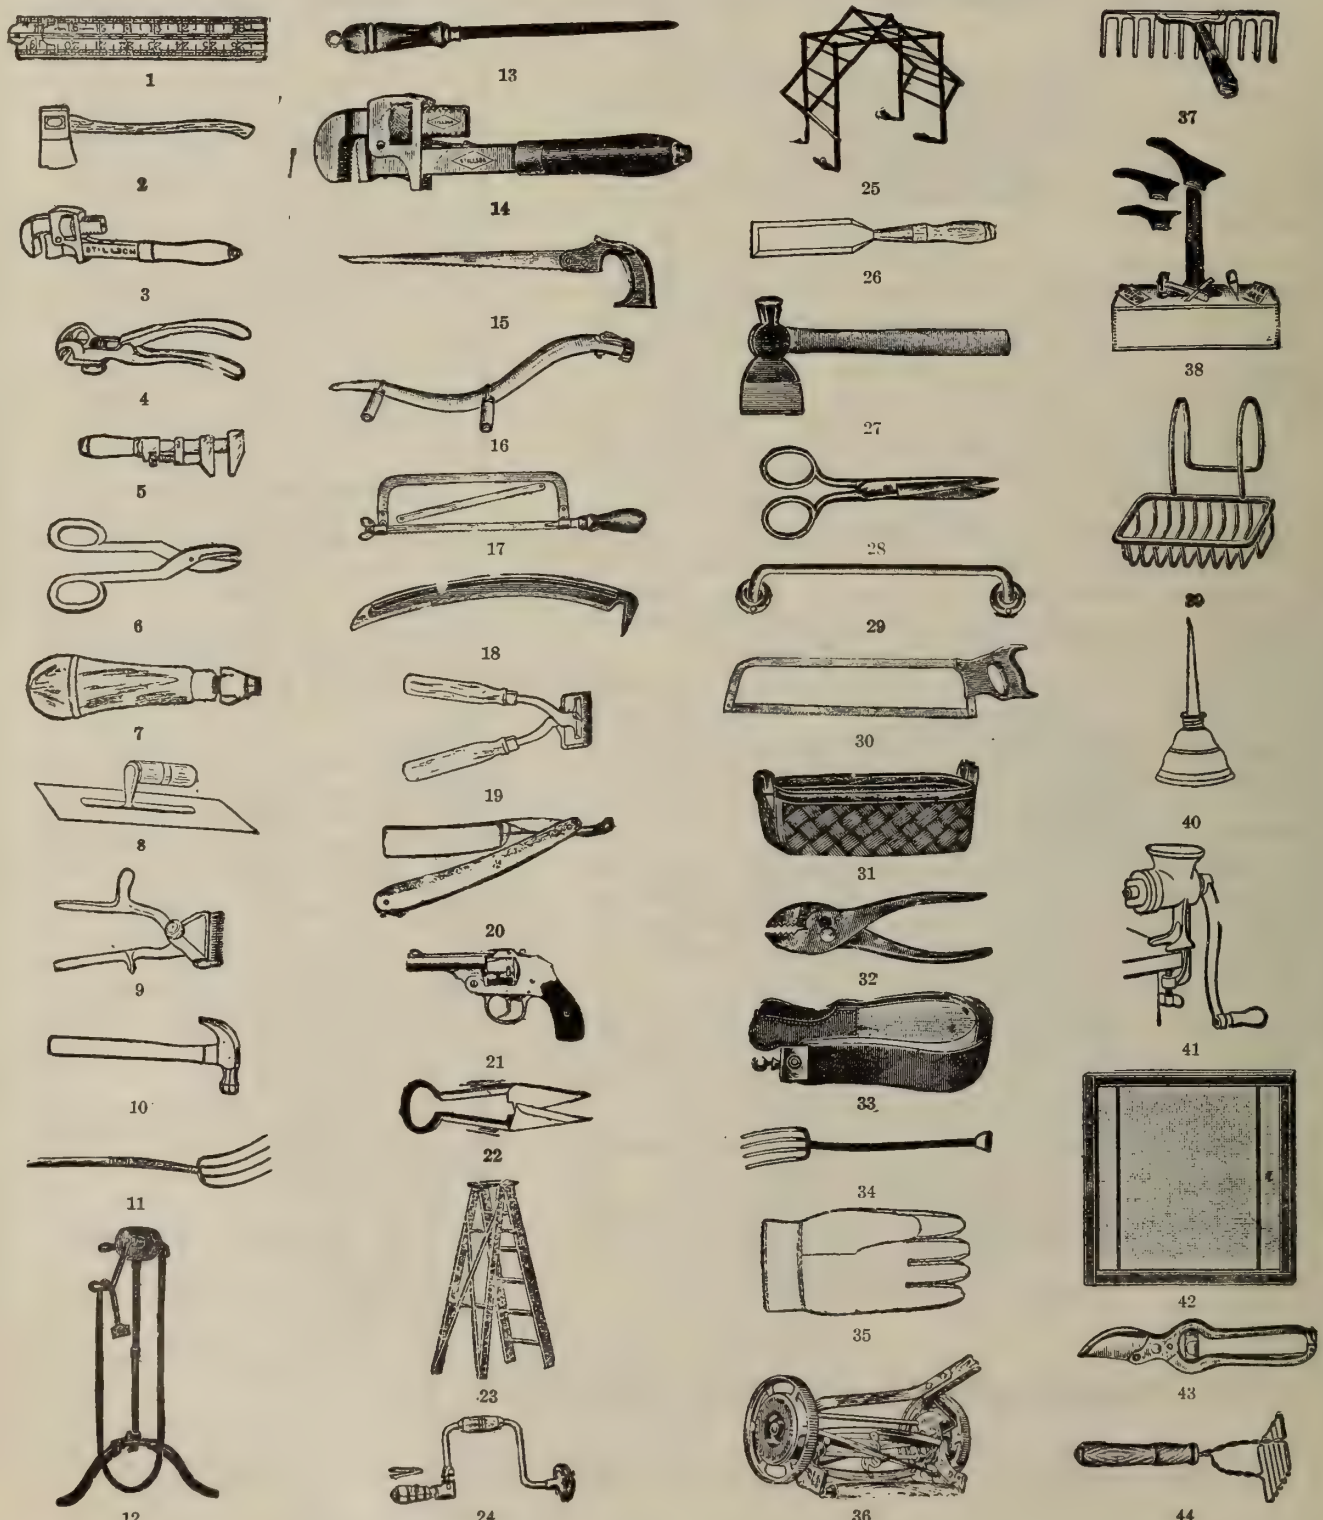
Our proposition has already helped many, let it help you. The work is pleasant and healthful, besides the training we give you in salesmanship will always be of great service to you in whatever work you finally engage in.

In every city and town in the Dominion there are many business men and private residents who would appreciate your interest in bringing

MACLEAN'S MAGAZINE

to their notice. It is *the* Magazine of Canada and is winning its way into the confidence of every Canadian reader of high-class matter.

A liberal commission is allowed on all subscriptions, and the spending of a few hours a week will easily enable you to realize your ambition and *enter the University next fall.*



If you are interested, write us at once and we will forward full particulars.

Hardware and Metal's Electro Service

AT the request of many of our readers and in order to assist Canadian hardwaremen in such a manner as to make it easy for them to use illustrations of staple hardware lines in their newspaper, circular or catalogue advertising. Hardware and Metal's editorial department has instituted a new service, viz., the supplying of electros of staple hardware lines at a reasonable price. Many merchants claim that the electros they have on hand are of such large proportions and occupy such large space that their use is almost prohibitive on account of the cost of newspaper space. By using small electros of seasonable goods the merchants will be able to feature several lines in one advertisement at a very reasonable cost. Hardware and Metal will from time to time publish seasonable advertising suggestions in which electros here shown will be used. In ordering electros be sure and order by numbers. Price of electros shown on this page is 15c each. Cash with order. Address all orders to Hardware and Metal, 143-153 University Ave., Toronto, Ont.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

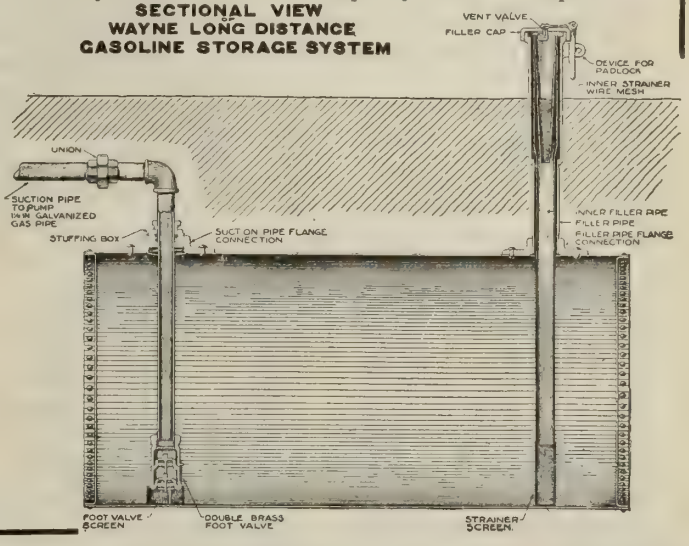
The Only Profitable Way of Handling Gasoline and Oils in the Retail Store

When gasoline and oils are handled with Wayne Storage outfits there is no waste due to evaporation, leakage and spilling. The waste does not seem to be very much at one given time, but in the yearly aggregate amounts to considerable.

This system also saves time and labor, as there is no constant filling and handling of measuring cups and the constant rolling in and out and tapping of barrels, and much space.

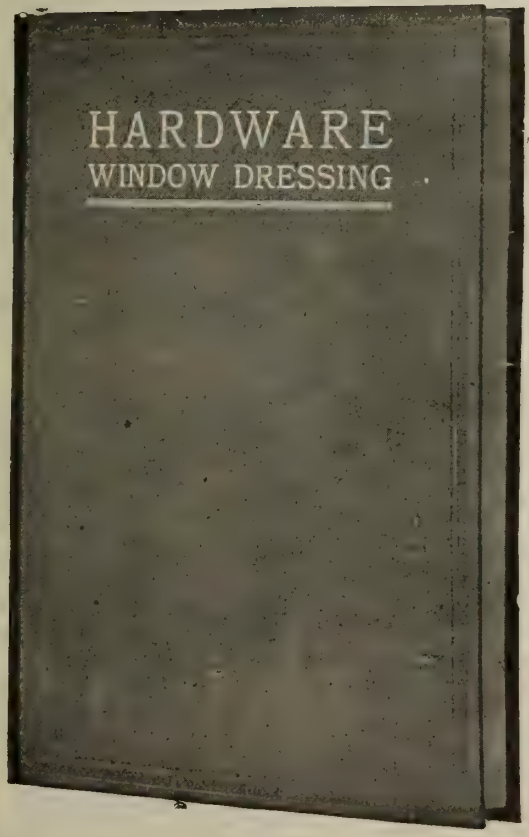
Does away with dirt and unpleasantness.



The **WAYNE PUMP** is constructed so as to throw a pint, quart, half-gallon or gallon, and measure exactly.

Works easily, and when not in use can be securely locked. Gears are completely housed. All parts are accurately machined and thoroughly tested, and are interchangeable.

WAYNE UNDERGROUND TANKS are made of the best grade of steel, carefully soldered and riveted, and finished in rust-proof asphaltum paint to prevent any possibility of corrosion; you bury the tank, as shown in detailed drawing, having the fill pipe come to the top of the ground, where it is handy for filling.



If you're interested in a Clean, Safe, Money-Saving Way of Handling Oils, write for full particulars.

NIAGARA to the SEA

Charming Summer Trips on Lake, River and Ocean

NO other water trip on the continent provides so many interesting features as that delightful cruise from Niagara to the Saguenay, Thousand Islands, St. Lawrence Rapids, Capes Trinity and Eternity. Stops at Toronto, Montreal, Quebec, Murray Bay and Tadousac.

Fast Freight and Passenger Service on Lake Ontario.

Between all important cities on both American and Canadian shores. Low passenger rates.

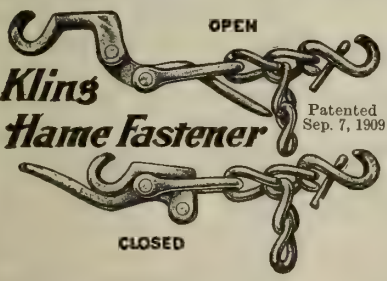
LABRADOR ROUTE

From Quebec along the North Shore of the Gulf of St. Lawrence.

LOWER GULF

From Montreal and Quebec to Gaspe, P.E.I., and Pictou, N.S.

NEW YORK QUEBEC



The all-water route via Halifax and Lower Gulf.

For full particulars, apply any tourist or ticket office, or address Passenger Department,

CANADA STEAMSHIP LINES, Limited

46 Yonge St., Toronto Victoria Square, Montreal

Every Horse Owner Buys at Sight

The Kling Hame Fastener holds the hames tight and uniform at all times. A child or woman can hitch up as easily as a strong man. Only takes a second to put on or take off, yet the horse can never open it or break it. Lasts longer than the harness. Costs the dealer $2.25 per doz. Any jobber. Write for circular.

Look for "Kling" on the lever.

The National Safety Snap Co., Inc., Dept. 33, Wilmington, O., U.S.A.

Sole manufacturers of the Klingsnap and Kling Hame Fastener.

No. 32 Torch

C. & L. Fire Pots and Torches are Sure to Please.

That is why every up-to-date mechanic insists upon having them. They combine quality, heat efficiency, and durability, and the user will soon save the cost of the tool in the saving of fuel alone, for they produce more heat, using less fuel than other makes. Remember, you buy gasoline often, but a Fire Pot or Torch only occasionally.

Your nearest jobber will supply at factory price. Our Catalog is free—send for it.

Talking to the Point—

CLASSIFIED ADS. get right down to the point at issue. If you want something, say so in a few well-chosen words. Readers like that sort of straight-from-the-shoulder-talk, and that is the reason why condensed ads. are so productive of the best kind of results.

CLASSIFIED ADS. are always noticed. They are read by wide-awake, intelligent dealers, who are on the lookout for favorable opportunities to fill their requirements.

TRY A CONDENSED AD. IN THIS PAPER.

CHICAGO STEEL BENDING BRAKES

This Brake is the result of years of experience and a thorough knowledge of the requirements of Sheet Metal Workers.

Any information concerning the work turned out by these machines, their adaptability, etc., will gladly be given on request. **Work quickly and easily.**

The Steel Bending Brake Works Ltd., Chatham, Ont.

Bolts

We have a large stock of **Carriage and Machine Bolts** and **Coach Screws, Rivets, Nuts and Washers,** from which we can fill all orders immediately.

Prompt Shipments. Reasonable Prices.

London Bolt & Hinge Works

There Were Many Doubters

when the Canadian Cadets entered the Imperial Cadet Rifle Competition in London, England, with their new and hitherto untried Ross Cadet Rifles.

But the Canucks won out. The Championship was won by Cadet McWilliams of Calgary and every important event but one was carried off by the Canadian boys.

The Ross Cadet Rifle is an ideal boys' rifle and there should be a large sale for it. If you have none in stock why not ask your jobber at once or write direct for prices and discounts?

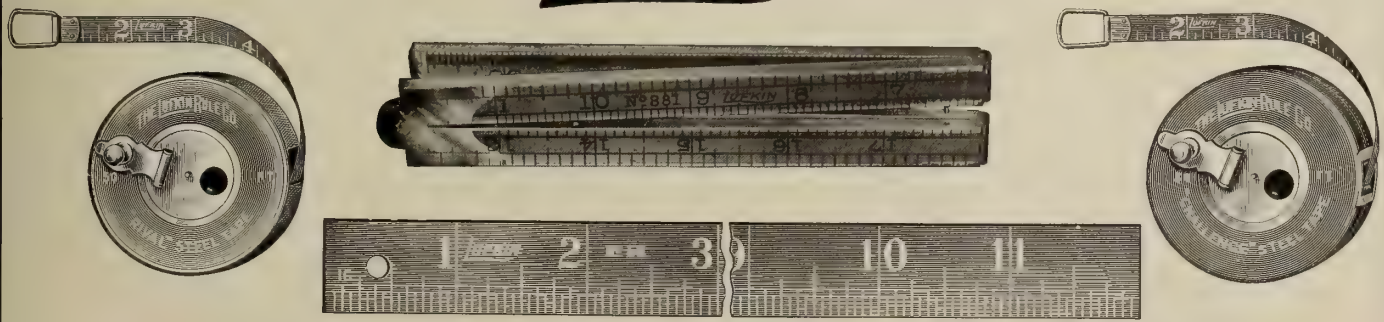
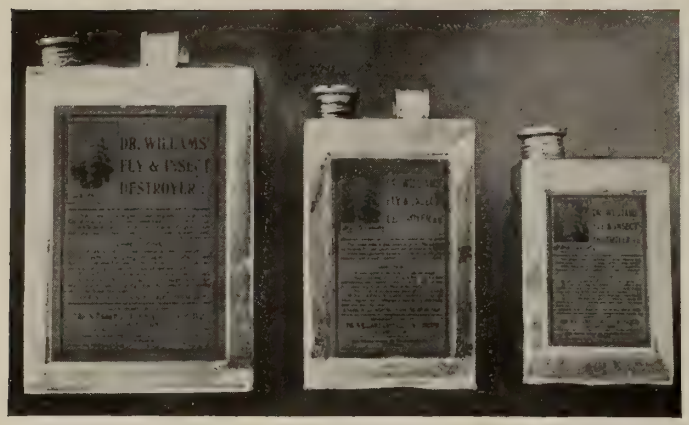
THERE'S MORE SELLING ARGUMENT IN THE NAME **LUFKIN** THAN YOU EVER NEED TO SELL **LUFKIN** GOODS



LUFKIN Measuring Tapes and Rules

Are Canadian Made and are on sale at practically every prominent house in the country stocking such goods.

THIS IS THE SIMPLE EXPLANATION: Dealers stock the line that will sell and will bring customers back. CUSTOMERS buy the line in which they have confidence.



THE OPINION OF THE LARGE MAJORITY MARKS THE SAFE COURSE.

Stock **LUFKIN** Goods

THE LUFKIN RULE CO. OF CANADA, LTD. WINDSOR, ONT.

Dr. Williams' Fly and Insect Destroyer

Used and highly praised by hundreds of dairymen from coast to coast

You'll find it a consistent good seller

Kills texas flies, animal lice and all bad germs.

It is easily applied and absolutely non-poisonous to animals.

This preparation is a liquid and sold only in tin cans lithographed in yellow and black and bearing the photogravure and facsimile signature of W. Williams. None genuine unless so printed.

It is a well-known fact that cows in Summer will not give more than half their usual yield of milk when the flies are at their worst. **You can use this strong talking point** to dairymen and farmers. **Get them to try it and they'll always buy it,** and recommend it to their neighbors.

We guarantee Dr. Williams' Fly and Insect Destroyer to do all that we claim for it.

We will be pleased to furnish full particulars and put you in touch with users.

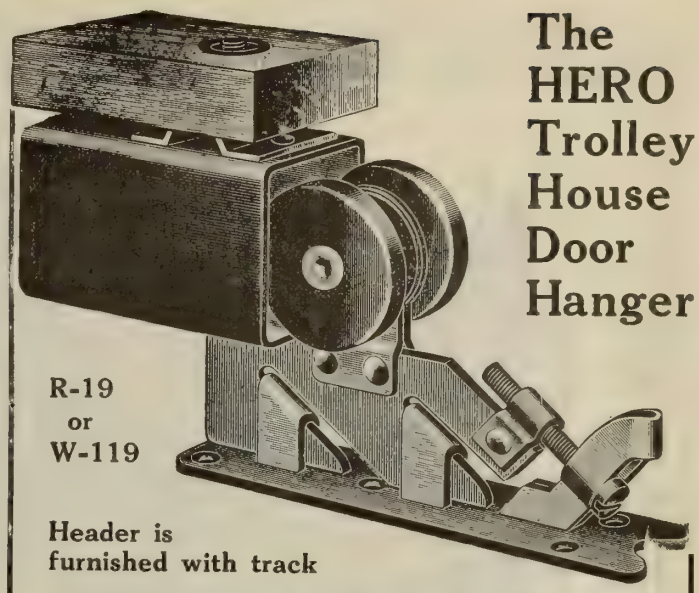
Automatic Power Washer

(Buy it in Canada)



Every farm home in the Dominion should have one of these splendid power washers. No man can afford to allow his wife to wear out her life doing the washing by hand when with the Automatic and a small engine all this hard work may be saved. And most of the men are coming to see this now. They are ashamed to use every labor-saving device in the field while the woman continues to drudge.

Wide-awake dealers will be quick to prepare for the splendid power washer business that is coming. Get our handsome 32-page book, giving complete washing machine information. It is free. Ask for Bulletin 107, so we will know what you want.

Reversible wringer, best made, safety release, extra length springs, easy control, tub has bottom outlet with brass faucet, pulley on left side, babbitted shaft bearing, high-class throughout. Also made in electric type.

Sold by Canadian jobbers.

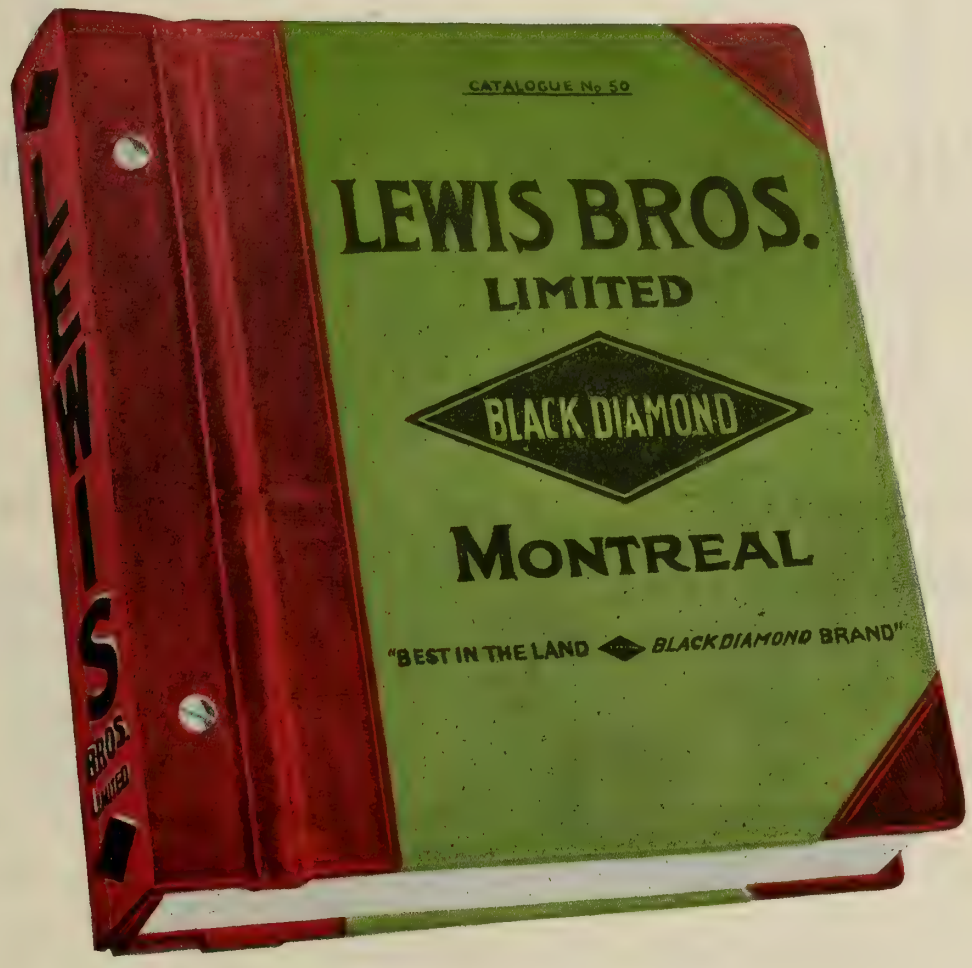
Canada's Departmental House for Mechanical Goods

DAVIDSON'S NON-EXPLOSIVE
Premier Underwriters Safety Gasoline Cans

Specially made for Gasoline, Benzine, Alcohol and all highly inflammable explosive liquids. Saves 30% Evaporation, and preserves the volatile qualities of the oil or spirits.

Strong and Superior Construction—Finished in a beautiful Japan Red.

The principle of this Can for safe storing of Gasoline depends upon the same fire-stopping property of wire gauze that gives absolute safety in use, to the celebrated "Davy" mining lamp. *The brass tube* extending into the tank is covered at its base by wire gauze and is sealed at the top by an automatic valve which practically makes it air-tight. If fire occurs near or or around the tank and excessive gas is formed by the heat, this valve opens automatically and allows the dangerous gas to escape.



In case contents of Can are ignited the vapor escaping through the gauze-protected tube will burn quietly and harmlessly at the orifice without exploding.

Tested by the most competent Engineers and accepted by the Underwriters, its use is therefore a positive safeguard to human life and property, and will reduce your insurance rates to the minimum.

—Three Sizes—
1, 2, and 5 gallon.

We want YOU to have a copy of our new book. It's yours for the asking. You may be in need of a few lines. Send us the order and we will enclose a copy, or if you don't need anything drop us a card and we will send it by express.

The most complete Hardware Catalogue ever issued by a Canadian House. Covers 1,350 pages, 8,000 illustrations. The greatest possible help in making up mail orders. Write to-day.

LEWIS BROS., LIMITED, MONTREAL

OTTAWA **TORONTO** **VANCOUVER**

What is Your Favorite Department in the Hardware Business?

Do you make a "fad" of any of your departments?

Is there any particular class of goods on which you are hungry for more information?

Write and tell us what it is. Tell us something of your ideas for buying, displaying, advertising and selling in your pet department. Let us know on what phases of the subject you wish more light.

These suggestions will help our editors to draw up the list of contents for our Annual Fall Number, to be issued August 22.

We want to make this the finest of all the Annual Numbers we have issued in our 26 years of experience.

Your ideas will help, and help wonderfully.

S M P
HEAVY STEEL BUCKETS

No. 140

No. 160

HOT GALVANIZED

Think of pails made of 24-gauge steel plate, wired on the top edge with ¼" rod, with ¼" bails and handsome wood handles and finally—dipped one by one in a bath of pure molten spelter,—free from dross.

You are then thinking of No. 140 and No. 160 **S M P** heavy steel buckets. Recommend them to *all* your customers for *all heavy work*.

A. MACFARLANE & CO.

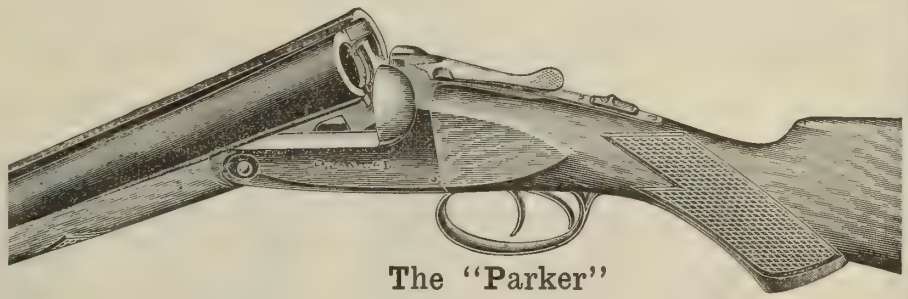
Coristine Building, Montreal

The "CAVALIER" Single Shot Gun

is made specially for us. Do not confound it with some of the cheap, common ones now on the market, for it is a much superior article. Barrel is decarbonized steel, fine case-hardened frame, oil-finished walnut stock, 12, 16 or 20-gauge.

The "Cavalier"

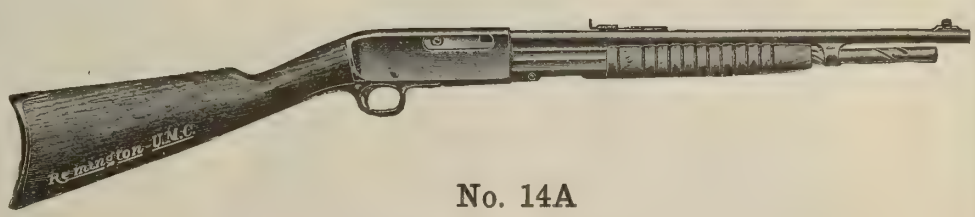
The STERLINGWORTH
No. 41 Double Barrel Gun



is another line high in quality and well finished. Compressed fluid steel barrels, fine walnut stock, tapered locking bolt, coil springs, simple action, 12-gauge.

The "Sterlingworth"

THE PARKER



No. 0412 Double Barrel Gun. Trojan steel barrels, drop-forged steel frame and parts, American black walnut stock, 12-gauge. Parker's have had a reputation for years.

The "Parker"

REMINGTON RIFLES

Solid breech hammerless take-down pattern, ordnance steel barrel, American walnut stock. Weight 6¾ lbs. Six-shot capacity. 30 cal., 32 cal., and 44 cal., using Remington High-Power Rimless Cartridges.

50 YEARS IN THE BUSINESS

It Pays to Meet This Demand

Every day, from coast to coast, there is a brisk, insistent demand for

NICHOLSON-MADE-FILES

Manufacturers, superintendents, purchasing agents and mechanics have learned by experience that these are the most efficient files—That they cut deeper, last longer, are more uniform in workmanship, and cost least to use.

For 50 years these files have been building up a reputation as a mighty good file. To-day, each sale means a satisfied customer and more profitable trade in files.

If you are not now benefiting by this demand for NICHOLSON-MADE-FILES, by all means get in line for your share of the business to-day.

OVER 50,000,000 FILES A YEAR

Starrett Sales Service

15,000 Requests for Starrett Catalogue

Last year we received 15,000 inquiries in answer to our advertisements in many papers. Nearly every inquiry is keyed so that we know what papers are pulling best and also which of our ads. appeal most strongly.

There are letters in this pile from all over the world and from all kinds of men — purchasing agents, foremen, superintendents, machinists, carpenters, chauffeurs, engineers, clerks, doctors, lawyers, and so on. Some requests come on letterheads of prominent companies, some from government department offices, some from municipal and state offices, some come on post cards and some on scraps of wrapping paper. But every man gets a catalog, and if there is a hardware dealer in his town, the dealer is notified of the inquiry and the man is told to go to that dealer. That is what we call "Sales Service" for the dealer.

BY INVITATION MEMBER OF

NEW YORK U.S.A.

Is your stock of Starrett Tools ready to meet any request that comes? If not, stock up. Don't lose a sale because you are not prepared.

The L. S. Starrett Company

WORLD'S GREATEST TOOL MAKERS

Mrs. Pott's Sad Irons

No. 50 — Nickel-plated.
No. 55 — Polished japanned top. Stands coppered.

The "IDEAL" Self-Heating Sad Iron

Is a good line to push in the hot weather. It does away with the necessity of lighting stoves and the resultant misery.

The "Ideal" is absolutely safe because each tank is tested to stand 175 lbs., while only 2½ lbs. pressure is on the tank when ironing.

Handle and operator are always cool, and the perfect combustion assures no gas.

Cost of operation is less than one cent a day for a family of five. Heat can be regulated to suit conditions. There is no possibility of scorching clothes.

Exposed parts are nickel-plated and polished, giving the iron an attractive appearance.

Sleeve Irons

Nickel face, plated top, with narrow point suitable for the finest work; lace, waists, etc.

Mrs. Pott's Handles

No. 1—Cast. No. 2—Malleable. Every handle guaranteed to fit every Taylor-Forbes iron.

The Disston Standard of Quality Applies to Every One of Their Products

From the beginning, 74 years ago, a high standard was set for Disston Brand Goods. This standard has been raised to keep pace with the advance of the times. So high is this standard that both dealers and mechanics have come to look upon a Disston Saw or Tool as the standard by which to judge all others.

Henry Disston, himself a finished mechanic, insisted upon sending his sons into the shop to learn the business as he did. Realizing the importance of this early training, his sons in turn placed their sons in the shops until they thoroughly understood the manufacturing end of the business.

This means that the sons and grandsons of Henry Disston, who to-day manage the great business which he established, are all practical men. They know the business from the ground up, which assures a maintenance of the efficiency and high quality of all products manufactured by the Disston Works.

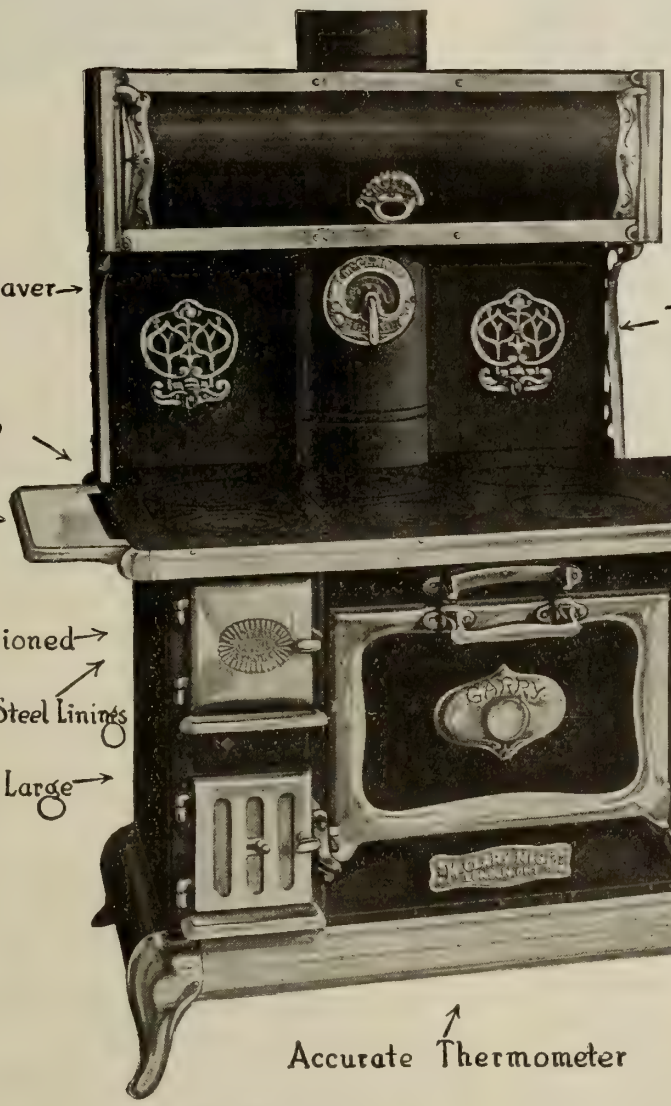
ELEY

CARTRIDGES

We Load for the World!

¶ No Ammunition Manufacturer or Loader handles or loads a greater variety of shot gun powders than ourselves, consequently our experience of the styles of powders and the specification of loads which give the greatest satisfaction to sportsmen is second to none.

Eley Smokeless Shot Gun Powder (33 gr. class) is inferior to no other powder. 33 grains is the Eley Standard load, and that this will do the work more satisfactorily than heavier loads of other powders is one of its merits. This load gives results equal to 3¼ drs. of other bulk smokeless powders.



ELEY CARTRIDGES are shot in the snows of Canada, the heat of Central Africa and India, and elsewhere throughout the world.
SOLD BY ALL GUNMAKERS AND AMMUNITION DEALERS.

ELEY BROS. (CANADA), LIMITED, NORTH TRANSCONA, MAN.
ELEY BROS., LTD., LONDON.

Adopt the highest standard of practice possible by selling standard goods only. It saves you trouble and loss of trade explaining away failures. A range that will meet a standard test is

McClary's

"GARRY" STEEL RANGE.

Its appearance is always attractive—No gawdy trimmings to tire the eye.
The Base is heavy—holds the range rigid.
The firebox linings in nine pieces—McClary's famous semi-steel makes them practically indestructible.
The Ovens are 18-inch and 20-inch—full size, means no difficulty in roasting largest joints.
The reservoir is a copper one—will never rust.
The flue construction is perfect—it utilizes all the heat by forcing it twice round the oven.
And the price is moderate—it's so moderate as to clinch your prospective sales. A postal request for more information will be gladly given prompt attention.

"McClary's" on goods is a Quality Name.

Adequate Supervision of Furnace Installation

Price-Cutting More Prevalent in This Than in Most Lines—Inferior Installation Work the Chief Difficulty—A Weeding Out of Incompetents Necessary for Self-Preservation.

Written for Hardware and Metal by Henry Lewis.

THE regulation of furnace installation has become a matter of such deep concern to retailers and manufacturers alike, that, failing any results from their own past efforts, it is time that they should invoke the aid of the authorities.

The condition that has arisen in some parts of Canada, particularly in the larger cities, such as Toronto, is the result of the increase in the number of stores that have gone into furnace installation in connection with the sale of stoves, etc. This fact alone would insure price-cutting, however competent the men might be; but when one considers that a large number of these dealers are utterly incompetent as furnace men, the situation is complicated tenfold.

There is undoubtedly a fair profit in furnaces, provided the retailers do the work in economical fashion, without any sacrifice of the customer's interest or the retailer's profit. Unfortunately, these profits have been overrated, and have in consequence excited the cupidity of men who are as much entitled to supervise the installation of a furnace as a hen is to row a boat. Overrating the probable profits, as uninformed people will, these men are the first to revert to price-cutting tactics as an order-getter.

The evils of price-cutting are too well known to need any indictment here, but the citation of one specific case that has to do with furnaces might serve the better to bring home to the guilty parties the folly of their course. A certain dealer, much against the wishes and advice of the manufacturer, took what should have been a one hundred and thirty dollar job for one hundred and fifteen. Two years afterwards that dealer, in quoting the standard price on this same installation to another man, some distance removed from the first buyer, was met by the complaint that it was a hold-up, because the first man had gotten the same furnace two years before for one hundred and fifteen. Upon investigation, this fact was found to be well known by builders in general. So, here, as a result of one dealer's greediness, the trade of a whole district was demoralized.

Manufacturers are doing all that they can to prevent incompetents getting hold of their lines, notwithstanding this fact, one does slip in once in a while, to say nothing of those that crawled through the bars before the manufacturers were awake to the necessity of strict surveillance. The mere fact of holding an agency, together with the purchase of an equipment, can never make a heating man, despite the fond belief that appears to actuate the motives of some so-called.

It is much easier to commit an injustice than to repair it: the one may be done in a moment, the other take years of reparation.

So it is with furnaces. By price-cutting, these men demoralize the market for themselves, their competitors and the manufacturers who supply them both. By inefficient installations they give all makes of furnaces a bad name, particularly the one they have been guilty of putting in. Then the next time that Jones wants a heating plant, he will remember the defects of his last furnace and so condemn them all. It is the furnace that is blamed, not the man, and even though it were otherwise, the satisfaction would be of a melancholy nature, for what inducement is it to the householder to purchase a furnace, however good, if he can have no assurance that the man who installs it is onto his job. Then, to draw the long bow and imagine the improbable: if this man Jones decides to take the chance of a freak installation, the first thing he does is to hold up his hands in holy horror at the fair price that is quoted him. That low price he got on the other job has spoilt him as a desirable customer, for he will be a discontented one even though he should finally be argued into paying a price that at best, offers only a fair profit.

The heating men, are so poorly organized that they have never accomplished any lasting good in the sporadic remedial measures that they have attempted to inaugurate. They are practically unanimous in their desire to remedy the evil, for even the incompetents may be ignorant of their own lack and blame condition on others, but their efforts have hitherto lacked direction, intensiveness or some other essential equality that is necessary to success. In spite of "gentlemen's agreements," someone's eyes have invariably proved larger than his stomach, so that he cut prices to corral the trade and soon others of better calibre were doing the same under the silly delusion that they were protecting themselves.

The bulk of the manufacturers are entitled to greater credit than the retailers. They have, in known instances gone to the extent of refusing to sell furnaces to men who were good customers and quite competent in other lines. Such action requires a far sighted and broad-minded policy, for the average man who can and will pay cash for his furnaces is apt to take offence at the imputation that he cannot properly install them or at least buy the services of those who can do so.

The vital requirement is that the un-

Selling Hardware and Groceries in Conjunction

Montreal Merchant Conducting a Combined Hardware and Grocery Store—Special Counters for 5, 10, 15 Cent Goods—Wall Paper and Crockery Also Carried in Stock.

ON June 4, George V. Kneen, of Maissoneuve, Quebec, held a formal opening of his new hardware and grocery store, at 515-517 St. Catherine Street. Hardware and groceries are not as a rule handled together, but Mr. Kneen has planned his store to handle both lines.

Mr. Kneen started a grocery store six years ago near his present location. The store at that time was 17 by 38 feet, or as he describes it, "little more than a hallway." The business grew to such proportions that larger quarters were necessary. He learned that a large hardware store nearby was having "hard sledding," the expenses apparently being larger than the business could stand. It was just the kind of store that he wanted, so arrangements were made for him to take over the lease. The new store has a depth of 85 feet and a frontage of 50 feet. It is divided down the center, so that there is 25 feet for hardware and the same for groceries. The two departments are so arranged that customers may pass from one to the other, the only division being some fixtures that extend half way to the ceiling, located between the posts down the center. Each store has its separate entrance and show window.

Mr. Kneen confesses that he knows very little about hardware, but he has overcome this shortcoming on his part by putting in charge of the department a man who has had considerable experience and who knows the line thoroughly. The accompanying illustration will give an idea of the layout and the spaciousness of the store, though it does not show the silent salesman counter and glass-fronted wallcases, immediately on the right of the entrance.

A feature of the store is the three large tables in the center containing 5, 10, and 15 cent goods. Each table is fitted with wire baskets in which kitchen or general household goods are shown, with neatly lettered cards bearing the price. Immediately in front of the tables there is sufficient floor space to show seasonable goods which it is desired to keep before the attention of the shopper. At the time the photograph was taken this space was taken up with a rather crowded display of oil and gas stoves and heaters, and a kitchen range.

The paint department is located across the rear, just under a balcony that extends back for a depth of about fifteen feet. Behind the shelving for paints is a "back shop" which is handy for unpacking or for storage purposes. On the balcony above, there is the wallpaper and crockery department, with the office on the extreme left of the balcony, back of the grocery.

There are two long main counters, on the left. The rear one is fitted with nail bins, outside, and both have drawers on the inner sides. The wall fixtures are very neat and attractive. They are oak finished and drawers and boxes are neatly sampled. There are two glass-fronted cases and a cabinet for exhibiting samples of builders' hardware, etc. Just forward of these fixtures there is a double-deck glass-fronted wallcase, extending from the floor to the ceiling. In the upper sections there are displays of carpenter's tools, and in the lower sections sporting goods are shown. Hammocks are hung about a post in the center, just inside the entrance, and a wall-

(Continued on page 56.)

Get Together vs. Price Cutting and Credit Extension

The Underlying Causes and Resultant Evils of Price-Cutting—Judgment Shown in Credit Extension—Futility of Both—Only Sane Solution of Problems Presented is Co-operation.

Written for Hardware and Metal by Norman Lowe.

IT appears ridiculous to us in our infinite wisdom that two boys who have quarrelled and who want to make up should remain aloof because each expects the other to make the initial move. They are wise enough to know that they can have more fun if they work together than they can by remaining "mad."

How much more ridiculous to our eyes should be, but isn't, the sight of two men pursuing the same tactics and reasoning by the same methods. The cases are parallel ones, even though marbles may be the mainspring of one and money of the other.

This aloofness and petty rivalry is but another of the sins that is committedd in the name of the God, Business.

Price-Cutting.

A man may slave from morning until night and deny himself and his family all necessary recreation in order that the business revenue may all be returned to its source, and yet he will blithely turn around and nullify the efforts of the whole combination by a senseless price cutting or an unwillingness to hitch up in business harness with his opposition because the latter once did him a great injustice in a business way.

Why not shut up shop altogether? The results of the business are negligible in either case and by getting out of business at once the merchant would at least be saved all the wear and tear of brain tissue that is associated with the conduct of a business war. What use to make a decent profit on a hammer and lose it on a keg of nails? It is robbing the left hand to fill the right. Inevitably, it is the merchant himself who suffers most in the end. True, he drags the innocent bystander to ruin with him, the manufacturer or jobber who has advertised an honest article, and all others associated with the growth and distribution of it, but what matter? He has sold nails or cement cheaper than Jones. "He'll show Jones."

Insofar as it concerns others, the price cutter mistakes the opportunity and privilege to make a fair profit on an article for the license to drag in the mire the carefully built up reputation of a good article, in order that, according to his distorted vision, he may increase his profits by swelling his sales. Unfortunately, under such conditions, his profits lessen, or rather, his losses increase in inverse ratio to the volume of his sales. The mischief, however, does not stop here. The sale of this article demoralized for all time in that town (for who will pay one dollar for that that once cost only seventy cents?), the buccaneer of trade turns his attention to some other healthy staple that can stand a little blood-letting, whets his cutlery and stretches the victim out on the altar of his anger and rapacity. Have patience, give him time enough, and he will run the gamut of hardware price cutting from tacks to turpentine—and then he will close his doors.

Poor Credits.

The same intense rivalry that animates price cutting spreads to the field of credit to the extent that, rather than see a customer go to the opposition, a merchant will extend credit to a man who can lay no claim to such consideration. He forgets in the rancour of a small business war that the race goes not always to the largest turnover nor the battle to the most vicious.

As is too well known to require elaboration here, few merchants require the incentive of a bitter opposition to indulge in a heavy credit business. The mere knowledge of an increased movement of goods off the shelves is often satisfactory enough to inspire such a policy.

The Remedy.

The time for useless discussion of these two prime evils of the trade has passed to make way for the new era of improved machinery that will eliminate such waste. The evils have been worn threadbare in discussion, but very little has been said or done about remedies.

As is very well known, rivalries of a purely local, and sad to relate, of a petty nature are the chief causes of the use of these awkward tools. In the few towns in which the merchants are not at loggerheads, these conditions do not exist. Petty quarrels are synonymous with price cutting and bad credits.

On the other hand, those towns whose skirts are free of the twin evils, are invariably found to contain merchants who refuse to quarrel. It does not follow that they are friends; although closer acquaintance often leads to such a relationship, but they realize that good business can not travel in harness with the self-indulgence of a quarrel, and that the bad feelings habit is a form of self-indulgence quite as much as that of liquor is.

The only solution of the vexing problem is to do as these men do—dwell in amity, and get together either in friendly agreement or formal association. The quarrels of the town of X are no more better than the hate that was rampant in Z until this plan went into effect. Talk to the dealers of Z to-day: they have tried both and would laugh at the suggestion of going back to the primitive price cutting and poor credits that follow in the wake of mean rancour and a distorted sense of the meaning of competition.

A thousand Canadian towns need their local Moses to lead them from out of their bondage of ancient evils to the promised land of a local association. In this want lies the opportunity of some one hardware man in every town to take the iniatitive, and so gain for himself fame, and for all concerned, a safe and sane readjustment of business evils.

HARDWARE AND METAL

VOL. XXVI. No. 29 Toronto, Canada, July 18, 1914 Two Dollars per Year

VACATION FOR THE PROPRIETOR.

HARDWARE AND METAL has met merchants who have said, "I've never taken a regular summer holiday in five years, only a day off now and then. I never seem to have the time." Some have said it with conscious pride; some with regret. The former offer a rocky field for missionary effort; the latter are more hopeful. Their tone implies at least that they would if they could; that they are trying to work it out for next summer. It seems almost an axiom to remark that the proprietor who has not reached the condition where he has capable under-studies requires a two or three week's rest more than any of his employees. But some go on, toiling early and late, and pay the toll for working the machine of life beyond its guaranteed capacity. As has been remarked, "Life on earth is short and we are a long time dead."

The fear that "The store cannot get along without me," is usually the excuse and often the reason for tossing aside the holiday slip that should have a yearly place in your own pay envelope. In many cases it is not to the credit of the proprietor if he has no one whom he has trained to take his place for two weeks during an off-season. Often this testing out of the temporary manager turns out to be one of the most valuable of experiences both for yourself and for him. It may mean the possibility of reconstructing the relation of yourself to your own business, the shifting of many a load, greater leisure for a broad planning in future, a conservation of your own energy. Business to-day issues an imperative demand for it.

SELLING SPORTING GOODS.

CANADA occupies an enviable place in the realm of sport. To-day in the midst of the glorious summer season the exclamation, "play ball" is heard in every open spot where people congregate, be it vacant lot or stadium, and the spirit of the play occupies a prominent place in the minds of all, young and old alike. The hardware store that does not lead as an emporium for sporting goods during the summer months will not make the best possible showing in the race for popularity. Even in the big cities there is no reason why hardware men should not secure a large share of this desirable trade, especially those located in suburban districts. The wise dealer is the one who will emphasize the play spirit during the summer months—window displays, newspaper advertisements, show cards and personal salesmanship should all be employed to this end. There is perhaps no side line attached to the hardware trade can be built up so quickly and satisfactorily as the trade in sporting goods. If the goods are right they advertise themselves and it should not be forgotten that it is invariably worth more to a store to sell quality goods than cheaper lines, for when comparisons are made in the intervals of the game the price doesn't count so much as the article that is called upon to respond to the command of the player. Quality wins in sporting goods every time. The slogan "Play Ball!" is typical of the whole summer season and an attractive card bearing the words would make an excellent central feature for a window display. Leave no stone unturned in your endeavor to become the acknowledged leader in the sale of sporting goods in your town. Many retail hardware firms are now the leaders in selling sporting goods in their respective towns. It pays in more ways than one.

GOOD BUSINESS AHEAD.

JUDGING by recent reports from business men throughout the United States, it is quite evident that there is a feeling of confidence in the immediate future, based largely on the record-breaking crops which it is said are now assured. Since the early part of June American reports upon steel have reflected an improvement in buying and steadiness in prices. Many U. S. business men are inclined to think that June will prove to have been the month when the depression in business which began last year, reached its climax and that from that time on their was a gradual recovery of confidence. It is now generally believed that the turning was not a temporary one, but was one of permanency marking the beginning of another period of several years' prosperity. A leading American newspaper recently asked the leading business men throughout the United States to make a forecast of trade conditions. Among the many reports printed, was one from E. C. Simmons of the Simmons Hardware Co., St. Louis, in which he says:—

"We have an assured basis of a new financial system which I believe is absolutely the best in the world. The question of tariff reduction is settled, at least for a time. The most encouraging feature, however, of the business situation at this time is the widespread spirit of optimism, which in general prevails in almost every district west of the Allegheny Mountains and south of the Mason and Dixon line. Most of the people are tired of the seemingly endless discussions of commercial and economic problems. They want to cut that out and get down to real work—down to facts and every day practical affairs, so as to see just what the new legislation we have is going to do for

us when it is put into action. They appear to be satisfied that the pledges and promises of this Administration have been carried out, as far as it was wise to do up to this time. They are, therefore, eagerly looking to see that these measures are those of construction and not of destruction.

"There is a marvellous change in sentiment toward the railroads; where hostility formerly existed friendliness, sympathy, and good-will are now clearly in evidence. I think the people now want to be let alone and not have any worries to think about, just be permitted to go along with their daily tasks to see what they can do in the way of production ,and it is quite in evidence that there is an increasing local pride not only in States and sections, but in counties and townships, where rivalries of the most friendly kind, but of an uplifting nature, are visible on all sides. Taking the people as a whole, they show great confidence in themselves, and in the general outcome of all these perplexing questions, in which they take part by their votes. All they ask now is a rest—with opportunity and time to show what is in them."

It is evident that the American people want a rest politically in order that their time and energies may be devoted to business and to increasing their own and their country's wealth. They have become tired of standing still and the outlook is that they are about to continue their progress toward better business conditions and prosperity.

A highly prosperous population south of the border will have a good effect upon Canadian business, and Canada will in a large measure reap the benefit of improved conditions in the United States."

OUR ELECTRO SERVICE.

IN the June 13 issue of Hardware and Metal we announced a new editorial service which was inaugurated for the benefit of Canadian retail hardware men. The new service consisted of supplying small electros to hardwaremen at a nominal cost. Hardware and Metal did not inaugurate the new service on the spur of the moment. It was only after a close study of the advertising problems and difficulties of retail hardwaremen that the new service was adopted. By making a close study of conditions in the retail field and securing the opinions of hundreds of retailers, we were enabled to gather much valuable data which would aid and enable us to go ahead with our plans to assist the retailer in his advertising problems. We found that one of the chief difficulties experienced by retailers was caused by their inability to secure advertising electros of suitable size for newspaper work. We found that in many cases the retailer had electros of various kinds on hand but in the majority of cases the electros were so large that the cost of newspaper space in which to use them was almost prohibitive. While it is generally admitted that one large electro will attract more attention to the particular line featured, there were many retail hardwaremen who felt that in the space occupied by one large electro they could show to advantage several lines of seasonable goods, providing they could secure suitable electros. The chief difficulty confronting us was that of supplying electros at a sufficiently low cost but this difficulty was overcome, and when we announced that we would be able to supply electros at fifteen cents the announcement was hailed with delight by our readers. We expected to find a heavy demand for the electros, but we did not anticipate a flood of orders such as we have received.

Hardware manufacturers and jobbers are taking an interest in the service and many of the orders have been placed by retailers after having been advised to do so by travelers, manufacturers and jobbers. One order received this week was from a hardware firm in a Saskatchewan town. Some months ago—before the new scheme was announced—this firm wrote to a Winnipeg jobber asking is small electros could be secured at a nominal cost. The jobber did not know of any firm or trade journal supplying the electros at a reasonable price. When our new service was announced it met the eye of the Winnipeg jobber and he immediately communicated with the retailer, the result being that an order was sent in at once. The service is not conducted as a money-making proposition. Our desire is to assist the retailer in bringing his wares before the public, and we are receiving our reward in the enthusiastic manner in which retailers are taking advantage of the new service. It might be in order to announce that in the near future the service will be enlarged by the addition of many new lines not now shown on the pages found elsewhere in this issue.

SURVIVAL OF THE FITTEST.

ELSEWHERE in this issue will be found an article dealing with the outstanding and well-recognized evils of inferior installations and price cutting in the furnace business. The business has attracted to it a class of men, whose knowledge, however profound, and whose success, however noticeable, can be no guarantee of ability as heating men. The influx of them, together with the resultant poor furnace work, has added unnecessary evils to what should be a very satisfactory line. Where one of them has operated can be found an indignant householder who possesses a balky furnace bought at a low price, both of which facts he will probably scatter broadcast. These facts are so well authenticated that it is no new thing for a manufacturer to advise against an ambitious hardware or stove man adding furnaces to the stock.

The remedy pointed out in this article is one that should be acted upon by those engaged in this line. Governmental supervision of furnaces would be welcomed by both laity and legislators, and it requires only the impetus of a little encouragement from a few well-informed furnace men to give the movement virility. If each and every one does his small part in aid of this worthy cause, a great evil will have been corrected and larger profits insured for the future.

EDITORIAL BRIEFS.

UNEASY LIES THE head that loses control of the credit accounts.

IF YOU CANNOT SELL goods at a profit you have no right to call yourself a salesman.

The Selling of Stoves by Suggestion

Physcology as Applied to the Science of Stove Selling—Versatility of Selling Ideas the Salesman's Chief Asset.

An authorized interview by a Hardware and Metal representative with H. C. Pattinson, mgr. of The Clark Hardware Co., Niagara Falls North.

I FIND my greatest interest in this stove selling game to be the acquisition of new selling ideas, so that if I find a customer hard of approach on one line of talk, I may be able to switch over to the other without losing a step.

Of course most sales must be based on demonstrations and all other agencies are usually offshoots of this one parent limb that feeds them all.

I find that most people like to do their own selling; that is, if one can ascertain the line of thought that causes the customer to take even the slightest interest in stoves, the battle is half won. By giving him a helping hand as it were, an occasional lead to be exact, he will seize upon the natural argument and fly at the job of convincing himself. In such a case the less the salesman has to say, the better. True, he must be there with the lifeline to throw out if the other fellow shows any weakness but if one can by suggestion, lead the customer's thoughts into the proper channel, he will be likely to sell himself and marvel in between times at his own brightness. Even a critical customer can often be thrown on to this tack by the exercise of a little finesse.

I am rather partial to cooking demonstrations but I am not wedded to them by any means. I used one the other day with great success though. A restaurant keeper came in, not exactly to buy, but rather to "look around." I found that he had a stove that was satisfactory except that it did not cook quickly. It was necessary for him to have one that could be depended upon to cook simple meals in double quick time, so, following his lead, I brought out a loaf of the bread that I always have handy. I turned on the gas and gave him a few slices of nice crisp toast in a jiffy.

The sale was made on that one simple operation. "Want it right away," he said. I might have talked myself hoarse in the vain endeavor to sell him by other means but by sizing up his needs and his line of thought, it was not selling at all, but mere order taking.

So this suggestion business to my way of thinking can be applied both ways. When the customer is already set in his thought, the sensible thing for the salesman to do is to get in line without any loss of time, but if the customer lacks an idea to go on, insert one in his cranium noiselessly and painlessly and the first thing we know, he has the bit in his teeth and does not need any outside aid. It is a very interesting game when one takes it out of the mechanical and makes it a matter of brains. Two heads are better than one and a customer can't hate you and your stoves exactly, else he would not be in the store looking around. Give him a chance: he is probably dying to help you but may be a trifle bashful.

Of course, I always have the gas hooked up, lighters handy and everything convenient for plain demonstration, fancy cooking or what not. I find that to be a very important feature of the selling operation too, for a customer certainly does dislike delays and fumblings.

If the salesman who knows the stove is clumsy and slow, the customer is likely to blame it on the stove, whilst if he be smart the stove may receive more credit than it is really entitled to.

Of course one must have a good article, must be honest in his claims and be prepared to stand back of it, else the underground railroad of sales boosting that should exist between one's customers is likely to get paralysis and repeat orders will be as scarce as hen's teeth.

I think that the plan as outlined above may be carried to advantage in many ways. Not only can one get good selling ideas from customers, but also from other merchants, the traveling men, the trade journal and in fact almost every source. The same scheme that sells peanuts or dry goods may often be used by the stove man by ringing in a few changes on the main idea.

That most stove men do use all of these agencies is my conviction and that they will never cease to do otherwise is my hope.

SUPERVISION OF FURNACE INSTALLATION.

(Continued from page 35.)

fit and incapable be weeded out of the trade before they ruin it for the remainder. The incompetents are usually the worst price cutters and in any event that evil will be less noticeable with the improved conditions resulting from a riddance of those incapable of properly installing a furnace.

There is one untried plan that offers possible relief from existing conditions and that is, the appointment by the municipality of thoroughly competent furnace inspectors, and in addition, or even seperately, the requirement that any would-be furnace man pass a rigid provincial or civic examination.

It should be a comparatively easy matter to have the necessary legislation passed. Anything of a corrective nature that emanates from those whom it is meant to correct should find the legislative ways greased for its quick passage.

Who will be the Moses to his oppressed furnace brethren? This is the opportunity for some hardwaremen who is engaged in civic or provincial legislation to make a name for himself and earn the gratitude of the trade.

Write to your representative and do it now!

"There is nothing magical about writing honest advertisements. You must co-operate with and be a silent partner of public opinion. Confidence is a plant of slow growth. If it is abused by false or questionable advertising it withers and dies of exposure. If it is planted in a dependable place, and that place is known for its straightforward dealing and the reliability of its advertising, it thrives, grows and spreads out.

Reminiscences of Fifty Years in Hardware

Interesting Word Picture of the Old Days—Stirring Events of a Firm's Start in Business—Recollections of Historic Figures in the Trade—St. Catharines' Co-operation.

An authorized interview by a Hardware and Metal representative with F. E. Coy, of Coy Bros., St. Catharines, Ont.

FOR well over half a century, we Coys have, from the vantage point of this store, participated in, and watched the ebb and flow of the hardware trade of Ontario in particular, and of Canada in general.

It was fifty-one years ago that my father died, leaving nine children, the eldest of whom was but 14 years of age, to carry on the name and the business. As Francis Coy's store it was known in his day and still is in mine, my son and his son each bear the same Christian name so that I have great hopes that the name of Francis Coy will be associated with this store for a long time to come.

Since that day, so many years ago, that we were confronted with the necessity of keeping the business going without even having a clerk to open the store that morning, I have seen many changes in the trade.

Friends have come and gone: some of the old ones have passed on and some new ones have come in their places. I have seen old abuses corrected and new ones creep in, but the former offsets the latter so that as a trade, I believe we are sound to the core. I am an out and out optimist and have no fear but what we shall continue to improve in the future as we have in the past.

To save the day, my uncle stepped in to fill my father's place in the store, but to no avail, for he was consistently unsuccessful in the conduct of the business. He was in time succeeded by my eldest brother, who was equally unfortunate so that the outcome was that another brother and I took the store over in '84, although I had been working in it since '72.

We were mere boys, our only assets, unlimited nerve and rather a complete knowledge of hardware, considering our age. We were penniless and without influence.

Under the terms of the agreement by which we bought the business from our brother, we were supposed to pay ten per cent. of the purchase price down. We got over that little difficulty by ignoring such a bothersome detail until we had sold goods from the shelves to that amount, at which time I nonchalantly drew a check for the proper amount and handed it over carelessly, quite as though such matters were a routine affair with Coy Bros.

The next rock that our little ship of trade bumped into was of a more serious nature. We were at the parting of the ways; our shelves were well nigh depleted and we knew not which way to turn for credit in order to stock up for the coming winter. In our extremity, we applied to those from whom we felt we had a right to expect some consideration, but the monotony of our turndowns was simply appalling. Seeking for advice, we were told that our case was hopeless, but that in any event we would only have our trouble for our pains if we should go to Crathern & Caverhill, of Montreal, as we had planned to do. They all agreed that that firm was entirely out of our reach. But being young and of adventurous spirit, that decided us to go for succor where we might least expect to get it.

We had a heart to heart talk that took on the nature of an inquest as we rolled our victim over and prodded it for signs of life. My brother said: "Well, since Crathern & Caverhill are the toughest proposition on the list, let's just go there first and get it over with."

"Done," I cried.

So down he went to Montreal to meet our Fate whilst I awaited the sentence back at home. Our little ship, if not sinking, at least had some hole in it, believe me, and I certainly did some watchful waiting that has the U.S. policy in Mexico backed off the map.

My brother lost no time in mincing words once he got into Mr. Crathern's presence. It was "Mr. Crathern, I have no friends, money, nor credit and I want some."

Mr. Crathern turned around and looked him over. "Well, young man, you may not have friends, money, nor credit, but you certainly have cheek. Who are you, and exactly what do you wish?"

My brother then introduced himself and lo and behold, things took a story book turn.

"Not Francis Coy's son?"

"Yes sir."

It appeared that Mr. Crathern and my father had worked together as boys for the old firm of Bryson & Ferrier and the latter had been manager of the floor on which the then young Crathern had worked. It was all plain sailing then. We were given a two thousand dollar leeway but just to show that his heart was in the right place; brother made it four thousand before he got through.

Mr. Crathern's letter that accompanied the invoice was typical of him.

"Here's your goods; now let's see what you can do."

That put us on our mettle so that by economy and hard work we met the bills as they came due the next year and forever afterward remained good customers of the firm that has since become Caverhill & Learmont.

We sent out bills every six months in those days and the jobbers sent theirs out every three months. We would see a traveler once in every six months then, and now it's every day and circulars over night.

I added another link to my chain of interest in hardware in those days by marrying the daughter of R. H. Smith, of saw fame, whose business, by the way, my brother and I at a later date came into control of for a time.

Most of the old firms have gone or at least have greatly changed in their personnel. Oldtimers will no doubt remember Andrew Brown, since dead, who traveled for Moreland & Watson, then of Montreal, but now of London; Jim Peck, of Peck-Benny; old Sandy Delisle, now dead, who represented Delisle & McGill up this way. Of the paint men, I remember best the firm of A. Ramsay & Son, of Montreal; S. C. Jamieson, of the same place, and Jack Hagar, of the S. H. May Company. Having been one of them I must confess to a sneaking fondness for the oldtimers.

A merchant had need to be quite as farsighted in those days in his ordering as now, but for a different reason. The two big bills of the season, then as now, were the spring and fall orders with smaller ones scattered over the summer period. Our fall order must needs embrace a sufficient stock to carry us over until the opening of navigation the next spring so that we had to do some close figuring to keep from coming out the small end of the horn.

The old Welland Canal lies a biscuit throw from our store door and although its familiar banks are half hidden by a business block, in those days I could stand in the doorway and talk to the skipper as the Montreal boat that had our precious stock aboard came tooting up the canal. Norris Neelon, in those

What Other Hardwaremen Do

Good Ad. and Helpful Advice of J. B. Skelton—Good Lighting—Price-Cutting—Unique Way of Meeting Mail Order Competition—Credit Limit Policy—Courtesy Pays.

OIL AND TANKS.

J. B. Skelton & Co., Palmerston, are pushing the sale of coal oil and oil tanks. In a recent advertisement the following offer was made:

"For the last six months we have been offering to our customers, a steel galvanized tank holding 40 imperial gallons (not U.S. measure, which is 1 quart less than Canadian measure) at 15c per gal. and tanks for $5.50.

"For the next six months we will put in this same tank for $5.00 and Royalite Oil the same as what you have been paying 20c. for in gallon lots for 14½c. per gallon.

"You can have your tank at any time it is convenient for you to take it and we absolutely guarantee the quality equal to any oil on the market, if not satisfactory to you after trying it we will refund your money and not charge you for what you have used."

The Skelton advertisement also draws attention to an important feature which is often overlooked and which is as follows:

"If you are carrying over five gallons of oil in any building insured, be sure and see your insurance agent and get a permit to carry over five gallons otherwise your policy is useless in case of fire."

LET THERE BE LIGHT.

To economize in the matter of light in the store is generally false economy. People shun the poorly-lighted store, and even if they do enter the dull and dark store, there is not the same inducement to purchase as in the well-lighted establishment where goods are shown up to advantage. Consider the lighting in your store, and if it is not as good as it should be, see to it that it is improved.

THE CHRONIC PRICE-CUTTER.

Says Thomas A. Fernley: "The price-cutter does quite as much harm to a manufacturer as the vandal who deliberately tampers with an article so as to impair its usefulness in the eyes of a consumer.

"In the case of the price-cutter, the effect of his baneful work is to disturb the relations of the manufacturer with his distributors.

"In planning a great coup the price-cutter selects the goods of known identity and quality, boasts of his liberty to do as he pleases in the matter of fixing selling prices, but he mistakes this privilege and opportunity to secure a living profit for the license to drag in the dust the valuable reputation of the manufacturers of popular goods for his own selfish ends, seeking to fill his personal coffers, regardless of whom it hurts."

MAIL ORDER COMPETITION.

J. Duff & Co., hardware merchants, of Olds, Alberta, have a unique way of meeting the competition of the mail order houses. They regularly procure two or three copies of the M. O. catalogues, and keep one in the office, where it is at all times readily available. Their salesmen are also supplied with one each, and a thorough study is made of its contents and prices, particularly along the lines that come in competition with their own business. This enables them to deal intelligently with customers who hint that they can buy cheaper from the outside. Whenever a suggestion is offered that a certain article can be bought from the catalogue house the party making it is politely invited to a comparison of prices with freight charges and other expenses added.

Thus by intelligent business tact they can convince the customer on the spot that with quality for quality, and price for price they can get as good a deal at home as by sending their money to a distant point where it benefits the people of another city instead of helping to build up their home town while at the same time they are nothing out and saved much inconvenience.

Business methods such as these are much preferable and more effective than grumbling that the mail order houses are taking all the business and draining the ready cash out of the town.

INSTALL AUTO STATION.

Ingram & Davey, St. Thomas, have recently installed a 400-gallon auto filling station opposite their side door entrance.

THREE FOR TWENTY-FIVE.

The Smith Hardware Co., Belleville, recently held a "Three for a Quarter" sale, in which a bottle of furniture polish, a can of special cleanser and a tin dustpan were offered for twenty-five cents. A special window display was arranged featuring the goods on sale.

A CREDIT LIMIT POLICY.

A certain merchant in Connecticut, U.S.A., has a time and amount limit for each customer. In order that all the clerks will know when this limit has been reached, and thus not oversell the customer, every sales slip carries the total amount, and a filing cabinet is used the same as an account register. To each customer's slips is attached a piece of red cardboard showing the time limit of this customer and the line of credit to which he is entitled. "When a customer comes in and places an order which overruns this credit arrangement, the clerk quietly informs me, and I draw the man over into a corner and explain my credit policy."

COURTESY PAYS.

Learn to say "thank you" to a customer after he makes a purchase. People like appreciation by a salesman, and even if they belong to the surly, indifferent type, your "thank you," accompanied by a smiling countenance, will make them want to meet you again, for even grouchy people like the company and presence of their opposites.

Optimists in the Retail Hardware Trade

Hamilton Retail Firms Enlarging Their Premises — Looking Forward to Better Business Conditions—Faith in Hamilton and Canada.

DESPITE the fact that some people are crying hard times and exhibiting a pessimistic attitude, which in some cases is warranted and in others unwarranted, at least three retail hardware firms at Hamilton, Ont., are optimistic and are showing their optimism in no mean manner. A representative of Hardware and Metal visited Hamilton a few days ago and in making the rounds of the retail stores he found three firms enlarging their premises. In each case the alterations were on a large scale, involving a considerable outlay.

The first store visited was the Stanley Mills Co. Here the whole interior of the hardware department is being remodeled and enlarged. A new metal store front is being installed and the store interior is being equipped with modern fixtures. Several new features in store equipment are being introduced. The cost of the alterations and equipment will run up to a considerable amount, and it is quite evident that the firm has great faith in the future of Hamilton and of Canada.

The next visit was to the head office at 95 King street east of the Mills Hardware Co., a firm which has two large and splendidly equipped stores. While the Hardware and Metal representative was visiting in the head office a deal was closed which will enable the Mills Co. to add an addition 20 ft. x 80 ft. to the King street store. The work on the new addition will commence next week and will cost in the neighborhood of $10,000. It is the intention of the firm to enlarge the paint, summer goods and silverware departments, and to add a new line not carried at present, namely, sporting goods, guns and rifles. Additional storage room will also be provided for contractors' supplies and builders' hardware. The present King street store is one of the largest and best equipped stores in the province and the fact that the firm intends to expend a considerable sum in the new addition to the building, as well as in new stock, is evidence of the faith which the firm places in the future of Hamilton and Canada.

Still further evidence of confidence in the future is exhibited by Kent, Garvin & Co., another Hamilton firm, dealing in builders' hardware, contractors' supplies, etc. This firm is equipping a large and pretentious store which will be occupied in the near future, and will give much additional storage and display space.

Hamilton is a city of many industries and the success of the industries depends to a large extent on the prosperity of the Dominion of Canada as a whole. If Hamilton industries suffer from business depression it means less business for the retail trade and the hardware trade particularly. The fact that three of the largest retail hardware firms in Hamilton are making extensive enlargements and are outlaying considerable sums of money, proves that they have great confidence in the future of their city and of the Dominion.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal of July 21, 1894:—

"Alfred W. Clark, of the Yale & Towne Manufacturing Co., New York, was in Toronto last week in the interests of his firm."

Editor's Note—A. W. Clark is now general manager of the Canadian Yale & Towne, Ltd., St. Catharines, Ont.

* * *

"Coleman Miller with M. & L. Samuel Benjamin Co. is taking a special business trip through the North-West in the interests of his firm."

Editor's Note—Coleman Miller is still on the traveling staff of M. & L. Samuel Benjamin, Toronto.

* * *

"C. P. Godden, hardware merchant, King Street E., Toronto, is in Montreal on a visit. He went down on his bike."

Editor's Note.—C. P. Godden, who in the nineties was a great bicycle enthusiast, is still in business on King Street E., Toronto.

Jack and the Wheat Stock—The fairy-tale that is coming true.

The Medicine Men of Eeh-Nis-Kim

The Annual Encampment of the Order of Eeh-Nis-Kim on the Banks of the Historic Niagara—The Initiation Ceremonies.

THE Niagara River, a few miles above the famous Falls, begins to widen out and its waters to lose their turbulence as it backs up and spreads out on either side into inviting bays and inlets. Here it takes on the quietness of a millpond and the semblance of a long and narrow lake before it takes that final leap through space.

To one such spot, in the fringe of a lordly forest, against the dark green of which the white tents show up like a string of huge pearls, the annual encampment of the Order of EEH—NIS—KIM draws its fresh quota of timorous braves and its medicine men of proven worth, the one to be initiated in, the other to renew the delights of the mysteries of the parent lodge.

Fathered by the Carborundum Company, of Niagara Falls, N.Y., and conceived in honest purpose; EEH—NIS—KIM came forth, the result of an idea as commendable in intention and results as it is unique in practice; than which no more can be said. Embracing as it does a membership of six thousand braves, whose only essentials to membership consist of a good character and a connection with the hardware trade, it furnishes an ideal vehicle for the indulgence of summer sports and the dissemination of the new freedom in hardware.

The personnel of the company's representatives is such that it offers through them, a hospitality that knows no creed nor country. A hospitality so fine and a courtesy so true that it puts the visiting brave upon his mettle to reciprocate in kind and not disgrace the folks back home.

No faintest praise of carborundum nor hardware talk is encouraged. The supposition is that the company's guests are there for fun. If they wish to devise some benefits of an educational order from their visit; well and good, the factory is but six miles away and open to their inspection, otherwise they are not asked to take andvantage of the opportunity, much less made to feel that they have slighted their hosts by the omission.

The precincts and privileges of the camp are sacred to the use of the downtrodden sex, except for an occasional visit from members of the softer one. The morale of the camp would please Colonel the Hon. Sam Hughes himself, such is the rigidity of the rule that bars all liquor from the camp. In short from the twenty-seventh of June until the end of August, there exists here, a conviviality so deep-rooted in its foundation and so wholesome in its operation that it needs no extraneous aid of a bibulous nature to foster its growth.

However, even in this quiet spot, life is not all monotony. Witness the first night and those eerie screams that threw the whole camp into an uproar. Some one said that it was the Maid of the Mist, albeit an ungraceful one, running amuck, if the heaving of the tent that appeared to be the center of the disturbance was any indication. Another wag surmised that Cristobel and her lady

A Hardware and Metal representative was recently the guest of the Carborundum Company's order of Eeh-Nis-Kim, and here tells of a typical day in their camp.

mother tiring of abbeys and art galleries, had stolen Lieutenant Porte's thunder, crossed the Atlantic in a night and so had fallen on us poor wights in peaceful America for some innocent diversion. However, a combination of time and willing hands proved them both wrong. It was merely the camp's fat man, one who usually sat by the fire with the women, instead of following the chase, metaphorically speaking, whose avoirdupois had proven an imposition on the good nature of his cot, which had finally broken down to the sleeper's fright and the camp's confusion.

Early morning, (there are none others in camp,) ushered in a bracing plunge for all except the cold-blooded individuals. Even they, however, were not without their land-lubber fun. One such, bid to go for a bucket of water for washing purposes, asked helplessly where he was to get the same.

The Niagara River was so close to him that if it had been a snake it would most assuredly have bitten him.

The bathees through bathing and the washees through washing, a noisy clanging of that triangle without which "the camp" is merely "a camp," and the stentortian "Let's Go," of Emil from the mess-tent, announced one of the three chief events of the day. For such, those meals assuredly were. From them all things dated as the only authoritative calendar of events; and to them all men looked forward in a very ecstasy of epicurean anticipation that hurt so good, that the very victims fostered their unhealthy curiosity.

Emil said that that pie was an apple pie; perchance it was. If so, assuredly the apples came from Eden. And that strawberry short cake! Ye gods! Some said that Emil had sucked the knowledge in from the breast of some black mammy, south of Mason and Dixon. But then Emil was a Canuck. Others, with more of plausibility, whispered that in the still watches of the night, when the fires were low and the tribe had sought its wigwams, that it was his wont to hie himself on a broom-stick down over the trees and marsh and river until he merged into the mist of the Falls. There, with grisly incantation and unholy rite, for once devoted to a useful purpose, he delved in the unknown, conjured up the departed ones of the tribe and sought of them the old wisdom of the camp-fire. This, the braves came to believe as the more reasonable explanation; be that as it may, Emil had the goods.

The day offered to the tribe the loot

Group of medicine men in recreation tent.

of many hardware stores and all the sports of the river. Some pursued the bass and pike that hung along the reeds. Others camped on the swimming raft. Between dips, they sat, pipe in mouth, with nothing on their minds but their hair. Canoeing and boating offered more vigorous exercise to those so minded.

Amid the tents, in the oldest clothes they had, some played at basketball, others at volley-ball. Here, at a specially constructed court, a dishevelled trio played at hand ball, sharing with the tennis players the cheers of the smoking loungers under the trees.

The afternoon saw the braves in critical judgment of a hydroplane that performed for their benefit, now on the river's bosom and then high above their heads.

But the activities of the day ended, paled into insignificance before the preparations for the night. The nervous braves who were to be initiated into the dread mysteries of the order began to gather in little knots, the while they conversed in whispers as they watched the dignified medicine men, equipped in full regalia, stalk about in gloomy meditation or feed anew the camp fire of the tribe. Then at the dark hour, a minion led them to the privacy of what the medicine men jocularly called the recreation tent but which they referred to as the morgue.

From hence they were led one by one back to the full council at the camp fire.

Here, the flickering gleams of the fire lit up at times the forest canopy above and the massive trunks around, while the pale moon and silvered river showed ghostly in between the trees. Permeating all was the muffled cadence of the distant Falls—a fit setting for what was to come.

Then the Grand Sachem, assisted by the medicine men, instructed the noviatate in the weird mysteries of EEH — NIS—KIM. Majestic of mien, with trenchant phrase, he unfolded before the other's eyes the secrets of the long ago and with priestly threat of dire import he adjured the beginner to be worthy of the order as he intoned in sombre majesty the concluding ceremonies of the ritual.

Each trembling brave, now a full-fledged medicine man in the full panoply of the order; the Sachem spoke, "Heap new medicine-man catchum heap big fire." "Ugh," grunted the others.

With the fire replenished and dropping all affectation, the Sachem, in a few well-chosen words, made a brief address that smacked more of clean living and high ideals than of hardware or of carborundum, and one that will live long in the hearts of those who heard. It was pack-

(Continued on page 47.)

Western Observations

By "Winnipegosis."

WHILE examining a display of stoves in a north-western Ontario store, a foundry traveler approached me. During our conversation, he told me an interesting story of how he was cleverly tricked while in the retail business.

A woman entered his store one day, and ordered a stove for her married daughter. She explained that the latter had been unfortunate in marriage, her husband having turned out to be a drunkard. Her daughter was suffering from cold, without a stove in the house. In case a seizure should be made, the mother secured a lien on the new stove, which was then delivered.

When the good-for-nothing husband returned home after several days "toot," he found his wife sitting beside a nice warm oven. He demanded an explanation, and on receiving it, declared he would not allow a "charity" stove in his house. When the wife's back was turned, he took steps to put the stove out of business, and he went about it in a manner that would baffle the average dealer. He filled the back draft half full of slack, effectually cutting off fire from the oven. That settled the stove.

A day or two later, a seizure was made, but the wife's mother laid claim to the stove, and had it installed in her own home. Naturally it refused to work, whereupon she sent for the dealer, making the claim that it was a stove which would not work in her chimney. This the dealer denied, as he had installed several in the same chimney, which had worked with great satisfaction.

He inspected the thing from top to bottom, first suspecting one thing, and then another, never dreaming that the back draft was half full of coal. He was all the more puzzled because the stove had operated satisfactorily for several days in the other house. He was about to disconnect it and return it to the store when, out of curiosity, he pushed a stick into the back draft, and found the coal. He scooped it out in cupfuls.

"That's the cause of the trouble," he said.

"And where did it come from?" asked the woman.

"Your son-in-law put it there," he replied.

She was so enraged at this reflection on the character of one of the family, she showed him the door, and hastened his departure.

He also told me of several cases where in passing through stores, he had found the damper pipe stuffed with paper, and in one case found some overalls stuffed in so tightly, they would not have been detected, and the stove could not possibly have worked.

In the same town I met Jack Findlay, of Carleton Place, selling his new models for fall trade. Discussing stove troubles he said he had just returned from a fifty-mile trip to see a stove which was declared unworkable. He found the grates reversed, a condition which hardly warranted a journey of fifty miles.

The talk wandered on to the subject of selling. He deplored the fact that so few clerks endeavored to go after this business. The selling of stoves was mostly done by proprietors and managers. The cause might be attributed to the fact that stoves were not the cleanest things in hardware to handle. Possibly too, the proprietors often thought a big deal like this should be handled by an expert, consequently the clerk did not get a chance.

Both these stove travelers reported the demand for stoves better than they had expected.

LETTERS TO EDITOR

Editor Hardware and Metal,
Toronto.

Dear Sir:

I notice that prices on crowbars, wrenches, nails, etc., have been reduced in Winnipeg, so Western Hardwareman, who drew attention to same in your columns some time ago, is to be congratulated.

What would be very interesting to the trade in general, would be to know the name of the firm who sells Eatons their paint, enabling them to retail same at less than regular wholesale price. Is it a Canadian firm? Can any of your readers inform us?

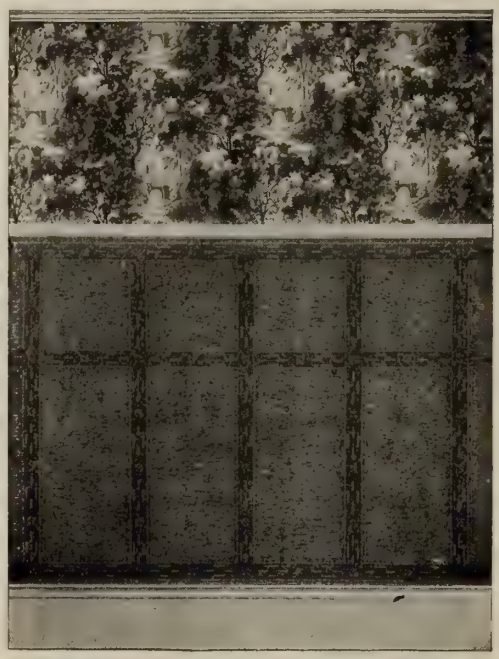
Is the Retailers' Association asleep?

Yours truly,
WESTERNER.

Editor's Note: The Western hardwareman referred to in the above letter sent a letter to Hardware and Metal giving a comparison of hardware prices which he said were being quoted by hardware jobbers and mail order houses. The latter appeared on page 62 of the May 16 issue of Hardware and Metal.

Printed Patterns in 30-inch Papers for 1915

Manufacturers Follow Up Popularity for Oatmeals and Ingrains With Papers to Compete With Import Business in 1915—A Futurist Note of Black—Blue Has a Showing—Patterns Printed in Wash Colors so as Not to Obliterate the Vari-Colored Weave.



WHILE the new line of wallpapers which is now being shown for next year's business shows a continuance of the tendency towards quiet effects—and in some cases an emphasis of it—there are some warmer designs for the living-rooms usually in tones of browns, mauves and greys, with foliage and forest effects; while for those who have felt the influence of the futurist school of art there is a note in some of the designs which will harmonize with their ideas.

This futurist note is the introduction of black in a number of patterns. To those who have not developed ideas along this line of decorative thought, the use of black would give the impression of a sombre effect, but when it is used in proper proportions with other colors, there is a remarkable alertness and snap to the color scheme which cannot fail to make an immediate impression. However, the introduction of the futurist note is yet little more than a prediction of what may be looked for in the coming season.

As has been predicted, the new papers show an effort to use the difficult blue. Strong shades are being introduced for the dining and living-rooms, but it is a color that requires very careful handling, and can generally be used to best advantage in a room with a southern exposure. There is also a new pumpkin shade for halls and stairways.

One of the outstanding features of the new line is the introduction of printed thirty-inch papers. This is the result of the impression created on the manufacturers by the great popularity of the ingrain and oatmeal papers, for it is figured that a share of this popularity was due to the greater width. In the introduction of these papers also there is an effort to educate people to the use of better class wall coverings, in which they should have the co-operation of the retailers who stand to make larger profits.

With the printed papers in the thirty-inch width there are wide cut-out borders which will be an added factor in enabling dealers handling the new line to place them in competition with the high-priced importations from Japan and other countries, which have the frieze stamped on the border paper so as to cover the entire wall above the plate rail or moulding with a single piece. The combination of the cut-out borders with the wide papers will give an appearance that will compare favorably with the importations and should appeal to the trade where a good paper is wanted at a moderate price. With the use of strappings and base runners there is a great range of possibilities for the new width.

From new Spring lines of Stauntons, Limited.

Sample of 1915 lines of wallpaper of Watson, Foster Co., Limited.

In the thirty-inch papers there are cable net and rubble designs embossed in high relief, the material being a heavy fibre stock, which carries the embossing very effectively. There are a large and excellent range of original weave effects and all-over patterns, some of which are adapted for use on both walls and ceilings, with an exquisite range of high-class hand-printed decorations to match. The cable net and rubble designs are also introduced in the Itaglio oatmeals in a large variety of beautiful shades that are richer and more effective than the plain oatmeals. Trimmers to match are used.

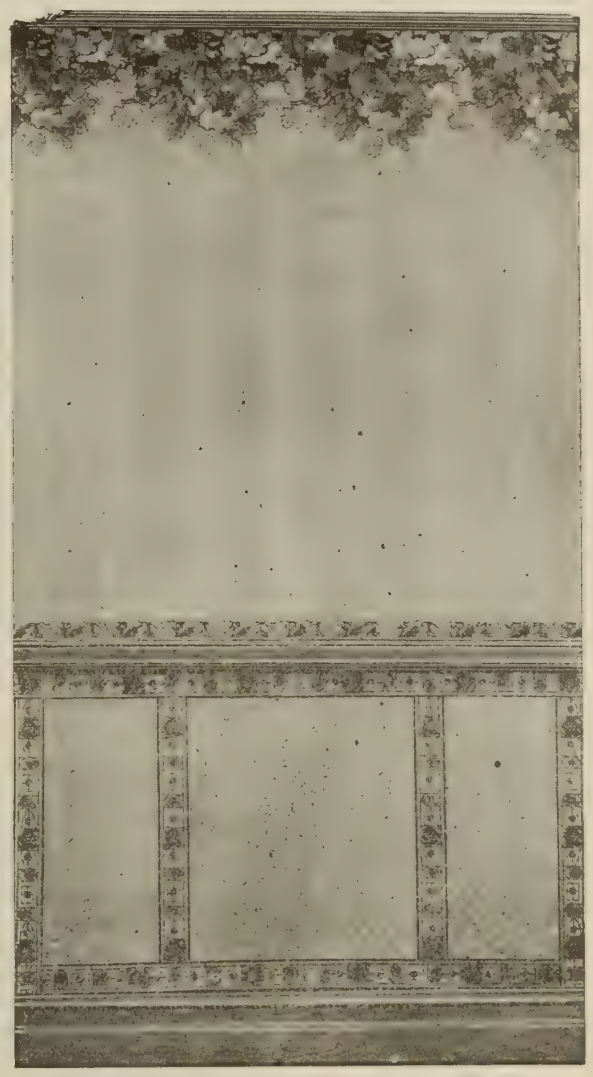
There are also the plain stippled oatmeals, with exquisite renderings in transparent colors, which allow the texture of the goods to show through the pigment. With these new specialties are an appropriate range of hangings, together with rear cuts and trimmers. Heavy hide leathers are shown in lacquer finish and embossed to reproduce the actual grain of the leather. These are in rich plain goods with frieze to match or printed in appropriate patterns.

Some New Foliage Designs.

The stippled oatmeals were brought out last season, and found favor by their beautiful shades and exquisite effect of the vari-colored fibre which forms the surface. This year printed designs have been introduced. In printing the patterns, care has been taken not to obliterate the charm which lies in the vari-colored fibre of the ground. Wash colors are used, which allow the fibre to show right through. Delightful effects are obtained. There are new patterns in foliage design, with just a suggestion of bright colors in the flowers scattered here and there amongst the

large leaves. Then there is a self-toned conventional pattern which forms a stripe, with a dash of brilliant tone in the dividing lines of the pattern.

Woven and All-over Effects



The new Mattines, which stand out in the thirty-inch goods, should be met with keen admiration and create big sales. They are in original weave and all-over patterns and in a variety of aesthetic colorings. These are very attractive and eminently practical, and are shown with matching hand-painted trimmers in a splendid variety of high-class designs and colorings.

New 21-inch Parlor Paper.

For the housekeeper who is troubled with that Springtime problem of what to put on the parlor walls one manufacturer has made a special effort. This is a new line with all original designs. There is a rainbow of colorings in attractive and appropriate hues. The patterns, 21 inches wide, are pressed out in high relief on extra heavy special stock, the texture of the silken fabrics which they resemble being accurately reproduced. This is a line which compares favorably with the imported goods, and is one which retailers should try to press as encouraging the higher artistic idea in wall covering.

For the bedroom and the reception-room there will be dainty effects in cretonnes, chintz, dimity and muslin designs, with striped backgrounds in soft colorings. Some very formal conventional designs with woven effects are shown also in colors, and some in which a silvery shimmer predominates. For the dining-room there are tapestry effects. These are treated with a new oil over-printing process, which closely reproduces the actual weave of the fabric. So finely executed is the workmanship that it is hard to realize that one is not beholding the warp and woof of the actual fabric.

With such papers for the bedroom and living-rooms, cretonne hangings can be effectively shown, and dealers who have tried the combination have found it very satisfactory as a business bringer. Even a larger range of cretonnes is being shown, which give perfect harmony with the wallpaper, and at once give the customer an idea of the relative effect of one on the other. Dealers will do well to give prominence to cretonnes for window decorations where the draping of the soft material is very effective in setting off the wallpaper—showing the actual appearance of the paper will often turn a doubtful prospect into a purchaser.

From 1915 lines of Colin McArthur & Co.

THE MEDICINE MEN OF EEH-NIS KIM.

(Continued from page 45.)

ed as full of intellectual meat as an egg is of the grosser variety.

Then the recreation tent again, recreation in the fullest sense of the word. With gramaphone and piano, songs and dancing they saw the night grow old—and young again. Good fellowship and gay camaraderie reigned supreme; all good fellows together making a perfect ending for a perfect day.

BUY AT HOME.

Kerksmith & Kickshaw deal in wax and Chinese eggs and carpet tacks. They are good sports in every way; they cough up money every day to make the town a better place in which to live and push your face. They hire a dozen clerks or more, who wait on patrons in their store. Our cross roads burg they would upbuild, and see it with glad people filled, and to that end they blow their scads like truly patriotic lads. But when we need of eggs a few, we send away to Timbuctoo; and when a carpet tack we wish, it's shipped from Ypsilanti, Mich. Each has the notion in his dome that things are best away from home, and so we order hods and hats, and humming-birds and Maltese cats, from strangers in some town remote, who would not know us from a goat. We ship away our hard-earned kale, and get our fourth-rate junk by mail. Say, are we seers, or are we fools? Those strangers don't support our schools, or keep the peeler on his beat, or help to pave Commercial street. They do not paint the village pump or build a fence around the dump. If our old burg were blown away they wouldn't care a bale of hay. Kerksmith & Kickshaw ought to get the local trade, already yet.

WALT MASON.

Practical Problems for Sheet Metal Workers

How to Develop Chimney Caps

By E. Bronson.

IN this problem is shown how to develop a chimney cap. In many instances, the action of the weather, combined with gases, causes the top of the chimney to become unsafe. To prevent the action of the weather on the brickwork, a metal cap similar to that shown in Fig. 1 may be used to advantage. The outline or profile of the cap follows the outline of the brickwork, with the exception of the bottom member, which projects out from the chimney to throw the drips clear off the brickwork.

In Fig. 2, the outline of the cap is shown over the outline of the brickwork, but does not fit close to it, but is made with fewer brakes or members. The dotted lines in the side view in each figure show the lines of the flues where they come through the cap. They are not shown on the patterns, as in most cases it is better to cut them out after, as the flues never come very even at the top, and collars can be fitted on after cap is made up.

Having obtained the size of chimney to be capped, draw end and side views as shown in upper part of Fig. 1. To obtain stretchout, space off from center at top to bottom on either side, as there are no round members or mouldings, each member can be taken as one space, as shown by figures 1-2-3-4-5-6-7-8. To lay out pattern of end, draw two stretchout lines a distance apart equal at least to the width of the end, as A-A and B-B. Draw a line at right angles to A-A, connecting it to B-B as at 1-1. From point 1 on each of the stretchout lines mark off spaces shown on side view, from 1 to 8. Draw lines from A to B connecting points 2 to 2, 3 to 3, 4 to 4, 5 to 5, 6 to 6, 7 to 7 and 8 to 8. On the end view draw a line in the center from top to bottom as shown by line 1-A. In the center of space between stretchout lines, draw a line as 1-A on pattern. Using these lines as a point from which to work from. In order to mark both sides of pattern without too much shifting, begin at A on end view. Measure the distance point 8, and mark off this distance on line 8-8 from point A on pattern. Measure off the distance of points 7-8-5-4-3-2-1- on line A to 1, and mark off in a similar manner from line A-1 on pattern, a line drawn through the points thus obtained will give you outline of pattern for the ends. To obtain pattern of sides draw two stretched lines, as C-C and D-D, and on these mark off the spaces shown on end view. On side view draw two lines as shown by 1-E and 1-F, on stretchout draw two lines as 1-E and 1-F the same distance apart as 1-E and 1-F on side view, using these lines as points to measure from. Begin at either 1-E or 1-F on side view and measure the distance to point 8, from either 1-E or 1-F, on pattern, mark off the distance thus obtained on line drawn from 8 to 8, and measure the other spaces, 7-6-5-4-3-2-1 in the same manner, and mark off on pattern. A line drawn through points obtained will give outline of pattern of sides.

The seams on the corners can be

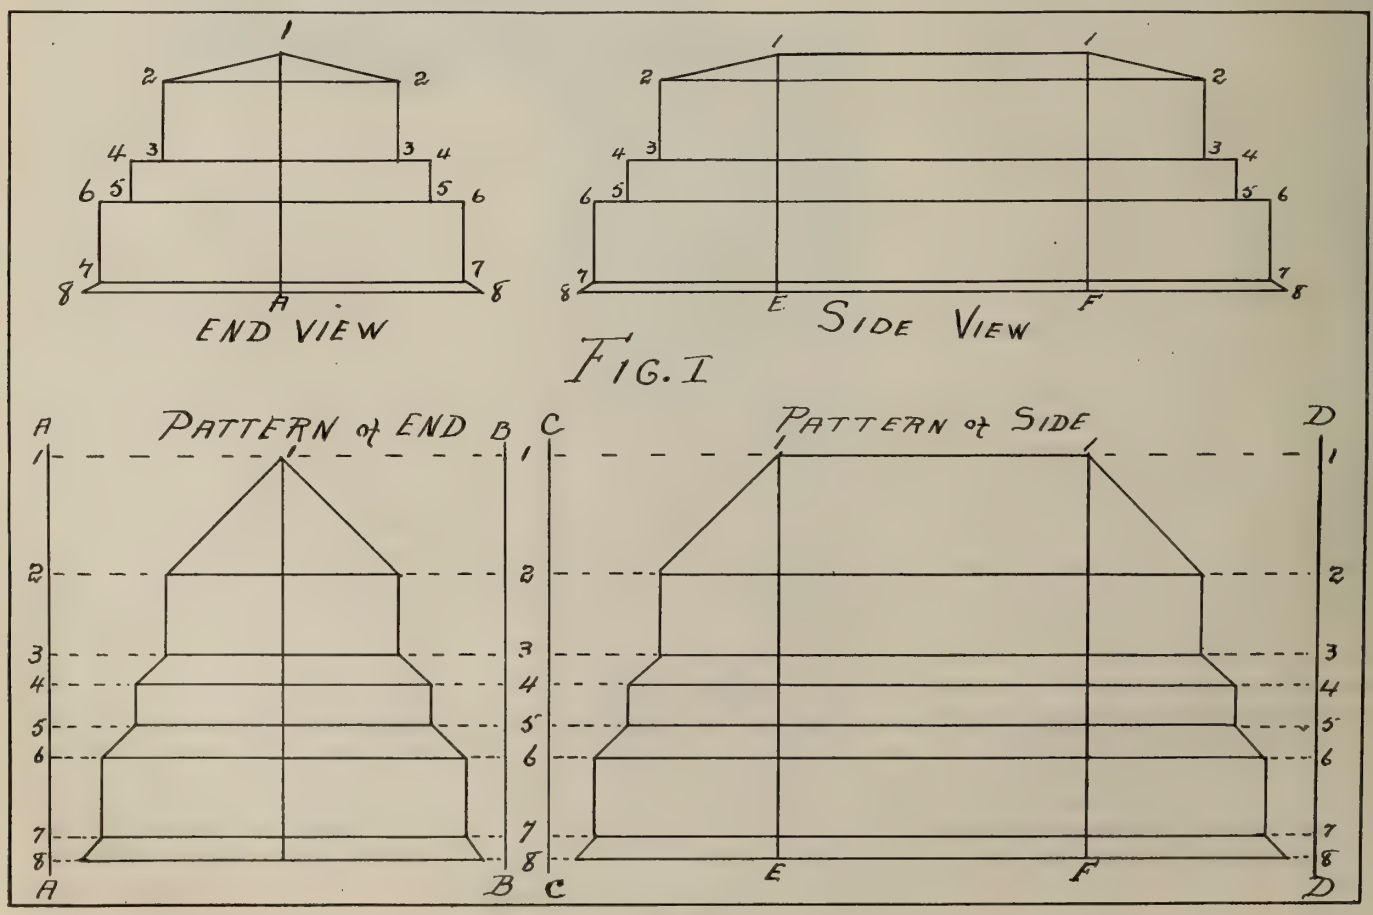


FIG. 1

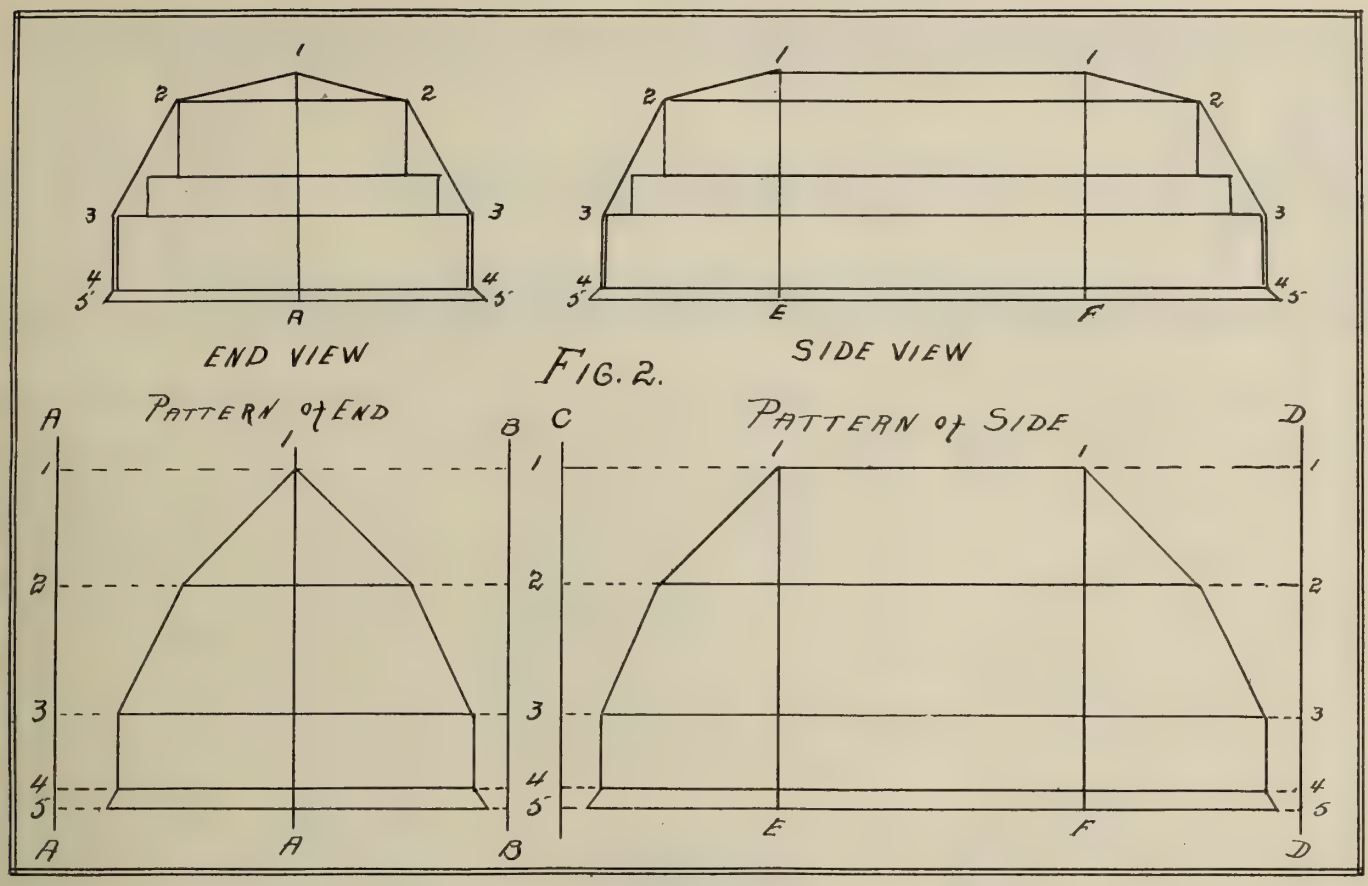

FIG. 2.

either lapped and riveted, or the seams on upright faces or members double seamed and the level members lapped and soldered; by this method it is an easy matter to keep the cap square.

As the cap shown in Fig. 2 is practically the same, we have not detailed the method to follow in developing patterns. While as shown, the patterns are full size, it is not necessary to make them so in actual practice, as a pattern five or six feet long would mean a lot of unnecessary work for nothing. In this case all that is necessary is a part of side as bounded by stretchout line C-C and measuring line 1-E. With this part of the pattern, the sides can be marked off from a straight line formed by the bottom of the cap, as 8-8. From this line draw a line at right angles, as 1-E. Lay pattern on two lines thus procured, and mark around with scratchawl or pencil. Lay off or measure the length of side required, and mark off the outline of pattern in a similar manner. Should the outline of the end and side of cap be the same on all its members, only one pattern, of course, need be developed.

It is only occasionally that great results are accomplished by accident or by the inspiration of genius. Most of us commonplace fellows must have the intention to do a great deal, in order that we may accomplish the little.

HARDWARE LETTER BOX

Water Systems.

Lashbrook Hardware, successors to J. T. Smiley & Son, Ayr, Ont.—Kindly publish in Hardware and Metal names of Canadian manufacturers of pneumatic water systems.

Pneumatic water systems are manufactured by the National Equipment Co., Wabash Ave., Toronto; General Machinery Co., Mulock Ave., West Toronto.—Ed.

Roller Doors.

Sumner Co., Moncton, N.B.—Can you kindly advise who makes Kinnear roller doors?

These doors are made by the Kinnear Manufacturing Co., Columbus, Ohio.—Ed.

Snatch Blocks.

Bonthron & Drysdale, Hensall, Ont.—Kindly advise us through Hardware and Metal who are manufacturers of large snatch blocks and block pulleys.

Snatch and block pulleys are manufactured by the Western Block Manufacturing Co., Westport, N.Y.; Mathias Klein & Sons, Canal Station 21, Chicago; Boston and Lockport Block Co., Boston.—Ed.

Climax Paper.

Please advise where I can get climax paper?

Canadian Fairbanks Morse Co., Toronto and Montreal, are agents for the Barrett Manufacturing Co., New Haven, Conn., makers of climax paper.—Ed.

Boat Patterns.

Geo. B. Jameson, Melfort, Sask.—Kindly advise where we can secure patterns for row boats, etc.

Patterns are offered for sale by Robertson Bros., Hamilton; Brooks Manufacturing Co., Saginaw, Mich.; Defoe Boat and Motor Works.—Ed.

Well Casing.

Curtis Bros. & Stage, Youngstown, Alta.—Kindly advise where perfection galvanized well casing is made.

Can any of our readers kindly supply this information?—Ed.

McClary's Picnic.

London, Ont.—Nearly 1,400 persons attended McClary's annual picnic held at Port Stanley on Saturday. The races and sporting events were keenly contested. A special train left London at 10 a.m., and the whole day was spent at the lakeside.

Current News

Dominion Incorporations.

Nash Temperature Control, Ltd., capitalized at $40,000, head office, Toronto, to manufacture, buy and deal in steam, water, gas and electric fixtures.

New Firms.

Tyvan, Sask.—F. G. Head has opened a hardware store.

Edmonton, Alta.—The Western Auto Accessory House has started business.

Lethbridge, Alta.—The Canada Malleable and Steel Range Co. have opened a store at 412 Fourth Avenue South.

Observing Half Holiday.

Campbellford, Ont.—Stores here are closing on Friday afternoon during July and August.

Rainey River, Ont.—The stores here, in common with most Ontario towns, indulge in a weekly half-holiday which in this particular place comes on Thursday afternoon during July and August.

Pratt & Lambert Salesmen's Trip.

Nine salesmen of the Pratt & Lambert Co. are now touring Europe as a result of a prize selling contest which ended on June 20. On the evening of July 1 a farewell dinner was given at the Waldorf Astoria, New York, by the Eastern Sales Department of Pratt & Lambert, Que.

Hamilton Firms Enlarge.

The Mills Hardware Co., with stores at 95 King street east and 425 Barton street east, will start next week on an addition to the King street store. The new addition will measure 20 ft. x 80 ft. and will enable the firm to enlarge the paint, summer goods, cutlery and silverware departments. A new department will be created for the purpose of stocking sporting goods, guns, and rifles. Additional space will also be devoted to the builders' hardware and contractors' supplies.

The Stanley Mills Co. are enlarging and remodeling the hardware department of their store.

A new store front is being installed, as well as new fixtures in the store interior. It is expected that when completed the store will be one of the finest in the province. F. H. Jeffery, formerly of Midland, is now manager of the Stanley Mills hardware department.

Kent, Garvin Co., dealers in builders' hardware supplies, are remodeling a large store, into which they will move when completed. The new store will have a wide frontage.

Ontario Incorporations.

The Standard Automobile Supply Co., capitalized at $40,000, head office, Toronto, to manufacture and deal in gasoline and allied products, auto accessories, etc.

The Underground Acetylene Co., Ltd., capitalized at $60,000, head office, Toronto, to manufacture and deal in lighting, cutting and welding machines, etc.

WALTER R. TURNBULL.

President of Turnbull & Cutcliffe, Ltd., hardware and stove merchants, Brantford, Ontario, has been appointed as one of the Brantford Street Railway Commissioners.

The railway is now being taken over by the city for municipal ownership, same as their waterworks system. Associated with Mr. Turnbull are A. K. Bunnell, C.A., and ex-Mayor Hartman, who were appointed by the City Council at a special meeting called for that purpose, authorizing these three commissioners to extend, improve and operate the Brantford Street Railway, also the suburban line to Paris and Galt.

International Safe and Register Co., capitalized at $100,000, head office Ft. Erie, Ont., to manufacture and deal in patented fireproof account registers, safes, strong boxes, filing systems, etc.

The Kortum Co., Ltd., capitalized at $25,000, head office, London, Ont., to manufacture polishing and buffing wheels and to deal in electro-plating and polishers' supplies.

Canadian Storage Battery Co., Ltd., capitalized at $40,000, head office, Toronto, to take over the business of Lewis Barter and Dwight E. Tyner, of Toronto, and to manufacture and deal in batteries, spark plugs, motors, etc.

Personal.

Geo. M. Rice, of Whitby, made the rounds in Toronto this week.

G. J. Lowrie, of Maple, was a hardware visitor in Toronto this week.

Streetsville.—James Dandy was in Toronto on hardware business this week.

Francis Coy, Sr., the veteran hardware man of St. Catharines, was in Toronto on Wednesday.

W. J. McClung, the hardware dealer, was a Toronto visitor this week, calling on the trade.

Mr. Trombley, of A. Trombley and Co., Belle Ewart, was in Toronto this week calling on the trade.

Messrs. Page & Hay, the former from the Agincourt and the latter from the Unionville store, were in Toronto this week.

David Miller, heating engineer, representing McClary Mfg. Co. in Toronto, has removed his office from Church street to 74 Richmond street.

J. O. Valois, Vaudreuil; J. Deschamps, Belisle Mills; J. O. Menard, Menard Corner; Arthur Laberge and Rena Laberge, Chateauguay, Que., were among the out of town buyers in Montreal this week.

E. A. Sherlock, of the Miller Lock Co., Philadelphia; F. O. Barber, of P. & F. Corbin, New Brittain, Conn.; A. G. Bowman, of Russell & Irwin Manfg. Co., New Brittain, Conn.; L. M. Willard, Millers Falls Co., New York; and J. E. Ruby, of Cassidy, Fairbanks Mfg. Co., Chicago, were calling on the trade in Montreal this week.

Too many retail competitors are suspicious of each other, and sacrifice legitimate profits in order to create the impression that they cannot be undersold by the other fellow.

Junior Clerk's Page

CONCENTRATE YOUR ATTENTION.

By William Edward Park.

HERE'S a point that the young clerk who wants to advance in his profession will find well worth considering:

Give every bit of your attention to the customer in hand.

There isn't a clerk from one end of the country to the other who wouldn't like to be an A1 salesman. There are in every small town salesmen who seem to fairly stand out from their fellows—born salesmen, who appear to the beginner to have a sort of mysterious trick of persuading customers and selling goods. And clerks less expert and less experienced, who freely admit that they don't rank as high in the selling game, are naturally envious of the brilliant leaders.

Yet the clerk who wants to be a good salesman can at least be a better salesman than he is. Let him take thought of his selling and steadily strive to improve, keeping his eyes open for the hints which every transaction offers to the wide-awake clerk.

One of the first things he will notice is that he seems to make sales a great deal more readily where he concentrates all his attention upon the sale—that is, upon the goods and upon the customer.

You've noticed that in your own experience. Stand behind the counter and hand out goods and at the same time let your thoughts go straying back to last night's party or ahead to the city league game tonight, and you can't seem to interest the man on the other side of the counter. But put these other things out of your mind entirely, give your every thought to persuading the customer and demonstrating the goods, and sales seem to come easier.

Try it a few times. Try it till concentration upon each individual sale becomes a sort of habit. It may be a little difficult at first—but keep on trying.

Of course there are bound to be interruptions now and then which will distract your attention. But nevertheless, try to get into that mental attitude where, the minute you go forward to wait upon a customer, you become all attention.

To make a real success of anything, you have to put your heart and soul into it. That's as true of every other work as it is of salesmanship. And if you want to interest your customer (which is a prime essential in successful selling) you must first be yourself interested—thoroughly interested—so thoroughly interested that you can't think of anything else. Whatever your dealings with people, the same thing holds true. Approach them in an indifferent, hesitant, don't-care-whether-you-go-or-stay fashion and you'll find them shockingly indifferent. Be interested in them, and they'll be interested in you.

I've proven that dozens and dozens of times in my own experience.

When you're interested in your sale—when every bit of your attention is centered upon the selling—you'll notice things that will help you. You'll quickly discover what it is that leads your customer to hesitate. Many would-be purchasers are reticent about voicing objections; but the most reticent customer is is mighty sure to drop an unintentional hint which the wide-awake clerk will be sure to notice, and the indifferent clerk never. And when you know where the trouble is, you'll be able to answer objections, in many cases even before they are actually voiced. And when you're wide-awake and watchful in selling, you'll grasp every opportunity to be attentive to the customer—to point out facts regarding the goods which, otherwise, you'd take for granted the customer knew; to render little attentions, such as the better tying of a parcel which will be appreciated.

And you'll show the goods more quickly—which is a mighty important thing. Said an experienced hardwareman to me a few days ago: "A crackerjack salesman will sell the goods while some follows are saying good morning."

What's worth doing at all is worth doing with your entire heart and soul. That's true of selling. And you'll find that selling is a lot easier work, and a lot more pleasant, where you concentrate your mind on each sale as it comes.

TWO PAINT TRAVELERS.

Pallette.—"The ladies seem to be very lightly attired this summer."

Spatula.—"Yes 'Pal,' most of 'em look as if they only had a 'PRIMING' coat!"

William H. Evans.

SPEED VS. RESULTS.

The young workers, and some old ones, are apt to think that the man who makes the most motions per hour has attained the height of human efficiency. Nothing could be more erroneous. It is not speed that counts: it is results. The long-legged ostrich appears rather speedy to the casual observer as he lopes over to his favorite sand heap and inserts his head in the same to keep out of the hunter's way, but the result is to laugh. If the fast workers could only learn to slow up on their hands and whip up above the ears many incidents that are to serve as warnings to future generations would never feel the searchlight of fame.

The motion, the act, the speech that is thought out before it is ushered into the world is the one that gets results.

REMARKS OF THE JUNIOR CLERK.

Some men carry their courage around in a pocket flask.

* * *

Boat rockers on the sea of business deserve their fate.

* * *

Some men are honest because they are too poor to be otherwise.

* * *

It sometimes happens that the chap who hesitates doesn't get lost.

* * *

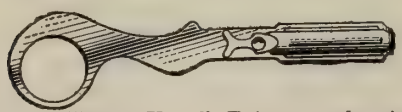
Be sure you are right but don't be too darned sure that everybody else is wrong.

* * *

Some fellows don't think they are being treated right unless you say to them: "What are you going to have?"

* * *

Many of us know just what we would do in the other fellow's place but never succeed in doing the right thing in our own place.

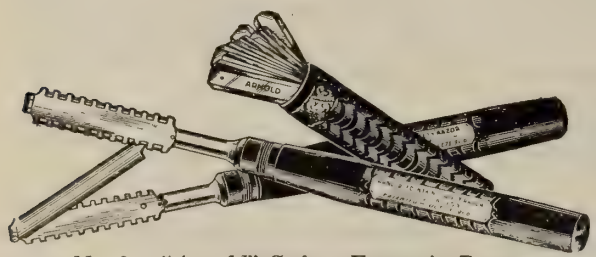


New Hardware Goods

Offered Canadian Hardwaremen

FOUNTAIN RAZORS.

The Arnold Company, manufacturers of Fountain Safety Razors and Blades, of Reading, Pa., are offering to the Canadian trade some new devices as shown in the accompanying cuts.

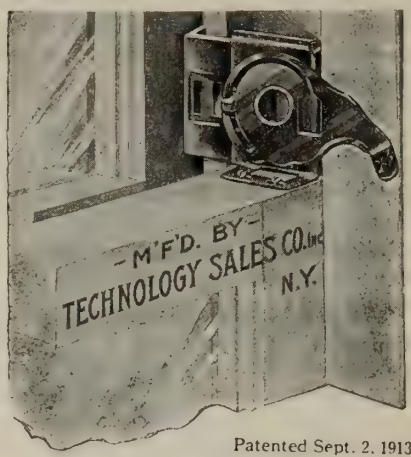


Number one shows the "Arnold" Safety Nail and Corn Trimmer. It is conveniently made so that it can be used

No. 1.—"Para Korn" Trimmer showing safety cutting arrangement.

in the same manner as a knife and has a cutting arrangement of a safety blade that is similar to that of a safety razor.

Cut number two shows the "Fountain" model of safety razor so-called on account of the resemblance of the case to that of a fountain pen. This case is made of hard rubber and may be carried in the pocket like a pen. Holders are made with gold bands and gold comb and contain either six or twelve blades and others are made without the

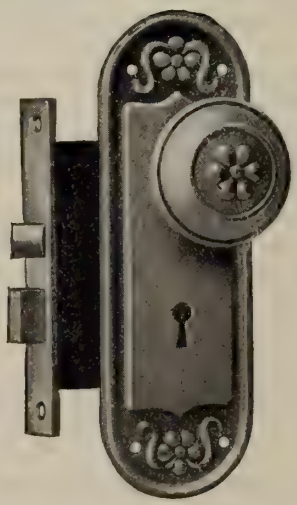


No. 2.—"Arnold" Safety Fountain Razor and Holder, with extra blades.

bands and with nickel plated combs and six blades.

VENTILATOR LOCK.

A new ventilator lock that may be easily and quickly attached to windows and will fasten the window tight in any position, open or closed, is being offered to the Canadian hardware trade by Saunders & Wainwright, 204 St. Nicholas Bldg., Montreal. It is claimed for this device that it will check noisy rattling, will let fresh air in, keep the children from falling out and stop the burglar, etc. It may be used in several ways so as to prevent either the upper or lower sash from being moved, can be applied to any ordinary window and is inexpensive. The ventilator lock is solidly made of pressed steel, in various finishes.



Patented Sept. 2, 1913.

Saunders & Wainwright ventilator lock for holding windows in any position.

GLEN DESIGN.

The Taylor & Boggis Foundry Co., Cleveland, O., have just placed on the market another new and attractive design of lock set here illustrated. It is known as their "Glen" design, and is made in both wrought steel and wrought bronze metal, and furnished in all the popular finishes.

Glen Design.

MARITIME HARDWAREMEN MEET.

St. John, N. B., July 11, 1914.

A MOST successful convention of the Wholesale Hardware Dealers' Association of the Maritime Provinces was held in Fredericton this week, with a large attendance from different parts of the Atlantic provinces. Officers for the ensuing year were elected ,matters of interest to the trade discussed, and a generally enjoyable time had from every viewpoint. The officers chosen for the ensuing year were as follows: President, H. H. Dalton, Halifax; vice-president, R. M. Bartsch, St .John, and member of the executive, R. B. Simons and J. L. Crowell, of Halifax, N.S.; W. T. H. Spinney, of Yarmouth, N. S. John Neill, of Fredericton, and J. F. Tilton and F. A. Foster, of St. John. The secretary is yet to be elected.

The reception and entertainment committee from among the Fredericton members certainly looked after the interests of the visitors during their stay in hospitable manner. Upon arrival, after a sail up the St. John river from St. John, the visitors, forty-four in number, were the guests of J. S. Neill & Sons on an automobile tour, and in the evening had luncheon at the beautiful summer resort, "The Birches." on the river, as the guests of the McFarlane Manufacturing Company.

A feature not on the regular program, but which proved most unique and enjoyable, was the visit from one of the "monarchs of the New Brunswick forest," which should be not particularly friendly towards hardwaremen in general, a large bull moose. The lordly beast stalked out of the woods near where the picnickers were having luncheon, and unconscious of their admiring glances, took to the water and swam to the opposite shore, pausing for only a moment to glance around, and then stalking majestically into the woods and disappearing. The incident caused delight to the hardwaremen present, and reminded them that they must look early to their sporting goods department to see that all was in readiness for the opening of the hunting season.

The ladies in the party were entertained at the Fredericton Boat Club

(Continued on page 55.)

Weekly Market Reports

Statements From Buying Centres

THE MARKETS AT A GLANCE.

Reports from hardware jobbers continue encouraging and July business so far has been very satisfactory. Retailers are still ordering in small lots but orders are numerous and a very fair volume of business is passing. The general opinion is that July will make a good showing. The metal markets have been subject to considerable fluctuation which has hampered trade, but prospects again seem better for gradual improvement. Price shading is still evident and orders are mostly for small lots. Stove manufacturers report business as being rather quiet with not much chance of a marked improvement until fall. Paint manufacturers report that business with the retail hardware trade has been satisfactory. Vacations are now in order and many warehouse employees and travelers on vacations. Reports from Winnipeg indicate uneasiness as to crop conditions, combined with the turmoil of a Provincial election, has affected trade somewhat adversely.

MONTREAL.

MONTREAL, July 16.—A very satisfactory volume of business reported by the jobbing houses and manufacturers. Thus far July has been up to expectations, and it is anticipated that the month as a whole will show up well. There is usually a little slackening during July and August, when many employees are away on vacation, but indications are that orders will be about equal to other years at this season. Collections have been very fair, and there is no particular complaint on this score.

Summer Goods.

The exceptionally warm and dry weather that has prevailed for the past few weeks has had the effect of keeping up an active demand for summer goods. Garden hose, for instance, has been moving exceptionally well, owing to the lack of rain. Repeat orders for other seasonable goods have also been frequent and generous.

Nails, Screws, Rivets, etc.

The nail market is very quiet, and there is no change from previous quotations, which are: $2.25 base for wire nails, and $2.50 base for cut nails, Montreal. Following the advance in the price of screws, which was announced two weeks ago, there was quite a flood of orders, and many of the retailers endeavored to place orders at the old figures. Present discounts for flat head bright and round head bright are: 85, 10, 7½, 10 and 5 per cent. All other lines are unchanged at the discounts listed in the current market quotations. The discounts on rivets and burrs of all kinds are also without change.

Metals.

The quotations on metals have not changed since last week, but there has been a steadying in some lines. Tin is firmer, and the price of solder is stiff, with every prospect of higher figures being asked in the near future. Pig iron has been moving very slowly, and sales made have been of a hand-to-mouth character. Quotations this week are as follows:—Tin, 37½c; sheet zinc, $6.75 in casks and $7 in small lots; lead, $5.10; antimony, $8.50; spelter, $6, and copper, $15.50. Ingot brass, red, is 14c lb.; ingot brass, yellow, 13c lb.; wire solder, 23½c; half-and-half, 22½c, and wiping solder, 22c.

Bar Iron

Sales of bar iron are small at present, and market is quiet, with quotations still at $2.05 base, Montreal.

Lead and Lead Waste Pipe.

The demand for lead products has been rather quiet lately, and market still has a firm trend. Quotations for lead pipe are 7½ cents, and for lead waste pipe 9 cents, with discounts of 7½ per cent.

Rope, Twine, etc.

Cordage lines have been selling steadily, and there has been no exceptional demand outside of binder twine, which is going freely now. Prices are unchanged as follows:—Pure Manila, 15c; British Manila, 11c; African hemp, 11c; sisal, 10½c; double lath yarn, 10¼c; single lath yarn, 9¾c. For binder twine the prices are:—Best Manila, 650 feet to pound, 13½c; Manila, 600 ft., 11c; standard Manila, 550 ft., 9¾c; standard, 500 ft., 9¼c.

Stoves and Ranges.

There is little change in the stove situation, and business continues to be on the quiet side. Some sales are being made in a regular way, but there is not much chance of a marked improvement until the fall.

Fall Requisites.

Jobbers report that orders are coming in now for guns and ammunition, and the outlook is for a successful season's business in this line. Harvesting tools are moving well.

TORONTO.

TORONTO, July 16. — The local hardware jobbers report an unexpected increase in sales for this week and appear at a loss to account for same, coming as it does in midsummer. Paint and metals lines are quiet, however. Metals form the basis of much comment. Tin has fluctuated violently and some shading of prices has occurred in other metals owing to scarcity of orders.

One theory advanced to account for the present increase in orders is that the early part of the month in a dull season would be likely to show a rush of hold-over orders. However, the first week in July should have seen such orders out of the way.

Metals.

Metals showed less activity during the past week except in the case of tin which has fluctuated violently up and down and the price of which is at present 34c. The high for the past week was £147 5s., the low £144 15s.

The market shows manipulation from some source, at present unknown. Production and consumption is too steady

for any question of supply and demand to have wrought the change. Trades in large quantities of three months' tin that appeal to speculators offer a possible solution of a condition that appears to be as much of a puzzle in New York as here.

Lead at 5.15, and copper from 14¼ to 14½ are quiet and zinc at 5½ is steady. Pig iron is still dull.

Ruling quotations in other metals are as follows:—Antimony, 8¾c to 9c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 12c to 14c lb.; half-and-half solder, 23c lb.; pattern aluminum 22c to 24c; ingot aluminum, 18½c to 19½c lb. acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 21¾c lb.; wire solder, 26c lb.; tinkers' bar solder, 27c lb.; lead wool, 8c lb.

Nails, Wire, Screw and Rivet.

Steel lines are all quiet and show the results of the price-cutting that has occurred, particularly in the United States. Nails are still 2.25 base for wire, and 2.70 base for cut. The discount of fine steel wire is 25 per cent.; smooth steel wire is 2.30 base for No. 0-9 gauge, and other sizes in proportion.

Since their late raise screws have remained stationary. Flat head, bright, are still quoted at 85, 10, 7½, 10 and 5 per cent.; round head, bright, at 80, 10, 7½, 10 and 5 per cent. Iron rivets, blocked and tinned, remain at 75 per cent., and iron burrs the same. Copper rivets, usual proportion, 35 and 12½ per cent.; burrs, 30 and 12½ per cent.

Rope, Twine, etc.

Cordage lines report a brisk business with hayfork rope and binder twine selling best. A possible shortage in the States is talked of in some quarters, partly owing to delays in ordering which are putting jobbers and manufacturer behind, combined with a big crop. It is not known yet as to whether Canada will be affected by a shortage there, if it does come.

Pure Manila remains at 15c base, and British at 11c. African hemp is 11c, and sisal, 10½c.

Tents and Duck.

Duck remains as per current quotations with a good demand. Tents and other made up articles continue to sell well and probably will until the end of the season.

Freezers, etc.

Freezers show a good demand and are priced as per current quotations with no recent changes. Demand in other summer goods varies with variety. Refrigerator sales are practically over, but demand in screen doors and windows is still good. Campers' lines remain in good demand.

Stoves.

Stoves show the increase in sales that is common to other lines. The warm weather has aided oil lines in particular as each succeeding hot wave causes more people to adopt anything that will tend to assist in maintaining a low temperature.

Cement, etc.

Cement remains at the old price of $1.85 and is in good demand. The Welland canal and other public works have all tended to assist sales in this line in what has proved to be a comparatively quiet building season.

Builders' Hardware.

This line compares less favorably with 1913 than almost any other class of goods. Demand is comparatively quiet, but the fitting of interiors in the fall is expected to stimulate things. The speculative element is not building to the extent of former years.

Harvest Tools and Threshing Supplies.

Harvest tools such as forks and barn equipment, machine repair parts, wrenches and other threshing and harvest supplies are in good demand and are as per current quotations.

LONDON.

LONDON, July 14.—Business continues fair, although it is a little slower than last week. All seasonable lines are in fair demand. Collections are good and local merchants anticipate a heavy fall trade.

Oil and Turpentine

Linseed oil remains unchanged since the decline announced last week, and the following are ruling quotations:—

Raw Oil—

1 to 2 barrels	60c per gal.
3 to 5 barrels	59c per gal.
6 to 9 barrels	58c per gal.
Less than barrel	65c per gal.

Boiled Oil—

1 to 2 barrels	63c per gal.
3 to 5 barrels	62c per gal.
6 to 9 barrels	61c per gal.
Less than barrel	67c per gal.

No change has taken place in turpentine quotations, which are as follows:—

1 to 2 barrels	70c per Imp. gal.
2 to 4 barrels	69c per Imp. gal.
5 gal. lots	77c per Imp. gal.

Building Materials.

The carpenters' strike has affected the building trades to a considerable extent, but the demand for building materials, particularly for the smaller class of buildings, is fair. Red mortar stain in 400-lb. barrels is quoted at 1⅛c per pound, while black mortar stain in 250-lb. barrels is quoted at 2 cents per pound. Solid sash weights are quoted at $1.50 per 100 lb.; ½-lb. sections at $2.25 per 100 lb., and 1-lb. sections at $2 per 100 lb.

Wire nails are only in fair demand, and are quoted $2.25 base for wire nails and $2.70 base for cut nails. Wood screws remain unchanged from last week, and are quoted as follows:—

Screws

Flat head, iron, 85, 10, 7½, 10, 5 per cent.

Round head, iron, 80, 10, 7½, 10, 5 per cent.

Flat head, brass, 75, 10, 7½, 10 per cent.

Round head, brass, 70, 10, 7½, 10 per cent.

Sash cord is quoted as follows:—No. 6 at 30½c lb.; No. 7 at 29½c lb.; 8, 9, 10, 12 at 29c lb.

Harvest Tools.

Harvest tools are moving well. A number of fall and winter lines are being booked.

WINNIPEG.

DURING the past week uneasiness as to crop conditions, combined with the turmoil of a provincial election, has affected business somewhat adversely, and trade has been quiet.

Crop is Patchy.

The Western crop is an exceedingly difficult one to summarize this season. In some districts it is particularly good, in others very poor, and at the end of last week the whole country was becoming extremely uneasy at the long continuance of heat and dry weather.

Ample rain on Saturday night and Sunday morning, extending from Winnipeg to Central Saskatchewan, has undoubtedly improved general prospects.

As far as I am able to size up the situation, it appears that the Red River valley will have a light output, the Pembina and Souris valley very good. Along the main line of the C.P.R. as far as Qu'Appelle the outlook is unsatisfactory. Qu'Appelle valley is generally good. Northern Manitoba is below the average. Northern Alberta has had over-much rain. Southern Alberta ar insufficiency. It is probable that with the increase in acreage this year's total output will be about equal to that of last year.

Wheat Prices Low.

With a good price for this produce the business outlook might be considered as favorable, but unfortunately there seems little prospect of anything but a low price for wheat, as even should the spring wheat crop in the United States deteriorate one-half from the July 1 Government report, the United States crop can hardly be less than 900,000,000 bushels. Kansas City September wheat is quoted at about 71c, December 74c, while our October is at 82c and December 80c (Fort William). This is too low a price to leave any profit for the producer.

It is possible that after the first rush Kansas farmers will start to hold wheat, as they have on previous occasions. With an undoubted strong European demand there is a chance of a stronger market if the American crop is not thrown on the bargain counter. Much depends on how the crop is marketed, for the world is not going to be oversupplied.

There are no changes in prices to record this week, and the demand for general hardware is fair. Harvest tools are moving fairly well. Builders' supplies about normal; but building in the city and in the country is not as active as building permits taken out would seem to indicate.

Paints and oils are seasonably quiet. There is, of course, a considerable consumptive demand for new buildings, but renovating work is not much in evidence. Linseed oil is steady and dull, but with a very deficient flax crop, both as regards acreage and yield, oil should be much dearer if industrial conditions improve.

There is still some inquiry for gas and oil stoves, and stove men are preparing for fall trade in heaters. Plumbers' supplies moderately active.

MARITIME HARWAREMEN MEET.

(Continued from page 52.)

quarters in the evening, while the men attended their business meeting. Next day the return was made home to the various parts of the provinces whence they had come. All had a very enjoyable time and voted the convention a decided success.

DEVER.

MILLS SHOWING FIRMNESS.

Cleveland, Ohio, July 16.—The Iron Trade Review to-day says:—An interesting development in competition between American and English manufacturers is shown in the bidding for a year's requirements for water pipe for the city of London. R. D. Wood & Co., Philadelphia, underbid the English syndicate 25 cents per ton, but public sentiment against allowing Americans to furnish pipe for the English metropolis was so strong that the city officials finally awarded the English syndicate the contract. The specifications bid upon called for 15,000 tons, assorted sizes, but the full year's requirements would probably have amounted to between 50,000 and 100,000 tons.

The principal pig iron sales of the week are 10,000 tons of malleable to the Eastern Malleable Iron Co., and 10,000 tons of basic to a St. Louis steel foundry. Implement manufacturers are endeavoring to make contracts for bars at very low prices and are succeeding in some cases, but mills are showng considerable firmness.

REMINISCENCES OF FIFTY YEARS.

(Continued from page 41.)

days, ran a line of propellers that included the Ocean, the American and the old Dominion and that made a weekly trip up from Montreal as long as navigation was open. We always looked forward to, and made a festival of the first ship of each spring.

These steamers used to carry manufactured products up from Montreal and grain and flour back and we never dreamed of shipping by rail; no one was in a hurry and incidentally the water rates offered a saving that we simply could not resist.

Our stock came mostly from the Old Country for there was little or no manufacturing done in Canada and few importations from the States. Cut nails were the only variety offered the trade and they were turned out in Montreal. Scotch iron held the market in that line and absolutely no heavy hardware came from the States. Our screws were all of the Nettlefold & Chamberlain brand, of Birmingham, where the famous Imperialist was engaged in the manufacture of them previous to going into politics on a large scale. We had no stoves nor tinware, and our stock consisted almost entirely of shelf and heavy hardware.

The principal crops in this vicinity were fall and spring wheat, oats, potatoes, etc. Since then those crops have given way to the fruit that has truly made this the Garden of Canada.

Even in our earliest days we were blessed with opposition here and so have always been kept on a healthy qui vive. There were just the two of us in the store and we were so hard worked that we used to post our books up of a Sunday. My brother finally rebelled, saying, "I vote that if we can't make a living at this business in six days, that we quit it."

I agreed, so we stopped, and later began to take a weekly half holiday. The store consisted of one floor, sixty by twenty feet then, and five thousand dollars would have bought our stock. It now occupies three storeys and a cellar with a depth of two hundred feet from window to receiving room and there is a stock of fifty-five thousand dollars on hand.

Those who are in a position to know say that we St. Catharines merchants pull together more evenly than those of some towns and prosper accordingly. We buy goods at a discount from one another, but do not borrow them. That was tried out here and happily discontinued.

In short, we have come to the conclusion that it is better to keep friends and keep posted than to go about with chips on our shoulders. A friendly rivalry is found to be more productive of results than a bitter one and instead of attempting to draw a ruinous trade by low prices, we draw a profitable one that is attracted solely through the quality of the service offered.

CORRECTION.

In the June 20 issue of Hardware and Metal we inadvertently stated that the Saskatoon Hardware Co., Saskatoon, Sask., had again opened up on Second avenue, thus giving the impression that the store had been closed for some time and then re-opened, which is not correct. The Saskatoon Hardware Co. have moved from their old stand on the corner of 22nd street and 2nd avenue, to much larger premises—almost five times as large as the former premises.

We wish to correct the impression that the Saskatoon Hardware Co. store was closed, as such was not the case.

ADDITION TO TORONTO MARKETS.

Decline in Pipe.

Black and galvanized lapweld wrought iron pipe has declined another half point, following that of May 1st. The reduction affects only the sizes over four inches. Present discounts are as follows:

	Lapweld. Black	Galvanized
Standard 4½, 5 and 6 in....	72	62
Standard 7, 8, and 10 in.....	66½	55½
X strong P.E., 4½, 5 & 6 in.	67	58
X strong P.E., 7 and 8 in.	58	47
Genuine Puddled Iron, 4½, 5 and 6 in.	64½	54½
Genuine Puddled Iron, 7 and 8 in.	59	47

COUNTRY REST ROOMS.

Is there any good reason why the country dealer cannot imitate some of the large city stores, for instance, by installing a rest room for tired farmer's wives? Big city stores have found such an innovation to be valuable adjuncts to their business, both in an advertising sense and otherwise. The country merchant has a still better opportunity here by reason of the fact that the farmer or farmer's wife who comes in for supplies is usually put to considerable trouble by having to drive around from store to store to collect the various purchases.

Why not have a room where the tired woman may rest and where her parcels from the grocery and the dry goods store may be brought and assembled for her convenience? And why not a smoking room for Dad—not necessarily a palace, but a place where he can sit and smoke without feeling that he is in the way?

Try it.

Paint Department

A Unique Invitation to Paint Men

An Unusual Opportunity to Assist in the Editing of The Paint Page—A Discussion in the Cabinet—The Cub Introduces a New Idea That the Paint Editor Elaborates On.

HARDWARE AND METAL was in conference. The chief spoke: "As suggested last week, we will take up the matter of the best manner in which to interest Hardware and Metal paint men in their own uplift to an even greater extent than at present. Any suggestions?"

The Paint Editor looked at him. "By what means?"

"Any means that will further arouse the rank and file to the necessity of keeping in closer touch with one another and with their trade journal, if they expect to keep up in the race."

"Why not use the pages of Hardware and Metal?" asked the Paint Editor.

The rest of them looked at him in astonishment.

"Oh, yes, I know," he said smilingly, anticipating their question. "We already use Hardware and Metal; but why not let the paint men use it, too, by throwing ourselves open to their criticism and our pages to their views."

"You're going to ask for knocks?" asked the Cub in round-eyed wonder.

"Not knocks, but constructive criticism, my son. We criticise the paint men or praise them, as the occasion demands, and we'll put the reverse English on it by inviting them to do the same—criticise and praise one another and us, just as they see fit."

"Gee!" It was the Cub. "And make a new kind Donnybrook Fair out of Hardware and Metal, make it a paper playground for all who wish to run amuck," said the Builder's Hardware Editor, aggrievedly.

"Decidedly not." It was the Paint Editor who spoke again. "Hardware and Metal readers are not of that calibre. But many of them have grievances, suggestions and views to air, and don't know where to look for a vehicle to express them in. I——"

The Chief interrupted. "Very good idea. You plan, I take it, to mail cards to our subscribers calling their attention to the necessity of working with us and asking for suggestions?"

The Cub began to stutter in his anxiety to shove his oar in. "Why not report this conference on the Paint Page, it will—"

The Builder's Hardware Editor became an outraged mother guarding her child. "And make this journal a newspaper, a regular yellow journal?"

"I'm inclined to agree with the Cub," came from the Paint Editor, who was now thoroughly on his mettle. "Form postcards are usually relegated, unread, to the wastebasket as a nuisance. Again, the man who might possibly read such a postcard would be inclined to throw it away, anyhow, saying 'Another circular,' but let him read it as a direct request from man to man in the pages of his favorite trade organ and he will be impressed by the cleverness of the idea and the unique quality of the appeal will slip itself over."

"Better than an open letter to our subscribers?" ventured the interested chief.

"I think so. Open letters are in almost every other issue of every magazine published nowadays: the Cub's idea of reporting this conference verbatim will interest the trade to the extent of wanting to know how an editorial conference differs from a store conference, and once they read the article they will be convinced of the sincerity of our motives."

"What do you think this will result in?" asked the Builder's Hardware Editor scornfully.

"It will result in a flood of letters from the trade, giving ideas on subjects that they would like to hear discussed and, I hope, some good articles from some of them for publication."

"They won't do it."

"Possibly, but I have confidence enough in my paint men to know that they will. I've bought paint from a lot of the boys and sold it to still more of them, and I positively know that all they lack is the opportunity to be up and doing something for the trade in general."

"How long will it require for this millenium to come to pass?"

"We'll hear from most of them inside of a week, because a man doesn't usually write to an editor except on the spur of the moment. But the results will be felt for a long time to come, as paint men, remembering this conference, will sit down and drop us a letter, outlining some idea that just struck them. But we'll get their present ideas at once."

The Cub's enthusiasm swept him off his feet. "Gee, I——"

"Conference ended for to-day," and the Chief snapped his watch.

SELLING HARDWARE AND GROCERIES.

(Continued from page 36.)

paper sample fixture is also prominently placed.

Mr. Kneen expects to make the wallpaper department a prominent feature of the store, as this has been a profitable line with other hardware dealers on the island of Montreal.

Mr. Kneen expects to put into the hardware department the same business qualities that have enabled him to build up the grocery end. He is a believer in the modern ways of doing business, and has equipped the store with cash registers, account registers, self-measuring pumps, etc. He is a consistent advertiser and gets out circular letters to customers and prospective customers frequently, and aims to make this a weekly affair.

He also keeps closely in touch with the credit end of the business and exercises considerable care in giving credit and making collections, as only in this way does he expect to achieve success.

"CHALCO"

A PAINT AND VARNISH REMOVER THAT'S 20% MORE EFFICIENT THAN OTHERS YET COSTS NO MORE

To Retailers, Jobbers and Manufacturers:

We are now able to offer in "Chalco" a Paint and Varnish Remover of unusual merit.

It's 20% more efficient than others.

TRADE CHALCO MARK

The Paint and Varnish Remover

"We pay no royalties to put on your bill."

Write for Proposition

"Chalco" is positively different and positively superior—it leaves the surface better for refinishing than any other product we've tested.

It does not injure the hands.

MANUFACTURED IN CANADA BY MARTIN-SENOUR CO., LIMITED
IN THE UNITED STATES BY THE H. B. CHALMERS CO., SCHENECTADY, N.Y.

The Painter Knows

Painters and decorators that enjoy the best patronage know that Berry Brothers' Varnishes produce results that are lasting and satisfactory.

They know that the House of Berry Brothers has manufactured high-grade varnishes for over 56 years—varnishes that have set a standard of first quality.

THE VARNISHES THAT SATISFY

Dealers can please both the painter and his customers by selling Berry Brothers' Varnishes—the kind that give lasting satisfaction.

These finishes are famed the world over for their durability and their high quality. Take advantage of this world-wide reputation by linking it up with *your* store.

Be the "quality" dealer in your town—sell lasting satisfaction with every varnish order. Write for more information. Investigate our plan of co-operation with progressive dealers.

Weekly Paint Markets

MONTREAL.

MONTREAL, July 16.—The paint trade is still brisk and jobbers report that the volume of sales is very gratifying. From retailers there is much the same report, travelers almost invariably stating that business is good in all sections of the country.

White Lead, Paris Green, etc.

There has been no further change in white lead and sales have not been exceptionally heavy since the advance. The market is firm and quotations are: $8.40 for small quantities and $8.20 for ton lots.

With the warmer weather there has been a better demand for Paris green and sales recently have been quite brisk. Quotations are listed in current price list.

Turpentine.

Turpentine is very steady at the figures quoted last week and there has been a fairly active demand from both city and country dealers. Quotations are:

1 barrel .....67c per gal.
5 barrels .....66c per gal.

Five-gallon packages, 5 cents advance; packages extra; terms net.

Linseed Oil.

Jobbers here report that the price-cutting of Toronto dealers has not affected the situation so far as Montreal is concerned. There appears to be no valid reason for reducing prices, in fact the crop reports this year would indicate that higher prices will be paid before very long. The market is firm and quotations are:

Raw Linseed—
1 to 4 barrels .....61c per gal.
5 to 9 barrels .....60c per gal.
Boiled Linseed—
1 to 4 barrels .....64c per gal.
5 to 9 barrels .....63c per gal.

Gasoline and Benzine.

Gasoline continues in very fair demand, with quotations unchanged from last week. Lubricating oils have also been selling well and business generally in oils is keeping up satisfactorily.

Quotations are:—
Barrels, in wood .....20½c gal.
In steel and drums .....17½c gal.
Tank wagon (100 gals.) .....16½c gal.

Benzine is quoted at 19c per gallon in single barrels.

Glass and Putty.

Glass market is quiet and the volume of sales has been small. The same may be said for putty. Jobbers do not look for much improvement until early in the fall when better conditions will no doubt prevail. Prices and discounts have not been altered and are the same as listed in the current market quotations.

TORONTO.

TORONTO, July 16.—Paint lines are very quiet this week, owing to the partial cessation of business, due to the Belleville Convention.

Oil is 1 cent higher, but is weak locally. Gasoline is the subject of considerable speculation, but is unchanged in price here. Other lines are unchanged.

Turpentine.

Turpentine is firm and hard to get. Demand exceeds expectations. Stocks on hand are very light as a result, although present sales are not heavy. Savannah shows June receipts of 24,197 barrels, as against 26,000 barrels in June, 1913. Single barrels remain at 70c, and two to four barrel lots at 69c.

Linseed Oil.

Linseed oil is weak here as the result of price-cutting tactics. It has gone up a cent, but dealers claim that it is still too low. At that, however, some dealers offer at a lower price, and some ask more than the ruling prices, which are as follows:—

	Raw.	Boiled.
Single barrels ...	61c	64c
3 to 5 „ ...	60c	63c
6 to 9 „ ...	59c	62c

Gasoline and Benzine.

Benzine is unchanged at 19c and 18½c for one and three-barrel lots respectively. Gasoline has dropped half a cent at outside points, and is selling for as low as 8c in Detroit, Michigan, for wine gallons, but local dealers say that the Toronto price is not likely to be affected by what is a purely local price war in Detroit. One and three-barrel lots are 19c and 18½c respectively.

Paints.

Paints are very quiet this week, largely due to the presence of a large number of paint men at the Belleville Convention. The prices are unchanged, and are as per current quotations.

Glass and Putty.

Glass and putty are unchanged, and are as per current quotations. Glass discounts are 20 and 25 per cent. The fall trade in building supplies should materially quicken demand in these lines.

White Lead, Paris Green, etc.

White lead is still firm after its raise, but sales have fallen off slightly at the new price, as given in current quotations.

Poor sales in Paris green are reported at the old price of 11¼c, 17½c and 19c per 100 lb. drum.

OIL OUTFIT SALE.

Whyte & Orr, Daipland, Alta., are running a three for a quarter sale in which they offer a bottle of oil, a handy oil can and a sharpening stone for 25c.

THE REWARD OF SMILES AND SERVICE.

John Gilpin was a hardwareman,
Who lived in Ottaway,
His store and personage were small,
But he smiled the live-long day.

He arose at sunrise, every morn,'
To prepare himself awhile,
And every customer he'd serve
Each one would get the smile.

He remembered all their faces,
Each one he'd call by name;
He satisfied them every time,
And smiled on just the same.

The people grew to like him,
And talked about his store,
Their wagging tongues did more for him
Than the sign above his door.

Years have passed and still he's there,
Smiling the same old way.
But his store is nearly twice the size,
Success is his to-day.

And if you ask him how he won
He will not puff and boast,
But in your ear he whispers this
"To serve best is to profit most."

WE GET ORDERS FOR YOU

It is not alone the uniform merit of our goods that draws trade for our Agents, but the ample means we provide for bringing that merit home to the people.

Our line of advertising material is complete, its selling force has been proved, and it is all trained to *help the dealer.*

You can get all the benefit of this tremendous selling power by handling B-H products. When you stock our goods, we place all the resources of our Advertising Department at your command and *help you sell* without cost to you.

The most successful Dealers sell B-H goods, which proves B-H goods make the best foundation for success.

YOU can increase your sales by joining with us. Write us for our Agency Proposition and we will tell you how.

Owning and operating P. D. Dods & Co., Ltd.

FALSTAFF:
"What money is in my purse?"
HENRY IV.

When Sir John Falstaff asked his page the above question it would have surprised him to hear that there was more than a few coppers left. Most of us are familiar with the riotous times that Falstaff had with Prince Hal as his chief companion. Falstaff was mostly broke and living at the expense of others.

IN THESE TIMES OF KEEN COMPETITION

Hardwaremen need to be careful to have stocks which find a ready sale. It will save you money and put money in your purse if when you require **BABBITT METAL, SOLDER, LEAD PIPE,** all **PLUMBING SUPPLIES** and **ALL INGOT METALS** you send your orders to

To Cover Wall Paper

The very best product you can sell your customers who desire to put on a finish over wall-paper is MURESCO. It will cover in excellent fashion all ingrain and plain tinted papers containing no aniline flowers or ornaments. It will do it without sizing. If the paper contains aniline colorings a coat of shellac thinned with pure grain alcohol will be all the preparation necessary before applying MURESCO. It's sure to give satisfaction. Recommend it —your customers will thank you when they see the result.

ADDRESS ENQUIRIE **ED. BRAND,** *neer Specialist in Wire Machinery* **96 Victoria Street, LONDON, S.W., Eng.** Cables: Wyrellous, London. Code: A. B. C., 5th.

¶ The fact that the successful business man is an advertiser is usually incidental. He is an advertiser because he is wise and possessed of good, sound business sense and an analytical mind. At some time or other he came to the conclusion that advertising could be made one of the mightiest factors of his business organization, and having arrived at this conclusion, he just naturally went to it and advertised.

The CANADA PAINT Co.'s Specialties yield good profits

These are the days when housewives like to freshen the appearance of their homes with paint and varnish products.

¶—Window screens and screen doors need touching up. CP wire screen paint is made expressly for this purpose. It makes an old screen look like new and does not close up the mesh.

¶—Picture frames, cupboards, bric-a-brac and a dozen other things about the average home can be made to look as good as new with a coat of CP Oxidized Art Enamel. It is put up in convenient-sized tins in very attractive shades that suit the requirements of the housewife.

¶—Radiators, water pipes and other metal surfaces around the house can be easily made attractive instead of dingy, with CP Aluminum Paint. Most housekeepers have use for this finish and a suggestion from you will very often make a sale.

¶ Doors, wainscotting, chairs and woodwork are to be found in nearly every home in a shabby, worn condition for want of a coat of varnish. CP Sun Varnish or Sun Varnish Stain meet just such requirements. Our display cards and other advertising features will draw your customers' attention to these finishes. Have a good stock on your shelves, then no danger of losing a sale.

¶—Women are always cleaning and polishing about the house. You can sell them Furniture Polish and Brass Polish just as easily as the drugstore or the grocery. With CP Furniture Polish and CP Sun Brass Polish on your counter you will soon appreciate these are good sellers, and yield profits worth while.

¶—Get your share of profit from specialty sales. No other merchant has a better opportunity, if you display the goods. Dress your windows these summer days with CP Specialties and advertising matter, and you will be agreeably surprised at the number of people who will come into your store for them.

¶—Write for our new catalogue if you are not familiar with prices of CP Specialties. There are a number of CP Specialties not mentioned above. They all represent good value, and yield good returns.

THE SAW OF PROFIT AND SATISFACTION

Have you seen the Simonds Saw with the selling price etched right on the blade? When a Carpenter buys one of these saws he knows that they represent the full $2.00, $2.50 or $3.00 value which the Dealer asks for them. He has the Manufacturer's guarantee. He is satisfied with his purchase. Moreover, he is confident that you have offered him a dependable tool and for that reason he is all the more pleased because he traded with you.

On the other hand, when you sell one of these Simonds Saws with the price etched right on the blade you may be assured that this sale means a fair and legitimate profit for yourself. The sales are easily made, the saws are absolutely guaranteed, the Dealer's profit is protected. We want you to see our samples and to receive our catalog and Dealers' discounts, if you haven't already secured them. Write us at once.

BAR IRON

A BOOK THAT SAVES MONEY

"Digest of the Mercantile Laws of Canada"

A READY REFERENCE FOR BUSINESS MEN AND THEIR ASSISTANTS. A GUIDE TO THEIR DAILY BUSINESS

IN RENTING A STORE, PROCURING A LOAN OR COLLECTING A DEBT, THIS BOOK WILL SAVE YOU MANY DOLLARS

No work ever published in Canada equals it for business men. A veritable consulting library on this one line so universally needed. Based on Dominion and Provincial Statutes and Court Decisions. Indorsed by barristers, sheriffs, magistrates and conveyancers.

Below appears a few of the questions it answers. These are picked out at random from the book.

If you endorse a cheque which bank cashes, are you liable to the bank for the amount, if the cheque were forged or raised?—173.

(The figures after each question refer to the section in the "Digest" which gives the answer.)

Can Interest written "one per cent. per month" in a note be collected by "legal process?"—See sections 345, 185.

In going security on a note, what is the difference between writing your name on the face of the paper or on the back?—171.

Why is it that a verbal agreement to buy real estate with, say $100 paid down "to bind the bargain," does not bind either seller or buyer?—451.

If a proposition is made to you by letter and you accept it by letter, do you know the exact time when the contract is closed?—39.

How many years does it take a promissory note, a book account, a judgment or a legacy to outlaw in your province?—356, 359, 360, 367.

How long may the drawee legally hold a draft for acceptance?—209.

If a man, in the presence of witness, makes a verbal agreement to buy a wagon, say for $53, but does not take possession of it, will the sale be binding?—500.

What effect has it on a will if only one person signs it as a witness?—815.

If the wife or husband of a legatee signs the will as a witness, what is the effect?—816.

"A," in paying off a Mortgage, gave mortgagee a marked cheque on which was written: "This cheque is given and received as a full settlement and discharge of Mortgage No.———." Is that a legal discharge?—410.

If a person goes with his hired man to a merchant and says: "Give this man the goods he may need up to," say "$15, and if he does not pay you," say, "within thirty days, I will," will the promise bind him?—110.

If stolen goods are sold to an innocent purchaser for value, can they be taken from him?—513.

How may a person legally add "& Co." to his name, or use any special name other than his own as a firm name, without having a partner?—694.

"B" claims that the Canadian Bills of Ex. Act allows him two days, in addition to the day of presentment, to accept a sight draft, and then three days of grace in which to pay it—six days in all. Is he right?—209, 217.

If you rent a property for a year, the rent payable monthly, and remain on after the year expires, are you a yearly or a monthly tenant?—580, 608.

Can you garnishee a debtor's money deposited in a bank if you know it is there?—885, 295.

Forwarded direct post free on receipt of price.

Keep the book ten days, and if it is not worth the price, return it and get your money back. If remitting by cheque make same payable at par, Toronto. Eastern Edition, Price, $2.00. Special Western Edition, $2.50.

To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price, $2.50.

Eastern Edition, Price $2.00 **Special Western Edition, $2.50**

"THE BIG WINNIPEG HOUSE"

Reading Brimful of Interest for Busy Canadians

The July MacLean's, just off the press, is full of feature articles and stories which should appeal to every Canadian. Does not this list interest you?

"The Education of the Camp"—A strong article by a military authority on the benefits, physical and otherwise, of militia training.

"On the Firing Line in Riel's Day"—The first of a series of articles on the North-west Rebellion, written by one who served through the last campaign. These stories will be full of reminiscences given to the public for the first time.

"The Adventures of Madelyn Mack: Detective"—The best detective stories published since Sherlock Holmes first appeared. The first of this series appears under the title "The Man With Nine Lives"—A strong recital of adventure, written in graphic, vivid style.

"The Miracle of the X-Rays"—A clear presentation of one of the greatest discoveries of modern times. The fascination that science exerts on the lay mind will serve to make this article one of absorbing interest to all.

There is nothing a man could not do if he had the right information before starting at it. Under the heading: "Getting the Facts," a Lieutenant of Harrington Emerson, the chief exponent of efficiency, tells how the right information can always be obtained. Want to get started on the highroad to success? Read this article.

Glen Campbell—Broncho buster, sturdy man of the plains, orator, player of practical jokes, firm friend and hard fighter—is the subject of a breezy sketch that will both interest and amuse. Meet this famous Western M.P. in the pages of July MacLean's.

These are just a few. There are plenty more of the same kind to be found in the July issue of Canada's national magazine. If you don't read MacLean's, start with the July number.

Send a postcard and have your name added to our subscription list. You'll be delighted with every issue.

Subscription price $2.00 *per year.* 20 *cents a copy.*

Hardware and Metal's Electro Service

AT the request of many of our readers and in order to assist Canadian hardwaremen in such a manner as to make it easy for them to use illustrations of staple hardware lines in their newspaper, circular or catalogue advertising. Hardware and Metal's editorial department has instituted a new service, viz., the supplying of electros of staple hardware lines at a reasonable price. Many merchants claim that the electros they have on hand are of such large proportions and occupy such large space that their use is almost prohibitive on account of the cost of newspaper space. By using small electros of seasonable goods the merchants will be able to feature several lines in one advertisement at a very reasonable cost. Hardware and Metal will from time to time publish seasonable advertising suggestions in which electros here shown will be used. In ordering electros be sure and order by numbers. Price of electros shown on this page is 15c each. Cash with order. Address all orders to Hardware and Metal, 143-153 University Ave., Toronto, Ont.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

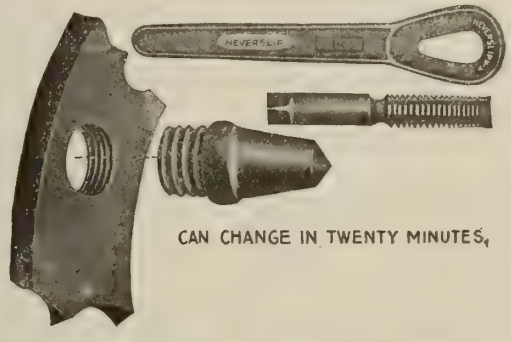
Get Your Trade Acquainted with RED TIP Calks and Shoes

They're Rattling Good Fall and Winter Sellers

No. 5

No 4

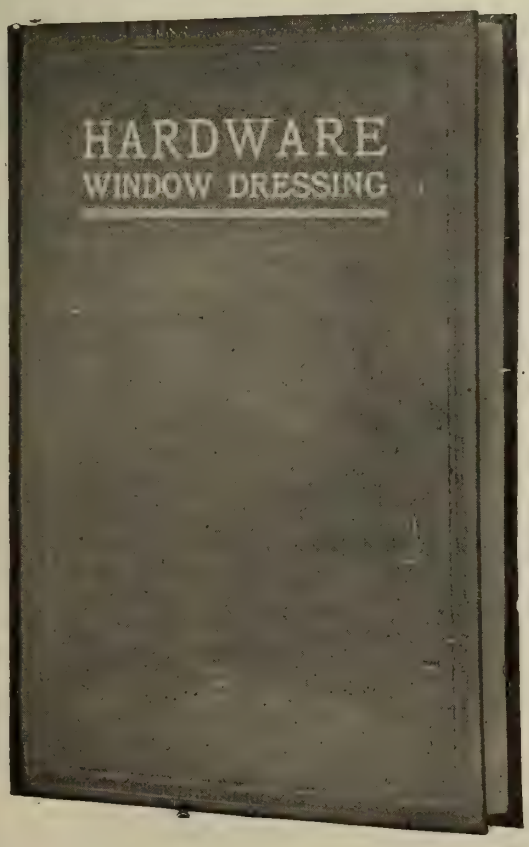
IRON—"B" PATTERN
Sold Drilled or Calked



The best Iron Shoe on the market for general utility purposes. This shoe is made of selected stock, double refined, and is creased to prevent snow from balling in hoof.

Every horse-owner would use Neverslip Red Tip Calks and Shoes if he knew what a saving they effected, and the protection they afford his horses when the roads and streets are coated with ice.

Neverslip Red Tip Calks stay sharp a long time and when they do become dull they can easily be replaced by new ones at small cost. All horseshoers use and recommend them.



Neverslip Calks are not to be confused with inferior imitations. We protect the dealer and user. They are marked with a Red Tip to distinguish them from other brands. Protect yourself by looking for the Red Tip.

Our booklet T gives full details. We will send it immediately upon receipt of your request. Drop a card now to our Canadian Office.

The Neverslip Manufacturing Company
U.S. Factory: NEW BRUNSWICK, N.J.

Canadian Factory and Office:
559 Pius IX Ave., MONTREAL

You May Become a Practical Window Dresser for $2.60

This is the first book ever written devoted exclusively to Hardware Window Display, and is a really new and good book. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense — any one of them will bring enough extra trade to the store to pay for the book many times.

MONEY WALKS

as well as talks

It takes a much longer time to walk back to you if you send it 1,500 miles further away.

BUY GOODS made in the West and reduce the length of time in which your money will get back to you.

Remember that right in the West, in use for the WESTERN MARKET only. is a plant that is as complete as any in Canada to-day.

This is the only factory in the West which makes everything in the Sheet Metal line that Western Canada needs.

Boost the home-made goods and insist upon being supplied with the products of

Amatite ROOFING

The Roofing that Needs No Painting

WHEN your roof is covered with Amatite, there is an end to the roof painting nuisance. Amatite has a real mineral surface and needs no painting. You don't have to get up on the roof every two years and paint it.

The mineral surface makes this unnecessary and it will stand rain and hail and wind and snow for years without attention.

When you paint the old-fashioned roofings you are practically trying to keep them from getting wet. Amatite is made to get wet, for water won't hurt it a bit. Next time your old-fashioned roofs need painting, cover them with Amatite.

A sample of Amatite and booklet about it will be sent free on request. Address nearest office.

THE LIGHT THAT'S RIGHT

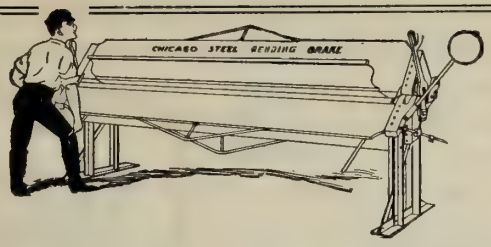
Eureka Lite

Eureka Jr. B.C. 2

The fact is, with our Eureka—

You can light almost any old car as light as day,
But you can't afford to light a Ford in any other way.

LOW COST—HIGH EFFICIENCY



Used with or without storage battery. Special attachments for Ford, Maxwell and other cars. Prices $20.00 and up, according to capacity required. Large profit to dealers. Write for particulars to-day.

HENRICKS NOVELTY CO., 1539 St. Paul St., Indianapolis, Indiana

BOOKS FOR HARDWAREMEN

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

Technical Books, 143-149 University Ave., TORONTO

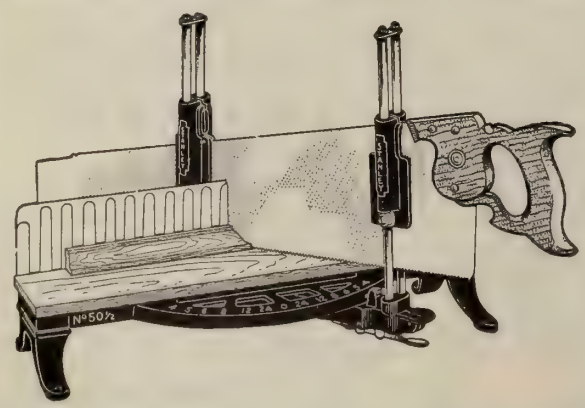
THE WHITE MOP WRINGER

always bears this trade-mark

LOOK FOR IT.



Janitors and Housekeepers praise these wringers, because they wring easily and neatly, are durable, practical and useful.

Ask your jobber for them or write to us.

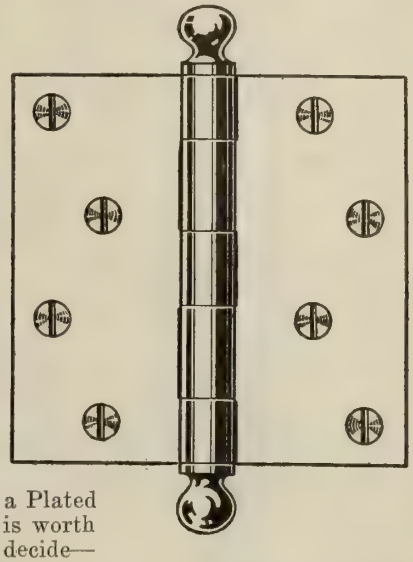
White Mop Wringer Co., Fultonville, N.Y

Stanley Tools

No. 50½ MITRE BOX

This has a single piece Frame, both the base and the back of which are accurately machined.

The Saw Guide Uprights are steel rods and carry the Saw Guides in which the saw works. The Uprights, which are instantly removable, are adjustable.



The special feature of these Boxes is that any ordinary Panel Saw may be used in place of a Back Saw if desired. A strong and accurate tool at moderate price.

No. 50½ — **List Price each $5.50**
No. 60½ with 20 in. Back Saw — **" " $7.50**

STANLEY RULE & LEVEL CO.

S.W.

That Trade-Mark

On the back of a STANLEY No. 241 Butt Distinguishes the Original No. 241 Butt sold in Canada and elsewhere from inferior imitations.

The Stanley No. 241 is a Wrought Steel, Loose Pin Butt with a Planished Surface and a Plated Finish. It sells for a little higher price, because it is worth more money. And it is worth more money, because it is better made in every respect. Let your own good judgment decide—that's enough. **We can make prompt delivery in any quantity of all Stanley Products.**

Failing to get Stanley No. 241 Butts from your jobber, we shall be pleased to quote prices direct.

See page 1 for ¼-page advertisement.

BARRELS OF PROFIT

Ross Rifle Barrels are "barrels of profit" to any dealer as they give satisfaction to the purchaser as well as to the dealer. Every Ross Rifle is good in its class, the Ross .280 High Velocity Sporting Rifle having won as enviable a place for itself among hunters of big game as the Military and Target Ross and Ross Cadet (22 calibre) among target shots.

Fall will soon be here. See that your stock is complete.

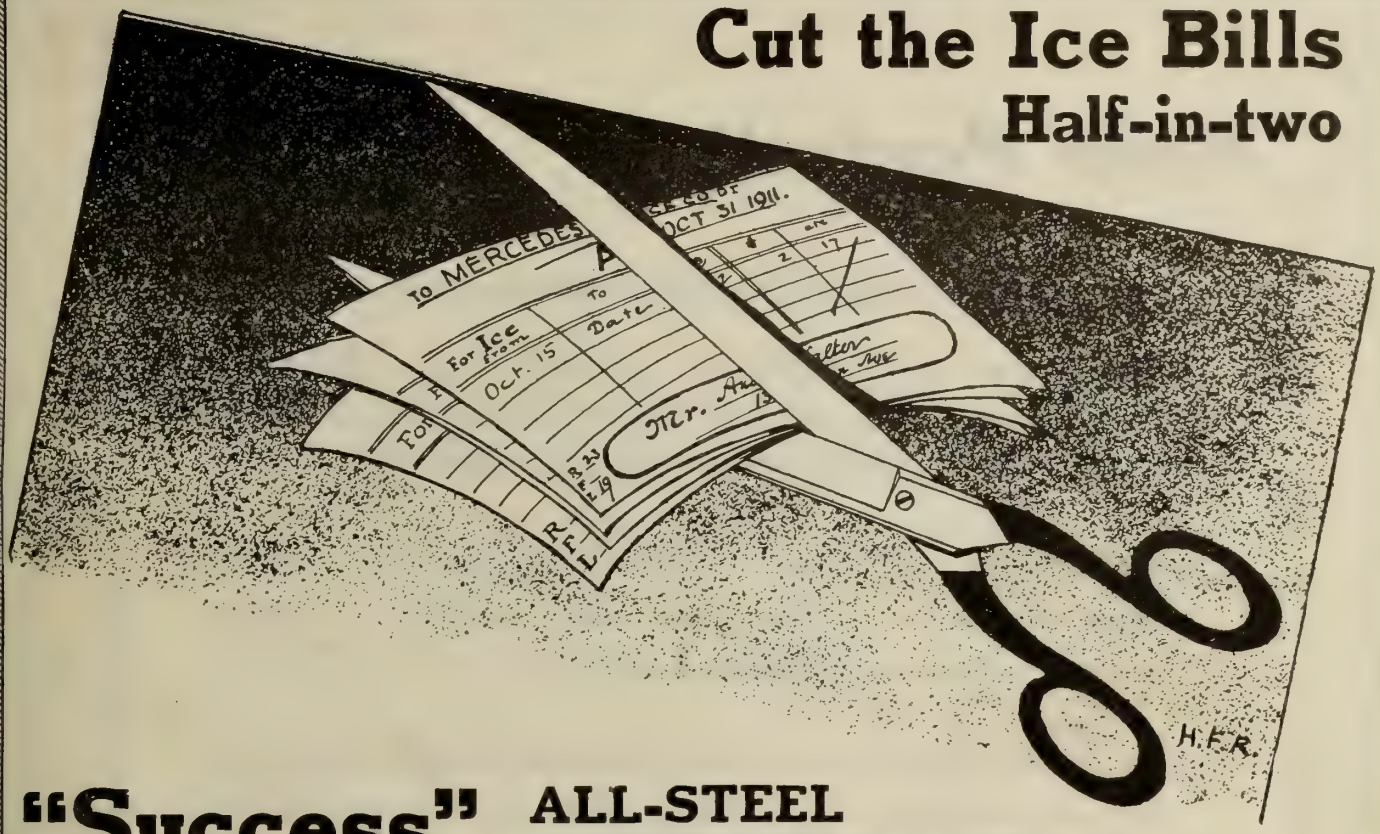
Marlin 20 Gauge Hammerless Pump Gun

Shooters will buy this gun in preference to any other "20" because:
They prefer a "pump gun"—and this is a beauty!
They like its handsomely matted barrel—costs extra on any other standard grade pump gun!
They want to use 2¾-inch shells—as well as 2½—and this gun will do it!
The optional 28-inch barrel—will sell this gun to many who would not buy the standard 25-inch.

This neat little, sweet little pump gun will delight the true sportsman by its clean simplicity and surprising efficiency as a game-getter. It's a perfect gun for snipe, quail, partridge, woodcock, squirrels, rabbits, etc.

It handles fast and with wonderful precision—and has ample range and power—and the light weight of gun and shells eliminates fatigue and adds zest to the sport.

Standard Grade A gun has 25-inch **matted** barrel; 5 shots; weighs about 5⅞ lbs. Retail, $24.00.



Like the 12 and 16 gauge Marlin hammerless, the new 20-gauge has solid top, side ejection, matted barrel, take-down construction, and the solid-steel-breech and safety features that make it the safest breech-loading gun built.

Order a sample to-day! Show your customers the splendid, high-grade **matted barrel**—without extra charge. Explain how it uses 2¾ as well as the regular 2½-inch shells, allowing good stiff loads for duck and trap shooting. And the 28-inch barrel, if preferred, for increased weight or range, at same price. **You will find it easy to sell!**

Did you receive **your** circulars, trade price list and counter sign? If not, write us to-day!

Keep Posted!

Things are moving in the retail hardware world.

Methods which were deemed good a few years back have been thrown into the discard in favor of newer ideas, which better meet the conditions of increasing competition.

Are you keeping posted on these new methods? Is your store thoroughly abreast of the times, in stock, in appearance, in system and in salesmanship?

If you are reading each issue of Hardware and Metal, you are entrenching your business behind the ramparts of new and improved ideas of merchandising, which will help you in meeting any business crisis that may arise.

Every week, Hardware and Metal contains vital facts pertaining to your business, presented in an entertaining way. Each issue will well repay your perusal.

But the very best efforts of our editorial staff have been focused on Hardware and Metal's Annual Fall Number, to be issued August 22. You will find it the most readable and valuable number of a trade paper that has ever reached your store.

It will pay you to keep this number on file for months, as a text-book on hardware retailing. A cord in the upper left-hand corner will make it possible for you to hang it in a convenient spot where you and your clerks can constantly refer to it.

Are You One of the Capable Men of Your Locality?

Does your present income permit you to enjoy all the every-day luxuries, an occasional vacation trip, a new watch, bicycle, or possibly an extra fall suit?

We are anxious to appoint a capable man in your district to represent MacLean's and The Farmer's Magazine.

In all parts of the country hundreds of energetic men are representing our publications, supplementing limited home incomes, or, in other cases, making this work their only vocation. Some of them earn more than managers of leading concerns.

The work is enjoyable, keeping you out of doors and in touch with the activities of the community. You will not be a canvasser, for as a representative of MacLean's or Farmer's Magazine you will be received as one of the successful, capable men of the community. Consequently your success is assured from the very start.

On each order, new or renewal, you will receive a definite commission, so that your salary will be gauged entirely by your efforts. No previous business experience is necessary. We coach you and co-operate with you at all times. If you will write us to-day, we will gladly tell you further about the work.

Starrett Sales Service

15,000 Requests for Starrett Catalogue

Last year we received 15,000 inquiries in answer to our advertisements in many papers. Nearly every inquiry is keyed so that we know what papers are pulling best and also which of our ads. appeal most strongly.

There are letters in this pile from all over the world and from all kinds of men — purchasing agents, foremen, superintendents, machinists, carpenters, chauffeurs, engineers, clerks, doctors, lawyers, and so on. Some requests come on letterheads of prominent companies, some from government department offices, some from municipal and state offices, some come on post cards and some on scraps of wrapping paper. But every man gets a catalog, and if there is a hardware dealer in his town, the dealer is notified of the inquiry and the man is told to go to that dealer. That is what we call "Sales Service" for the dealer.

BY INVITATION MEMBER OF

A BOOK THAT SAVES MONEY

"Digest of the Mercantile Laws of Canada"

A READY REFERENCE FOR BUSINESS MEN AND THEIR ASSISTANTS. A GUIDE TO THEIR DAILY BUSINESS

IN RENTING A STORE, PROCURING A LOAN OR COLLECTING A DEBT, THIS BOOK WILL SAVE YOU MANY DOLLARS

No work ever published in Canada equals it for business men. A veritable consulting library on this one line so universally needed. Based on Dominion and Provincial Statutes and Court Decisions. Indorsed by barristers, sheriffs, magistrates and conveyancers.

Below appears a few of the questions it answers. These are picked out at random from the book.

If you endorse a cheque which bank cashes, are you liable to the bank for the amount, if the cheque were forged or raised?—173.

(The figures after each question refer to the section in the "Digest" which gives the answer.)

Can Interest written "one per cent. per month" in a note be collected by "legal process?"—See sections 345, 185.

In going security on a note, what is the difference between writing your name on the face of the paper or on the back?—171.

Why is it that a verbal agreement to buy real estate with, say $100 paid down "to bind the bargain," does not bind either seller or buyer?—451.

If a proposition is made to you by letter and you accept it by letter, do you know the exact time when the contract is closed?—39.

How many years does it take a promissory note, a book account, a judgment or a legacy to outlaw in your province?—356, 359, 360, 367.

How long may the drawee legally hold a draft for acceptance?—209.

If a man, in the presence of witness, makes a verbal agreement to buy a wagon, say for $53, but does not take possession of it, will the sale be binding?—500.

What effect has it on a will if only one person signs it as a witness?—815.

If the wife or husband of a legatee signs the will as a witness, what is the effect?—816.

"A," in paying off a Mortgage, gave mortgagee a marked cheque on which was written: "This cheque is given and received as a full settlement and discharge of Mortgage No.———." Is that a legal discharge?—410.

If a person goes with his hired man to a merchant and says: "Give this man the goods he may need up to," say "$15, and if he does not pay you," say, "within thirty days, I will," will the promise bind him?—110.

If stolen goods are sold to an innocent purchaser for value, can they be taken from him?—513.

How may a person legally add "& Co." to his name, or use any special name other than his own as a firm name, without having a partner?—694.

"B" claims that the Canadian Bills of Ex. Act allows him two days, in addition to the day of presentment, to accept a sight draft, and then three days of grace in which to pay it—six days in all. Is he right?—209, 217.

If you rent a property for a year, the rent payable monthly, and remain on after the year expires, are you a yearly or a monthly tenant?—580, 608.

Can you garnishee a debtor's money deposited in a bank if you know it is there?—885, 295.

Forwarded direct post free on receipt of price.

Keep the book ten days, and if it is not worth the price, return it and get your money back. If remitting by cheque make same payable at par, Toronto. **Eastern Edition, Price, $2.00. Special Western Edition, $2.50.**

To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price, $2.50.

9 RUNAWAY BARGES SEND 156 CRAFT ADRIFT AND SINK 7

Boats Break Loose from Tow and Sweep Yacht Anchorages.

HAVOC ALONG SHORE OF THE HUDSON RIVER

Three Houseboats, with Families on Board, Among Those Struck and Damaged.

Nine runaway barges, laden with sand, gravel and other building material, swept through the numerous fleet of yachts, motor boats, launches and other small craft moored in the Hudson River between 137th and 170th streets yesterday morning, sinking at least seven of them and sending 156 adrift, many of them damaged.

All day the owners of the craft and the harbor police were busy searching for the drifting vessels, many of them being found as far south as 100th street.

A sudden squall out of the northwest at two o'clock yesterday morning parted the hawsers by which two tugs of the Cornell Towing Company were towing nine laden barges down the river against a rising tide. The nine barges, which had been lashed together, parted, two of them being blown inshore at 138th street, while the tugs caught the other seven, towed them inside of the cove at Fort Washington Point, opposite 176th street, and anchored them while they put out to stop the other two barges.

But these two barges were blown swiftly into the moorings of the Colonial Yacht Club, at 138th street, and with such force that three motor boats were sunk, forty more small craft were stripped from their moorings and the landing stage was smashed. The freed vessels started down stream. Their cabins had been crushed in by the barges, their sides scraped and their seams sprung in many instances.

The wrecking of the landing stage awa

The news story opposite goes to show how much damage may result from the parting of a rope. Viewed in this light, every poor or overstrained rope is a public menace.

A man's responsibility does not end with himself—it embraces everybody whom his dealings or actions may affect.

You, as a dealer, can do much to fulfill your responsibility by selling only Plymouth Rope, which is reliable, and by educating buyers to purchase new rope oftener.

Both these courses are also profitable—in money and good-will alike.

DAVIDSON'S "STERLING"
SANITARY SEAMLESS MILK STRAINER

Extra large and very strong. Made of Seamless Drawn Steel, Retinned.
Will stand hard usage.
Has Removable Centre Strainer. Easy to clean.
Strictly sanitary, gives the Dairy the highest reputation for least bacteria.

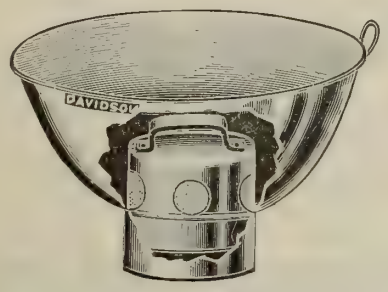

Fig. 232B

It strains through fine mesh brass strainer gauze first, and then through as many thicknesses of cheese cloth as desired.

The brass strainers catch all the larger pieces of foreign matter, and the cloth strips the milk of the finer particles of dust, leaving it clean and wholesome, ready for the table. It also strains rapidly, and is large enough to eliminate the annoying wait, which is bound to occur when smaller and slower strainers are used.

DIMENSIONS—Top ..... 13½ inches
Bottom .. 6 inches
Height .. 7¾ inches

Davidson's "Sterling" Sanitary Milk Strainers

are highly recommended and approved by Doctor Hood, Chief Food Inspector and Expert for the City of Montreal.

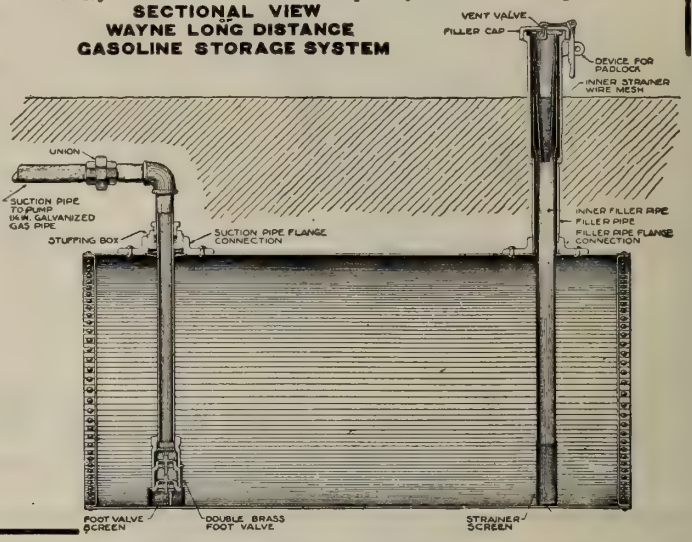
CHANNELS CHECKERED PLATES SPECIALS

The Only Profitable Way of Handling Gasoline and Oils in the Retail Store

When gasoline and oils are handled with Wayne Storage outfits there is no waste due to evaporation, leakage and spilling. The waste does not seem to be very much at one given time, but in the yearly aggregate amounts to considerable.

This system also saves time and labor, as there is no constant filling and handling of measuring cups and the constant rolling in and out and tapping of barrels, and much space.

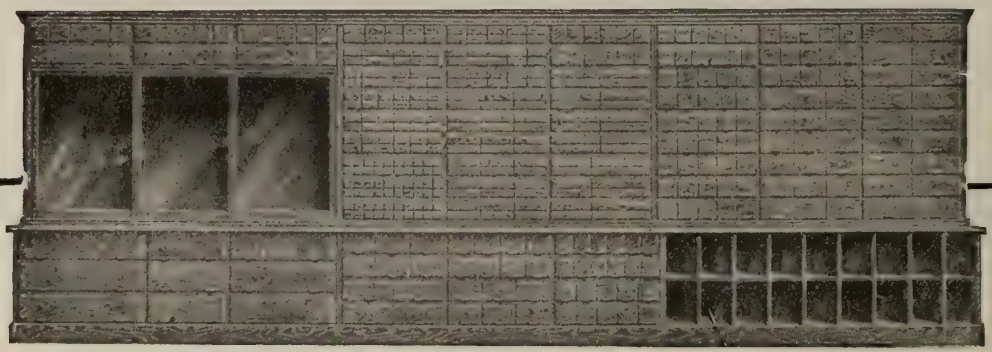
Does away with dirt and unpleasantness.



The **WAYNE PUMP** is constructed so as to throw a pint, quart, half-gallon or gallon, and measure exactly.

Works easily, and when not in use can be securely locked. Gears are completely housed. All parts are accurately machined and thoroughly tested, and are interchangeable.

WAYNE UNDERGROUND TANKS are made of the best grade of steel, carefully soldered and riveted, and finished in rust-proof asphaltum paint to prevent any possibility of corrosion; you bury the tank, as shown in detailed drawing, having the fill pipe come to the top of the ground, where it is handy for filling.



If you're interested in a Clean, Safe, Money-Saving Way of Handling Oils, write for full particulars.

Wrico ANTI-RUST

Sanitary Milking Pails

No. 914 COVERED. and No. 714 OPEN.

These Pails are made of Block Tin.

All seams and crevices flushed with solder. No lodging places for matter to collect and decay.

In using the Covered Pail, a piece of muslin or cheesecloth is stretched across the opening. Then milk the cow into the pail through the cloth.

The milk is thus strained just as soon as it emanates from the cow, and being in a covered, germ-proof pail, has no opportunity to become contaminated.

These Pails are 14-qt. capacity.

Ears are strapped on, as well as being riveted and soldered.

O-Cedar Polish Mop

(Made in Canada)

Dusts, Cleans and Polishes at same time.

Very easily manipulated.

A wonderful time and labor saver for the housewife — Once she has tried it she will never do without it.

We run an extensive advertising campaign in the daily papers from coast to coast in Canada, and in the largest and most popular magazines, telling housewives of the advantages of using the O-Cedar, and inviting them to place ($1.50), the price of the mop, with their dealer, with the understanding that if they are not satisfied they'll get their money back.

This invitation is certain to bring you big business if you have the O-Cedar where the public can see it—because nothing but lack of funds will ever result in an O-Cedar Polish Mop being returned, and the housewife is always looking for labor-savers.

Place an order with your jobber to-day.

HARDWARE AND METAL

Vol. XXVI. JULY 25, 1914 No. 30

Existing Conditions of Importance to Trade

During the past week several events of importance to hardwaremen have developed. The linseed oil situation has caused much speculation and some consternation among jobbers. The announcement that a large American manufacturing firm has secured a large interest in a Canadian plant will prove interesting to hardwaremen. The nail situation is being discussed by jobbers, and there is a variance of opinion regarding future quotations. The army worm pest has caused considerable alarm in various parts of Ontario, and in some districts the retail hardwaremen are benefiting to the extent that sales of paris green have been stimulated.

The Oil Situation

ONE of the chief features of the past week, particularly in the Toronto district, has been the unsettled condition of the linseed oil market. In spite of the fact that flax seed has advanced in price on several occasions recently and is still exhibiting an upward tendency, a number of jobbers have been selling oil at exceedingly low prices. During the week linseed oil was being quoted by jobbers at a lower price per gallon in single barrel lots than the price quoted in car lots by the grinders. There has been a great deal of price cutting recently and many retailers have purchased oil at ridiculously low prices when the present condition of the seed market is taken into consideration. Much of the price cutting and low prices now in effect are due to the fact that when oil was very low in price some months ago, a number of firms anticipating higher prices in the future bought for future delivery at very low prices. Much of the stock purchased at that time is still on hand. In other cases it is said that contracts have not yet terminated and that some jobbers and manufacturers are still buying oil at low prices, and are able to sell at prices much lower than those who have to make purchases from the grinders at present prices. Many of the firms with stocks which were purchased at low prices some time ago did not find the spring demand as heavy as usual and the result was that heavy stocks remained on hand. In order to move the stocks low prices were quoted. The situation is one that has been a puzzler to many in the trade but is easily explained when the facts are known.

Enlarging Plant

The announcement just made that the Stanley Works of New Britain, Conn., had acquired a large interest in the Canada Steel Goods Co., Hamilton, Ont., was confirmed by Arthur F. Hatch in conversation with Hardware and Metal. Mr. Hatch said that the plant of the Canada Steel Goods Co. would be greatly extended by the erection of a large rolling mill, and the installation of considerable machinery at once. A large number of additional hands will be employed and the output of the firm will be largely increased. Arthur F. Hatch has been appointed general manager and treasurer of the company. For the present the firm name will not be changed although this may take place later on. The announcement is very important in view of the fact that the Stanley Works concern is one of the largest of its kind, and that another American industry is locating a branch in Canada.

The Army Worm

The old proverb, "It's an ill wind that blows nobody good," can be appropriately applied to the paris green and army worm situation, particularly in Ontario at the present time. Reports for some time past have indicated that the demand for paris green has been light. It appears that the invasion of the army worm has placed a different aspect on the situation.

The following is the advice of the commission of conservation in connection with the dread plague of the crops:—

"By thoroughly spraying or dusting a small strip of the crop in advance of the worms with Paris green, and liberally distributing poisoned bran (mixed at the rate of fifty pounds bran and one pound Paris green with enough molasses and water to sweeten it), large numbers may be destroyed. A field so poisoned must not be harvested until rain has thoroughly washed it. Whatever is done must be done quickly and at once, for a single day's delay may often mean the ruin of a valuable crop."

The hardware merchant need not consult his conscience with regard to the moral point of taking advantage of the troubles of others to make business for himself.

The hardware merchant can make himself a public benefactor, and can make himself a factor in conducting the campaign against the almost irrepressible march of the myriad pest—by stocking Paris green and selling it.

The hardware merchant should consider it his duty to let the farmers of his district know that Paris green can be made an effective agency in dealing with the worm—many of them do not know it—and he can point out the recommendation of the conservation commission in connection with the matter. The farmer will do well to get a supply of Paris green to keep on hand for immediate use throughout the districts where there is likelihood of the worm appearing, and the danger zone is being extended every day in a manner that spells danger to a large proportion of the standing crops.

A warning to the farmers to be ready to combat the worm on its first appearance is sounded by the Ottawa commission. Look for a worm about one and a half inches long and striped with black, yellow and green of a dingy appearance and very much resembling the cut-worm. When detected, there should be every effort made to keep the worm out of the crops not yet attacked. Besides the Paris green method which is recommended, a furrow ploughed along the line of march like a trench, with the ver-

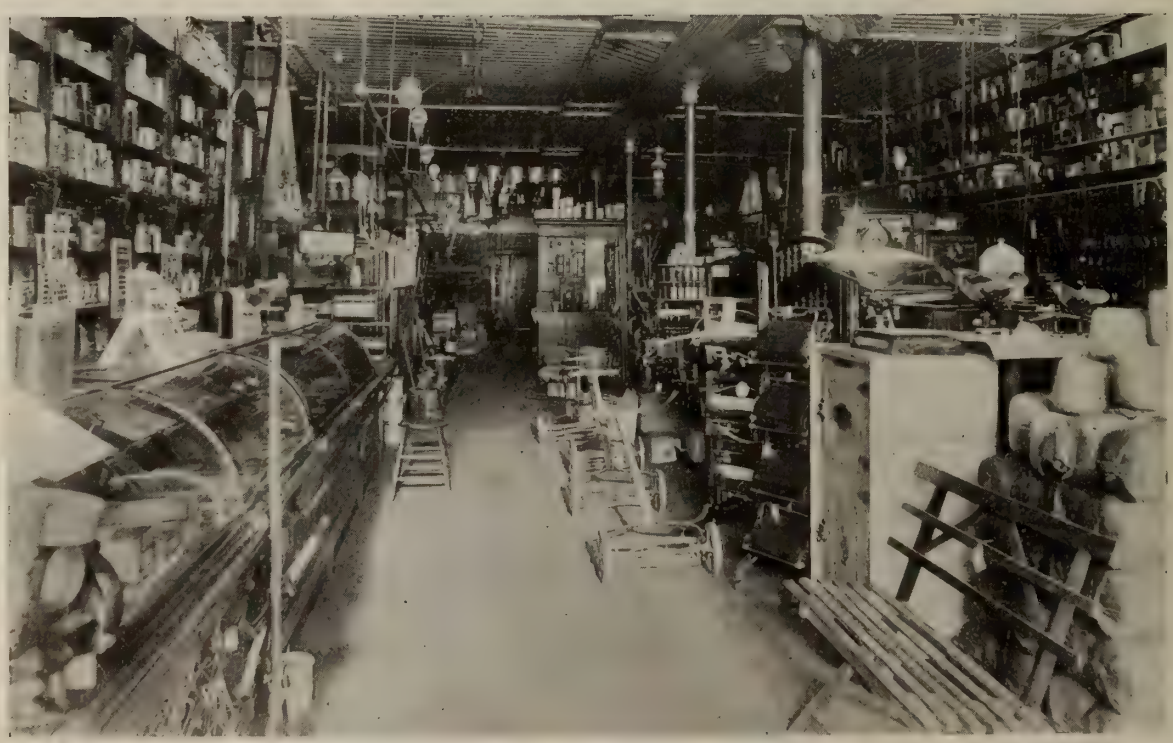
The Human Element in a Hardware Store

Broad Store Policy as Applied to Employees—Working of System Automatic—Spreads Through All Ranks to Advantage of Employer and Employee—All Success Hinges on This Department.

An authorized interview by a Hardware and Metal representative with A. W. Moore, of St. Catharines.

I BELIEVE, in all modesty, that I can agree with Hardware and Metal's assurance to me that in this store the various departments appear to work in harmony, and that no one branch of the equipment or the service is glorified at the expense of some other one, nor neglected that the other may be played up.



Such at least has been our intention. I say our advisedly; for although I am speaking as manager of this store, we endeavor to think, say and do here, in the plural, as a gathering of individuals that are all equally interested in the welfare of the business.

An apt comparison might be made between a store and the human body. The articulation of the departments of the former is, in a sense, similar to that of the bones of the latter, in that each department or each bone depends upon the easy working of the others to insure its own efficiency. Controlling, in the fullest sense of the word, all other departments, however much it may also depend upon them, is the brain in the case of the human body. Equally dependent and fully as domineering is the human department in the case of the store. From here all ideas come, all policies emanate, and the final fortune of the business is determined as a result of the combined actions of the personnel of it. I do not think that I am inconsistent in saying that the human element of a business must be given the first attention, for once that it is working smoothly and at maximum efficiency, other departments swing into line quite as a matter of course. To illustrate: if you have a good buyer, he buys well; a good salesman sells well; a good porter keeps stock in good shape. Reverse the problem: a poor buyer coming into a well-bought stock follows his natural bent, and buys badly in spite of the good example before him; the poor salesman may have high grade of goods to sell, but he does not sell them; the indifferent porter soon allows a well-kept stockroom to deteriorate, and so on ad infinitum. In the last analysis, all things mundane rest upon the human equation.

If, as I am told, we have good window trims, a tasty store interior, a well-bought stock, a good annual turnover, and the whole capped by an excessive cleanliness and orderly appearance, it is because back of all these things are human brains devoted to the intelligent solving of the problems of their work.

I can only lay claim to personal credit in this connection through my policy of having encouraged the individual development of my employees as a result of piling responsibility on them. This policy brings out in them the habit of self-reliance and the ability to grasp and solve the problems that arise. The division of responsibility frees me from the petty annoyances of settling every trivial matter; enables me to give my undivided attention to the larger matters that come within the manager's true sphere, and educates the employees so that they do their work better and incidentally prepare themselves for a better position.

To illustrate: Our paint man on his own responsibility plunged on paint this

Interior view showing one-half of the store of the Moore Hardware Co., St. Catharines.

spring to the tune of a thousand dollars. I was surprised, but I supposed that he knew what he was about. He did; it has nearly all been worked off. In the same way, partly, I am sure, because he was made to feel that his ideas were appreciated, the porter evolved a scheme that enables us to store and use material that had previously been wasted. If necessary, I could give illustrations of such things in the case of each individual in the store.

We constantly get new ideas from one another that vary in value from a big saving on the purchase of a bill of goods or a new selling idea, to our warehouse scheme of piling nail kegs on their sides instead of end, in consequence of which we can pile higher and still tell at a glance as to what size nails are in any given keg.

One would be surprised at the manner in which the slackest of men will develop under a system that allows full play for his imagination and initiative. No man is any good until he has been tried out, and it is only through his first mistakes that he learns to avoid them in the future. It is easy to warn men; but few of them or us, I should say, pay much attention to what we are told. It is our experiences that we remember.

I discourage any dependence upon authority. If a man comes to me for orders on a comparatively simple matter, I say, "Don't bother me with the details of the work you are paid to do. Go ahead and do the best you can." And then I watch, and I am seldom disappointed in the results. If the result is good I am satisfied; if it is bad, the clerk probably knows it as well as I do. At any rate, any harping of mine on the error would do more harm than good, and assuredly if any complaint is made, it is done in private, so that no feeling of humiliation will result. The satisfied man works best, and that is one way of keeping him in such condition.

Carrying that last theory a little further, I believe that incompetent help, however cheap it may be to hire, is very expensive in the long run. I get away from the danger of it by endeavoring to get a group of men about me of whom I can be proud.

By paying unusually good salaries, by seeing that they get weekly and annual holidays, I insure their mental contentment and good physical condition.

A man is similar to a horse, a binder, or any other engine; if he is fed with the best brand of mental lubricant and stoked with good physical coal, he will do the work, provided reasonable quality is there to go on in the first place. As life is what a man makes it, so is a store what the man makes it. Good men will make a success of the meanest store, because they are not there long before they

View of the store front of the Moore Hardware Co., St. Catharines. Two neat displays of seasonable goods are shown in the windows.

are revolutionizing its methods from window front to coal bin. Place a weak bunch of men in the best store in Canada and watch it hit the chutes.

In the other departments we constantly strive at improvement, and if one shows a little gain, the others are soon at its heels, so that they all hold pretty much to the same level of efficiency—which is, of course, just as high as we can make it. There are a few basic laws that we employ in all departments. We insist upon absolute cleanliness as much so in the cellar as in the window, so that we may with impunity show our customers all over the establishment with the sure knowledge of making a good impression. The windows we endeavor to make artistic, and we plan to have them emphasize the advantages of the goods shown by intelligent display rather than by using the show window for a warehouse.

I might go on with endless illustrations of the working of our endless chain, but I believe that I have said enough to convince the most skeptical that attention to the human element is the merchant's chief asset.

AN OBJECT LESSON.

Hardware and Metal investigators are unanimous in reporting that the merchants of those towns that show a get-together spirit invariably have the best-looking stores, and show in every way that they are in the forefront of progress. It requires a certain amount of broad-mindedness to crawl into the business bed with one's competitor, but it is an axiom that the state of broad-mindedness is a highly desirable one for mankind. Ergo, it is beneficial to come under that category.

The town of St. Catharines offers what is probably one of the most astonishing examples of what can be done by united effort and the sinking of individual prejudice. This town and the methods of its dealers offer a fertile field of investigation for those who wish to see the condition duplicated in their town.

IDEAS AND TRAVELERS.

Kipling says that a traveler should be caught fresh with his experiences still sticking to him. So should an idea be caught fresh and whipped into workable shape before it grows cold and enthusiasm falters.

The man who has the inspiration of a good window trim, a selling campaign, etc., should endeavor to put it in force at once. If this is not possible, the next best thing to do is to make notes of the ideas that have occurred in connection with and keep on doing so, and then when the time is ripe for action one does not have to depend upon a tricky memory. And even though the memory is good, it is almost impossible to marshal a large number of detail facts simultaneously at one's bidding. They must be jotted down as they occur, else half of them will refuse to come up above the mental surface until it is too late to use them.

Wingham, Ont.—Alex. Young, who has been in the hardware business here for over twenty years, has sold out to Messrs. Ross & Bell, who will take possession about August 1. Mr. Ross has had considerable hardware experience in Cargill, Ont. Mr. Bell was formerly a resident of Paisley, Ont.

HARDWARE AND METAL

VOL. XXVI. No. 30 Toronto, Canada, July 25, 1914 Two Dollars per Year

RETAILING OF NAILS

HARDWARE AND METAL has heard much favorable comment on the article "The rotten retailing of wire nails," which appeared on page 39 of the July 11 issue. It appears that the article has "struck" a great many retailers, travelers, jobbers and manufacturers. One retailer told a Hardware and Metal representative last week, that he hoped the opposition store in his town would take the hint, and cut out the "Under the Hat" quotations which they have been handing out for some years past. Another merchant intimated that a great many travelers are handing out "Under the Hat" quotations.

One of the most interesting of many letters which we have received is one from a leading nail manufacturer in Canada and a portion of whose letter is here appended:—

"From a manufacturer's point of view this question cannot be too strongly pressed in your paper, as there is not a question of doubt that nail prices have been as a sort of cat's-paw to pull other chestnuts out of the fire, and as has been very truthfully stated by you, not only are the hardwaremen losing money by this method of business, but the manufacturers have been made a party to these business methods, therefore, losing money for both the manufacturer and the retailer. We trust you will continue to impress upon your readers the necessity of keeping up the price of this staple article and making a profit for themselves, at the same time assisting the manufacturer to get a reasonable profit for his goods."

ARE YOU BUSY?

WHO are the busy men during times of depression, and who are grumbling the least about hard times? The answer is an easy one. The men who are complaining the least are those who are working the hardest, and are securing the business. When business depression and hard times strike a community there are always a large number of merchants who rest on their oars and take it for granted that business is bad and that extra efforts will avail nothing. There are on the other hand merchants who work harder during times of depression than at any other time. A hardware merchant, on being approached by a Hardware and Metal representative last week, began making excuses for the untidy and disorderly condition of his stock and stated that the reason his store interior looked disorderly was on account of the quiet times and lack of business. He said he did not think there was much use in arranging window displays, interior displays or cleaning up because it would not pull any more trade. His stove department was in a very untidy condition and the tops of the stoves were covered with tinware, boxes, and packages of various descriptions. The goods on the counters and in the cases were dusty and did not present an inviting appearance. The window displays had been in for several weeks and were badly disarranged and the proprietor was complaining about hard times. Four blocks farther on another merchants sells hardware. He did not complain about hard times. He realized that a depression in business existed but by hard work he had kept his sales up to those of corresponding periods of last year. His stock which is not a large one was exquisitely clean. He employs two clerks and they are good live salesmen. During spare time they were busily engaged in arranging the stock. There was a great contrast between the two merchants. The man with the disorderly store was complaining about hard times. His sales were falling off. Another merchant on the same street had a clean, attractive store and was doing equally as much business as he did last year. One merchant is working hard and is securing the business. The other merchant is resting on his oars—and sinking.

DEALING IN FUTURES

NOW that the annual quietness is here again it behooves hardware dealers to take advantage of any extra leisure and lay plans and put out outposts for the fall building trade. This is more particularly true of any probable large-sized orders, for it is in just such desirable orders that jobber's delays are most likely to arise, owing to their very size and the presence of many of them coming in simultaneously. Persistence, combined with the logical explanation of the advantages of early ordering, will frequently accomplish the desired result with the builder.

Each season sees new wrinkles, new devices and new sources of profits in the building game and on all of these the dealer should post himself before the season commences instead of discovering them through a series of errors which are of no use to him until the next building season, by which time they may be replaced by still newer ideas.

Buildings are mostly far enough along by this time so that the quantity of finishing paints, varnishes, etc., and all varieties of finishing hardware required can be estimated and ordered now. The one item of glass and putty alone offers a wide field to the one who will get out and hunt for new business and the time to prepare for it and to get it is now, when it is just beginning to loom up on the horizon.

MIXED FARMING IN THE WEST

WRITING from Calgary, Alta., a Hardware and Metal representative says: the crop prospects in Southern Alberta this season are not as good as usual. The scarcity of rain over a large section has done considerable damage. However, during the last three weeks there have been frequent showers and a marked improvement has been made.

In the Northern and Middle section of the province there has been abundance of moisture and crops are in excellent condition. In fact they have not looked better for a number of years. Taking the province as a whole, the harvest will not be a bumper one, but promises a fair average. Of course, every one desires a big crop, but there are many who think that a bumper would not be an undivided blessing.

Through the greater part of the province there has been a marked change in farming methods during the past two years, and grain raising has very largely given place to mixed farming. At one little town north of Calgary, from which a large amount of grain used to be shipped in former years, last season there were only about two carloads sent out. At other places the changes are not nearly as marked. It is not that the farmers in those sections are not growing large quantities of grain, but the great bulk of it is fed to cattle and hogs.

Old residents of the West say that two or three times in its history farmers have drifted away from grain raising, but just when they would get nicely started, along would come a bumper crop, with good prices, when there would be a rush back to the old method of raising grain almost exclusively. It is to be hoped the farmers have now learned their lesson, and that mixed farming has come to stay.

STORE CO-OPERATION

PRACTICALLY all hardwaremen are intensely interested in and hopeful for a better spirit of co-operation amongst the various units of their trade. The tendency, however, is to think in a rut on this matter by laying all the emphasis on the necessity of individual stores to unite, in a local association, and later for the local associations to unite into provincial ones, the latter eventually to make a national one.

Any movement must originate within its prospective membership to attain a healthy growth. Men and movements must grow up themselves, not be jerked up by others. The analogy is comparable to the business that boosts for co-operation and is keen on it for general practice, but that neglects such practice in the conduct of its own affairs.

It is more often a matter of being unable "to see ourselves as others see us" rather than deliberate neglect that causes a merchant to condemn in the trade as a whole, the very lack that his own business suffers from.

The lamentable working at cross purposes that occurs in many stores is a tragedy. Here, money is spent on smart ads. that bring the people in, only to meet with slipshod salesmanship and inferior goods: there, a splendid window trim induces customers to enter only to find that the trim had used up the entire stock in that line.

The prevalence of these conditions calls for the strict surveillance of all departments by the owner so that each may submerge its own selfish interests for the common good. Each department should look for its reward in the grand annual increase of business and good-will rather than to the passing glory of one day's increased sales or some little favorable comment as the result of some action that entailed a sacrifice of another department to accomplish its own flashy results.

Going deeper, the same thing is true of the men who make up the force of a department. Each one is apt, out of his selfishness, to do those things and to comport himself so that he may receive notice for an hour rather than that the department gain for a year. The thing is true and the remedy is as applicable to the largest department store as to the one-man country hardware. It is not splitting hairs to say that the individual must co-operate with himself. His business will do better by him if he makes his policy in nails fit in with that in some profitable specialty. A lack of attention to nails because they are not profitable, will lose possible customers for the more profitable lines.

The need is urgent and the opportunity ample for a thousand would-be efficiency men to start now to clean up at home first.

INSTRUCT THE SALESMAN

LEARNING and knowing the goods is not all there is to the game of salesmanship. It takes the individual skill and initiative to know how to handle the different kinds of customers who visit the store. The salesman must know the goods, be polite, be cheerful, and back of it he must have a will of his own and a spark of aggressiveness which will give him a compelling power to induce customers to buy. Proprietors can do a great deal towards making competent salesmen of their employees. A little time spent each week in instructing the salesman in the art of handling customers will be time well spent and will result in many sales being made which might otherwise be lost.

EDITORIAL BRIEFS

ARE YOU ROPING in the binder twine trade?

* * *

HARVEST MITTS, ROPE and binder twine should be well displayed at this season.

* * *

KEEP YOUR STORE up-to-date. There is a sense in which nothing prospers like the appearance of prosperity.

* * *

ELECTRICAL APPLIANCES are growing in popularity and many sales are being made. Are you securing your share of this trade?

* * *

THE WORST FAULT to be found with some dealers is that they do not recognize the necessity of making special efforts to feature staple lines.

* * *

THE MAN AT THE head of a business should know how to keep the man responsible for the various departments of his business "out of the ditch."

* * *

BECAUSE YOUR DEBTOR has successfully avoided you at the end of one month is no reason why he should be given to the end of the following month to pay up.

* * *

GET RIGHT WITH yourself and other people will have to. Men and events will be yours to dictate to and the world will be your football. Be honest with yourself in as far as it is possible for a prejudiced human being to do so. Remember that although the man who deceives others is only a villian; the man who deceives himself is a fool. Face your frailities. Correct your crimes—both of ommission and commission, large or small. Be a sport, acknowledge past errors and guard against future ones.

What Other Hardwaremen Do

Trade-Getters and Customer-Holders in Use From Coast to Coast—Model Show Room — New Application of Old Idea — Important Emphasis—New Ads. and Selling Points—Rip Van Winkle and Twentieth Century.

Builders' Hardware Room.

THE Toronto Hardware Company has a special room in the rear of the store that is devoted to builders' hardware. It is well finished in a rich wood, that shows off to good advantage the good appearance of interior hardware furnishings. The walls are of glass, so that the stock may be seen from the body of the store, although it is necessary to go inside for a close examination. The goods are shown on open shelves, and also in handsome cabinets.

An air of cosiness is given the room by the presence of a nice flat-topped desk and a couple of chairs, so that the salesman and customer may sit down at their ease, surrounded by a good display, and figure out specifications, etc.

Keys in a Guessing Contest.

Abraham Bay, of Pelly, Sask., addresses his trade in part, as follows:—

"Our proposition is this—we are distributing a box of keys, one of which will open a Yale lock in our store hanging on a Hoosier kitchen cabinet, and the holder of the right key wins the handsome prize.

"You are entitled to one key with every two-dollar cash purchase, four-dollar cash purchase two keys, and so on up; also one key given with every $10 paid on account.

"This contest is for the purpose of introducing ourselves to those who are not our regular customers and to show our appreciation of those we have had the pleasure of serving.

"A prize of $5 will be given to the person holding most keys."

Important Emphasis.

Houghton's Hardware, of Parkhill, Ont., lays especial emphasis on the triology of Courtesy, Service and Quality extended to customers at their store.

They apparently consider that these qualities, which are supposed to be embodied in any store policy, are of sufficient rarity to advertise by any store that really has them. That the customer expects these features is an accepted fact; that he does not always get them is well known; hence the presence of them is worthy of mention.

Sporting Goods Ad.

The High River Hardware Co., of High River, Alta., gets out an attractive ad. that includes cuts of several first-class fishing scenes under the heading: "Get Ready." Under a large type statement to the effect that the season opened July 1st is a priced list of fishing tackle.

The cuts were taken from a good quality of picture that stands out well in the ad., and the general effect is one that seems to invite the reader to get near the water with a rod in his hand.

Things This Won't Do.

A. H. Murray, of St. John's, Newfoundland, enumerates all the troubles of an oil engine as being among the things that the oil he offers will not be guilty of. The importance of such negative suggestions may be readily recognized when one begins to enumerate the reasons for the stopping of engines. Dirty and inferior oil probably heads the list of the trouble makers for the engineer, and an oil that is guaranteed to do away with some of the chief causes of trouble is bound to sell if the idea is properly driven home.

A Clincher.

W. F. Dibblee & Son, Woodstock, Ont., devote all their space in a recent issue to a complete description of a certain article, and then wind up with the final argument—"Only sold by W. F. Dibblee & Son."

The latter statement is not a new one in itself, but it is rarely seen as here combined with a rousing description of the article offered and then offered as a super-climax.

Rip Van Winkle Again.

Another Ontario hardware dealer makes a doubtful claim to fame by advertising in July that he has paints for the spring painting. The moral is obvious, even to him if he should read this.

It was only a short time ago that we called attention to a like offence against the tenets of good advertising.

Adapting to Circumstances.

D. Mackey, of Dunnville, Ont., under his paint ad., and P. C. Peck, of Minden, Ont., under his fence ad., both make the announcement that they will pay highest prices, or trade for wool, butter, eggs, and all kinds of produce. A large number of country merchants take those staples in exchange, but too few advertise the fact. The country woman will take her eggs to the man who offers the most for them and does it the oftenest, and she will turn around and buy a churn with her egg money. She may not know the latter, but she knows eggs, and the man who talks eggs can sell her churns.

Wheels Within Wheels.

J. Preeter, of Zurich, Ont., runs a very unique ad., in that it is a newspaper within a newspaper. It occupies two full columns of the first page of his local paper under the following heading:

PREETER'S NEWS.

No. 11—Published every two weeks—Price gratis.

A Little Paper Devoted to News Usually Heard and Seen Around a General and Hardware Store.

Then follows a particularized account of his goods, with special emphasis on any distinctive qualities. At the foot is the significant statement in heavy black type: "Produce Always Taken."

Cultivating Initiative.

The A. W. Moore Hardware Co., of St. Catharines, Ont., seeks to cultivate initiative in its employees by deliberately

(Continued on page 45.)

Biographical

Mainly About the Men Who Call on the Hardware Trade in Canada

THE subject of our sketch, E. H. Grenfell, is one of those men to whose warming-up influence the ordinary person just naturally has to succumb. He has always a snatch of song with which to cheer himself, or a jest to pass along to someone else, and a laugh that is ready and infectious, and a sure cure for the blues.

"Grandpa" Grenfell was born in Cornwall when he was very young—we will not say how long ago, but sufficiently long to qualify for the prefix of "Grandpa" by which he is so well and favorably known by his confreres on the road. He says that it was between fifty and eighty years ago, but it seems impossible that he could have learned so much of stoves and tinware in so short a time.

Reared as he has been in the vicinity of the Cornish tin mines, his ideas naturally turned in the direction of mining ventures, and while still a lad he came to Canada, to assist in developing the copper properties at Bruce Mines. He found this task not sufficiently remunerative, and after a short time spent there, turned to salesmanship. His first experience in this line was in selling stoves for the James Stewart Company, of Hamilton, but for long over thirty years, he has occupied a similar position with the McClary Company, of London, covering various territories in their interests, but more particularly that part of Ontario known as the Western Peninsula, in which he has a very large number of warm friends, which claim, in a lesser degree, may be said to apply to the whole Dominion.

It is very hard, nay it is impossible to get "Grandpa" to talk about himself to his own glorification. He will recount errors—but hits, never. Hence, the task of compiling his biography has been one long and arduous pursuit of his friends for the valuable facts of his life that were in their possession.

He admits that, as a youth, he twice offered himself to his country as an applicant for the Queen's shilling, but was refused on account of his lack of height. Had he been accepted it is quite possible that the achievements of "Bobs" and Kitchener would have suffered in consequence, for it is a certainty that to any man who knows stoves and enamelware as he does, the sizing up of the British Army would have proved but a mere detail. And any man who knows human nature well enough to make the quality of salesman that he is, could not but have helped to make a leader of men.

Fond of a joke, he has been the victim of many. It is said of him, when first commencing on the road, and not being familiar with trade terms, he was asked

E. H. GRENFEL.

for pits (meaning the price of copper pits) and replied promptly, "Fine, saw him this morning."

On another occasion, whilst asleep in the car (and presumably snoring) some mean man surreptitiously removed his teeth, painlessly and without the aid of a dentist.

But do you think any of the boys could put him on his back? Not much! Grandpa came from Cornwall, that county famous alike for tin and wrestlers and he can still slap the shoulders of the best of them on the mat.

Even his misfortunes are a joke. It is said of him, (and mind, this story is not vouched for) that upon his arrival in this strange land, whilst the burr of Cornwall still stuck to his tongue, that he made unfortunate acquaintance with a porcupine to the sad point of having several of the barbed quills of said animal run into his hand.

In recounting the adventure at the moment of greatest pain and excitement, he said: "Damme, never zee such hair on cat nor dog, her's got feathers on him like a gad, yon." For the benefit of the unitiated, it might be added that a gad is a sharp pointed mining tool.

To get back to our bacon, he is never completely happy except when on the road, pushing his stoves, enamelware and tinware. They say that it gives him positive pain to see the goods mishandled either in the selling or the use of them. His knowledge of their points is positively uncanny and as previously hinted, it is to be surmised that he, walked the earth for centuries in other incarnations, getting stove dope.

Be that as it may, he is, in the opinion of stove men, be they competitors or customers, the grand old man of heating in Ontario. He will not like this nor will his innate modesty allow him to appreciate any thing of a laudatory nature said about him. Nevertheless, this is a free country and as citizens of it, his friends have the right to eulogize one whom all unite in hoping may be spared for many years to come to call on the stove trade of Canada.

It is to be hoped that he will continue for many years his happy task of disbursing his hard-garnered information to a thirsting world as he goes down this broad highway. Unhappy off the road, may he long continue to shed radiance on it by his beaming smile, his ready wit and cheery voice.

If this were only a banquet instead of a biography, it could only be fittingly concluded by all standing as they sang "For he's a jolly good fellow."

The Problems of the Small Retail Dealer

One Bad Feature in Retailing is the Danger of Overstocking—When to Take Losses—Taking Cash Discounts—Watching the Trade Papers—Importance of Advertising.

EVERY retail merchant, whether he be located in the largest town or the smallest hamlet, is confronted with business problems. Many of the problems require close study, and are only solved after much experience and expense. At the recent Ad Club Convention held at Toronto the problems of the small retail dealer were discussed, and the chief speaker on the subject, Henry R. Young, of Columbus, Ohio, opened his address by quoting the statement of Bradstreets that there were more merchants who failed because of incompetency than because of lack of capital—a statement which he believed was considered correct by every business man who had given much thought to the subject.

"Incompetency," said Mr. Young, "in retailing covers a multitude of sins, but the worst is generally conceded to be that of over-buying. Statistics prove that many failures during 1913 in the United States and Canada were due to this fault.

"Months before the selling season starts, many injudicious merchants are persuaded by the smooth, experienced salesman into believing that his particular line of goods is going to sell like hot cakes. Frequently the merchant feels that he is induced to place an order on account of other relations with the firm.

"Frequently the styles in wearing apparel and novelties change in color, cut or shape before the retail season is fully opened. By this time the manufacturer has sprung something new, hence the retailer, in order to keep his stock up-to-date and hold the trade, is forced to heavily re-order, and is also compelled to sacrifice the greater part of his earlier purchases at a loss, in order to secure the money necessary for the second purchase.

"If the retailer of changeable styles would take his previous year's business as a basis when buying for the season and order no more than one-third of his needs, then later on as styles change, buy as his sales require, he will find at the end of the season that he has operated at a profit.

Frequent Turnovers.

"Every stock should be turned at retail from three to twelve times a year (according to the stability of the merchandise). In specifying retail trade it means if the merchant has an average stock through the season of $10,000 at retail selling price, then he should do, if his stock calls for a four times a year turn—a $40,000 business.

Take Necessary Losses.

"Even when the injudicious retailers discover that they have purchased unwisely, they are slow, or sometimes lack the nerve, to take what sooner or later must become a necessary loss. The successful retailers, big and small, act quickly in turning stock, thereby getting the cash to buy what the trade is demanding.

"Another big financial error many small retailers make is their failure to take cash discounts. Few realize what

An exceptionally well-balanced refrigerator advertisement by The Baxter Hardware Co., Windsor, Ont. The ad. occupied only a small space but was very effective.

a high price they pay for the privilege of taking full time on their invoices. For instance 1 per cent. in 10 days on a 30-day bill means 12 per cent. per annum. Example: Invoice $1,000, 30 days net, 1 per cent. cash in 10 days. If the merchant pays in 10 days he receives 10c cash discount which in effect is the interest the wholesale house pays him for the use of the $1,000 for the twenty days unexpired time. This is at the rate of 18 per cent. per annum.

"The value of discounting one's bills does not only lie in the amount thus saved. The prestige which comes with gaining a reputation as a firm who discount their bills is worth a great deal.

First Cost Not Whole Cost.

"Some retailers neglect to figure selling or overhead expenses on top of the first cost. Example: If a retailer is doing a gross business of $50,000 a year at an expense of $10,000, then he is doing business at a cost of 20 per cent. of his gross sales. If he pays $1 a yard for goods, he must sell at $1.25 to recover his net cost and the retailer who figures otherwise is a loser.

"I know a lot of small retailers who are laboring under the false impression that they must personally do so-called chores about the store, work which a ten-dollar-a-week clerk might be instructed to do. These merchants had far better be taxing their brains, estimating with care possible sales, making sure that expenses are reasonable and generally looking to a profit-making stock turn.

Importance of Show Window.

"I have known retailers to let window displays stand from one to four weeks until the goods become dusty and fly-specked. The retailer who is neglecting his windows should stop and do a little figuring and he will discover that he would not agree to pay $3,000 for $10,000 storeroom without windows, and consequently he must be paying about $7,000 a year for his display—it is commercial suicide to neglect this.

"Again, many retailers change their show window displays during the busiest hours of the day, when the streets are crowded with shoppers, while the rightly conducted store engages experienced window trimmers to make these changes over night, having the displays ready for business in the morning. Changing show window displays during shopping hours is much like taking the highest-priced salespeople off duty when the store is full of customers.

Watch Trade Papers.

"Of course I realize that many stores are not large enough to justify the engaging of an experienced window trimmer. In these cases, I would suggest the proprietor or manager giving this work personal attention. If he watches the trade papers in his particular line, he will secure many valuable ideas of how to display successfully his merchandise.

Advertising Important.

"Out of 11,143 small retailers in the United States who closed their doors in 1913, it is claimed over half of them did not realize the necessity of proper advertising and many of those who did were at times careless in the preparation of their copy, and they scattered their appropriation by going into every publication, program or scheme presented, thus

destroying the possible and profitable effects.

"Some small retailers advertise just because their competitors do—considering it a necessary evil. They buy space and prepare copy with just about as much pleasure as a child takes castor oil. It seems drudgery for them to furnish copy or even make suggestions to the advertising solicitor, who, I believe in many cases, would gladly assist in preparation of copy if requested to do so. Why, some retailers when called upon for copy (according to contract) look in disgust, saying "I have been busy buying goods, taking care of correspondence; I haven't had time to write an ad., I have so many other things more important to do." The result is the solicitor finally gets an order to repeat any old ad., and possibly a slurring remark, "I may as well throw my money in the sewer," yet these selfsame merchants wonder why advertising doesn't always pay.

"Advertising under such adverse circumstances cannot possibly produce a satisfactory measure of results for any merchant, be he large or small.

"The big, successful store is simply a result of organization made possible by concentration of capital, backed up by good and continuous advertising. The large successful merchant not only buys advertising judiciously, but engages the best talent to prepare the right copy about the right merchandise at the right time.

Nationally Advertised Brands.

"The competent, experienced merchant whether large or small is also shrewd in taking advantage of the advertising done by manufacturers of trade marked goods. He makes attractive show window and interior display, especially at the time certain trade marked goods are to be advertised in the newspapers or magazines. He also calls attention in his own advertising that his store sells nationally advertised articles. The incompetent or thoughtless merchant not only overlooks these opportunities but goes so far as to offer patrons a substitute, thereby losing all the effects of a national advertising campaign.

"The merchants who are overlooking nationally advertised trade marked goods possibly don't know their value. Recently capitalists who tried to purchase the Walk-Over shoe factory, appraised the trade marked name "Walk-Over," at $5,000,000. Coco Cola Co. places a value of $5,000,000 upon its trade marked name, while the National Biscuit Co., estimates the value of the word "Uneeda" at more than a million dollars for each letter in the word.

Harmony in Organization.

The competent merchant and his sales organization work in harmony. Every salesperson is informed of what has or is going to be advertised, and how properly to present the goods to the shopper. Nine times out of ten the incompetent merchant even fails to notify the sales people about the advertising."

The Discussion.

Immediately after Mr. Young's address a discussion took place in which a few present took exception to some portions of the address.

FROM NEW ZEALAND.

Hamilton, N.S., 5 June, '14.
MacLean Publishing Co.,
Publishers,
"Hardware and Metal,"
Toronto, Canada.

Gentlemen, — Herewith I have pleasure in handing you Post Office order for 16/8 in payment of "Hardware and Metal" for the year ended December 31st, 1913. As you will observe from the enclosed circular the ironmongery business of "Gruar, Morton, Sample, Limited," has been sold to the "Hardware & Metal Stores Limited" as from the 1st December last.

I have arranged with the successors of this Company that they will continue their subscription to your journal as from the 1st January of 1914 and will accept all responsibility for payment as from that date.

I have found "Hardware and Metal" even in this distant Dominion a most useful publication and I wish it every success.

Yours faithfully,
Gruar, Horton, Sample, Ltd.,
WM. GRUAR,
Governing Direct.

One merchant took exception to what Mr. Young had said regarding the proper time to dress the show window. The merchant stated that he believed the best time to dress a window was when people were passing, as any moving object in a window always attracted considerable attention. The merchant stated that on several occasions he had watched to see results when a window trimmer was in the window during business hours, and he felt satisfied that a great many people had been attracted by the activities of the window trimmer.

Another merchant located in an American city asked some pointed questions. He said that in 1913 he expended three thousand dollars in newspaper advertising. He did a good business that year, but he could not say where he had secured any extra business on account of his newspaper campaign. This year he has not spent any money on newspaper advertising, and up-to-date this year he has done more business than he did during the corresponding period of last year, when his advertising appropriation was extremely heavy. He asked Mr. Young if he could explain the reason for such a peculiar situation. Mr. Young explained that advertising did not jerk—it pulled, and the merchant is now getting returns from last year's advertising. Mr. Young also explained that a big advertising appropriation could be injudiciously expended in mediums that do not reach the right class of readers. Poor copy is also another reason for some campaigns falling flat. He also explained that when a merchant starts an advertising campaign he must have the merchandise and the service to back up his advertisements. All departments must work in harmony if satisfactory returns are desired.

BUILDERS' HARDWARE ROOM.

(Continued from page 42.)

refusing to decide questions of store policy that in its opinion should come within the scope of the employees. The aim is to create a resourceful staff, the individual members of which will each shoulder his own troubles instead of piling them on a management that may have other matters of greater import to settle. The material result appears to be a model store.

A New Movement.

Hardwaremen in general appear to be taking new interest in the old questions of price-cutting and the extension of immense credits, so that it is not too much to prophesy that a new era is dawning—one that will eventually see these evils disappear.

They have been carried to excess in many places, and it behoves Canadian hardware men to heed the gratuitous warning.

Builders' Hardware Window.

Garner Bros., of Niagara Falls South, Ont., get some of their most artistic and selling effects in their windows in builders' hardware and specialty lines which have a rich appearance on the proper background.

The brass and glass hardware of the builders' lines, phonographs, and electrical supplies are all peculiarly fitted for window trims, and they use them to advantage.

Present-day Problems in Builders' Hardware

Builders' Hardware Dealer Should Get Orders Early in Season—Pressing Necessity of Customers' Education in Artistic Ideas—Specialty Lines the Most Advantageous for Quiet Times.

"WHAT would I do at this season if I was still in business?" repeated the old dealer after me.

"Why, I'd pile right on to the builder's end; in fact, I'd have started long ago and I'd feature it on every occasion during the dog days. It's a good line right now, but it'll be a better one a little later on in the fall, when the contractors get to slapping in doorknobs, locks, hinges, transoms, and so forth. The contract for the hardware for just one house makes a nice little bill, and each house that is outfitted adds just that much more to a man's stock of profit and information."

"What do you mean by 'piling on to the builder's hardware?' Just what did you have in mind?" I asked.

He laughed. "All good selling and advertising schemes in general, son, and one in particular that is very frequently overlooked by those who should know better."

"What's that?"

"Just this, the requirements of every room and every house may differ, so that to carry a stock that offers a liberal selection is an impossibility for the average dealer. Failing such a large stock, he hasn't a decent variety to offer the builder who comes in a great hurry for a bill of goods. But, making the best of a bad job, he offers what he has, and the builder, knowing that he can do no better in the other stores, takes it. The consequence is that after a deal of window carving, spoiling of frames and marring of doors, they kill the appearance of a room that is done up in light colors by placing in it hardware that is meant for some rich-looking dark interior. Result—a dissatisfied buyer; lesson—none, for they both do the same thing next year. The builder will again put off until the last moment the ordering of his goods and the dealer will stay in his store and wait for the order. I always used to plan to get out and sandbag the builders for their orders as soon as they had their plans. A moment's reflection will convince you that it's the only sane thing to do. An architect or contractor, once the owner decides to go ahead with the plans, can as easily determine the amount and order the builder's hardware as he can the brick. It's all nonsense for them to do otherwise, and it's the bounden duty of our dealers to educate them up to it. They can't carry a stock sufficient to fill unexpected orders and they want to give good service, so it's a case of making a jobber's order out of every bill that comes in."

"Another thing that the dealer should get busy on is the education of his trade along aesthetic lines."

"Don't laugh," he said to me as he caught my grin.

"People who are building houses engage high-priced architects to lay that house out, not only on practical, but on artistic lines. Now, why in the name of all that's wonderful should a man plan an expensive and artistic house, with rooms of different size, light, and of use, and then deliberately turn round and do as a man I know up in St. John's did. This fellow used to live in British Columbia and was used to bungalows; so what did he do but put hammered brass hardware all through his new cold climate house. It's a mighty nice line in its place, such as summer houses and certain rooms, but the effect was awful here. I wouldn't have considered anything but glass in some of those rooms, and some of them wanted a dark gunmetal finish so bad they almost talked."

I had my man going now and just sat back, afraid to breathe for fear of disturbing the golden flow.

He continued: "Another thing that appears to be making trouble for some of the boys is the shading of prices. That was not so in my day, but they tell me that profits are down to bed-rock now and that owing to the ignorance of the buyers, the lowest price article is often the one that sells. Something should be done about that last to protect both the dealer and the customer. The manufacturers are getting out so many alloys that the only safeguard appears to be in the stamping of brass goods just as is done in the case of silver. The manufacturers of the superior lines would do well to do this; it would corroborate the retailer's argument when he tells the customer that he has to ask the higher price because he sells the superior article."

"It's funny what people will do to make an apparent saving. They'll put a good honest lock in front for the looks of it and then make up the difference on the back door, which is so fitted that a sick kitten with a hair-pin could pick the lock. It's all a case of educating the consumer to more practical and also more artistic ideas. Just think what it means to a house to have every room of it furnished in taste. It's worth the trouble of convincing the owner just to see the result afterwards. Also, the artistic lines run into a little more money, too. Hand-chased goods are very beautiful and the extra cost of installing them in an ordinary house does not exceed twenty-five dollars. The increasing use of glass hardware adds another string to the dealer's bow. The idea is to treat every room as a separate problem and do a work of art in each. Study the later use of the room, shape, size, lighting, etc., and outfit it accordingly."

"Of course, I'm a has-been and perhaps I shouldn't be standing up here on my hind legs talking like the incarnation of wisdom; but, somehow, I just can't help but take an interest in all that the boys are doing. They're such a darned decent bunch and keep me so well posted on what's what in the trade that I have managed to keep up fairly well with the trend of events. Hardly a week goes by that I don't hear from one of them telling me of a good month he's had or a new line he's taken on."

"They all tell me that it's the specialties that pay the profits, just as they did in my time. However, the specialties of my time are the staples of to-day, and so it must always be. Mighty good reason that for a man to make hay while the sun shines. These glass lines in builder's hardware appear to have all other lines on the run for popularity, and I hear a good deal about glass rush plates and knobs and French lever handles going into a class of houses that used to use porcelain and plain metals. One of my old friends who is now in Victoria is very enthusiastic about a combination refrigerator and dumb waiter that he is putting into a lot of new houses. All of the boys are shouting for shutter workers, sash balances, concealed transom operators and other small specialties. I always found that it was during these quiet times that it paid to shove these little extras. I remember once I——"

"Good Lord, it's three o'clock, and I promised to take my boy's kids out to the circus."

He had taken his hat off early in the conversation and it lay beside me as he made a dash for the street car. I shouted to him and held the hat up. He shook his head and grinned sheepishly, but I could not make out what he said beyond an unintelligible something about "——kids—late—crying." And in a moment the car had carried him around the corner and out of my sight.

The Manufacture of Gas Mantles

Written for Hardware and Metal by J. H. Ladd, of Hamilton Gas Mantle Co., Hamilton, Ont.

THE manufacture of incandescent gas mantles is practically a new industry in Canada. Heretofore dealers and consumers have had to rely chiefly upon foreign makes, upon which there is a duty of 30 per cent. The retail proceeds from the sale of gas mantles in Canada amounts to upwards of $1,000,000 per annum, and it is said that the consumption of gas mantles in Canada foots up to five million mantles per annum. At the request of an editorial representative of Hardware and Metal, who recently visited and inspected our plant, I will endeavor to impart to the readers of Hardware and Metal some information regarding the interesting process of manufacture through which the mantles pass.

For many years after the introduction of the incandescent gas mantle by Dr. Aur, of Welsbach, Austria, the foundation or knitted fabric of the mantle was made from cotton, and is still largely employed by some manufacturers, but since the machinery for the treatment of the ramie fibre (a grass which is grown in India) has been perfected, the ramie has superseded the cotton in the factories of Great Britain and Germany, this fibre having been found far superior for mantle making, due to its long fibre and consequent regularity in spinning.

The first process in the mantle factory is the knitting of the ramie yarn by special machines, which makes it into tubular form of about thirty yards in length, the width being regulated by the number of needles employed on the machines.

The fabric as it comes from the knitting machines is submitted to a bath of certain acids in order to eliminate all impurities, natural or otherwise; it must be rendered chemically pure before treatment with the nitrates forming the composition of the finished mantle.

After careful drying of the washed web, it is impregnated with nitrates.

Following the impregnation, the web is dried by a blast of hot air, after which it is cut and sewn on machines, according to the various designs of mantles required. The sewn webs are then submitted to the action of high pressure gas for the purpose of burning out the ramie fibre, thus leaving the ash only of the nitrates now converted into a metallic oxide. This is again submitted to a high pressure flame, which shapes and hardens the mantle. The mantles are then dipped in a solution of collodion, forming a stiff coating, and which prevents breakage in transportation.

Testing machines in Gas Mantle factory.

THE M.I.A.

The Mutual Improvement Association is a society that Hardware and Metal readers are cordially invited to join. It is here and now fathered in Sincerity out of Good-will for the purpose that the name implies, the improvement of one and all. Individual members may help themselves by constantly watching for small errors, hasty speech, careless work in sweeping or in selling. And they may help us all by keeping in touch with Hardware and Metal, suggesting new topics for discussion, and by criticizing or praising the old.

CHECKING STATISTICS.

IN a recent investigation of nail retailing, the results of which appeared recently in Hardware and Metal, the investigator gave a rating of 100 per cent. to only one store of thirteen visited. A few days afterward the same man investigated paint retailing, and the outstanding feature of his report was the very poor account he gave of a certain dealer. Now, this investigator was totally ignorant of the local trade, and had never before heard the names of the men he called upon. But when he came to check up he found that the 100 per cent. firm, although not doing the largest business in the city, for they are located on the outskirts, bore the reputation of being the most wide awake in the city, and, incidentally, the members of it are rated as wealthy men, and last, but not least, gentlemen in every sense of the word.

On the other hand, the paint man was found to be one who was looked upon as a hopeless case as a business man by the jobbers and the trade generally, even to the extent of not being able to get an order filled unless it should be accompanied by the cash.

Could any better argument be advanced in support of the self-improvement than Hardware and Metal is constantly advancing? This is in every detail an absolutely authentic case in which an average man reached the same opinion about two stores that represented extremes of management as the consensus of trade opinion had already arrived at. It goes to show that the retailer who is satisfied with a store and methods that the trade journal and the practice of his friends in the trade condemns as archaic would do well to heed the still small voice and—get busy!

SIGN OF 1915. SPRING.

The fishing tackle traveler, who might be almost termed the robin of the hardware trade, has made his appearance in Montreal, and is about the first sign of spring business. Mr. Reed, of Horrocks, Ibbotson Co., Utica, N.Y., is the first of the men out with the fish tempters. R. E. Bass, of the Williams Stove Lining Co., Taunton, Mass., and F. Clive Hatch, representing the Martin Mfg. Co., of Whitby, Ont., were in Montreal during the week.

Merchandising Methods and Specialty Lines

General Description of One of Niagara Falls Stores — Heavy Sales of Electric and Other Specialties in Midst of Electric Store Competition—Description of Excellent Window.

An authorized interview by a Hardware and Metal representative with W. D. Garner, of Garner Bros., Niagara Falls South, Ont.

I HAVE been in business here since 1884, long enough to have learnt that some lines that were profitable then are no longer desirable, and that others that were undreamed of then are now among the hardware dealer's most profitable ones.

We rather pride ourselves on the appearance of this store, and a brief description of the general scheme of it might not be amiss. The store itself is almost square, so that the customer, upon his first entrance, can get as good an idea of the stock in the rear as that at the front of the store. The first thing that meets his eye is a handsome showcase that is used for the display of cutlery, scissors, and other showy goods. The front of the store is so well lighted that considerable care is exercised to show there only those things that invite the light of day and show off to the best advantage in a bright light. The store itself is devoted to hardware stocks exclusively, and other lines are kept elsewhere. We use fancy lockers for shelves and all the other modern adjuncts that go to help out a store's appearance.

The bulk oils, turpentine, etc., are stored in a special building at the rear. In this connection I might say that we carry several varieties of special automobile oils that offer a good profit and a ready sale. The small lots of oils, varnishes, and paints are stored upstairs with the granite aluminum and wooden ware.

In the warehouse at the rear are bulky and heavy lines, such as bar iron, nails, poultry netting, pipe and fittings, beaver board, etc. Firebrick, tile and other non-perishable goods are piled in the yard, and the whole stock is so situated and piled as to render the handling of it economical.

We consider our electric goods department one of the most profitable features of our business. This may appear strange, in view of the fact that we lie in the cheap power district, which is overrun with electric specialty stores, but it is none the less true. We eschew jobs and contracts and centre our work on the sale of the goods themselves. We do this to such good effect that our electric store competitors often come to us for a good part of their orders. A specialty business should always be a side line in a small town, so that the hardware man usually has the advantage over the man who carries one line to the exclusion of all others. I presume that this also applies to other lines, such as auto accessories, etc. At any rate, our electric fixtures make a splendid side line. The investment of our stock is not large, the overhead charge for adding another line to a working business is nil, and the same clerk hire, rent and light covers the increased business that occurs under the same roof. I cannot speak too highly of this line, which in our particular case embraces all sizes and varieties of house wire, all sizes tungsten and carbon lamps, switches, tubes, knobs, drop cords, fans and out-and-out specialties; in fact, a full line of both electric supplies and specialties.

Our chief pride is our windows, for we have good ones, and it is our aim to put first-class displays in them. The present one might safely be called a good example of our practice in this respect. It is almost a straight builders hardware window, and is laid out with a Yale cabinet for a background on a floor that is covered with cheese cloth that is artistically puffed and draped so as to give soft lines to the whole. A handsome phonograph (another of our specialty lines) stands on either side of the cabinet. In front of these three pieces and at proper intervals are draw knives, keyhole and carpenter saws, door knobs, locks, etc. Encircling the whole is a continuous chain of gunmetal and brass hinges and fixtures of various kinds. The delightful contrast offered by these metals against the soft sheen of the cheese cloth is very catching, and this is particularly so in the case of the gunmetal. The whole effect is aided by the presence of a large number of electric lamps overhead and on the wall, among which are a couple of special window display lamps that materially assist any window trim.

There is no doubt that hardwaremen are constantly going in for new expenditures in such lines as these lamps and other modern selling aids. Things change so rapidly, old ideas going and new ones coming, that he who fails to grasp the opportunities offered by the use of new store conveniences and the sale of the specialty hardware lines that are peculiarly adapted to the hardware trade is passing up golden opportunities.

WESTERN NOTES.

The Tourtellot Hardware Co., Port Arthur, will shortly double the size of their store.

The Fife Hardware Co., Fort William, will shortly open a retail store at Fort Francis, Ont.

The Little Current branch of the Cochrane Hardware Co. has been purchased by the manager, W. H. Hawkins.

Roy Abbott, clerk in the Soo Hardware Co.'s store, Sault Ste. Marie, has gone to Kingston for his vacation.

Charles Ferguson, a traveler for the Cochrane Hardware Co., Sudbury, has severed his connection with that firm.

Graham & Graham, dealers in sporting goods, Sault Ste. Marie, will shortly go more extensively into the automobile accessories business.

P. Knibbs, who has been with the Fort William Hardware Co. for two years, has started business as a plumber in partnership with A. W. Gough, Brown street, West Fort William.

The James Purvis Co., Sudbury, are removing the front of their store, built by the Hudson's Bay Co., 25 years ago, and are replacing it with a modern front, with two large display windows.

E. H. Barnes & Co., sanitary engineers, 344 Queen St., Sault Ste. Marie, will shortly move into larger premises and will instal one of the finest displays of plumbing goods in Western Ontario.

Among the stove travelers who recently called at Sault Ste. Marie were Jack Findley of Findlay Bros., Carleton Place, and Charles Connors of the Beach Foundry Co., Ottawa. The latter has gone on to Winnipeg.

The Cochrane Hardware Co. have prepared plans for the enlargement of their Sudbury store. When completed, there will be seven display windows, instead of three as at present. There will be three floors, served by an electric elevator.

Colville & McLaughlin, who succeeded W. G. Colville, Fort William, have opened up for business at 111½ May street, South. Geo. P. McLaughlin was with Gerry Bros., Fort William, for nine years. Gorden R. Colville is a son of W. G. Colville, now traveling for the Marshall-Wells Co. He was previously with H. H. Otton & Son, Barrie, Moore & Brown, Sault Ste. Marie, and Wood, Vallance & Co., Hamilton, in their wholesale department. They will specialize in tools and builders' hardware.

Western Observations

By "Winnipegosis."

OF all the lines that hardwaremen find easy to handle on the side, furniture seems to find most favor, especially in smaller towns west of Winnipeg, where the competition of big furniture houses is not felt. Recently I wandered east as far as Sudbury, Ont., and there met a hardware merchant who launched out into the furniture business by a curious accident.

The Sudbury Hardware Co. opened up early this year in a nice new store, and it was their intention to do an exclusive hardware business. A love affair caused them to handle furniture as a side line—because a girl had jilted a youth. This is how it came about.

Shortly after the store opened, a traveler for a furniture concern, almost out of idle curiosity, entered and engaged the proprietor in conversation. A young man who was standing near ventured the remark that he was thinking of marriage, and although the event was yet two months ahead, he would buy his furniture now if the Sudbury Hardware Co. would hold it until required. Never was a new business begun under such happy auspices. The future husband started out to feather his nest, ordered elaborate suites, and concluded by adding many household goods, such as a stove, a washing machine, and utensils.

To prove his good faith he gave the merchant a cheque for $100, and in course of time the furniture arrived, and was stored in the rear of the establishment, pending the tying of the nuptial knot.

But, alas and alack, the fickle woman changed her mind, it is alleged, and the nest would not require feathering. The youth forfeited his deposit, and the hardwareman had sufficient furniture to start a separate department to his business. That is why the Sudbury Hardware Co. is not an exclusive hardware store to-day. John A. Moore, one of the proprietors, informed me that they intend to go more extensively into the furniture business.

A curious thing about the hardware business in Sudbury is the number of new establishments which have sprung from a parent stem. As the population of the town has almost doubled in the last five years, the prospects for new businesses have been good. James Purvis moved into Sudbury twenty-five years ago, coming from Barrie, where he and his brother David had been in business together. The latter is now in business at North Bay.

James saw a future for Sudbury, and opened up in a frame building on Elm Street. Ten years later he purchased the old store of the Hudson's Bay Co. His first clerk was Robert Horne, who also came from Barrie. After being in the Purvis store for six years, Mr. Horne started in business for himself on Elm Street, and has since acquired considerable wealth.

Then came F. R. Ricard and his brother Emile. The former was head clerk, and his brother was the junior. To-day they have their own business on Elm Street, and secure a good part of the French-Canadian trade. They were followed by Lorne Fowler, who stayed six years, and George Winsor, who was with Mr. Purvis for a year and a half. These two are doing business to-day on Cedar Street as Fowler & Winsor.

A similar thing happened in the plumbing end of the business. J. R. Wainwright came from Winnipeg to be foreman of plumbing and tinsmithing. A year ago he opened up for himself on Durham Street, taking the bookkeeper into partnership with him. The latter, Percy Morrison, who started with Mr. Purvis as a boy, has since opened his own plumbing shop, and both he and his former partner are doing well. James Purvis abandoned the plumbing end when his staff opened up in opposition.

YOUR CREDIT.

One of the most common causes of friction between the wholesalers and the trade in Western Canada is the scant courtesy and lack of respect shown by a large proportion of the retailers to their notes and acceptances. The thought of "Thank heaven, I'm rid of that," when a note is signed or a draft accepted, still prevails with a lot of men in business out West to-day. If you find this is exaggerated, ask the next credit man you meet and listen to his language. What is your promise given in writing worth, friend? Do you take any precaution to see that it is carried out, and if you find yourself unable to carry it out, do you get in touch with the man you gave it to before he gets in touch with you? Every time you don't do this, it is recorded against you in some firm's books. The black mark stays there too and it's often referred to, particularly when confidential information is exchanged between one wholesaler and another.

Your credit is good now—keep it good—it's about the most valuable asset you have if you only realized it—it's sometimes worth more than cash in the bank. Of course you can't always "come through" on time—we all know that, but you can always write and tell your man, or phone or call and see him on or before the due date. Give him your spiel and make him an offer before the due date—you'll get better consideration by a long chalk than if he has to find you after that time—he's in a different frame of mind. Sometime you're so "durned" busy selling goods you forget all about it, eh? Your credit mark's going down all the time just the same. Try this little idea—Get a diary—every business man should have one anyway. Every time you sign a note or accept a draft, enter up in your diary seven days before the due date, amount, name, and where payable. You might also find it useful for other stuff too, such as "John Jones promised me payment to-day;" "Alf. Brown gets his wages to-day—he owes me $20.00;" "Insurance on stock lapses in 10 days from to-day," and so on. Get the habit of looking at your diary right after breakfast. There'd be an end to those nasty jarring letters from those "hawk-like" credit men. They do jar sometimes, and they sometimes all come together, don't they?—then the poor salesman gets it in "the neck" on his next visit.

We won't deny that there are a certain number of merchants and painters, whose word is their bond—they'd no more think of letting their paper go back ignored than trying to jump over the moon—their number does not increase at an alarming rate though—but still, as few as they are, it is a pleasure to look at their name on the books and to do business with them—you can read their character by their account—they're not always rich, mind you, but they're always cheerful, and possess an orderly mind and an orderly store and we know they're looking after the selling end of their business too and that they'll make good. They can insist upon and nearly always get the best of terms, prices and consideration from the wholesalers and they deserve it.

Which crowd do you belong to, friend?—Stephens Paint News.

To Sell Cleaners in Canada.

The B. F. Sturtevant Co. of Canada, Ltd., Galt, Ont., intend marketing their vacuum cleaners in Canada. The cleaners are sold extensively in the United States under the name of the Western-Electric-Sturtevant Vacuum Cleaner.

THE WASTE OF VALUABLE HUMAN MATERIAL.

Interesting Extracts From the Speech of the President of the Western Union.

I believe many men who fail lose principally through lack of putting their best goods in their show windows. The window itself is of little or no importance; the goods in it, and their arrangement, are of paramount importance. If a man's best goods are not in his show window, how is the world to know that he possesses them?

Business needs to pedigree its forces. It now selects leaders through the application of methods so haphazard that anything like them instantly would be rejected by the foreman of a stock farm in his management of animals. The knowledge at headquarters of the men employed by any of the great corporations is not quite nil, but it is wholly accidental. Hence it is extremely wasteful.

The men under him form the material with which every employer, large or small, must work. Small employers study this material and gain thereby. If they study it aright they cease to be small employers and become great ones.

But the minute they become great ones, under our present system, they lose track of individuals.

If our great employers knew as much about the men at work under them as a good carpenter knows about the boards and timbers which he puts into the building he constructs they would be amazed by the high average of their working rank and file.

The best proof which can be cited of this—and it cannot be doubted—is the fact that corporations do succeed, and that the success of every corporation in America or elsewhere is dependent upon the performance of the average man within the ranks of its employees.

We handle human material in far more slovenly fashion than that in which we handle boards. The lumber dealer goes through his yard and grades his stock. He lays aside the best, the knotless, straight-grained boards, and charges high prices for them. The carpenter who buys them knows them to be good and puts them in important places in the structure which he builds.

No one has ever done this with men and women. The great employer who first discovers how to do it will, in his turn, immediately be magnified and become the greatest of employers. The corporations now are putting loads for 8x8s on 2x4s and breaking them; they are putting loads for 2x4s on 8x8s and wasting them.

In the first case they wonder why there should be disaster, in the second place they wonder why there should not be success.

Such errors are probably more frequent and more lamentable in politics and Government than they are in business, but there are plenty of them in business.

I am inclined to thing that all-enduring Governments have been preserved, not so much by their conspicuous leader, as through the presence in their ranks of unobtrusive small fry truly appreciative of the majority's problems. Dryden, in accounting for the power of England, wrote:

> Time, the elements and some guiding star
> In high cabal have made us what we are.

When great business men begin to take intelligent inventory of their human assets, then will come such progress as we have not known before. But now—

Railroads keep careful records of the coal consumption and oil bills of their various engineers. That sounds like real efficiency. Is it? It is not. It is but a brief step toward it. It is good economics, of course, but it does not reveal to the railroad management the potential master mechanics who are hidden in the locomotive cab.

DETAIL.

Most great successes will be found to have been built upon the foundation of detail, without which no service is substantial. The lack of it would be like omitting to put the drier in paint.

Even most so-called geniuses admit that their great successes are built upon that definition of genius which describes it as an infinite capacity for pains. Even though they have the great idea to work on, it is valueless until it is made workable by a long course of study and painstaking labor by the one who would father it.

One of the biggest men in this country insists that his highest paid officers do a certain amount of apparently unimportant detail work. He maintains that he can get all the men he wants for big jobs, and that the woods are full of men of talent, but that it is getting harder all the time to find men who will properly attend to a lot of trifling matters, any one of which may be insignificant, but the grand total of which may spell success or failure. And even in individual cases it is sometimes found that a mere trifle lost or made success in some particular case. That is why responsible men must be willing to do a junior's work—in order that it may be well done.

There is food for reflection here for the man who considers that he is doing work that is beneath him.

COURAGE.

The courage to go in and try to win when one feels that the case is hopeless is the quality that goes to make success in the world, whether one is leading armies in war or cleaning up a warehouse that everyone else appears to be engaged in filling with excelsior, broken glass and waste paper. Consistent courage will win its way against all odds, if not at once, at least in time. Slowly but surely the effects of it will grow and spread and effect a result that will benefit the one who has practised it according to the quality and the age of it.

CONDITIONS OF IMPORTANCE TO TRADE.

(Continued from page 37.)

tical side acting as a wall against the advancing army, up which they are not able to crawl. Every ten or twelve feet along the furrow holes or pits should be dug so as to trap the worms as they crawl along trying to get out of the furrow. They can then be destroyed by burning straw over them, or saturating them with kerosene and setting fire to the mass.

Current News

Industrial.

London, Ont.—The Ideal Concrete Machine Co., Ltd., is moving from London to Windsor, where they are building a large factory.

Personals.

J. B. Archer, buyer for the A. W. Moore Hardware Co., St. Catharines, met with a painful accident last week when he fell off a ladder.

Change Firm Name.

The corporate name of Freed, Clarke & Co., Ltd., has been changed to that of the Hardware Co. of Toronto, Ltd. The firm is located at Toronto.

Dominion Incorporation.

The Arnprior Felt Co., Ltd., capitalized at $50,000, head office, Arnprior, Ont., to construct and operate felt and pulp mills, and to engage in the manufacture and sale of pulp paper, felt and woolen goods, etc.

New Firms.

Hafford, Sask.—J. H. Young has opened a hardware store.

Wawanesa, Man.—L. R. Cotton has started a tinsmith business.

M. W. Van Alstyne, Gunton, Man., was a visitor in Winnipeg Monday.

Halbrite, Sask.—Nordquist Bros. & Anderson, hardware and furniture, have opened a branch store at Talmage.

The Alex. Martin Sporting Goods Co., Calgary, have sold their Edmonton business to McLaren & Son, Edmonton.

George McCosh, of Brock, Sask., introduced his bride to the trade in Winnipeg this week.

Fire Losses.

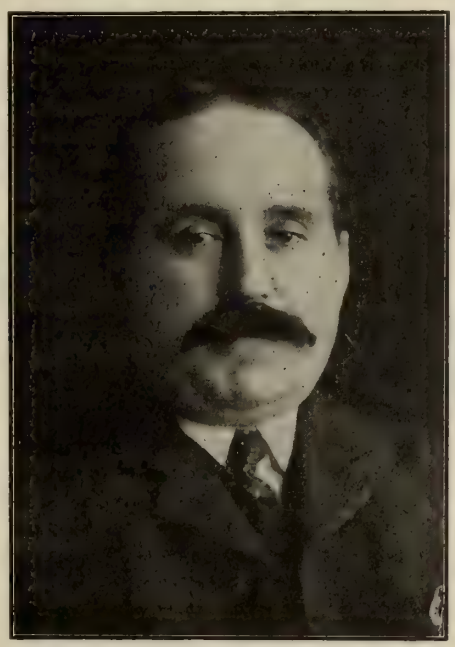
Chilliwack, B.C.—Denmark & Burton, hardware dealers, have suffered a fire loss.

Moncton, N.B.—G. A. Robertson, hardware and groceries, has suffered loss by fire.

Toronto, Ont.—The Wilkinson & Kompass stock of their Toronto warehouse was damaged by fire.

Prince Albert, Sask.—The large and splendidly-equipped store of the Manville Hardware Co. was destroyed by fire.

Business Changes.



Mozart, Sask.—G. J. Budal has sold out his hardware business.

Elgin, Man.—Chas. Mounding, hardware, is reported having sold out.

J. Wright & Son of Strathroy, Ont., have sold their hardware business.

Joliette, P.Q.—Chas. Leblanc is offering his hardware business for sale.

Griswold, Man.—D. A. McMillan continues the dissolved business of McMillan & McIntosh.

ARTHUR F. HATCH,

Treasurer and General Manager Canada Steel Goods Co., Hamilton, in which firm the Stanley Works, of New Britain, Conn., has acquired a large interest. Extensions to the plant will be undertaken at once, and will include a large rolling mill. Announcement of the change is made on page 37.

Dauphin, Man.—The Dauphin Hdwe. Co. has sold out to Sutherland Stelek, hardware and implements.

Melville, Sask.—E. & G. Smith, hardware, has been succeeded by Smith Hardware and Electrical Co.

Coaticooke, P.Q.—The hardware firm of W. C. Webster & Son will be carried on in the future by O. C. G. Webster.

Western Notes.

George M. Christie, local manager of the G. F. Stephens Co., has returned to Calgary from the East.

Mr. Allaire, of Allaire & Bleau, St. Boniface, has returned from a three months' trip to Paris.

William Home, Canadian manager for Berry Bros., manufacturers of varnishes, has returned from a trip through the West.

The Miller-Morse Hardware Co. held their annual picnic last week at Riverview Park, a special steamer being chartered for the occasion.

A. D. O'Brien, Southern Manitoba traveler for the G. F. Stephens Co., has gone to Aylmer, Ont. It is not known for sure why he has gone there.

M. S. Schroeder, Walsh, Alta., is reported to have been drowned while bathing on Friday, July 17. He had been in business there for a number of years.

F. Morton Morse has returned from a motor trip in Europe. His son, Stanley Morse, secretary of the Miller-Morse Hardware Co., has left for a vacation in New York State.

Chas. G. Johnstone, one of the best known hardware travelers in Western Canada, was married on July 15 to Miss Lulu Glenn, daughter of Alpheus H. Glenn, of Prince Albert. The happy couple have gone to Halifax, N.S., to spend their honeymoon. On returning, they will reside at Prince Albert. Mr. Johnstone has been with the Miller-Morse Co. for nine years.

The following merchants visited Winnipeg during Exhibition week:—Norman Henderson, of Henderson Bros., Vanguard and Aneroid, Sask; John Veum, Foam Lake, Sask.; T. R. Learmonth, Theodore, Sask.; T. Mair, Minnedosa; Ralph Tucker, Unity, Sask.; J. A. Schmidt, of the Blackie Hardware Co., Blackie, Sask.; J. MacGregor, of Roycroft & MacGregor, Lanigan, Sask.; R. Hutchinson, Kinley, Sask.; A. A. Ferguson, Beattie, Sask.; George Badger, Asquith; A. V. Lenz, St. Gregor, Sask.; J. Peters, Goodwater; J. H. Ellis, Ellisboro; K. Kroeker, Rhineland, Man.; Joseph Joyal, St. Agathe, Man.; and Frank Phillips, Tugaske, Man. The number was slightly less than last year.

New Hardware Goods

Offered Canadian Hardwaremen

COBBLERS' REPAIR OUTFIT.

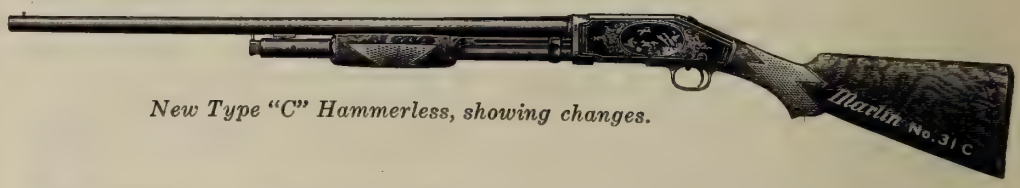
The Taylor-Forbes Co., Ltd., Guelph, Ont., manufacturers of general hardware, lawn mowers, fine castings, etc., offer the trade the new "Homestead" cobbler's repair outfit, with adjustable lasts, here illustrated. The firm claims that there has been a demand for a set, such as the "Homestead," which is being made in two sizes—one with 14-in. stand and the other with a 22-inch stand. The outfits are made in malleable iron as well as cast iron. Each outfit is put up in a neat wooden box, containing the following parts:—One adjustable reversible stand, 1 adjustable last for men's work, 1 adjustable last for boys' work, 1 adjustable last for woman's work, 1 cobbler hammer, 1 shoe knife, 1 sewing awl, 1 sewing awl handle, 1 pegging awl, 1 pegging awl handle, 1 package clinching nails, 1 package heel nails, 1 card directions for half-soling, etc. The sets are numbered as follows:—No. 1, cast iron, with 22-in. stand; No. 2, malleable iron, 22-inch stand; No. 3, cast iron, with 14-in. stand; No. 4, malleable iron, with 14-in. stand. Booklets describing the new product will be mailed on request.

Cobbler Outfit, with Adjustable Lasts.

20-GAUGE HAMMERLESS.

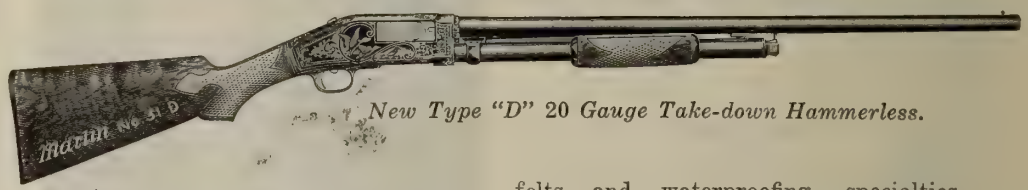
The Marlin Firearms Co., New Haven, Conn., have just completed their line of 12 and 16-gauge hammerless pump guns by the addition of a little 20-gauge hammerless repeater, as illustrated.

The standard 20-gauge is made with 25-inch barrel, weighs about 5⅞ pounds; magazine carries four cartridges, giving with one in the chamber five shots at one loading. It is a take-down, packing in a space the length of the barrel; it has solid top frame, solid steel breech, side ejection. It is provided with the usual Marlin features of safety and convenience; the automatic hang-fire safety device operated by the recoil, the trigger and hammer safety, the press-button magazine cartridge release and thumb-push pin safety for removing shells quickly from magazine and chamber without firing, when desired.



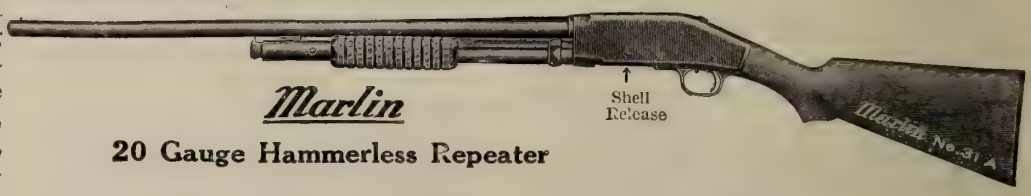
It is chambered and built to handle the 2¾-inch shells of all makes and styles as well as the ordinary 2½-inch shells, allowing good stiff loads for trap and duck shooting.

The barrel is handsomely matted on top for its entire length, which aids in quick sighting and prevents the reflection of sunlight or the heat radiation from top of barrel interfering with the shooter's aim.



The standard gun has 25-inch matted barrel, but for those who prefer a little heavier gun or a longer barrel for long range work the gun will be furnished with 28-inch barrel at the same price.

This new gun is now ready in grades A, B, C and D, and in the special Field grade, as illustrated.



Circulars for distribution, price lists, counter signs, illustrating this new gun, and electrotypes if wanted, can be had by writing the Marlin Firearms Co.

New Type "C" Hammerless, showing changes.

New Type "D" 20 Gauge Take-down Hammerless.

20 Gauge Hammerless Repeater

NEW SALES AGENT.

Alexander Gibb, St. Michael's Building, Montreal, has been appointed sales agent for the Flintkote Manufacturing Co., Boston, Mass., makers of roofing felts and waterproofing specialties. Samples and other information regarding the new line will be supplied to the trade on request.

CULTIVATING YOURSELF.

Since we are always eager to improve those about, why not get busy at home? Cultivate a sane cheerfulness of outlook and thoughtfulness of others, and those qualities will have ability and such commonplace attributes backed clear off the map as result getters.

It is well to remember that nothing really worth having was ever won in a night, but only as the result of a long course of honest attention to duty and service.

Get the hook for that nasty streak in yourself.

Weekly Market Reports

Statements From Buying Centres

THE MARKETS AT A GLANCE.

Vacations are the order of the day, and the usual summer-month quietness is much in evidence. This does not mean that business is at a standstill, for in some sections a very fair volume of trade is passing. Quite a number of hardware travellers are on their vacation, and mail orders are therefore more numerous than for some time past. The metal trades are still quiet and price shading in some lines is noticeable. Paint manufacturers are busily engaged in preparing for fall campaigns. There has been considerable variation in prices of linseed oil lately, and low prices have been quoted. The flax-seed market is on the upward trend, but some jobbers appear to be unloading stocks purchased or contracted for at low prices some time ago. At London, Ont., a carpenters' strike has affected building operations. In the West all eyes are watching crop reports, although it will be hard to judge the Western crops until a period of two weeks has passed. A number of price changes are reported at Toronto, Montreal and Winnipeg.

MONTREAL.

MONTREAL, July 23. — Hot weather and the exodus of business men from the city are having the usual effect on business and conditions are being reported as quiet, although in general lines they do not appear to be more than reasonably so and some wholesalers report a better record than for July of last year. In the metals and heavier hardware in general, and which enter into construction work, things are dull. Stove men report collections as poor and little reordering for gas stoves. In the construction metals the quietness continues with little noticeable improvement and the prospects that it will be a long heavy grade back to normal.

Seasonable Goods.

Summer weather is having an effect on reordering for some seasonable lines and such articles as ice cream freezers and wire netting are still going out, and there has been a good run on garden hose.

Nails, Screws, Rivets, Etc.

Business in this department is quiet as it is in building hardware lines in general; $2.25 base for wire nails and $2.50 base for cut nails, Montreal. Screws, rivets and burrs are unchanged and discounts are stationary.

Metals.

Conditions are continuing quiet with regard to most of the metals and for iron pipe and sheet metals there are substantial changes in the prices announced —the alterations being downward. There are small sales of bar iron and the prices are easy with the base $2.05 Montreal.

Metal Pipe.

There are substantial reductions in the quotations for metal wrought iron pipes, which are now on the following basis:

Buttwelded.

	Black.	Galvanized.
¼ and ⅜ inch	$2.10	$3.00
½ inch	2.55	3.48
¾ inch	2.93	4.08
1 inch	4.33	6.03
1¼ inch	5.86	8.16
1½ inch	7.01	9.76
2 inch	9.43	13.13
2½ inch	15.21	21.06
3 inch	19.89	27.54
3½ inch	23.92	33.12
5 inch	28.34	39.24

Lapwelded.

	Black.	Galvanized.
2½ inch	15.79	21.64
3 inch	20.65	28.30
3½ inch	24.84	34.04
4 inch	29.43	40.33
4½ inch	33.02	45.72
5 inch	38.48	53.28
6 inch	49.92	69.12
7 inch	70.21	96.39
8 inch, 25 lbs.	73.75	101.25
10 inch	94.40	129.60
12 inch	157.56	

Metal Sheets.

Reductions have been made in the price of galvanized and black metals sheets by some of the wholesalers, Queen's Head, Colborne Crown and Apollo all being cut.

Sheets Black.

10 gauge	$2.50
12 gauge	2.55
14 gauge	2.35
16 gauge	2.40
18 gauge	2.45
20 gauge	2.45
22 gauge	2.50
24 gauge	2.50
26 gauge	2.60
28 gauge	2.70

Sheets Galvanized.

	Queen's Head.	Colborne Crown.	Apollo.
16-20 gauge	$3.65	$3.60	$3.40
22-24 gauge	3.85	3.65	3.70
26 gauge	4.10	3.90	4.05
10¾ oz., 28 gauge	4.35	4.15	4.25

The above quotations arrived too late to change old current quotations.

Other Metals.

There is a change in the quotation for sheet zinc in small lots, the price going up 25c to $7.25. Other quotations:—Tin, 37½c; sheet zinc, $6.75 in casks; lead, $5.10; antimony, $8.50; spelter $6.00 and copper $15.50. Ingot brass, red 14c, yellow 13c; wire solder 23½c; half and half 22½c and wiping solder 22c. Sheet lead, 3½ lb. sq. ft., has been reduced to $6.60, a come down of 2½c.

Lead Waste Pipe.

The demand for lead waste pipe continues quiet. The quotations for lead pipe are 7½c and for lead waste pipe 9c, with discounts of 7½ per cent.

Rope and Harvesting Goods

With the exception of a demand for rope for hay forks and binder twine there is not much stir in the rope department. Harvesting activity is also affecting other lines such as pulleys for hay forks, regular hand forks and other similar lines. Prices are unchanged as follows:—Pure Manila, 15c; British Manila, 11c; African hemp, 11c; sisal, 10½c; double lath yarn, 10¼c; single lath yarn, 9¾c. For binder twine the prices are:—Best Manila, 650 feet to

pound, 13½c; Manila, 600 ft. to pound, 11c; standard Manila, 550 ft., 9¾c; standard, 500 ft., 9¼c.

Stoves and Wire Goods.

In the stove business things are quiet and a better demand can hardly be looked for before the change of the season. There is some interest being reported in the furnace lines and first orders placed. Reordering in gas stoves has been light. Collections are reported as poor. In wire goods some netting is still going out, but the business is largely over for the season; it has been a good year in regard to the netting business.

TORONTO.

TORONTO, July 23.—Steel products are causing much speculation here. Nails are slated for an advance by some authorities. The usual summer quietness is on, and is causing some shading of prices in metals and some other lines. As compared to last year, a larger amount of business was looked for on account of the fact that business dropped off in late summer and early fall in 1913. However, in spite of July business not being up to expectations, it will compare more favorably with the corresponding period of 1913 than June did. Most of the travelers are on their holidays. Cordage lines are very good; fall lines are moving, and slight changes occurred in some metals and in paint lines.

Metals.

There have been slight changes in several metals, but the general situation is unchanged. Tin has been fluctuating all week—first up and then down; but is quoted at present at last week's price of 34c. It is in slightly better demand than formerly, but orders are in small lots.

Copper has dropped 10c per 100 lbs., due to unsettled conditions and price shading. It is now $14.15 per cwt. Zinc and lead have advanced 5c each, making them $5.55 and $5.20 respectively. These lines are quiet.

Pig and bar iron are unchanged and dull.

Other metals are as follows:—Antimony, 8¾c to 9c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 12c to 14c lb.; half-and-half solder, 23c lb.; pattern aluminum, 22c to 24c; ingot aluminum, 18½c to 19½c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 21¾c lb.; wire solder, 26c lb.; tinkers' bar solder, 27c lb.; lead wool, 8c lb.

Nails, Screws and Rivets.

Steel lines are still quiet, but are the subject of much speculation. Steel men complain of the price on nails. Some authorities confidently presage a raise in this staple before long; possibly by late August. Others, equally well informed, deny the possibility of a raise in the present state of the market, and point out that the late raise of 15c in nails merely covered the new tariff of $3 per ton, so that any further raise would be in direct opposition to the United States prices that, after allowing for the tariff difference, are at the present Canadian level.

They are very firm at the present price of $2.25 base for wire and $2.70 base for cut. Screws are unchanged. Flat head, bright, are still quoted at 85, 10, 7½, 10 and 5 per cent.; round head, bright, at 80, 10, 7½, 10 and 5 per cent. Iron rivets, blocked and tinned, remain at 75 per cent., and iron burrs the same. Copper rivets, usual proportion, 35 and 12½ per cent.; burrs, 30 and 12½ per cent.

Wire Products.

Rods, wire nails and staples have advanced $1 per ton in the United States, according to advices received by the Canadian trade, but no change is noticed here yet as a result of same. Some steel men are inclined to consider the advice more of a market feeler than anything else.

Rope, Twine, etc.

Cordage lines report more favorably than any other hardware line. Ropes are unchanged at 15c base for Manila, 11c for British, 11c for African hemp, and 10½c for sisal. Other prices are steady, with no changes. Hay fork rope, duck, waste and oakum are all selling very well.

Preserving Goods, Enamelware, etc.

Preserving goods, enamelware, etc., are among the best selling lines. Freezers come next in this class. This has been an exceptional year for this class of goods. Refrigerator demand is light, but some few sales may be expected up until quite late with couples going into housekeeping, etc.

Cement.

Cement is unchanged at $1.85, and is still in good demand. Firebrick and tile are unchanged as per current quotations, and are only fair in demand.

Builders' Hardware.

This line is comparatively quiet, but specialties are selling well and replacing old articles in established homes.

Fall Goods

Horse blankets, ammunitions, guns and rifles are moving, and sled orders are also coming in. Harvest tools are still selling well, and will until the harvest is gathered.

LONDON.

LONDON, Ont., July 21.—Business in London has been very fair during the past week. The holiday season is making some difference but is not decreasing business to any great extent.

It is rumored that the striking carpenters are trying to influence the men working at other building trades in the city to go out in sympathy. If this takes place it will no doubt injure the sale of building material for the balance of this season.

Paris green has been an exceptionally heavy seller for the past two weeks and is quoted as follows:—

½ lb. pkgs. .....21¾c lb.
1 lb pkgs. .....19¾c lb.
25 lb. drums .....17¾c lb.
50 lb. drums .....17½c lb.

Binder twine is in good demand at present

650 ft. .....13½c lb.
600 ft .....11c lb.
550 ft. .....9¾c lb.
500 ft. .....9¼c lb.

Linseed Oil.

Linseed oil is showing an upward tendency. The quotations mostly in evidence are as follows:

	Raw.	Boiled.
1 to 2 bbls.	61	64
3 to 5 bbls.	60	63
6 to 9 bbls.	59	62
Less bbl.	68	71

Turpentine.

1 bbl lots .....70c per Imp. gal.
2 to 4 bbls. .....69c per Imp. gal.
5 gal. .....77c per Imp. gal.

Building Material.

Owing to the carpenters' strike the demand for some lines of building material is not heavy. Wire nails are quoted at $2.25 base; cut nails at $2.70 base.

Fall Goods.

Axe handles, horse blankets, sleighs, skates, etc., are being booked in fair quantities for fall delivery.

WINNIPEG

WINNIPEG, July 22.—Since the amount of business done by hardwaremen in the West will depend entirely on the crop, some notice has to be taken of its progress. At present, reports are not overly bright, and the best that can be said is that the crop this year will likely be seventy-five per cent. of what it was last year. There are some districts that will have no crop. There are others whose crop will measure about fifty per cent. average; and there are other districts which will enjoy record crops. Hot winds seemed to have played havoc in some districts. A telephone message sent to Virden by the Merrick-Anderson Co. to-day brought the reply

that crops would be good if they could get plenty of sun. On the other hand, between Winnipeg and Portage a failure is reported. West of Portage things are better, until west of Moose Jaw is reached. And so on. The crop seems to have come in spots, and happy are the hardwaremen who find themselves out of the lean areas.

When this state of things became known, collections took a sudden drop. During the early part of July, one house reports in ten days collections dropped fifty per cent. Confidence was restored, so that collections righted themselves in the following week, and from a financial point of view, July should be as good as last year, despite the fact that jobbers are carrying considerably less on their books. Few new accounts are being opened up.

Good Auguries.

Hardware and Metal's Western editor has just returned from a trip to the Soo, Port Arthur and Fort William. If new stores and improvements count for anything, the outlook in that part of the country should be good. In Port Arthur, one hardware firm is preparing to double the size of their premises, and instal new fixtures. At least one new store has opened up. Colville and McLaughlin were arranging stock in their new premises at Fort William. In the Soo, the Cochrane Hardware Co. are in their magnificent new home, while another house is preparing to add up-to-date fixtures. In Sudbury, one firm was doubling their premises, another was putting in a new front, and a new store had opened its doors.

Price Changes.

The discount on galvanized washtubs and buckets has been changed from 37½ per cent. to 45 per cent., and the discount on heavy buckets, which was 30 per cent. is now 37½ per cent. All other galvanized ware remains at 37½. Several hardwaremen who have recently purchased galvanized ware complain that they did not receive a bigger discount. It should be borne in mind that the change applies only to the above three lines.

Manufacturers insisted that the price of rope would rise as a result of the trouble in Mexico, but up to date this has not taken place. Nails remain at the old price, with only a fair demand. Manufacturers are still urging local jobbers to advance their prices. The fencing season is practically over, and has been better than expected. Nails are quoted f.o.b. Winnipeg, $2.80 base, and $2.40 base, Fort William.

Bale Ties Wanted.

Some districts are waiting longer than usual to see how the crop will pan out before purchasing their thresher supplies. Business in these lines is reported fairly good, although an estimate is hard to make until the harvesting season is nearer. As the crop of hay has been dried up in some districts, it will be necessary to ship from places where it has been good. Hardware merchants in these districts should see that their stock of bale ties is good. They are quoted:—14 gauge, single loop, $3.65 Winnipeg.

The demand for both rubber and leather belting is good, for threshers. The price is firm, and an advance is in sight, owing to the high price or raw hides. Rubber belting, 60 per cent. off list. Agricultural leather belting, 66 2-3 off. Standard, 60 and 10 off.

The price of galvanized sheets is now the lowest it has been for years. The demand is small. Builders' supplies all round are moving very slowly.

Paint, etc.

Sorting business is coming in well, though not so heavy as expected. This statement covers all lines of paint. A little Paris green has been sent out during the last two weeks, but little is being purchased by the farmers this year.

Merchants are beginning to book orders for glass, and jobbers expect to do a big fall business. Hailstorms at several points brought in several big orders. Little glass is being bought locally as yet. The following prices will likely be good at least until fall.

	Single.	Double.
Up to 25 in.	$4 50	$6 25
26 to 40	4 85	6 75
41 to 50	5 40	7 75
51 to 60	5 90	8 50
61 to 70	6 40	9 25
71 to 80	7 00	10 25

Putty, which goes hand-in-hand with glass, is selling at the same old price. Turpentine is moving slowly. It is quoted at 80c per gallon barrel lots. Varnishes are only having a fair sale.

Sporting Goods.

The retail trade in Winnipeg experienced a brisk demand for sporting goods and guns during Exhibition week, but generally the only lines moving are boats, canoes, and bathing goods. There are some healthy inquiries coming in for fall sporting goods, particularly guns of different kinds.

Stoves.

Only a few orders are being booked. Merchants cannot be induced to buy anything they are not requiring immediately. However, although buying is from hand-to-mouth, business is about as good as it was last year. Trade is a little inclined to tend toward cheaper lines, which it always does in an off year. Merchants are carrying very light stocks, except in heaters.

Oils.

Most of the lines quoted in Hardware and Metal are having a fair demand, particularly gas engine and cylinder oils. Sales of gasoline are moderate, and prices are not likely to change just now. The following are typical quotations:—

Silver star oil, 18½c gal.
Capital cylinder, 56c gal.
Standard gas engine oil, 41c.
Premier motor, steel barrels, 21c gal.
Queen gasoline, steel barrels, 26c gal.
Painters' naphtha, steel barrels, 21c gal.

As the outlook for the flax crop is not bright, and as an advance in price of flax means an advance in the price of linseed oil, changes may be expected shortly. The market at present is very firm.

ST. JOHN.

ST. JOHN. N.B., July 22.—That business conditions are brightening in this section of the Dominion is shown by the optimistic reports that have been received by the board of trade from industrial and other business concerns in St. John, by the increased number of real estate transfers, by increases in bank clearings, in tax receipts, and by an appreciable increase in lumber shipments both to British ports and the United States. During June, 1914, the lumber exports from St. John to the United States were valued at $199,808.14, as against $128,812.95 in 1913. Lumber shipments to British ports in June, 1914, amounted to 11,174,774 ft. spruce, and 480,912 ft. birch, as against 9,217,387 ft. spruce and 456,506 ft. birch in the same period in 1913. Like satisfactory business reports come from other sections of New Brunswick, indicating that the business depression which affected Western Canada so seriously had little effect upon this province.

St. John, N.B.—There are ten cities in Canada in which the bank clearings for the month of June show a decided improvement. St. John is among the number. The gain in this city was $93,-622. July figures continue to show an improvement. For the week ending July 15, the clearings at St. John were $1,901,522 as against $1,698,156 during the same week in 1913.

St. John, N.B.—There are few cities in Canada that have more progress in building and general development than the city of St. John. On the west and northern sides of the city, particularly on the high land overlooking the harbor and river, the Fenton Land Company, the St. John Realty Company and other companies and builders have erected many beautiful residences. When contemplated extensions of the street railway service have been carried out, building growth will be even more rapid than it is now.

Paint Department

An Eye for an Eye and a Tooth for a Tooth

Narrow Views of an Unsuccessful Man—They Are Refuted by an Argument Showing That Work is its Own Best Reward—If We Give Little, We Receive Less—As We Give, We Receive.

By Henry Lewis.

IT was Sunday evening. The tea things had been put away, and we sat on the verandah and talked shop.

Mrs. Dorn had been employed in the same paint store as her husband for some years before their marriage, so that she was quite at home in the discussion. We touched first upon one thing and then another, recalling old friends and past occurrences in the trade until we finally hit upon old Dave Lewis, Dorn's employer, and his store methods. I was surprised at the vitriolic quality of their criticism of him and their adulation of themselves. It was really my own fault, and was in answer to a sweeping statement of mine that one should always give one's best, regardless of conditions or possible results. I was all but submerged in their flood of vehement protest.

"By George, I used to figure that way," said Dorn, "but I got no thanks for showing up early and working late, long after I had to and I gave it up. Never got my pay raised, nor nothing, and I just said to myself: 'Old boy, here's where I do different,' and from that time on I quit doing anything I wasn't paid to do, and if anything I'm treated better than ever."

"Raise your pay?" I asked tentatively.

"Oh, no; but he don't take so much for granted, and he's darned good and careful about askin' me to do extra work."

"You find it pays?" I inquired.

"I'm sure do. I don't get there a minute sooner than I have to, to hold my job, and I leave on the dot every night; if there's anything left to do, old Lewis does it, or else he's darn particular how he asks me to give him a hand. You bet, I make him understand it's a favor."

"Well, I can't agree with you," I said with conviction. "No slighting of one's work can ever pay in the long run."

Mrs. Dorn was one of those whiffety little women who always had a chip in her shoulder for those who disagreed with her and hers. She came to the assistance of her spouse at this point. "Like to know what good it does to work hard when it's not appreciated. Jim worked like a dog there without ever getting on like he should of done."

"No doubt, and it's quite likely that Lewis was unjust in not having done more for him, but leaving all question of Lewis out of the matter, was not Jim being untrue to his own better self when he deliberately decided not to give his employer the best that was in him, regardless of hours, stipend or what not?"

"I sell more paint than any man in the store at that," stoutly averred Jim.

"Well and good; but think of what you could sell then if you really tried. You weren't hired for a certain output, but to do all that you could for your employer, and when you refuse to do so, you aren't keeping your bargain, and, incidentally, you are harming yourself to a greater extent than you are him."

"Well, look at me," flared the lady. "Didn't I do all the work in that office alone for years, and then when he put Miss Mills on, didn't she get the same pay as me and her never on the job on time, and fiddling at the mirror all day long, didn't she? Huh!"

"No doubt," I acquiesced, "but when the hard times came, wasn't Miss Mills laid off, and wasn't one of the other clerks laid off, whilst you and Jim were kept on?"

"Yes, but what of that? We only had more work at the same pay."

"This much: you were kept on because of long and faithful service, and whilst Lewis' profits were being cut down on account of the panic, you had to bear your share of the burden by doing a little more work."

"Well, all I know is that the girl he's got in there now doesn't do half the work I did and gets the same pay as I did."

The irrelevance of their remarks was getting on my nerves. "None of that alters the truth of my first statement. Granting the truth of all you say, that you were overworked and underpaid; how does that excuse any lessening of effort on your part? I say, and I know, that when you cease to do your best, you are killing something within yourself that is finer than money. I don't care whether you are selling paints or scrubbing floors, the thing holds good in every sphere of human endeavor. Let them overwork you and underpay you. Your day will come; and if your own employer isn't appreciative, some other one will be, and then you can make a change and give the old one the horse laugh. But more important than that is the fact that all the time that you are honestly doing your best you are so busy that you haven't time for anything but what is important and you're so sincere that a great moral development is constantly going on within you, and, utterly unknown to yourself, you are making friends and admirers right and left. Slacken up on your efforts, and there is a loosening of moral fibres that you, from the very nature of things would be the very last to perceive." You can't get away with——"I beg your pardon," I cried. I had become so oblivious to everything but my argument that I had forgotten that I was their guest.

There was nothing else that could interest us and I felt that there was danger in pursuing the subject further, so I bade them good-night.

"CHALCO"

A PAINT AND VARNISH REMOVER THAT'S 20% MORE EFFICIENT THAN OTHERS YET COSTS NO MORE

To Retailers, Jobbers and Manufacturers:

We are now able to offer in "Chalco" a Paint and Varnish Remover of unusual merit.

It's 20% more efficient than others.

TRADE CHALCO MARK

The Paint and Varnish Remover

"We pay no royalties to put on your bill."

Write for Proposition

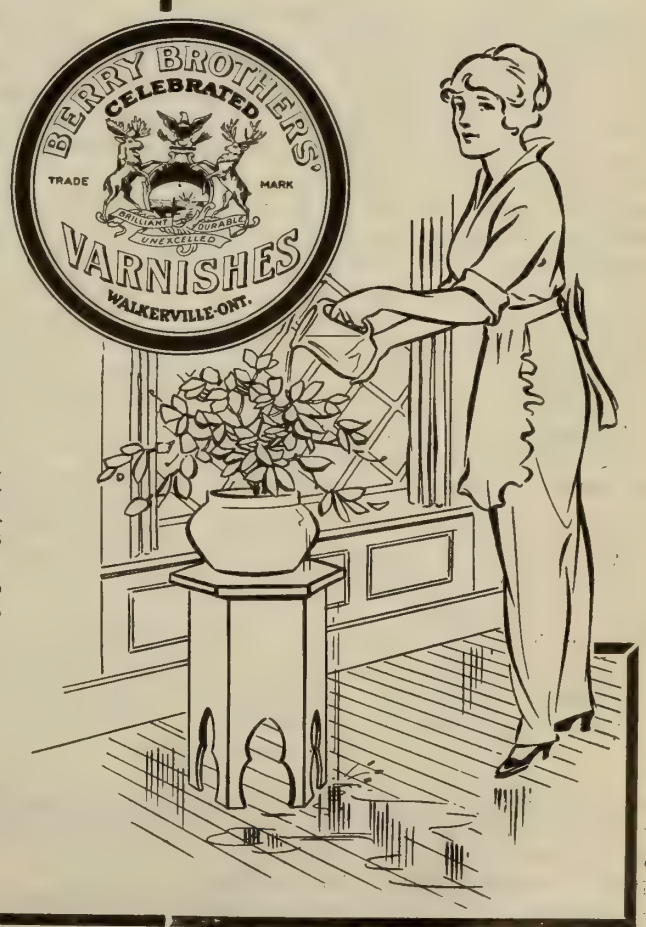
"Chalco" is positively different and positively superior—it leaves the surface better for refinishing than any other product we've tested.

It does not injure the hands.

MANUFACTURED IN CANADA BY MARTIN-SENOUR CO., LIMITED
IN THE UNITED STATES BY THE H. B. CHALMERS CO., SCHENECTADY, N.Y.

Liquid Granite

is the floor varnish you should sell to your customers. It is made by Berry Brothers, the largest manufacturers of varnishes in the world, and sold by the leading dealers in most every town throughout the Dominion.



Every dealer selling Berry Bros.' Varnishes has the advantage of selling finishes that have a reputation of giving the utmost in satisfaction for 56 years. He sells varnishes of the highest quality—varnishes that have the confidence of master painters and contractors the world over.

Durable and Waterproof

Liquid Granite is the most durable and elastic of all floor varnishes. Wood treated with it may dent under a hammer blow but the finish will give without cracking. Washing with soap and water does not affect it. Liquid Granite floors are easily kept clean.

These are a few of the many points that make Liquid Granite so popular with the housewife—that have made Liquid Granite a big seller for dealers everywhere.

Write for our co-operative proposition. Let us show you how you can profit by selling Berry Brothers' Varnishes.

BERRY BROTHERS

WALKERVILLE, ONT.

Weekly Paint Markets

MONTREAL.

MONTREAL, July 23.—The dog days mean the quiet season for the paint business, and things are expected to continue so for the next couple of weeks. Jobbers report that the volume of trade is satisfactory for the latter part of July, and there appears to be a better tone for the future with prospects that easing of financial situation will result in larger building programs. Higher prices for linseed oil and a demand for Paris green to combat the ravages of the army worm are the features.

White Lead, Paris Green, etc.

An improvement in the business in white lead is noted, and stocks, which were rather slow after the advance, are beginning to move better. The market is very firm at the quotations—$8.40 for small quantities and $8.20 for ton lots.

The action of the Dominion Conservation Commission in recommending Paris green to combat the ravages of the army worm in Ontario, where the plague has become rather extensive, is looked to have the effect of creating a better demand in this line than has been noted for several years; there have not been many pests of this nature during the past two or three seasons. Some wholesalers are taking aggressive steps to see that the trade is well supplied.

Turpentine.

The demand for turpentine has been fair, considering the general quietness of the season. The quotations are:—

1 barrel ..... 67c a gallon.
5 barrels ..... 66c a gallon.

Five-gallon packages 5 cents advance; packages extra; terms net.

Linseed Oil.

As predicted last week, higher prices must be paid for linseed oil, although there is some difference of opinion as to when the advance will go into general effect with the trade. Some jobbers are still quoting 60c and 61c for raw and 63c and 64c for boiled, with the prices firm; while in other cases an advance of 2c to 3c has either been made or is being considered as a course of immediate action. The rapid advance of the price of flax during the week has been responsible for several cents increase per bushel for raw material, and the refiners have advanced the price of spot 2½c since last report. This advance must soon be felt by the trade if prices hold.

Gasoline and Benzine.

A fair business in gasoline is reported with a continuance of conditions and prices about as they have been ruling. The demand for lubricating oils is quiet, this being rather an off season in this department. Quotations are:—

Barrels, wood ..... 20½c a gallon.
In steel and drums .... 17½c a gallon.
Tank wagon (100 gals.) 16½c a gallon.

Benzine is quoted at a cent under these prices all round.

Glass and Putty.

In glass and putty, although things still continue quiet on account of the curtailment of building programs, there seems to be a better tone to the outlook for the future, and in this connection the chances for better finances and more construction work are mentioned. Prices are unchanged.

TORONTO.

TORONTO, July 23.—Paint lines are rather inactive, but are better than last week. Linseed oil prices are a matter of heated discussion and the cause of much dissatisfaction. Paris green is selling better.

Zinc pure in Damar is up. Paint men consider that their lines are too low with the exception of white lead. The prices for these lines have been high the last year, but the first cost has advanced even more rapidly, so that manufacturers and jobbers are selling on a closer margin of profit than in years. Painting is light in the city and larger towns, but is good in the country. If demand were better a general advance all along the line might be expected. A large number of paint men are on their holidays, which fact adds to the midsummer quietness.

Turpentine.

Turpentine is still firm, stocks light, and demand good in comparison. There has been no change in price, which is 70c for single barrels and 69c for two to four-barrel lots.

Complications in Oil.

The linseed oil market is notable for a lack of harmony and upset by widely different views as to what constitutes a fair price. The situation is complicated by keenness to get orders and the additional fact that some dealers stocked up heavily during the low prices of last winter. They are now anxious to sell their overstocks, and are pricing them at a level that insures them a profit, but is disastrous to those who have to buy from the grinders at a price that is based on the present cost of flaxseed. Price-cutting also has something to do with the present level of prices, which are in marked contrast to the dollar level of a few years ago.

On July 2nd flaxseed was quoted at $1.39¼ in store, Fort William. On the 21st it had advanced to $1.49⅜. To-day it is $1.52⅜. At these prices the grinder has to get almost as much for his oil from the jobber as the overstocked jobbers are asking of the retailer.

The prices remain practically the same as last week, although some firms are shading them at that, and others are fighting for a higher price. Harmonizing influences are at work, and it is hoped that the situation will have been cleared up by next week.

A number of firms have advanced their prices this week to:

	Raw.	Boiled.
Single barrels	63	66
3 to 5 „	62	65
6 to 9 „	61	64

Others are still offering oil at last week's quotations.

Decline in Benzine.

Benzine is down ½c to 18½c and 18c for one and three-barrel lots respectively. Gasoline is unchanged at 19c and 18½c, and for one and three-barrel lots respectively. Toronto dealers still insist that the local market has not felt nor will feel the result of American price-cutting, as it is restricted to one district there.

Paints, Ready Mix and Dry Colors.

Paints are quieter this month than at any time this year, but not unexpectedly so. Many travelers and office men are on their holidays. Most of the sales are going to country districts. Dealers are centering their attention on stove pipe enamels, aluminum liquid, paint, etc., to make up for the lack of demand in staple lines. Prices are unchanged as per current market quotations.

July sales compare more favorably with the corresponding period in 1913 than June did in spite of a decreased business.

The Rain Falls Everywhere

and wherever it falls on unprotected shingles, it rots them.

It is this simple little fact that creates the wide market for

Anchor Shingle Stain

This stain is exceptionally reliable—a creosote stain so combined that it won't wash out—and is also made in very artistic shades—an irresistible combination to the man who owns a shingled house.

This creates an excellent opportunity for the live dealer to develop a very profitable line of trade. A really reliable shingle stain is wanted everywhere, and ANCHOR exactly meets the requirement.

Prices are right—fair to the consumer, yet with a good margin of profit for you, and all the resources of our Advertising Department are at the command of dealers who handle our products.

We would like to add you to the list. Shall we send you further details?

Write us to-day.

OWNING AND OPERATING P. D. DODS & CO., LIMITED

FALSTAFF:
"What money is in my purse?"
HENRY IV.

When Sir John Falstaff asked his page the above question it would have surprised him to hear that there was more than a few coppers left. Most of us are familiar with the riotous times that Falstaff had with Prince Hal as his chief companion. Falstaff was mostly broke and living at the expense of others.

IN THESE TIMES OF KEEN COMPETITION

Hardwaremen need to be careful to have stocks which find a ready sale. It will save you money and put money in your purse if when you require **BABBITT METAL, SOLDER, LEAD PIPE,** all **PLUMBING SUPPLIES** and **ALL INGOT METALS** you send your orders to

THE CANADA METAL COMPANY, LIMITED

WINDOW GLASS

1
Immediate Shipments Make Satisfied Customers

2
Satisfied Customers Are Constant Patrons

3
Constant Customers Spend Most Money

4
Such Customers make the monthly balance Read "Profits"

That is the whole story, and the argument is as clear as the glass we sell. Many large orders have had to be "passed up" because the dealer's stock was small, and his source of supply far distant. Our dealers buy from

FIVE LARGE STOCKS

Calgary **WINNIPEG** **Edmonton**
Saskatoon **Swift Current**

As a result they save both time and money. Our glass stock is by far the largest in Western Canada—no order too small to receive our minutest attention, and none too large for us to fill.

Fall Season is Glass Season

Builders and contractors everywhere will be rushing their buildings to completion, and endeavoring to close them in before the arrival of cold weather. That means a demand for glass. Let us assist you in handling this business.

Plate—Fancy—Art Glass—Mirrors

Price lists, samples and quotations on Plate and Fancy Glass furnished promptly.

Our new Art Glass Catalogue shows a large range of designs suitable for every purpose.

Church Windows a specialty. Catalogue, Design Sketches and Prices on application.

We are the largest manufacturers of Mirrors in Western Canada. Lists and discounts on application.

Black Cat

Spark Plugs, Batteries and Flash Lights

TRADE MARK

NINE LIVES

Nine Lives

goods are a very profitable kind

These goods are just as the name implies, NINE LIVES—or in other words, they give LONGER SERVICE.

Their exceptionally big value will bring you a consistent good trade in this line.

All Black Cat goods are sold under a "satisfaction or money back" guarantee.

Write for full particulars and prices to-day.

Canadian Carbon Company, Limited

96 West King Street, TORONTO

Do You Want More Money?

OF course you do and are willing to make use of your spare hours in a way that will net you the biggest returns. Many others like yourself have had the same desire to turn their spare time into money and profitable experience. They are now making from $5 to $20 a week, according to the time given.

IF YOU ARE NOT AFRAID OF WORK you can make $5 a week, giving 3 hours a week to taking subscriptions to

MacLean's Magazine

We supply you with all you need to take subscriptions except the determination. We allow a definite, liberal commission on both new and renewal subscriptions.

THE coming months are the most pleasant in the year for the work. If you write at once we can appoint you as our local representative.

MACLEAN PUBLISHING CO., LTD.

143-149 UNIVERSITY AVENUE, TORONTO

Red Devil Tools

Insure Confidence

Your trade, knowing the unconditional guarantee of

Red Devil Tools

do not hesitate to accept them.

That means no unnecessary time required to make the sale.

That means further—minimum of selling expense.

Confidence in the tools you sell means confidence in **you.**

It's worth investigating.

HEATING PLUMBING TINSMITHING STOVES, RANGES, HEATERS, PAINTS, OILS, GLASS

MONSON HARDWARE CO.
GENERAL HARDWARE

Manitou Man. March 31st, 1914.

Messrs. G.F.Stephens & Co.Limited.,

Winnipeg, Man.

Gentlemen:-

To confirm our telegram order for a quantity of Silkstone a copy of which is as follows:-

"Freight six- each one-half gallon cans numbers four- five- seven- eight- sixteen- fifteen- fourteen- twelve- three- one- two- ten- seventeen- eighteen- twenty- and eleven Also four one quart cans each of the above numbers all SILKSTONE. Two one quart, four one pint, four one-half pint cans White Enamel."

This order is the direct result from three or four of our customers having seen some sample work done with SILKSTONE while in Winnipeg last winter.

Yours truly,

Monson Hardware Co.

Per Geo. L. Monson

IT ONLY NEEDS TO BE SEEN TO BE APPRECIATED

"SILKSTONE" is the housekeepers' delight. It is being used by the women of the West on account of its surpassing beauty and because they can wash it with soap and water without harming it in any way. In fact, washing only serves to revivify the original lovely finish. You can sell "SILKSTONE" easily, as it is already well known through our extensive advertising. There is a long profit in it for you.

WRITE TO-DAY FOR FULL PARTICULARS.

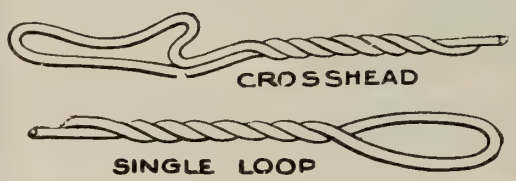
For Outdoors Or In

You can fill every paint requirement with the right RAMSAY finish.



And every RAMSAY product is *right.* The right formulæ, the right materials, the right price and the right value. You'll find it a pleasure to do business with a house that has grown up with the country and has 72 years of Canadian paint experience behind it.

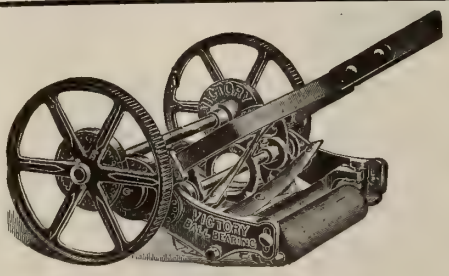
Write us.

A. RAMSAY & SON CO., - MONTREAL

ESTABLISHED 1842

WIRE BALE TIES

Our wire, for baling hay, is made from the finest quality Bessemer Rods, and is 10 per cent. stronger than any other baling wire.



This is the line that brings the dealer clean, satisfactory profits with every sale, as it is not the come-back kind.

Get our prices and send us a trial order—we guarantee to satisfy.

We also recommend our WIRE NAILS and STAPLES as inferior to none.

The height of the fruit-picking season will soon be here and you can net a good profit from same if you boost

THE PERFECT FRUIT STEP LADDER

It makes easy work for fruit pickers, as it is easily manipulated.

The pointed portion or legs can be turned up, making a long single ladder which readily rests in the trees. The ladder as you see it in illustration is an **excellent general purpose ladder,** for the reason that it can be used on uneven ground without danger of tipping.

Made in the following lengths:

6 ft. step ladder extended to 11 ft.; 8 ft. ladder extended to 18 ft.; 10 ft. step ladder extended to 19 ft.

A Novel Feature of the

MAXWELL
"Favorite" Churn

—and one which has made it popular wherever used — is the

BOW LEVER

No other churn has this lever. Handle can be adjusted to centre, left or right, whichever is desired, or is easiest for driving. The frame is of light rigid steel with bolted trunnions, and the barrel of best imported oak with aluminum hoops. Swings on roller bearings and is exceptionally easy-running and durable. A splendid seller.

Send for Illustrated Catalogue of the "easy-to-push" Maxwell lines.

MAXWELLS LIMITED, St. Mary's, Ont.

THE BEST PAINT MEANS THE BEST BUSINESS

This simple statement can't be beaten. Language and arguments can be twisted forty ways to prove the supremacy of other influences, but they all get back to this old-time business principle

PEOPLE WANT THE BEST PAINT

There is yet to be found a man in his right senses who doesn't seek full value for his money. And there is such a thing as forgetting the price in the memory of the quality, but

DON'T BE FOOLED

Paint propositions put forth with all the fanfare and mysticism of an Oriental fete may live for a day, but they soon wither if they forget that it is paint that is wanted by the public, not conjuring.

MAPLE LEAF
Paints and Varnishes

MAKE GOOD BECAUSE THEY'RE MADE GOOD

M L FINISHES THAT ENDURE
QUALITY

To prove it: We want every live dealer who is interested to try our goods against any other line they wish. We leave it to you to judge. Send for our samples. Try them out against the other fellows.

You'll find that we leave out the fuss and humbug and make quality the basis of our proposition.

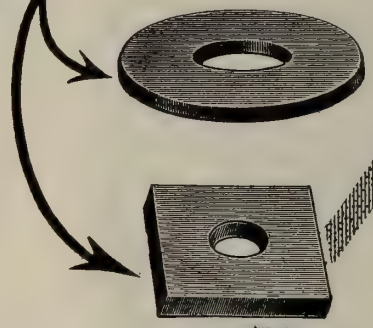
You Don't Have to Hold Sales

to sell Millers Falls tools, or start a bargain counter either; they sell themselves. As an example, take

"MILLERS FALLS" HAND DRILL No. 306

It's a tool that catches the fancy of every mechanic who looks at it. Has the lines he likes and the workmanship and finish that guarantee results.



You could sell this Drill—there's no doubt about it, and you wouldn't have to talk your head off to do it, either. It proves itself at sight, therefore would be a profitable tool for you to stock.

One of the most complete Catalogues ever issued on tools is yours for the asking. Write for *New* Dealers Catalogue.

Safety First

(OUR MOTTO)

The most reliable extension ladder offered to the trade to-day. Made of clear yellow pine with hardwood rungs. Reinforced with wire let into a groove on the back of the ladder. One of the principal features of our ladder is the heavy malleable iron castings bolted on the sides which have given satisfaction for years. Stock sizes 20 to 40 ft.

Write for catalogue and prices for step ladders, bake boards, skirt boards, curtain stretchers and other woodenware.

McFarlane Ladder Works
158-160 River Street, TORONTO, ONT.

Saves Oil, Time and Labor

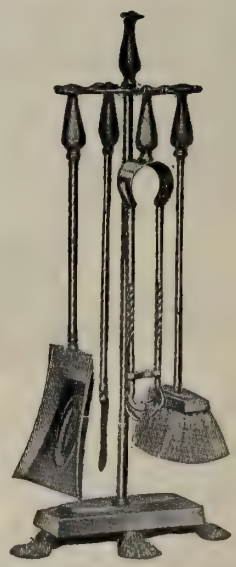
A trial always makes a steady user.

Easy Profit because Easily Sold

No matter in what position the can may be held, the oil is entirely controlled by the operator. Not a drop of oil need be wasted. Oil is forced out by simply pressing on the plunger. The flow of oil ceases the instant the pressure on the plunger stops.

Oiling can be done in one-half the time and with less effort.

The "Cannon" is giving satisfaction to thousands of users.



Drop a card for particulars.

Making a National Magazine

The publishers of MacLean's Magazine are striving to give the people of Canada a magazine that will stand for the highest ideals of Canadian nationality; that will depict Canadian life and character in all phases; that will present questions of Dominion-wide import; and finally, that will give readers an opportunity of keeping up with the march of world events.

The keynote of MacLean's is *Canadianism.* It is edited for Canadians. It gives Canadian articles and stories, written by Canadian authors.

And the publishers are sparing no effort or expense to put MacLean's right up in the van of the magazine world. New features are being introduced with each issue.

If you have not been reading MacLean's, why not make the acquaintance of *Canada's National Magazine* at once? The August issue is now offered for sale and the publishers feel safe in asserting that, by reason of the new features introduced, this number will inaugurate a new era. Here are some of the special reasons why:

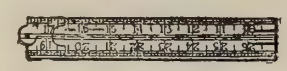
A Romance of the Land of Gold

"TWISTING TRAILS,"

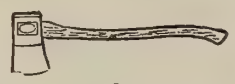
a new serial by Robert E. Pinkerton, the promising young Canadian author, is started in the August number of MacLean's.

A gold mine in Northern Ontario, a financial magnate in difficulties, a charming woman, a villain: By expert manipulation of these elements, with the wild, free and mysterious land of the North providing a suitable setting, Mr. Pinkerton has written a story that grips the interest from first to last. It has plenty of action and its plot is new —not an old idea rewritten, but something that has never been treated before.

Rea Strain, the central figure of Pinkerton story "Twisting Trails."



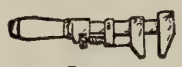
Alan Sullivan's best story, "The Things That Count"—a tense picture of life centered around the efforts of an inventor to wring from Nature one of her most wonderful secrets —starts in the August number.



"The Adventures of Madelyn Mack: Detective" will be continued. Original, bright, mystifying, just as good as Sherlock Holmes, better than any others — these stories are striking a new note in magazine fiction.

Send $2 to-day and your name will be entered on our subscription lists for one year, commencing with the August Number. Write Department F, The MacLean Publishing Co., Ltd., 143-149 University Ave., Toronto, Ont.

Hardware and Metal's Electro Service



AT the request of many of our readers and in order to assist Canadian hardwaremen in such a manner as to make it easy for them to use illustrations of staple hardware lines in their newspaper, circular or catalogue advertising. Hardware and Metal's editorial department has instituted a new service, viz., the supplying of electros of staple hardware lines at a reasonable price. Many merchants claim that the electros they have on hand are of such large proportions and occupy such large space that their use is almost prohibitive on account of the cost of newspaper space. By using small electros of seasonable goods the merchants will be able to feature several lines in one advertisement at a very reasonable cost. Hardware and Metal will from time to time publish seasonable advertising suggestions in which electros here shown will be used. In ordering electros be sure and order by numbers. Price of electros shown on this page is 15c each. Cash with order. Address all orders to Hardware and Metal, 143-153 University Ave., Toronto, Ont.

AUTOMATIC ELECTRIC WASHER

(BUY IT IN CANADA)

This machine possesses so many attractive features and is so absolutely pleasing to the people who use it, that there is no excuse for there being any other Electric Washer.

Dealers who delight in the friendship of their customers and who take especial delight in selling something better than can be had elsewhere, cling to the Automatic.

Such character does not come by accident; it is the result of a perfect 100% score, when considering Simplicity, Mechanical Operation, Materials, Workmanship, Efficiency, Convenience, Ease and Safety.

Made in both Electric and Engine Power types, also in Bench or Platform type.

A beautiful 32-page book, called Bulletin 107, gives full particulars regarding washing machines. It is free. Write for it.

Sold by Canadian Jobbers.

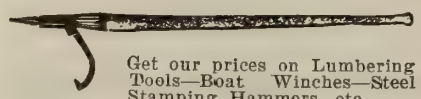
Amatite ROOFING

practically trying to keep them from getting wet. a bit. Next time your old-fashioned roofs need painting, cover them with Amatite instead.

A sample of Amatite and booklet about it will be sent on request. Address nearest office.

THE ROOFING THAT NEEDS NO PAINTING

WHEN your roof is covered with Amatite, there is an end to the roof-painting nuisance. Amatite has a real mineral surface and needs no painting. The mineral surface makes painting unnecessary, and it will stand rain and hail and wind and snow, for years, without attention.



When you paint the old-fashioned roofings you are Amatite is made to get wet, for water won't hurt it

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

EMPIRE FOOT-POWER GRINDERS

Made in Canada

Empire Foot-Power No. 2 Grinder, with Drilling Attachment.

No. 3 Empire Foot-Power Grinder, without Drilling Attachment.

The most powerful Foot-Power Grinder on the market; has set of roller bearings and cut gear; wheel 8" x 1¾"; 300 revolutions per minute attained by a simple and easy movement of the foot.
For Grinding Drills, Castings, Machine Parts, and Tools of all kinds.
The Drilling attachment with drill holes up to ¾".
Catalogue on request. **Every Machine Guaranteed.**

Manufactured by

THE ADAMITE WHEEL & MANUFACTURING CO.
Hamilton, Ont.

Why buy the "Near" Brand when the "Best" is Procurable?

The L. Martin Co.

Old Standard, Eagle Pyramid and Globe

GERMANTOWN LAMP BLACK

IS THE BEST AND HAS BEEN FOR OVER SIXTY YEARS.

When we originated Germantown Lamp Black at our factory in Germantown, Philadelphia, we little realized that it would become the STANDARD of the Trade and that in order to market their Blacks every other manufacturer would have to use that name, or else make something better.

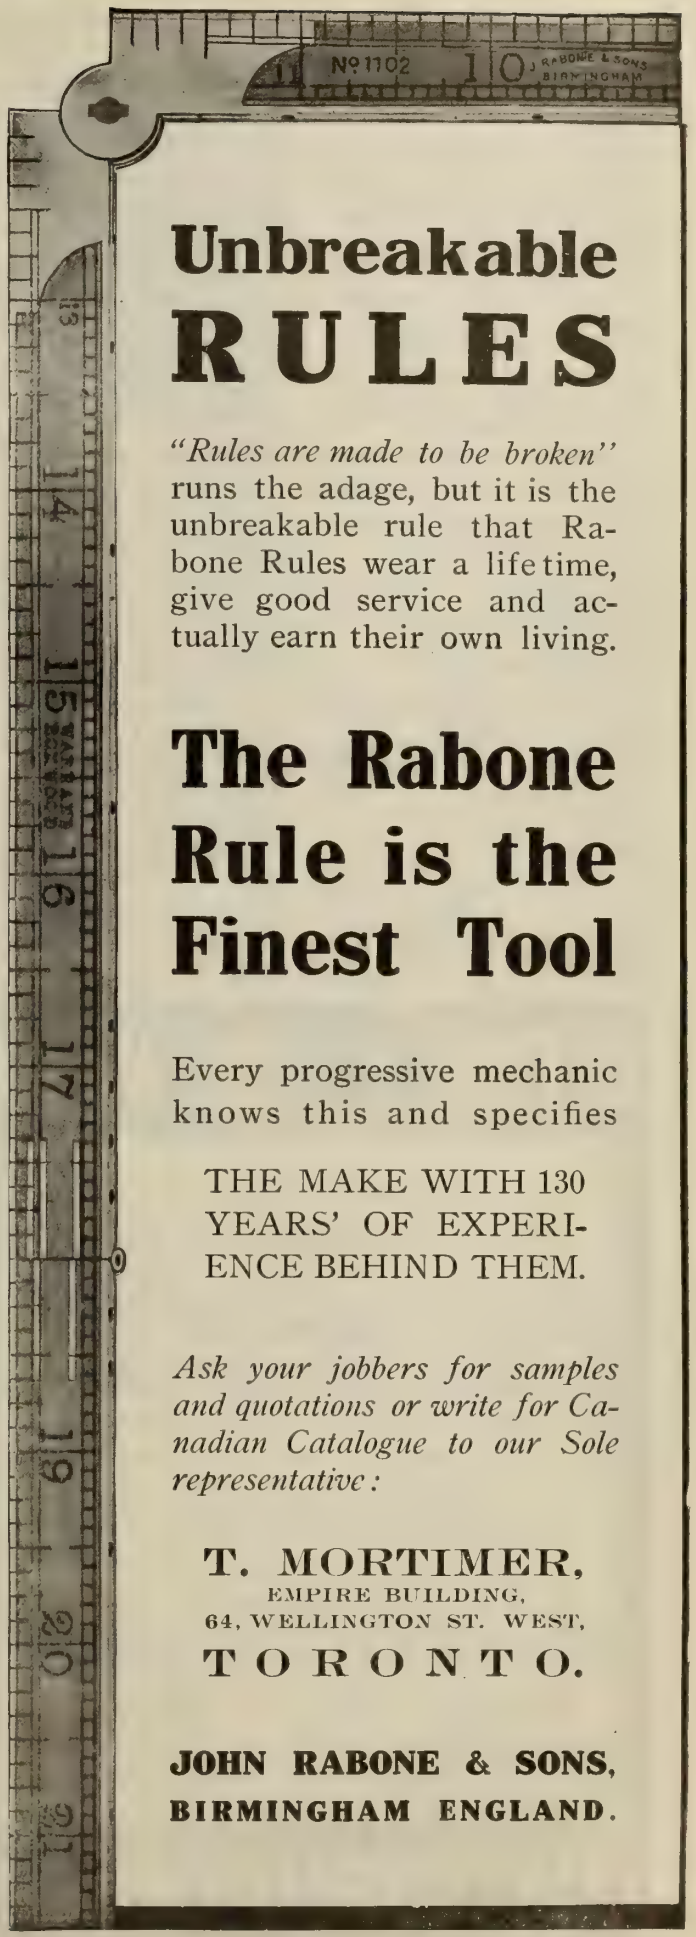
Every Horse Owner Buys at Sight



The Kling Hame Fastener holds customers as well as horses. Anyone can attach it in a minute. Keeps the collar uniformly tight at all times. No matter how he lunges, the horse can't open it or break it. We refund the money for any that may be returned to our dealers. Costs you $2.25 a dozen from any jobber.

Look for "Kling" on the lever. Circular on request.

The National Safety Snap Co., Inc., Dept. 33, Wilmington, O., U.S.A.

Sole manufacturers of the Klingsnap and Kling Hame Fastener.

D. C. Ross & Co., 56 Colborne Street, Toronto, Ont.

Unbreakable RULES

"Rules are made to be broken" runs the adage, but it is the unbreakable rule that Rabone Rules wear a lifetime, give good service and actually earn their own living.

The Rabone Rule is the Finest Tool

Every progressive mechanic knows this and specifies

THE MAKE WITH 130 YEARS' OF EXPERIENCE BEHIND THEM.

Ask your jobbers for samples and quotations or write for Canadian Catalogue to our Sole representative:

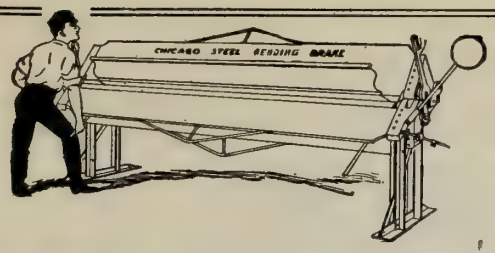
WASHED COTTON WIPERS



The New Metal Worker Pattern Book

This is the most elaborate and complete work that has ever been brought out for the use of sheet metal pattern cutters. It is printed from new type with a new and improved arrangement, especially convenient for reference and study. Parts of a former edition, entitled The Metal Worker Pattern Book, which have been utilized in its preparation, have been re-written and simplified and later methods embodied. 218 problems are now given, 75 of which are entirely new. A Treatise on Pattern Cutting as applied to all Branches of Sheet Metal Work. By George W. Kittredge. 430 Pages; 744 illustrations; Size, 10 x 13 inches. Cloth bound, Price, $5.00. Sent postpaid only on receipt of price.

CHICAGO STEEL BENDING BRAKE

This Brake is the result of years of experience and a thorough knowledge of the requirements of Sheet Metal Workers.

Any information concerning the work turned out by these machines, their adaptability, etc., will gladly be given on request. **Work quickly and easily.**

The Steel Bending Brake Works Ltd., Chatham, Ont.

You Can Reduce Your Expenses

No. 1 Fire-Pot

and add to your profits by using Clayton & Lambert Fire Pots and Torches. No mechanic can afford to fool away his time and money on cheap, poorly made tools. Remember, you buy gasoline often, but a Fire Pot or Torch only occasionally. The No. 1 Fire Pot is known as the greatest general utility Fire Pot made. Try it. You will be pleased and satisfied.

Your nearest jobber will supply at factory price. Send for Catalog—it's free.

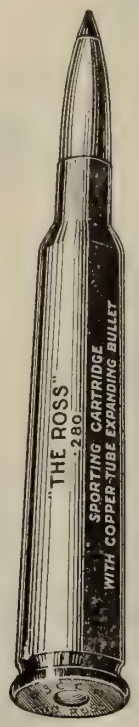
QUALITY S.W. MARK

Bent Mud Guard $7.00—Broken Lamp $13.00

Stanley Garage Door Holder Would Have Saved $20.00



A sudden gust of wind sends the garage door swinging to. There's a smash and the door comes off the victor. A mudguard bent and an expensive lamp broken. The owner will be looking for something to prevent the repetition of such an accident.

Are you ready to demonstrate the New "Stanley" Garage Door Holder? Its action is practically automatic. No one has to give it a thought, the mere act of throwing the door open will set the device in action and it takes care of itself. In closing the door, all that is necessary is to catch a convenient Thumb Ring, and a slight pull releases the lock on the side and pulls the door shut as well.

It's never in anyone's way. There is as much clearance as if it weren't there, for it's applied high up on the door. Ask your Jobber. Weight 9 lbs. Length, open 48 inches. Closed 37½ inches.

The Stanley Works New Britain Conn.

A. Macfarlane & Co., Montreal Canadian Rep.

EVER SELL AMMUNITION AT SO MUCH A HEAD?

Ross .280 Sporting Ammunition with Copper tube expanding bullet (patented), may seem dear alongside of Government ammunition, etc., but after reading what it does, how big game, seemingly lightly hit, falls paralyzed in its tracks—thus enabling sportsmen to materially increase their bag—one sees that the price per round is far from being the most important consideration.

It's a good time now to sell Ross Rifles and Ross Ammunition.

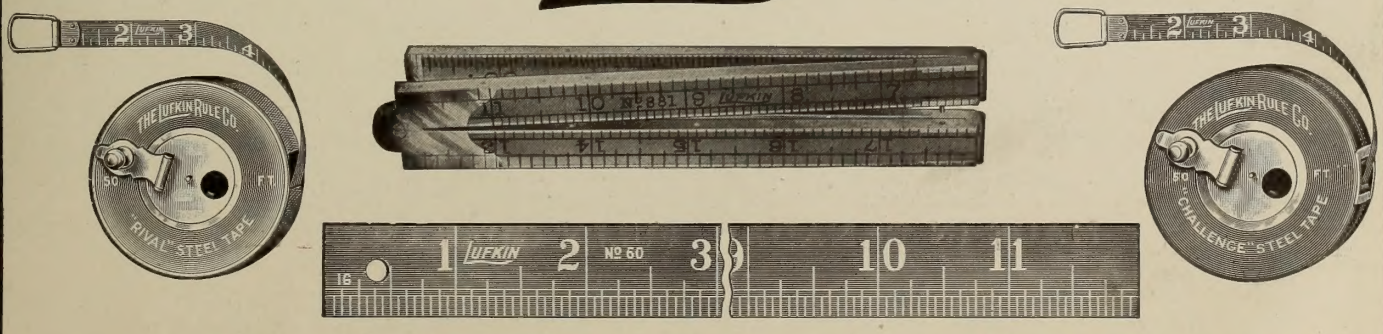
THERE'S MORE SELLING ARGUMENT IN THE NAME LUFKIN **THAN YOU EVER NEED TO SELL** LUFKIN **GOODS**



LUFKIN Measuring Tapes and Rules

Are Canadian Made and are on sale at practically every prominent house in the country stocking such goods.

THIS IS THE SIMPLE EXPLANATION: Dealers stock the line that will sell and will bring customers back. CUSTOMERS buy the line in which they have confidence.

THE OPINION OF THE LARGE MAJORITY MARKS THE SAFE COURSE.
